MAX. SIZE: Minimum depth at low water in fairway is 10.00 m. Tidal range 0.2 m. – 0.3 m. Also see "Berthing".

HEALTH: Inspectors attend from Akita and board at Quarantine Anchorage.

RADIO: Choshi Radio and Nagasaki Radio depending navigation area. ETA advices should be sent to Agent's Akita Office.

VHF: Channel 16 operated by Regional Maritime Safety Agency Headquarters (Harbour Master).

No port VHF station.

TUGS: No tugs stationed at Funakawa. One or two tugs available from Akita (1×2,000 h.p. and 1×350 h.p.).

BERTHING:

Wharf	*Length* (m.)	*Depth* (m.)	*Max. Draft* (m.)	*Cargo*	*Capacity* (d.w.t.)
5,000 ton Pier	227	7.5	6.0	Oil	2×5,000
7,000 ton Pier	155	8.0	6.8	G.C./Logs	1×7,000
15,000 ton Pier	185	10.0	9.0	G.C./Logs	1×15,000

(15)	Number and Size of Tugs Available:	Tugs not stationed at Port. When required tugs to be called from Akita.
(16)	Availability of Bunkers and How Delivered:	Not available.
(17)	Availability of Dirty Ballast Facilities:	Not available.
(18)	Are Slops Accepted:	No.
(19)	Where is the Pilot Boarding Area:	3 miles South of Berth.
(20)	Any Other Information:	Berth for National Oil Storage.

DENSITY: About 1020.

FRESH WATER: Available. Supply rate 30 tonnes/hr. Cost Y.320/ton in daytime.

FUEL: Not available.

CONSULS: None.

REPAIRS: Minor repairs only.

GANGWAY/DECK WATCHMAN: Not compulsory, but available if required.

OPENING/CLOSING HATCHES: Possible by stevedores, but charges to ship as per tariff.

CERTIFICATES: Ship's Register to show Customs Inspector, to check registered gross tonnage and net tonnage with New Tonnage Certificate. The check is possible on vessel if Customs Officer onboard, but it has to be brought to Akita Office if Officer not attending onboard.

REPATRIATION: Not recommended due to distance from Akita Airport. Also Customs and Immigration are not stationed here.

AIRPORT: No airports located nearby.

HOLIDAYS: Local holidays: January 2nd/3rd; July 20th; August 13th/14th, December 30th/31st. Also 1st, 3rd and 5th Sunday of each month are non-working days.

POLICE/AMBULANCE/FIRE: Contact through Agent.

SERVICES: Hold cleaning not available. Surveyor arrangeable. Ship's telephone not available. Radio/radar minor repairs possible, depending on make. Other services are mainly from Tokyo area.

SHORE LEAVE: Local Immigration Office, attending from Akita, issue shore passes.
AUTHORITY: Funakawa Port Administration Office, 134 Funakawa Aza-Sotogasawa, Funakawa-Minato, Oga-City, Japan 010-05.
AGENT: Sub-agents of Aall Barwil Agencies.
Akita Kairiku Unso Co.Ltd., Funakawa Branch, 47 Shinhama-cho, Funakawa-Minato, Oga-City, Akita Pref., Japan 010-05. Tel: 0185-23-2311. Fax: 0185-23-2315.

FUSHIKI: 36.49 N. 137.03 E. (See Plan)

DOCUMENTS:
Ship's Register.
Last Port Clearance.
6 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
Ship's Agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Pilot available any time during daylight. Not compulsory. No telegraphic address of pilot station, therefore, direct advice to local Agent always required. Pilot meets vessels 209°, 2.5 miles off Fushiki West Breakwater Lighthouse, thence takes vessel to Quarantine Anchorage ground. Due to many fish-nets on both sides of fairway if requiring to come into Quarantine Anchorage without taking Pilot, necessary to advise Agent in advance. In case of bad weather and need to await outside port, recommend cruising in Toyama Bay until sea abates. Bay area too deep to anchor and also danger of fish-nets. When approaching position for Pilot, give exact ETA to Agent by using VHF to Fushiki Harbour Master. Small wooden pilot boat painted black and white. No particular light or sound signals required.
ANCHORAGE: No adequate anchorage at Fushiki but at Toyama Shinko, position 36° 46.8′ N., 137° 08.5′ E., however unavailable for larger vessels over 10,000 tonnes d.w.t.
RESTRICTIONS: Pilot not available during darkness. No restrictions on tide, because small tide in all seasons. If draft over port limitation, vessel enters port after making adjustment by lightening in Outer Harbour.
MAX. SIZE: Length 175 m., draft 29 ft. in Summer and 30 ft. in Winter. However, depth of port not always definite, being a river port and dredging operations always carried out to keep depth all year round. Tidal range is maximum 0.45 m. Dredging to 10.0 m. depth underway.
HEALTH: Radio Agent for Free Pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When Free Pratique is granted by radio, vessel will be required to submit the following documents to Quarantine Officer on arrival:
Maritime Declaration of Health.
Crew List.
Passenger List.
The following vessels will not be able to get Radio Pratique:
A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.
If a vessel has on board any case, or any suspected case, of infectious disease within 15 days of arrival.
If a vessel does not possess a valid Derat or Derat Exemption Certificate.
RADIO: (Also see "Pilotage".) Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.
TUGS: Tugs normally join vessel at port entrance, but sometimes in Outer Harbour for large vessels. Narita-Maru (3,000 h.p.) and Nihonkai-Maru (1,800 h.p.) provide lines, free of charge and Raicho-Maru (2,600 h.p.) uses ship's line. Used only when Pilot on board.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio.

Berth	*Length* (m.)	*Capacity* (g.t.)	*Cranes*
Left No. 1 Wharf	160	10,000	2×5 T

Right No. 4 Wharf	175	15,000	
Right No. 5 Wharf	130	5,000	

Note: Depth becomes shallow with every rainfall. Therefore, recommended to contact the port authorities prior to vessel's call. See "Max. Size".
STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agents, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 hrs. – 2100 hrs. and 0600 hrs. – 0800 hrs. 60%; Sundays/holidays 100% additional.
MEDICAL: No advance notice required unless urgent.
DENSITY: Average density between 1015 and 1019 in all seaso
FRESH WATER: Available, from Left Wharves No. 1, 2 and 3, and Wharves No. 3 and 4, average 45 t.p.h. Not available at other be
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Osaka Bay and Kanmon Port. Bunkers will be lightered from the ne bunker port at maximum 7 days' prior notice.
CONSULS: None.
REPAIRS: Minor repairs only.
DRY DOCKS: No dry docks.
GANGWAY/DECK WATCHMEN: Not specially required u passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening closing hatches if requested.
CERTIFICATES: Ship's Register to show Customs Inspector registered gross and nett tonnages. Valid Cargo Gear Certific sometimes required by stevedores when cargo gear's mainten appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take as but no spirits.
REPATRIATION: Possible.
AIRPORT: Toyama Airport about 35 km. distance. 6 regular servic Tokyo daily.
TIME: GMT plus 9 hours. No alterations made to clocks during ye
HOLIDAYS: All national holidays on calendar, also 2nd Saturday month, 1st May and 30th December – 4th January.
POLICE/AMBULANCE/FIRE: Police, Fushiki Police Station, Tak (0766) 44-1500; Ambulance, Fushiki Fire Station, Takaoka (0766 1122; or 119; Fire, Fushiki Fire Station, Takaoka (0766) 44-1122.
TELEPHONES: No facilities for placing telephones on board.
SERVICES: Hold cleaning available.
SHORE LEAVE: Local Immigration Offices issue shore pass va only 3 days, but 3 days extension possible if ship stays longer.
DEVELOPMENTS: Fushiki Outer Port Construction is schedule completion in 2000. If completed, max. depth will be 14.0 m. At tha all the present berthing facilities will be shifted to the area.
AUTHORITY: Fushiki Port Administration Office, 5-15, Fushiki M machi, Takaoka City, Toyama Pref., Japan. *Tel:* (0766) 44-0277.

AGENT: Sub-agents of Aall Barwil Agencies.

HACHINOHE: 40.33 N. 141.33 E. **(See Plan)**

DOCUMENTS:
5 Crew Lists, including Passport Numbers.
5 Passenger Lists, if any.
1 List of Ship's Stores (specified Customs form).
3 Lists of Ports of Call.
1 Declaration of Crew's Baggage (only first port of call in Japan).
1 Maritime Declaration of Health (for Quarantine on specific form).
Ship's Register or International Tonnage Certificate.
Port Clearance from previous Port.
Derat Certificate or Derat Exemption Certificate.
Passports or Seaman's Books.
Ship's Agent will prepare Inward/Outward Declaration, Cargo Manifest for discharge and Cargo Manifest in transit using specific forms.

PILOTAGE: Not compulsory.

Harbour Pilot is arranged by Agent at Master's request, therefore vessel has to ask Agent at latest 24 hours before arrival.

Pilot generally leaves by tug from Shirogane Pier, 30 minutes before boarding time, and tug flies a pilot flag "H". Vessel is able to contact pilot through VHF Channel 16 installed on the tug, just before pilot comes on board.

Vessel must keep Agents advised of her ETA in order to inform exact ETA to pilot.

Pilot ladder is required on the lee side of a vessel, and to be 10 ft. above sea level with manropes slightly shorter. Boat rope not required. Pilots are available from 0600 hrs. to 2200 hrs. for berthing and up to 2400 hrs. for sailing, and anytime in an emergency.

ANCHORAGES: Open sea anchorage with a sandy bottom. Depth of Quarantine Anchorage is 18 m. – 22 m., but this place is too close to the breakwater, therefore pilot recommends anchoring in vicinity of Lat. 40° 34′ N., Long. 141° 33.5′ E., in depth of about 22.0 m., soft sand bottom, where pilot comes on board even if weather is bad.

RESTRICTIONS: Max. draft limitation is 12.0 m., and LOA limitation is 230 m., no restriction on beam.

MAX. SIZE: See "Berthing".

HEALTH: At first port of call in Japan, vessel should obtain Free Pratique. If the vessel is qualified to apply for Japanese Radio Pratique, vessel has to send Radio Pratique Message (RPM) to Hachinohe Quarantine Station through Hachinohe Agents, within 36 hours prior to vessel's arrival. However, Saturday, Sunday and national holidays should be excluded when counting the hours, otherwise a quarantine official comes on board upon berthing, unless there is berth congestion.

Vessel must report to Quarantine Office, number of crew and passengers with health condition, also if there is a sick person on board, Master to report the illness condition in detail through the Agents.

RADIO: Masters' telegrams from Westbound vessel via Choshi Radio and Northbound vessel via Nagasaki Radio are passed on to Agents.
Call sign: Choshi Radio JCS, JCT, JCU and JDC
Nagasaki Radio JOS, JOT, JOU and JDB.

Inmarsat telex available.

VHF: There is no Radio Station in Hachinohe.

When vessel approaches Hachinohe, and in case of emergency, VHF Channel 16, call sign "Shiogama Hoan") belonging to 2nd Regional Maritime Safety Headquarters, is available to inform Agents.

RADAR: No shore radar service, however harbour tugs are equipped.

TUGS: 5×3,200 h.p. Additional tug of 4,000 h.p. under construction, and will be available October 1992.

Pilot generally requests one tug if vessel less than 5,000 g.r.t., and 2 tugs if vessel more than 5,000 g.r.t., but depends on weather, berth and whether she is equipped bow thruster.

BERTHING: Public Wharves: Controlled by Aomori Pref.

Sumikin Kogyo Pier	20,000	285	11.0	175	9.7	Limestone, Cement

CRANES/BULK CARGO FACILITIES:

Hattaro A	Mobile Cranes.
Hattaro B/C	2 unloaders × 8 tons (clear height from water 16 m.).
Hattaro D/E	1 unloader × 19 tons (clear height from water 21 m.) and ship's gear if available.
Hattaro F/G	Mobile cranes and ship's gear if available.
Hattaro H/I/L/M/N/O	Mobile cranes and ship's gear if available.
Shirogane A	Mobile crane and 4 pipelines for cement.
Shirogane B	Mobile cranes and ship's gear if available.
Shirogane C	1 pipeline for cement and 2 lines for fish oil.

3 mobile tower cranes are available at Hattaro C/D/E/F/G, and lifting capacities are 1×25 tons and 2×15 tons. Clear height from high water level is more than 20 m. There is no heavy lift crane in Hachinohe.

Mitsubishi Paper Mills Pier: Hopper and belt conveyor for woodchips and shore mobile crane for other cargoes.

Tohoku Grain Terminal Pier: 2 pneumatic unloaders (each 400 t.p.h.) for maize and sorghum, and 1 pneumatic unloader (130 t.p.h.) for soya bean meal.

Sumikin Kogyo Pier: 2 loaders (each 1,500 t.p.h.).

BRIDGES: If proceeding to a private berth in the channel, vessel has to pass under the bridge which has a minimum clearance from water of 30 m.

STEVEDORES: Stevedores are Hachinohe Kowan Unso Kaisha Ltd. Final exact ETA is to be advised by Master, at latest by noon the day before vessel's arrival on weekdays, in order to arrange gangs.

Main commodities handled: Nickel ore, coal, zinc/lead concentrates, woodchips, chrome ore, grain, logs, lumber, kaolin, fish meal in bag, etc.

Usual working hours and production:

Nickel Ore	0830 – 2000	10,000 tonnes.
Woodchips	24 hours	12,000 tonnes.
Grain	0830 – 1630	5,600 tonnes.

Following Sundays/holidays are not worked: Every 1st and 3rd Sunday; January 1st – 3rd (New Year Holiday); May 1st (Labour Day); August 1st (Hachinohe Festival); August 15th (Feast of Lanterns) and December 31st.

Other Sundays and national holidays are workable if requested by client.

Workable national holidays are January 15th (Adult's Day); February 11th (National Foundation Day); March 21st (Vernal Equinox Day); April 29th (Green Day); May 3rd (Constitution Memorial Day); May 4th (National Holiday); May 5th (Children's Day); September 15th (Respect for the Aged Day); September 23rd (Autumnal Equinox Day); October 10th (Health and Sports Day); November 3rd (Culture Day) and November 23rd (Labour Thanksgiving Day).

MEDICAL: 3 General Hospitals and Medical Specialists available. No advance notice required unless urgent.

TANKERS: Max. size 5,000 d.w.t., also see "Berthing".

DENSITY: About 1025.

FRESH WATER: There is no water barge, but water is available from shore by water hoses at about 30 – 35 t.p.h.

Cost per ton: Yen 410 at Public Pier, Yen 320 at Mitsubishi Pier, Yen 800 at Tohoku Grain Terminal Pier and Yen 480 at Sumikin Kogyo Pier.

FUEL: Domestic AFO and CFO are obtainable by barge. Bonded oil is brought from Yokohama, Chiba, etc., with sufficient notice.

CONSULS: None.

REPAIRS: Minor repairs possible.

DRY DOCKS: For new buildings and repairs, Kitanihon Shipbuilding Co.Ltd. Tel: 0178-24-4171. Fax: 0178-22-7803.
New buildings (A): 8,500 g.r.t., LOA 140 m., breadth 25.65 m.
Repairs (B): 1,999 g.r.t., LOA 90 m., breadth 12.00 m.
Repairs (C): 8,000 g.r.t., LOA 140 m., breadth 26.50 m.

Dock C is now under construction, but will be available from September 1992.

SURVEYORS: No Classification Society at this port, but Marine Surveyors "Nippon Kaiji Kentei Kyokai" and "Nakajima Kentai Kyokai", licensed by the Japanese Government. Surveyors of NK, Lloyd's, ABS and NV normally come from Hakodate, Tokyo or Yokohama.

GANGWAY/DECK WATCHMEN: Not compulsory, but shore-based watchmen arrangeable at Master's request.

OPENING/CLOSING HATCHES: Stevedores will carry out hatch opening/closing at Master's request, in case of pontoon type hatches. Other types are opened/closed by crew.

CUSTOMS ALLOWANCES: Customs allow 200 cigarettes and 1 bottle of spirits per week.

CARGO GEAR: See "Cranes/Bulk Handling Facilities".

REPATRIATION: All facilities available for crew changes.

AIRPORT: Misawa Airport, distance Hachinohe/Misawa about 40 km.

Domestic flights: Misawa/Tokyo 4 flights and Misawa/Sapporo 1 flight per day.

TIME: GMT plus 9 hours.

HOLIDAYS: See "Stevedores".

TELEPHONES: It is not possible to place telephones on board.

There are telephone booths at every public pier for international telephone calls.

SERVICES: Following services are arrangeable: Tank cleaning, but small tanks only, removal of dirty oil, compass adjusting, radio and radar repairs, sea protest, safety equipment.

Extension of certificates are possible, but classification surveyor comes from Tokyo or Yokohama.

BANKS: Aomori Bank, Hachinohe Branch, 10-2, Ban-cho, Hachinohe City, Aomori Pref., Japan. Fax: 0178-46-0975.

STORING:
(A) Stores are delivered by truck which can come alongside ship-side, even when loading or discharging, but must arrange ferry boat or tug in case of Tohoku Grain Terminal Pier.
(B) Possible to deliver at any time with Customs permission, with ship's gear, shore crane can also be used.
(C) Local riggers can be employed to assist with storing.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance and Fire 119.

SHIP SUPPLY SERVICE: Tohoku Senpaku Shoji Co.Ltd., 10-16, Kaigan, Kawaragi, Hachinohe City, Aomori Pref., Japan. Tel: 0178-28-8008. Fax: 0178-28-8009.

Stores supply is performed in port or at anchorage by boat.

SHORE LEAVE: Immigration issue shore-passes for ship's stay if crew have valid Passport or Seaman's Book.

IDENTIFICATION CARDS: Not required.
REGULATIONS: Vessel may sail anytime.
DELAYS: No delay normally but sometimes due to congestion of a specific berth.
DEVELOPMENTS: The Port Authority has a plan to increase the Fairway depth, extend the breakwater and construct new deep water berths. The expected dates of completion is within 7-8 years.

The following berths are planned, and 3 berths are already under construction:

Name	*Length*	*Depth*	
Kawaragi Pier No. 1	560 m.	14.0 m.	2 berths × length 280 m.
	260 m.	7.5 m.	2 berths × length 130 m. – under construction
Kawaragi Pier No. 2	280 m.	14.0 m.	1 berth – under construction
Hattaro Pier No. 2	540 m.	13.0 m.	2 berths × length 270 m.

AUTHORITY: Hachinohe Port Administration Office, 1 – 131 Kitanuma, Kawaragi, Hachinhoe City, Aomori Pref., Japan. *Tel:* (0178) 28–2105. *FAX:* 0178-20-4746. *Contact:* General Manager.

Hachinohe Harbour Master, 16, Chikkogai 2-chome, Hachinohe City, Aomori Pref., Japan. *Tel:* 0178-33-1221. *FAX:* 0178-33-1223.

AGENT: Sub-agents of Aall Barwil Agencies.

Hachinohe Kowan Unso Kaisha Ltd., 16-4 Kawaragi Kaigan, Hachinohe City, Aomori Pref., 031 Japan. Tel: (0178) 29-3114. Telex: 8229-18 Hckown J. Fax: (0178) 29-3119. Cables: Hachinohekowan Hachinohe.

HAKATA: 33.36 N. 130.24 E. (See Plan)

DOCUMENTS:
Customs: When vessel arrives direct from foreign port, Customs Officials will board vessel for search. The following documents are to be submitted.

Crew List, Passenger List, Store List, Manifest of Crew Personal Effects (must be signed by individual crew member), Arms and Ammunition List, Narcotics List, List of Ports of Call on Current Voyage, Discharging Cargo Manifest, Through Cargo Manifest, Declaration Inward/Outward (Form No. C2000).

The following will be checked on board: Ship's Registry, Last Port Clearance, International Tonnage Certificate.

When vessel comes from Japanese port, Customs Officials will not attend on board, except special case. The Master or Agents are to attend at Customs House for entry formalities with the following documents:

Discharging Cargo Manifest, Through Cargo Manifest, Declaration Inward/Outward, Ship's Registry with International Tonnage Certificate (if on board), Last Port Clearance, Documents entrusted with the Master at previous port.

On vessel's departure, a clearance is issued by Customs, after confirming payment of tonnage dues.
Immigration: Immigration Officials board vessel in special cases, on her arrival in port to examine passports, discharge books and/or other equivalent travel documents and provide a 15 day Landing Pass for crew members. But in most cases, Agents are required to attend at their office carrying above documents and Inward/Outward Declaration, 2 copies of Crew List and Passenger List with 1 copy of Application of Issuance of Landing Pass. Receiving Crew List/Passenger List beforehand is a great help in expediting Immigration business. Extension of the Landing Pass is available, if the vessel stays over 15 days, on application.

In the event that crew members, without entry visas, are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men have been booked, or unless the vessels to which they are to be transferred, arrive in Japan within 5 days.
PILOTAGE: Not compulsory, but necessary unless Master well acquainted with locality. Pilot embarks at Quarantine Anchorage; position Lat. 33° 38′ N., Long. 130° 19′ 30″ E. Request for Pilot made through ship's Agent, Master reporting ship's ETA by radio giving accurate time of arrival at least 24 hours prior arrival, also any subsequent change. Pilot on VHF Channel 16, 11 and 12. In the event of rough sea, harbour tug-boat will be used.
Shipmaster's Report: 1982: The Hakata-Bay Pilot is available on request off Genkai Island (Lat. 33° 42′ N., Long. 130° 15.5′ E.).
ANCHORAGE: No anchorage in port.

Anchoring at Quarantine Anchorage is feasible, subject to size/draft of vessel and requesting an Entry Procedure from Customs Officials.
RESTRICTIONS: No restrictions if vessel in Free Pratique and draft less than 10 m. No tide.
MAX. SIZE: No restrictions of length, breadth. Draft 11.10 m.
HEALTH:
(a) Quarantine Station: Sea area surrounded by the following lines:

1. The line connecting between the top of the Nokono-Shima and point "A" which is located on the sea in the direction of 90° and at the distance of 2,540 m. from the top of the Nokono-Shima. (The parallel of 33° 38′ 00″ N.)
2. The line connecting between point "A" and point "B" which is located on the sea in the direction of 000° and at the distance of 1,750 m. from point "A". (The Longitudinal line of 130° 20′ 00″ E.).
3. The line drawn towards the Nokono-Shima in the direction of 270° from point "B". (The parallel of 33° 37′ 06″ N.).
4. The coast line of the Nokono-Shima.
   The centre of the Quarantine Anchorage: Lat. 33° 37′ 30″ N., Long. 130° 19′ 30″ E.

(b) Quarantine service is rendered from sunrise to 1 hour before sunset.
(c) "Q" flag should be hoisted until Free Pratique is granted.
(d) When vessel arrives from plague infected or suspected area w 10 days after she left such place, a 24-hour special quaran required. All sanitary scuppers must be closed and garbag thrown overboard after vessel reaches 60 miles off inland sea a
(e) Radio Pratique is applicable.

RADIO: Recommended Master communicates with Agent thr Choshi Radio or Nagasaki Radio which cover all ports in Japa specifically Westbound vessel, to contact Choshi and Northbou contact Nagasaki Radio respectively.
VHF: Hakata Port Radio on Channels 11, 12, and 16. Power 50 w 24 hour operation.
TUGS: "Taiho Maru" 3,400 h.p., "No. 2 Kyoto Maru" 1,800 h "Tetsuho Maru" 3,520 h.p., "Wakasugi Maru" 2,600 h.p., "Ha Maru" 3,400 h.p., "Hakata Maru" 3,840 h.p., "Kashii Maru" 3,840 h
BERTHING: No specific requirements. Pilot boarding time will be no by ship's Agent mainly by radio.

CARGO HANDLING FACILITIES:

	Shore Facilities	*Production/Capacity*
Suzaki Pier:		
No. 2 Wharf No. 3 Wharf No. 4 Wharf	4 units of pneumatic unloaders.	300 t.p.h. – 350 t.p.h. each
Hakozaki Pier:		
No. 5 Wharf	2 gantry cranes.	The gantry cranes are used f container operations with rat 25/30 boxes/hr. and lifting capacity of 30 tons per crane
No. 12 Wharf No. 13 Wharf	1 pneumatic unloader.	300 t.p.h. – 350 t.p.h.

Average Discharging Rates:

Grain Cargo	: 300/350 tonnes/hr. per pneumatic unloade
Grain Cargo	: 50/60 tonnes/hr. by ship's gear.
Crude Rubber	: 30/40 tonnes/hr. by ship's gear.
Sugar in bulk	: 60/80 tonnes/hr. by ship's gear.
Lumber in bundles	: 90,000/140,000 BMF/hr. per gang.
Logs	: 120 cu.m./hr. per gang.
Frozen Cargo	: 40/50 tonnes/hr. per gang.
Fresh Fruits	: 50/55 tonnes/hr. per gang.

Average Loading Rate:

Loose Tyres	: 70/90 cu.m./hr. per gang.

Grain silos:

STEVEDORES: At least 24 hours' prior notice excluding Sunday holidays required in order for Agent to arrange stevedores. Vesse constantly keep her Agent advised of ETA. If stevedores ca commence loading/unloading at time notified by the Agent, the ow must pay for waiting time. If cargo gear not rigged on be stevedores will do same for ship's crew. Normal working hours: 08 1700 hrs.

Overtime work is possible by applying to Customs at the followi

0000–0500 hrs.	350 Yen per hour
0500–0830 hrs. 1700–2200 hrs. and Sundays and Holidays	300 Yen per hour

2200–2400 hrs. 350 Yen per hour

No work can be arranged for on 31st December to 3rd January.

1st and 3rd Sundays of each month are stevedores' non-working days per Union's Regulations.

MEDICAL: Medical service available throughout 24 hours.

DENSITY: Winter: 1026 (approx.), Summer: 1018 (approx).

FRESH WATER: Supply available ex-shore hydrant at all berths at a rate of 20-25 t.p.h. No water barge is available unless a coastal water barge is brought from Kanmon (Moji) area with 2 days advance notice.

FUEL: Bonded bunker oil is not available at this port, but is to be lightered from other port. An adequate notice should be given to the suppliers in order to avoid delay in replenishment. The rate of delivery from oil barge is 80 – 100 t.p.h.

FIRE PRECAUTIONS: Modern chemical fire service boat "Hiryu Maru" (30 tons).

CONSULS:

American Consulate General, Fukuoka. Tel: 092-751-9331.
Hon. British Consulate, Moji. Tel: 093-331-1311.
Republic of China Consular Agency, Fukuoka. Tel: 092-473-6655.
Republic of Korea Consulate, Fukuoka. Tel: 092-771-0461
People's Republic of China Consulate, Fukuoka. Tel: 092-713-1121.
French Consular Agency, Fukuoka. Tel: 092-431-4400.
Hon. Malaysian Consulate, Fukuoka. Tel: 092-733-6400.

REPAIRS: Local workshop is available to arrange repair service, from Hakata and Moji areas, subject to type of repair.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

REPATRIATION: Possible.

AIRPORT: Fukuoka Airport: Distance: About 20 minutes from Hakata Port by car. A regular domestic airline service is available to most airports in Japan. A regular international airline service for U.S.A./Europe/East or South East Asia countries by various airlines is available.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police/Ambulance Tel: 110; Fire 119.

TELEPHONES: Marine radio telephone is available at 3/4 days notice. Mobile telephone is available at 7 days notice.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for 15 days, but 7 days extension possible if ship stays longer, good for any Japanese port.

AUTHORITY: Hakata Port and Harbour Bureau, 13-13, Sekijo-Machi, Hakata-ku, Fukuoka-city, Japan. *Tel:* (092) 291-0561. *FAX:* (092) 291-7144.

AGENT: Sub-agents for Aall Barwil Agencies, Tokyo.
Green Shipping Ltd., Fukuoka Branch, 1st Floor, Doimachi Shirouzu Building, 8-16, Shimo Kawabata-Machi, Hakata-Ku, Fukuoka, 812 Japan. Tel: (092) 272-5513. Telex: 722224 Greenh J. Fax: (092) 272-5519. Cables: Greenship Fukuoka.

HAKODATE: 41.47 N. 140.42 E. (See Plan)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory, but in practice is necessary. Pilots available 24 hours a day and vessels able enter and leave port day and night. Pilots board about 1.5 miles S.W. of Breakwater Lighthouse. Pilot boat is small boat carrying flag "H".

The limit of Hakodate Piloting District is the sea area surrounded by a line drawn from Obana Misaki to Kattoshi Misaki and the coastline.

ANCHORAGES: Quarantine Anchorage outside breakwater and care should be taken not to foul fishing nets. Good anchorage inside breakwater at East side of Section 3 – depth 11 m. to 13 m.

RESTRICTIONS: Quarantine and Customs business between 0800 and 1700 hrs. only.

MAX. SIZE: Tankers up to 84,000 d.w.t. at SBM. Max. draft 14.5 m. Max. LOA 260 m.

Also see "Berthing".

HEALTH: Radio Agent for Free Pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When Free Pratique is granted by radio, vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case of infectious disease, within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: 1×3,200 h.p. and 3×2,400 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio.

No. 3 Buoy		10.0	9.5	20,000	
Imodoco Buoy		15.5	14.5	84,000	Cosmo Oil Co., Sea Berth (Pipelines).

CRANES: Hakodate Dock own 1×200 ton and 1×50 ton floating crane.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agents to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 – 1900 hrs. (50% additional of basic stevedorage) 2100 – 0500 hrs. next morning (130% additional) Sundays/holidays (60% additional).

MEDICAL: No advance notice required unless urgent.

TANKERS: *Single-Buoy Mooring:* Cosmo Oil Company, sea berth suitable for up to 84,000 d.w.t. and max. draft 14.5 m. at Imodco Buoy.

Position: Lat. 41° 48′ 08″ N., Long. 140° 40′ 57″ E.

Soundings: At site 15.5 m. In approaches to site, more than 15.5 m. The approach to terminal is free from obstructions.

There is one 20 in. crude line running 2,000 m. from shore to the buoy, and about 500 m. from shore line to the storage tanks.

Mooring: There is no night mooring. Unmooring is carried out from 0600 till 2400 hrs., and may be done by the Master of the ship without a Pilot.

A mooring/unmooring gang is provided for by Agent. Two launches and one tug are in attendance at the mooring. One launch will keep the hose clear while the other handles the lines. The tug is standing by and only pushes against bow or near the stern to keep the head of the vessel in position whilst mooring.

At least 6 good mooring lines are required, preferably each line to its own bollard. The lines are run single to the buoy. The position of the ship's bow from the buoy is about 40 m., when the distance from the buoy to ship's manifold is about 360 ft.

When mooring, it is requested that the propeller is completely stopped or otherwise turned astern.

Both bow anchors are to be hove well up in the hawse pipe and properly secured before reaching the buoy. Anchors are never to be used while on the buoy. They may foul the buoy's mooring cables and pipeline on the bottom if released.

Floating Hose: There is one set of 12 in. floating hose for the discharge of crude only. The floating hose is about 600 ft. long from the buoy's manifold. The last two lengths are floating in doughnut-shaped plastic floats. The end is marked with an unlit marker buoy.

The hose connections are always made to the port manifold and are lifted with ship's gear. The hose when full of cargo and equipment weighs over one and a half tons. Information is required of the distance from ship's bow to ship's manifold, and the distance from ship's side to ship's manifold prior to arrival.

Standard flanges are used on the hose. OD 19 in. diameter of bolt-circle 17 in. with 12 bolt-holes size 0.875 in.

Discharging: The discharging should be arranged in such a way as to be able to take sufficient ballast into ship's tanks, when about half way during discharge; to be able to get the ship's head down to prevent the vessel from veering too widely, and run over the hose near the buoy, in case of unfavourable conditions.

Maximum allowed back pressure by shore is about 10 kg./sq.cm. During the discharge the main engine must not be immobilised as it may be used to keep the vessel clear of the buoy.

Stand-by Men: While on the buoy, the vessel will be required to provide sleeping quarters for four men, this includes the foreman who will remain on board throughout the entire operation. It is requested that the discharge officer be provided with meals. The other men are supplied with food from shore.

Discharge Rate: 1,800 k/l per hour.

DENSITY: Average 1025.

FRESH WATER: Available at piers ex-hydrants and by barge at anchorage. Supplier, Hakodate Municipal Office.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

Fuel supplies for Hakodate are generally lightered from Tokyo Bay area and delays can be caused by weather conditions.

CONSULS: None.

REPAIRS: Hakodate Dockyard Co., undertakes hull and engine repairs.

DRY DOCKS: No. 1. Capacity 17,100 g.t., length 156 m., breadth 24 m. depth 6 m. No. 2. Capacity 9,000 g.t., length 140 m., breadth 21 m., depth 6 m.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommended request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Custom Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

AIRPORT: Distant 20 minutes by car.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.

TELEPHONES: Arrangeable on board.

SHORE LEAVE: Local Immigration Officers issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AUTHORITY: Port and Harbour Bureau, Hakodate City, 4-19 Suehiro-cho, Hakodate City, Hokkaido. *Tel:* (0138) 22-3101.

AGENT: Sub-agents of Aall Barwil Agencies.

Kyoei Unyu Co.Ltd., 22-5, Kaigan-cho, Hakodate City 040, Hokkaido, Japan. Tel: (0138) 42-4121. Telex: 9925-64 Kyoei J. Fax: (0138) 42-4120. Cables: Funekyoei.

HAMADA: 34.52 N. 132.03 E. (See Plan)

PORT LIMITS: See "Plan".

DOCUMENTS: When vessel arrives direct from a foreign port, Customs Officials will board to search. The following documents are to be submitted:

Ship's Register.
International Tonnage Certificate.
3 Voyage "Memos" (ports of call).
5 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

APPROACHES: Ships approach the harbour entrance directly. Harbour entrance is between New West Breakwater and Yana Shima, depth 26 m. (85 ft. 4 in.), width 530 m. (1,739 ft.). Distance from harbour entrance to Nagahama No. 1 Wharf is 2,200 m. (7,218 ft.).

PILOTAGE: Harbour pilotage in/out not compulsory. Pilots are available at harbour entrance. Harbour pilotage should preferably be arranged through Agent, by cable.

ANCHORAGE: Quarantine Anchorage Position: Lat. 34° 53.3′ N., Long. 132° 03.3′ E. (400 m. circle).

RESTRICTIONS: See "Berthing".

MAX. SIZE: Max. d.w.t. 15,000 tons at Nagahama No. 1 Wharf, length 190 m., depth 10.0 m.

HEALTH: Radio Pratique available. At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers come from Hiroshima Office, and will attend vessel from daylight to sunset, and Master to show all Vaccination Cards and Derat Exemption Certificate. In case vessel arrives from Cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office, through ship's Agent prior to arrival, and close all soil pipes before entering port.

Sanitary Inspection available.

RADIO: Recommended that Master communicates with Agent thr Choshi Radio or Nagasaki Radio which cover all ports in Ja Westbound vessels to contact Choshi Radio, and Northbound ves to contact Nagasaki Radio respectively.

VHF: Not available.

TUGS: 1 tug 3,100 h.p. Additional tugs are available from other po

CUSTOMS ALLOWANCE: Only allowed 60 cigarettes to take ash but no spirits.

REPATRIATION: Possible. The authorities are not stationed bu attend from Matsue City.

AIRPORT: Nearest is Izumo Airport, about 125 km. Iwami Ai (40 km.) is expected to open in 1993, but Tokyo, Osaka or Fukuok preferable, due to convenience of traffic.

TIME: GMT plus 9 hours. No alterations made to clocks during ye

POLICE/AMBULANCE/FIRE: Police 110, or 0855-22-0520. Ambu and Fire 119.

HOLIDAYS: Authorities holidays are Sundays, National holidays 2nd and 4th Saturday of month.

TELEPHONES: No facilities for placing telephones on bo International telephone booths are located on Nagahama Wharf.

SERVICES: Hold cleaning available.

STORING: Provisions and bonded stores can be obtained shipchandlers on berthing.

SHORE LEAVE: Local Immigration Offices issue shore pass val only 15 days when Hamada is first port of call in Japan. Exten possible if ship stays longer.

DELAYS: An incoming foreign vessel is to be given priority, but de will be expected when the quay is occupied by vessels.

GENERAL: Hamada port is mostly for import of round logs. Discha and loading cargo operations carried out alongside berth. Ship's re (except small ones) for machinery, radio, radar, et. are all arrang firms located in Kitakyushu, Hiroshima, Osaka and Kobe.

AUTHORITY: Hamada Public Works Office, 1785-7, Nagahama Hamada City, Shimane Pref., Japan. *Tel:* 0855-27-0088.

AGENT: Sub-agents of Aall Barwil Agencies.

Green Shipping Ltd., Moji, c/o Hamada Koun Co.Ltd., 17 Nagahama Cho, Hamada City, Shimane Pref., 697 Japan. Tel: 0 26-0515. Telex: 6322-46 Koun J. Fax: 0855-27-3409. Ca Hamadakoun Hamada.

HIBI: 34.27 N. 133.56 E. (See Plan)

Also see "Uno".

DOCUMENTS: In addition to the documents required at "Uno", vessel must be provided with Customs' Closed Port Entrance Permission by Agents before entering Hibi, as it is a Non-Open Port.

MAX. SIZE: See "Berthing".

BERTHING:

Berth	*Length* (m.)	*Depth* (m.)	*Draft (S.W.)* (m.)	*Cargo Handled*
Hibi Public Wharf	185.0	10.00	9.20	Not specified.
Mitsui Hibi Wharf	176.0	13.10	12.0	Copper concentrate (discharging).

CRANES: Hibi Public Wharf: No shore cranes installed. Ship's gear used.

Mitsui Hibi Wharf: One shore crane with capacity 10.0 tons.

BULK CARGO FACILITIES: See "Berthing".

STEVEDORES: Normal working hours: 0830 hrs. – 1630 hrs. (FIO basis), discharge rate 3,500 tonnes, or 0830 hrs. – 2030 hrs. (FIO basis), discharge rate 5,300 tonnes. Copper concentrate at Mitsui Hibi Wharf.

See "Uno" for Hibi Public Wharf.

FRESH WATER: Available from shore hose at Hibi Public Wharf, cost Yen 270/ton. Available from shore hose at Mitsui Hibi Wharf, cost Yen 300/ton.

FUEL: Bonded fuel is available from main port or oil station by barge at Hibi Public Wharf. Fuel oil and L.O. supply not available at Mitsui Hibi Wharf.

REPAIRS: All types of deck and engine repairs are possible at Hibi Public Wharf, but subject to smelters approval at Mitsui Hibi Wharf.

HIBIKINADA: 33.57 N. 130.50 E. (See Plan)

See "Kanmon-Ko".

LOCATION: The Port of Hibikinada is located in position Lat. 33° 56.7′ N., Long. 130° 49.9′ E. and is only protected by a breakwater. It has no other shelter and is exposed to strong winds from the North. The strongest winds are from the NW and if accompanied by swell, causes a dangerous surge in the port.

DOCUMENTS: When vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:

Ship's Register.
International Tonnage Certificate.
Voyage "Memo" (Ports of Call).
3 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore Ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Kanmon Strait and Harbour Pilotage Association.

Pilotage compulsory. Pilot boards inbound vessel at Mutsure: Lat. 33° 58′ 30″ N., Long. 130° 52′ 48″ E. or at He Saki: Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGE: *Coming from West:* Mutsure Anchorage: Lat. 33° 59.5′ N., Long. 130° 51.7′ E. Depth 23 m.

Coming from East: He Saki Anchorage: Lat. 33° 56′ N., Long. 131° 03′ E. Depth 12.5 m.

If gale force winds blowing, it is possible with Coast Guard permission to shift to Mutsure Anchorage.

RESTRICTIONS: Berthing and unberthing only during daylight hours. Berthing undertaken at slack water only. Unberthing at any stage of the tide.

Vessels are permitted to transit Shimonoseki with a max. draft 30 ft. 6 in. at anytime and with a max. draft of 32 ft. 10 in. at HW.

Also see "Report".

Controlling Factors:

	Controlling Depth (MLW) (m.)	*Mean Tidal Range* (m.)	*Velocity Current* (knots)	*Nature of Bottom*
Entrance	20	1.0	3 max.	Mud
Channel	13.5	1.0	3 max.	Mud
Anchorage	21	1.0	3 max.	Mud
Berth	13.5	1.0	nil	Mud

MAX. SIZE: *Wharf A-1:* Max. LOA – 340 m. Max. draft 12.2 m. Max. 150,000 d.w.t. Beam of vessel determined by hatch width.

Wharf A-2: Max. LOA 235 m. Max. draft 12.2 m. Max. 60,000 d.w.t.

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel between 0830 hrs. and 1630 hrs. at anchorage. Master to show all Vaccination Cards and Derat Exemption Certificate. In case vessel arrives from cholera infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office, through ship's Agent, prior to arrival, and close all soil pipes before entering port.

Also see "Moji".

RADIO: Recommended that Master communicates with Agent through Choshi Radio or Nagasaki Radio, which cover all ports in Japan. Westbound vessels to contact Choshi Radio, and Northbound vessels to contact Nagasaki Radio respectively.

VHF: "Shimonoseki Port Radio" on Channels 16, 12, 14, 20 and 22. Pilot on Channel 13.

TUGS: There are 3 tugs available each 3,500 h.p. Use of all 3 tugs is advisable when docking and 2 tugs when undocking.

BERTHING: Vessels always dock port-side-to at A-1 Wharf, and starboard side to at A-2 Wharf. Ship's gangway used.

Moorings: Forward: 3 headlines, 1 breast line, 2 springs.

Aft: 3 stern lines, 1 breast line, 2 springs. Vessel berths against spring roller fenders.

CRANES: 2 unloaders available with 45 tons capacity.

BRIDGES: Kanmon Suspension Bridge was built in 1973 across Hayatomo Channel (narrowest place in Kanmon Strait, width of fairway 530 m.) between Shimonoseki and Moji. The height of the bridge from sea level is 61 m. Vessels over 59 m. high must give notice to Pilot Office.

STEVEDORES: At least 24 hours' prior notice, excluding Sundays and holidays, required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time.

MEDICAL: No advance notice required unless urgent. All kinds of doctors available.

TANKERS: No tanker berths available.

DENSITY: Average 1025.

FRESH WATER: Good fresh water supplied either from water barge or from hydrants, 2 days prior notice required.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports, bunkers will be lightered from the nearest bunker stock port at maximum 7 days prior notice.

CONSULS: See "Yawata".

REPAIRS: All types of repairs possible.

DRY DOCK: Mitsubishi Heavy Industries Ltd. 4 dockyards (No. 3 and 4 for small vessels).

	Dimensions of Docks			*Max. Size of Vessel*		
	Length (m.)	*Breadth* (m.)	*Draft* (m.)	*Length* (m.)	*Breadth* (m.)	*Draft* (m.)
No. 1 Dock	164.13	25.0	7.04	160.00	22.50	5.50
No. 2 Dock	150.10	20.0	6.88	143.00	19.30	5.00

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid cargo gear certificate sometimes required by stevedores, when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 60 cigarettes to take ashore, but no spirits.

CARGO GEAR: See "Certificates", but no special requirements.

REPATRIATION: Possible.

AIRPORT: Nearest Fukuoka Airport, about 2 hours by train and taxi. Kitakyushu Airport about 40 minutes by taxi.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110. Ambulance and Fire 119. Public telephone booth available near by berth.

TELEPHONE: Possible to place telephone on board.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 15 days if Hibikinada is first port of call in Japan. Extension possible if ship stays longer.

SERVICES: All services available.

CHARTS: B.A. 1578, B.A. 532, B.A. 127.

DEVELOPMENTS: Port will reclaim land of 590 ha. for redevelopment, industrial use, and for waste disposal. 2 berths on the domestic trade quay will also be improved.

REPORT: June 1985: It was found that, whilst the weather was severe and from a North/Northwesterly direction it was not abnormally severe. Had the vessel been able to moor in a symmetrical fashion, she would have been in no difficulty.

The berth was extended in 1976 to accommodate two vessels simultaneously. As a result, the vessel that moors to the Eastern end of the jetty can, depending upon the size of the two vessels on the jetty, overhang with their after end. The effect of this, as can be seen from the plan, is that vessel has nowhere to put out proper stern mooring lines except to a shore mooring post (See "X" on "Plan"). On our vessel, the mooring lines were in the order of 130 m. long, and some four times the length of the headlines. It is well known that mooring lines should be symmetrical at either end of the vessel.

The only place for the larger vessel on the "Plan" to moor safely is some 50/60 m. ahead of her diagrammatical position. It is, of course perfectly feasible for a vessel to moor ahead of that shown in the plan. If this was the case, we would consider her to be perfectly safe.

SHIPMASTER'S REPORT: January 1994.

Communications: Communications with Pilots and Quarantine were all made through the Agents. Due to the approaching New Year weekend, the Radio Pratique Quarantine message was sent 5 days before arrival. This was too early and had to be re-sent 2 days before arrival, and Radio Pratique was granted the following day.

Anchorage: Anchorage for awaiting Pilots and Quarantine only, was advised by the Agent to be 'North of a line 090° from Koshiki Iwa for daylight arrivals and in the area contained by a line 000° from Mutsure Shima Light and a line 310° from a position 000° × 1.4 miles from Mutsure Shima Light at night'.

Approaches: Approaches were found to be as charted on B.A. Charts No. 524 and 1578.

Berthing: Berth No. 1: The berth, as charted on the North side of Wakamatu, is well fendered and is served by 2×40 ton gantry cranes for grab discharge of bulk cargo, either to hoppers close to the quay side feeding conveyor belts for coal cargo, or onto the dock about 30 m. from the quay edge for other cargoes, where it is picked up by payloaders and removed by lorries.

This vessel was discharging gypsum, and achieved a rate of 296.3 tonnes per crane per hour discharging to the dock. This rate could probably be doubled if discharging to the hoppers due to the shorter grab travel required.

Crane outreach is in excess of 30 m. and airdraft is adquate for all vessels.

Discharging is on a 24 hour basis.

Berthing is port side to using a tug on the starboard bow and quarter, made fast with tug's lines. Mooring boats are used to carry the head and stern lines ashore.

Unberthing is also with 2 tugs made fast.

Both operations are controlled by tidal currents as regards to timing.

Pilotage: Pilots board from a small launch at the charted pilot station. Vessels are called in from anchorage by VHF. Boarding will probably be advised by telex from the Agents some days in advance.

Shore Leave: Passes are issued to each crew member and visaed by the Immigration Department. This is arranged by the Agent.

Access to the shore is direct to the dockside by ship's gangway. Taxis to the nearest town can be arranged by the Agent at a quoted price of U.S.$ 27.00 for 3 to 4 passengers, to the nearest Customs Office, where shore-going crew are requested to report on their way ashore and before returning.

Crew members going ashore were able to negotiate better terms through the stevedores.

Clearance: Inward and Outward Clearance is mainly carried out by the Agent, but the Customs' Agents may also attend and a Customs search was carried out.

Services: All services including bunkers, provisions, stores, fresh water, medical and repatriation are available, but are generally more expensive than average prices elsewhere.

Swell: The berth, in spite of a breakwater to the North, is exposed to swells from the Northeast. During the first day on the berth, the vessel was rolling alongside in spite of the fact that no breakers could be seen on the breakwater or shore, which gave the impression of some underwater tidal effect as though the sea surface appeared the same. After the vessel had been lightened, she lay quietly alongside.

AUTHORITY: Kitakyushu Port and Harbour Bureau, 2-7 Nishi-Kaigan, 1-chome, Moji-Ku, Kitakyushu City, Fukuoka Pref., 801 Japan. *Tel:* (093) 321-5941. *FAX:* (093) 321-5915.

AGENT: Sub-agents of Aall Barwil Agencies.

Green Shipping Ltd., Moji, 9-7, Minato-machi, Moji-ku, Kitakyushu City, Fukuoka Pref., 801 Japan. Tel: (093) 321-4261. Telex: 7153-11 Greenm J. Fax: (093) 321-4288. Cables: Greenship Moji.

HIKARI: 33.57 N. 131.56 E. (See Plan)

DOCUMENTS: When vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:

Ship's Register.
International Tonnage Certificate.
Voyage Memo (Ports of Call).
3 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore, ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Harbour pilotage not compulsory, but it is recommended to take pilot at pilot station (Lat. 33° 54′ N., Long. 131° 56′ E.). Pilot boards from 0700 hrs. for berthing and up till 1800 hrs. for unberthing. Inland Sea Pilot undertakes harbour pilotage.

Inland sea pilotage should preferably by arranged through Agent by cable via Nagasaki Radio, giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all inland sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations, depending upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours, and 72 hours' advance notice prefered, thereafter advising any alterations. Most Inland Sea Pilots also act as harbour pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea Pilot Stations.

1. Wadamisaki, at entrance to Kobe (vessel transiting Kii Straits). Position Lat. 34° 34′ 09″ N., Long. 135° 11′ E. Cable address: "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessel transiting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Cable address: "Anjin Moji". In event bad weather, recommended vessel proceeds for shelter as near as possible, having due regard to safety, to Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGES: Pilot station, 2 miles South of Ominae-Shima (Is If the vessel cannot go alongside directly at Hikari Wharf, du congestion, wait at Kudamatsu Anchoring section.

RESTRICTIONS: Entry and departure is not available after su Depth of water in channel 11.20 m.

MAX. SIZE: See "Berthing".

HEALTH: At first port call in Japan, vessel must obtain Free Pra Quarantine Officers will attend vessel from 0830 hrs. to 1630 h anchorage of Tokuyama, as there is no Quarantine Office at Hi Master to show all Vaccination Cards and Derat Exemption Certi In case vessel arrives from cholera infected area within 10 days, M must advise crew and passengers' health condition to Quarantine O through ship's Agent, prior to arrival, and close all soil pipes be entering port. Radio Pratique available.

RADIO: Recommended that Master communicates with Agent thr Choshi Radio or Nagasaki Radio, which cover all ports in Ja Westbound vessels to contact Choshi Radio, and Northbound ves to contact Nagasaki Radio respectively.

VHF: No VHF service.

TUGS: Available as required, but come from Tokuyama or Kuda Port.

BERTHING: Only one berth operated by Nippon Steel Corporatio

Steel Export Wharf: Length 232 m. Depth 11.6 m. Max. LOA 2 Max. draft 11.20 m. Max. size 30,000 d.w.t.

Loading Facility: One shore gantry crane (lifting capacity 15 to Outreach: 22 m. from front leg of the crane. Height: 17 m. from the Span: 28 m. (longitudinally forward/aft). Air draft: 20.10 m. at ML

Loading Rate: Approximately 1,500 – 2,000 tons through nig 2 gangs (gantry and ship's gear).

BRIDGES: None.

STEVEDORES: At least 24 hours prior notice, excluding Sunday holidays, required in order for Agent to arrange stevedores. Vessel constantly keep her Agent advised of ETA. If stevedores c commence loading/unloading at time notified by the Agent, the or must pay for waiting time. If cargo gears not rigged on be stevedores will do same for ship's crew at additional cost. Ov surcharges 1700 hrs. – 1900 hrs. 50% additional of basic steved 2100 hrs. – 0500 hrs. next morning 130% additional; Sunday h 60% additional.

TANKERS: No tanker berth.

MEDICAL: No advance notice required, unless urgent.

DENSITY: Average 1025.

FRESH WATER: Good fresh water supplied from hydrants. D rate 50 t.p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Is Osaka Bay and Kanmon Port. At all other ports, bunkers will be lig from the nearest bunker stock ports at maximum 7 days prior no

CONSULS: No consuls. Marine Note of Protest possible at local N public.

REPAIRS: Only minor repairs available. Others from Moji, Tok or Kobe.

DRY DOCKS: Shin Kasado Dockyard in Kudamatsu-Wan, en 3 miles East of Tokuyama-Wan entrance. Largest dry do 90,000 tonners and two other dry docks/building docks.

GANGWAY/DECK WATCHMEN: Not specially required, u passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out openin closing hatches. If any time lost by ship's crew doing this stevedores charge ship for waiting. Recommend request stevedo this work, unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector registered gross and nett tonnages. Valid Cargo Gear Cert sometimes required by stevedores, when cargo gear mainte appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take a but no spirits.

CARGO GEAR: See "Certificates". No special requirements.

REPATRIATION: Possible.

AIRPORT: Hiroshima Airport about 40 minutes by Shinkanse about 40 minutes by Shinkansen and taxi.

TIME: GMT plus 9 hours. No alterations to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110, Ambulance/Fire 119.

EMERGENCY CO-ORDINATION CENTRE: Maritime Safety A Tokuyama Office in Tokuyama City. Tel: 0834-31-0110.

TELEPHONES: Not possible to place telephones on board.

SHORE LEAVE: Local Immigration Offices issue shore passes for only 15 days, when Hikari is first port of call in Japan. Ext possible if ship stays longer.

SERVICES: All services available from Moji and Tokuyama.

AUTHORITY: Shunan Port Administration Office, 111, Chik Tokuyama City, Yamaguchi Pref., Japan. *Tel:* 0834-21-1787.

AGENT: Sub-agents of Aall Barwil Agencies.

Green Shipping Ltd., Moji, c/o Sankyu Inc., Hikari Branch, 16-2 1-chome, Hikari City, Yamaguchi Pref., 743 Japan. Tel: 0833-7 Telex: 6754-49 Sankyu J. Fax: 0883-72-0939. Cables: Sankyu H

HIMEJI (including Hirohata, Shikama, Mega and Aboshi): 34.47 N. 134.41 E. (See Plan)

DOCUMENTS:

Ship's Register.

Last Port Clearance.

3 Crew Lists including Passport Numbers.

3 Passenger Lists.

1 Stores List.

1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: See "Kobe". Vessels take Inland Sea Pilot off Wada, Hesaki or Sekisaki; or from ports of Inland Sea. No exact pilot station and no checking point at port of Himeji (Mega, Shikama, Hirohata and Aboshi) but Agents arrange Pilot when vessel approaches upon receiving cable giving 24 hours advance notice. Pilot boarding positions as follows: Mega Lat. 34° 44′ N., Long. 134° 42′ 15″ E. Shikama Lat. 34° 45′ N., Long. 134° 39′ E. Hirohata Lat. 34° 44′ N., Long. 134° 37′ E. Aboshi Lat. 34° 44′ N., Long. 134° 34′ 10″ E.

No strict location of anchorage for vessel awaiting a Pilot in Himeji area, but should be as close as possible to port according to draft and communication.

ANCHORAGE: No strict boundary areas for anchorages. Anchor as close as possible to the port according to draft.

RESTRICTIONS: At ports of Mega, Shikama, Aboshi and Hirohata, no Pilot boarding between sunset to sunrise.

MAX. SIZE: Draft restrictions as follows:

Mega 11.80 m., Shikama 11.0 m., Hirohata 13.2 m. (80,000 d.w.t. or 100,000 d.w.t. part load) for Central Pier, 8.50 m. for Kamota Pier (Piers No. 3 – 6), 9.5 m. for Tsuruta Pier (Pier No. 10). 16 m. (160,000 d.w.t. or 270,000 d.w.t. part load) for No. 18 Pier. Aboshi 9.0 m.

Sea buoy mooring, max. draft 19.2 m. Max. 254,000 d.w.t.

HEALTH: No Quarantine Office at Himeji. At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards. Deratt Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. Specifically Westbound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively.

TUGS: Tug(s) normally join vessel when approaching, or at anchorage. Always use tug's lines without charges.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

TANKERS: Idemitsu Kosan Co. Ltd., Himeji Oil Jetty where 1 berth only and max. draft 11.8 m. allowed. Shore discharging facilities 3×12 in. diameter hose connections which connect to 18 in. diameter line for tank hoses. Acceptable max. 5 kg/sq.cm. on hose gauge, discharge rate approximately 2,000 long tons per hour.

Note: Idemitsu Kosan Co. Ltd., Himeji, require following information prior to arrival for smooth berthing and connecting hoses: Height from sea to deck; Length from vessel's side to underneath of hose connections; Height from deck to connection of line; Diameter of connection.

Operator's Report: 1983.

Idemitsu Kosan Hyogo Sea Berth (Discharging terminal) is operated by Idemitsu Kosan Co. Ltd.

SBM Berth. Berthing equipment to OCIMF standard.

SBM operates 24 hours per day, 7 days a week. Ships moored and unmoored at daytime, weather and other circumstances permitting. SBM will not be closed due to any holidays.

Area around the SBM with radius of 410 m. is an open port for Customs' Regulations. Therefore supplies, disembarkation, etc. should be handled by related regulations.

Location: Lat. 34° 42′ 37″ N., Long. 134° 39′ 54″ E.

Pilotage: Not compulsory.

Anchorage: Himeji port is not an open port. Ships can anchor at the following points.

Point "A" Lat. 34° 42′ 58″ N., Long. 134° 39′ 02″ E., depth 21 m.
Point "B" Lat. 34° 42′ 10″ N., Long. 134° 40′ 48″ E., depth 21 m.
Point "C" Lat. 34° 41′ 30″ N., Long. 134° 41′ 00″ E., depth 23 m.

Anchorage "A" and "B" are for tankers of less than 18.5 m. draft.

Restrictions:

(a) Berthing Master comes on board 3 miles South from the line joining Kurakake Id. and Kami Id.

(b) Ship's Master has to arrange tug boats both sides and aft (total of 3 tugs).

(c) Ship proceeds at moderate speed taking into consideration tide and wind and any other circumstances. When approximately 1,000 m. from SBM vessel reduces her speed to avoid risk of touching SBM.

(d) Ship has to stop completely 200 m. from the SBM.

Max. size:

Maximum draft 19.20 m.

Maximum d.w.t. 254,000 tons

Berthing:

From bow to manifold 145 m. – 186 m.

Derrick capacity SWL in excess of 10 tons.

Mega:

Berth	*Depth (m.)*	*Pipe-Lines*
Idemitsu Jetty No. 1 – Berth No. 1 – No. 4	5.0 – 7.0	4×8 in.
Idemitsu Jetty No. 2 – Berth No. 5	7.0	8 in.
Idemitsu Jetty No. 3 – Berth No. 6	12.2	12 in. and 8 in.
Idemitsu Jetty No. 4 – Berth Nos. 7 – 8	7.0	2×8 in.
Idemitsu Jetty No. 5 – Berth No. 9 – No. 12	5.0 – 7.0	4×8 in.
LPG Jetty – Berth No. 22	6.0	4 in. and 2 in.
Monoageba	6.0	—
Sea Berth	19.0	—
Kanden LNG Jetty	14.0	—

DENSITY: Average density between 1025 and 1026 in Winter season and 1018 and 1020 in Summer season.

FRESH WATER: Idemitsu Oil Jetty, Shikama Public Pier and Hirohata Pier able to supply fresh water from shore, but *No Water Barge available at Port of Himeji* therefore not able to supply fresh water at Satetsu Pier (Shikama), Shikama Buoy, Aboshi Buoy or outside anchorage.

Port	*Average rate of delivery*
Mega	20 – 30 tonnes/p.h.
Shikama	25 – 30 tonnes/p.h.
Hirohata	15 – 20 tonnes/p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

CONSULS: No consuls at Himeji, Shikama or Hirohata.

REPAIRS: Most minor deck and engine repairs available at port of Himeji; in case special technician required, should be called from Kobe.

DRY DOCKS: No dry dock available at port of Himeji. Nearest dry dock Ishikawajima-Harima Heavy Industries Co. Ltd., Aioi, who have following dry docks. Also see "Aioi".

	LOA	*LBP*	*Breadth*	*Depth*	*Capacity*

GANGWAY/DECK WATCHMEN: Not specially required unless passenger or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

CARGO GEAR: See "Certificates" but no special requirements.

REPATRIATION: Possible.

AIRPORT: About 60 km. to Itami Airport. Regular services.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: At Aboshi, no work on 1st and 3rd Sunday. At Shikama, shore crane, no work on 1st and 3rd Sunday but gangs available for discharging and loading.
POLICE/AMBULANCE/FIRE: Police (Shikama) Tel: 35-1441; Ambulance (Shikama) 119 or 35-0119; Fire (Shikama) 119 or 35-0119.
TELEPHONE: No facilities for placing telephones on board.
SERVICES: Tally, laundry, daily provisions by ship chandler available locally. All other service from Kobe or Osaka.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for 9 days, but 3 days extension possible if ship stays longer.
GENERAL: No quarantine available at port of Himeji, therefore pratique to be obtained at other ports.
AUTHORITY: Himeji Port Administration Office, 294, Suka, Shikama-ku, Himeji City, Hyogo Pref. *Tel:* (0792) 35-0176.

AGENT: Sub-agents of Aall Barwil Agencies.
Shikama Kaiun Co. Ltd., 1300 Hosoe, Shikama-ku, Himeji City, Hyogo Pref. 672, Japan. Tel: (0792) 33-0482. Telex: 5772-211 Sikama J. Fax: (0792) 34-0975. Cables: Shikamakaiun Himeji.

HIMEKAWA: 37.02 N. 137.51 E. (See Plan)

DOCUMENTS:
Ship's Register (and International Tonnage Certificate, if Register does not show gross and nett tonnages).
Last Port Clearance.
6 Crew Lists, including Passport numbers.
4 Passenger Lists.
2 Stores Lists.
2 Declarations of Crew's Baggage.
PILOTAGE: Not compulsory, but recommended. Pilots board in position Lat. 37° 03′ 03″ N., Long. 137° 51′ 30″ E.
ANCHORAGE: Position: Lat. 37° 11′ 45″ N., Long. 138° 14′ E., within radius 700 m.
RESTRICTIONS: Entry and sailing during darkness is permissible, but pilots are only available during daytime. Draft limitation in the channel is 8.20 m.
HEALTH: Radio Pratique is available. Ordinary quarantine inspection takes place at the anchorage.
TUGS: No tugs are stationed at the port, but they can be arranged, 1×3,000 h.p. from Niigata and 1×1,300 h.p. from Naoetsu.
BERTHING:

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat. 33° 57′ N., Long. 131° 03′ E.

MAX. SIZE: See "Berthing".
ANCHORAGE: Anchorage outside breakwater, sufficient water, but on account fast current deemed not safe anchorage. Anchorage inside breakwater generally shallow, and sea area narrow for large vessels.
RESTRICTIONS: No entry after dark.
HEALTH: Vessel should obtain Pratique at Matsuyama or any other Quarantine port. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards and Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.
TUGS: 6 tugs available, 1,050 h.p. – 4,000 h.p. Kurashiki Wharf: Join vessel at sea anchorage, using tug's line with charge.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio. Also see "Max. Size".

Kurashiki Wharf:

Section	*Length* (m.)	*Depth* (m.)	*Max.Draft* (m.)
1	165	9.0	8.10
2	140	7.5	6.75
3	180	5.5	
4	270	5.5	

Toryu Wharf:

1	180	5.5	

CRANES: Floating crane available from Kure.
STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges (0700 hrs. – 0830 hrs., 1630 hrs. – 2130 hrs.) 60% additional of basic stevedorage; 2130 hrs. – 0700 hrs. next morning 120% additional; Sundays/holidays 100% additional.
MEDICAL: No advance notice required unless urgent.
DENSITY: Temposan Wharf 1015.
FRESH WATER: Fresh water available by barge from Onomichi.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.
CONSULS: See "Kobe".
REPAIRS: Only minor repairs.
DRY DOCKS: Imabari Ship Building Co.Ltd.:

No. 1 Shipway	1×16,800 g.r.t.
No. 1 Dry dock	1×53,000 g.r.t.
No. 2 Dry dock	1×80,000 g.r.t.

Hashihama Dockyard Co.Ltd.:

No. 1 Dry dock	2,800 g.r.t.
No. 2 Dry dock	6,200 g.r.t.
No. 3 Dry dock	3,300 g.r.t.
Oshima Works	20,000 g.r.t.

There are also some small dockyards.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
GANGWAY/DECK WATCHMEN: Not specially required u passengers or valuable cargo on board.
CERTIFICATES: Ship's Register and/or International Tonn Certificate to show Customs Inspector ship's registered gross and tonnages. Valid Cargo Gear Certificates sometimes required stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take as but no spirits.
REPATRIATION: Possible. Immigration Office at Niihama.
AIRPORT: No airport. Nearest airports are Matsuyama and Takama where are All Nippon Airways.
TIME: GMT plus 9 hours. No alterations made to clocks during yea
POLICE/AMBULANCE/FIRE: Police Tel. 110; Ambulance 119; F 119.
TELEPHONES: No facilities for placing telephones on board.
SERVICES: None.
SHORE LEAVE: Local Immigration Offices issue shore pass valid only 7 days, but 7 days extension possible if ship stays longer.
AUTHORITY: Imabari Port Administration Office, 2 Katahara-c 1-chome, Imabari City, Ehime, Pref. *Tel:* (0898) 22-4120.

AGENT: Sub-agents of Aall Barwil Agencies.

(A) IMARI

DOCUMENTS: When vessel arrives direct from a foreign port, Cust Officials will board to search, and the following documents are to submitted:
Ship's Register.
International Tonnage Certificate.
Voyage Memo (ports of call).
4 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Last Port Clearance.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits came wrist-watch, radio, firearms/swords, etc. (only at first port of cal Japan).

Ship's Agents will prepare Inward/Outward Declaration, Ca Manifest and Cargo Manifest in Transit, using specific forms. There ship's Agents should be provided with necessary information ab details of cargoes in advance.

PILOTAGE: There are 2 Pilot Stations. One is for Bay Pilot board Lat. 33° 26.4′ N., Long. 129° 42.7′ E., and the other is for Harbour P boarding at Quarantine Station at Lat. 33° 20.15′ Long. 129° 48.74′ E. (from Uranosaki Light 93° × 1,630 m.). Both pi available to board any time if the Master requires, through Agent, a pilot not compulsory. Pilot uses tug as pilot boat, so the Master c contact tug by VHF Channel 16 in daytime, except Sundays/holiday
ANCHORAGE: No restrictions, except dangerous cargo ships and d Depth of inner harbour anchorage is about 10 m. – 17 m.
RESTRICTIONS: No restrictions on entry/departure, available day a night.
MAX. SIZE: LOA 248.50 m., beam 43.00 m., d.w.t. 88,309 t Minimum under-keel clearance 10% of draft required (See "Berthin
HEALTH: Formalities will be carried out at anchorage. Quaran Station is 096° × 1,300 m. (200 m. circle) from Uranosaki Lightho in position Lat. 33° 20′ 06″ N., Long. 129° 48′ 32″ E.
RADIO: Recommended Master communicates with Agent thro Nagasaki Radio.
VHF: No port radio.
TUGS: 3 tugs available, 2×3,000 h.p. and 1×3,100 h.p. Additional t available from Sasebo and Nagasaki.
BERTHING:

Name of Berth	*Length* (m.)	*Max. Draft* (m.)
Buoy No. 1		9.0
Buoy No. 2		9.9
Buoy No. 3		11.7
Kubara North Pier No. 2	130	6.8
No. 3	185	9.0
Kubara South Pier No. 1	270	5.0
No. 2	260	6.8
No. 3	370	9.0

CRANES: Mobile cranes available if required.
BULK CARGO FACILITIES: None.
SPECIAL CARGO HANDLING FACILITIES: See "Section B".
BRIDGES: None.
STEVEDORES: 2 gangs for general cargoes and/or 10 gangs for available.
MEDICAL: Notice not necessary, full hospital facilities available.
DENSITY: 1025 salt, generally at all tides.
FRESH WATER: Available 24 hours a day at 50 t.p.h. from shore Cost Yen 700/ton.
FUEL: Domestic oil is available. Bonded oil will be brought from Oita or Tokuyama area with sufficient notice, when required.
FIRE PRECAUTIONS: None, except LPG tankers (See "Section

CONSULS: No local representatives.
REPAIRS: The shipyard is capable of carrying out all kinds of fitting-out and repair work.
DRY DOCKS: One dry dock of 460 m. length and 70 m. width (New building only).
SURVEYORS: Available for cargo and class survey (NK, BV, RL, NV, etc.)
GANGWAY/DECK WATCHMEN: Not specifically required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Hatch operation by crew.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid cargo gear certificate sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 60 cigarettes to take ashore, but no spirits.
REPATRIATION: Facilities exist for repatriation of crew.
AIRPORT: Fukuoka Airport 80 km. from Imari. Served by domestic and overseas airlines.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
HOLIDAYS: January 1st – 3rd; August 15th – 16th.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance and Fire 119.
EMERGENCY CO-ORDINATION CENTRE: VHF Channel 16 call "Moji Hoan". Tel: 0955-73-4999. 24 hours service.
TELEPHONES: Not available.
SERVICES: Almost all services available.
BANKS: The Bank of Saga Ltd., Imari Branch Office. Tel: 0955-23-3111. Fax: 0955-22-5908.
STORING: Vessels can store by barge, truck and forklift at any time, except LPG tankers.
SHIP SUPPLIERS: *Provisions:* Sasebo Trading Co.Ltd. Tel: 0956-32-1211. Fax: 0956-33-4868.
Matsuda Shintoh Trading Co.Ltd. Tel: 0956-22-7220. Fax: 0956-22-7225.
SHORE LEAVE: Local Immigration Offices issue shore passes valid for only 15 days when Imari is first port of call in Japan. Extension possible if ship stays longer.
REGULATIONS: Normal port regulations.
DEVELOPMENTS: Dredging inner harbour to 10 m. One grain berth 10 m. depth and 400 m. length is under construction, and will be completed in 1995.

AGENT: Sub-agents of Aall Barwil Agencies.
Green Shipping Ltd., Moji, c/o Nagai Shokai Co.Ltd., 58-2, Shiohama Men, Fukushima Machi, Kita-Matsuura gun, Nagasaki Pref., 859-41 Japan.Tel: 0955-47-3463. Telex: 7479-33 Nagai J. Fax: 0955-47-2221. Cables: Nagai Fukushima.

(B) LPG TANKERS

LOCATION: Kyushu LPG Fukushima Terminal Co.Ltd. (Lat. 33° 29′ N., Long. 129° 40′ E.).
DOCUMENTS: When vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:
Ship's Register.
International Tonnage Certificate.
Voyage Memo (ports of call).
4 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Last Port Clearance.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
Ship's Agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore Ship's Agents should be provided with necessary information about details of cargoes in advance.
PILOTAGE: There are 2 Pilot Stations. One is for Bay Pilot boarding (Lat. 33° 26.4′ N., Long. 129° 42.7′ E.), and the other is for Harbour Pilot boarding (Lat. 33° 29′ N., Long. 129° 40′ E.). Both pilots available to board any time if the Master requires, through Agent, and pilot is compulsory. Pilot uses tug as pilot boat, so the Master can contact tug by VHF Channel 16 in daytime, except Sundays/holidays. Boat's name is "Mezura Maru".
ANCHORAGE: Same as Pilot Station (Lat. 33° 29′ N., Long. 129° 40′ E.). Depth of inner harbour anchorage is about 10 m. – 17 m.
RESTRICTIONS: Entry is allowed after sunrise to 4 hours before sunset. Also see "Berthing".
MAX. SIZE: Max. draft 14.0 m. Max. d.w.t. 70,000 tons.
HEALTH: No restrictions except Quarantine. If the vessel has a valid Sanitary Certificate, Radio Pratique available. If no valid Sanitary Certificate, normal Quarantine Inspection will be carried out at Terminal Berth after berthing.
RADIO: Recommended Master communicates with Agent through Nagasaki Radio. No radio station so if vessel equipped with telex, send to Agent's Office (Telex: 7479-33 Nagai J).
VHF: When approaching the port, contact pilot boat "Mezura Maru" on Channel 16.
RADAR: No radar at port.
TUGS: 3 tugs available, 3×3,000 h.p. 3 tugs required for berthing, and 2 tugs required for unberthing.
BERTHING: Vessel may berth either side alongside, although Terminal prefer portside alongside. Local regulations prohibit the commencement of discharging after sunset. Normal mooring configuration is 3,3,2, with lines on quick release hooks. Mooring boats in attendance. A shore gangway is provided.

The following restrictions apply to berthing:
1. Max. wind force allowed: Less than 10 m./sec.
2. Max. wave height allowed: Less than 1.0 m.
3. Visibility allowed: Over 1.0 sea miles.
4. Max. docking speed allowed: Less than 10 cm./sec.
5. Max. docking angle allowed: Less than 6°.
6. When coming alongside berth, the ship's manifold to be used shall be clearly marked with "Flag N", so as to be easily distinguished by the Terminal Berthing Master on the jetty.

CARGO HANDLING FACILITIES:

	Propane (L)	*Propane* (V)	*Butane* (L)	*Butane* (V)
Receiving Capacity (cm./hr.)	2,000	2,700	2,000	2,300
Max. Pressure (kg./sq.m.)	10	10	10	10
Allowable Temp. (C)	−45	−45	−10	−10
Hose Flange Size (in.)	12	10	12	10

Note: Unloading cargo operation of Propane and Butane shall be carried out at the same time.

Shore arms arrangement: If berthing port side to, from bow BV-BL-PL-PV.
BRIDGES: None.
MEDICAL: Notice not necessary, but advisable if treatment required. Full hospital facilities available, also cholera vaccinations.
DENSITY: 1025 salt, generally at all tides.
FRESH WATER: Available from the berth, but minimum of 7 days notice is required for this service. Tank capacity 350 cu.m., supply rate 19 cu.m./hr.
FUEL: Domestic oil is available. Bonded oil will be brought from Moji, Oita or Tokuyama area with sufficient notice, when required. Must be taken at anchorage.
FIRE PRECAUTIONS: In operation.
CONSULS: No local representatives.
REPAIRS: The shipyard is capable of carrying out all kinds of fitting-out and repair work.
DRY DOCKS: One dry dock of 460 m. length and 70 m. width (New building only).
SURVEYORS: Available for cargo and class survey (NK, BV, RL, NV, etc.) from Moji or Nagasaki.
GANGWAY/DECK WATCHMEN: Whilst alongside at the Terminal berth, a responsible member of crew shall be stationed at the ship's gangway to advise visitors on safety regulations and to check visitors and crew members.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages.
CUSTOMS ALLOWANCE: Only allowed 60 cigarettes to take ashore, but no spirits.
REPATRIATION: Facilities exist for repatriation of crew.
AIRPORT: Fukuoka Airport 80 km. from Imari. Served by domestic and overseas airlines.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
HOLIDAYS: Unloading cargo operations will be carried out every day.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance and Fire 119.
EMERGENCY CO-ORDINATION CENTRE: VHF Channel 16, call "Moji Hoan". Tel: 0955-73-4321, 24 hours service.
TELEPHONES: Not available.
SERVICES: Most services available.
BANKS: The Bank of Saga Ltd., Imari Branch Office. Tel: 0955-23-3111. Fax: 0955-22-5908.
STORING: Stores shall be loaded before unloading from a barge.
SHIP SUPPLIERS: Provisions: Sasebo Trading Co.Ltd. Tel: 0956-32-1211. Fax: 0956-33-4868.
Matsuda Shintoh Trading Co.Ltd. Tel: 0956-22-7220. Fax: 0956-22-7225.
SHORE LEAVE: Local Immigration Offices issue shore passes valid for only 15 days when Imari is first port of call in Japan. Extension possible if ship stays longer.
REGULATIONS: Cargo handling operations shall be stopped and the vessel shall be shifted to safe anchorage under such conditions as follows:
1. When Harbour Master or Maritime Safety Agencies give order.
2. Wind force is forecast to increase to more than 15 m./sec.
3. Wave height is forecast to be more than 1.0 m.
4. Visibility is less than 200 m.
5. Thunderstorm is forecast and approaching.
6. When LPG vapour accumulation is present on the deck.
7. When a fire occurs either on the vessel or in the vicinity.
8. When warning of approaching tidal wave is received.

Smoking shall be prohibited onboard when Chicksan arms are being connected or disconnected.

Fire wires shall always be lowered to sea level over the off-side bow and quarter to enable tugs to connect up rapidly in an emergency.

Lubricant pressure of stern tube shall be maintained lower than sea water pressure.

SHIPMASTER'S REPORT: November 1984.
Location: The terminal is a fairly new facility situated deep within Imari Bay on the N.W. coast of Kyushu – some 12 miles or so North of Sasebo. It is owned by Kyushu L.P.G. Fukushima Terminal Company Limited and was built in August 1982.

It is used solely for LPG discharge and there is a coastal tanker loading berth immediately adjacent.

Approaches: BA. 1527 is the only British chart to cover the area from the South and is barely adequate. Japanese Charts 166 and 1256 will give a better indication of the geography of the bay and immediate approaches.

On this occasion we arrived from the Arabian Gulf and chose to approach to the East of the Goto Retto, through Aizaki Seto and thence North to pass between Azuchi O Shima and Taku Shima, i.e. through Oshima Seto.

Navigation presents no problem with the high land providing excellent radar returns. Because of the strong tidal streams it will be necessary to time the passage of Aizaki Seto on the flood; if this cannot be managed then passage through to the East of Eno Shima is recommended.

There are the usual huge concentrations of fishing vessels in the area and, on arrival, the Pilot advised strongly against attempting another passage of Oshima Seto. (We had transited on a Sunday morning and the passage was entirely clear. On departure, however, it was thick with fishing vessels). A passage to the North of Azuchi O Shima is therefore recommended.

From Safety Regulations:

(i) Master should proceed carefully in Imari Bay to prevent grounding in shallow water (from Aoshima S.E. 1.3 miles, depth 12.4 m. – 13.8 m., Nohtori Asase depth 15.5 m.).
(ii) Under keel clearance shall be kept to more than 10% of maximum ship's draft.
(iii) Entering bay is prohibited under the following conditions:
  1. Wind force is forecasted to increase to more than 10 m./sec.
  2. Wave height is forecasted to be more than 1.0 m.
  3. Visibility is forecasted to decrease to less than 1.0 mile.
(iv) Boil-off gas blowing is prohibited in Imari Bay.
(v) Master shall be requested to proceed through Imari Bay during period from sunrise to sunset.
(vi) Master will be requested to keep ship's speed less than 8 knots while proceeding in Imari Bay.
(vii) The vessel should keep a good lookout by radar and sight.

Pilotage: Pilot compulsory for LPG tankers over 10,000 gross tons. The pilot boarding position is 33° 29′ N., 129° 40′ E., although this is not marked on the BA charts. The Pilot boarded from a tug and required the pilot ladder 2.0 m. from the water. Boarding daytime only. The vessel is then escorted to her berth by 2 or 3 tugs, one of which stations itself over a shoal (12.0 m.) patch within the bay as a marker. There is a 4 knot speed restriction in this area. Pilot guarded Channel 16 and worked Channel 6 VHF.

Length of pilotage about 1.5 hours to quarantine anchorage and thence to berth.

Restrictions: See "Approaches" and "Berthing".

Max. Size: 70,000 d.w.t., max. draft 15.5 m.

Health: If the vessel has a valid Sanitary Certificate the quarantine anchorage may be dispensed with and the vessel will be cleared alongside.

VHF: See "Pilotage".

Tugs: See "Pilotage".

Berthing: Vessels may berth either side alongside although they prefer to berth port side to, presumably to save time on arrival. Local regulations prohibit the connection of cargo lines after sunset.

Normal mooring configuration of 3, 3, 2, with lines on quick release hooks. Mooring boats in attendance.

A shore gangway is provided, length 15 m., extension ability 5 m. – 9 m., can operate to 33° above horizontal and to 17° below horizontal.

The following restrictions apply to berthing:

1. Max. wind force allowed: less than 10 m./sec.
2. Max. wave height allowed: less than 1.0 m.
3. Visibility allowed: over 1.0 sea mile.
4. Max. docking speed allowed: less than 10 cm./sec.
5. Max. docking angle allowed: less than 6°.

From Safety Regulations:

1. Should be port side alongside in principle.
2. Should use tugboat for berthing and unberthing.
3. Should keep berthing speed less than 10 cm./sec., berthing angle less than 6°.
4. Should use line boat for berthing.
5. When coming alongside berth, the ship's manifold to be used shall be clearly marked with "Flag N" so as to be easily distinguished by the Terminal Berth Master on the jetty.
6. Should be careful not to damage the berth facilities.

Discharging: Normal cargo survey procedure. However, the shore carry out their own determination of cargo S.G. and will use this figure for their own calculations.

Normal Japanese Safety Inspections and procedures. There is supposed to be a 4 hourly safety check throughout discharge.

The discharge presented no problems with a rate of 1,200 t.p.h. being achieved with 4 pumps.

A back pressure of 3.0 bar was stipulated but we worked constantly at about 3.2 bar without any complaint, tonnage rate apparently being their main consideration at the time.

Chicksans are purged with Nitrogen on completion.

Cargo Operation Specifications:

	Propane (Liq.)	*Propane (Vap.)*	*Butane (Liq.)*	*Butane (Vap.)*
Receiving capacity (cu.m./hr.)	2,000	2,700	2,000	2,300
Allowable max. pressure kg./sq.m.	10	10	10	10
Allowable temperature (°C)	−45	−45	−10	−10
Hose flange size from shoreside (inches)	12	10	12	10
	All 150 ASA			

Remarks: Unloading cargo operation of Propane and Butane shall be carried out at the same time.

Chicksan Arm Arrangements: From left to right looking shoreward: Propane vapour, Propane liquid, Butane liquid and Butane vapour.

This being the usual Japanese configuration of V.L.L.V. with dedicated lines.

Shore Vapour Blower Capacity:

Propane: Max. pressure 2,400 mm. Aq.
Max. quantity 5 t.p.h.
Butane: Max. pressure 2,400 mm. Aq.
Max. quantity 5.8 t.p.h.

Shore Tank details:

for Propane: Tank capacity 40,000 tons×2
Tank pressure 0.15 kg./sq.cm.
Tank temperature −45°C
for Butane: Tank capacity 40,000 tons×2
Tank pressure 0.15 kg./sq.cm.
Tank temperature −10°C

Nitrogen Supply:

Tank capacity: 27 cu.m. (in liquid)
Supply rate: 3,000 cu.m./hr.
Flange size: 1.0 in.

Flare capacity: 3,500 cu.m./hr.×1

Communications: Communication is by means of a telephone pla on board in the CCR. Level of English rather poor and an Agen invariably in attendance to assist.

Ship's Tel. No.: 380.

Shore Cargo Control Room Tel. Nos.: 350, 351, 352.

Fresh Water: Available from the berth but a minimum of 7 days' no was quoted for this service.

Tank capacity 350 cu.m, supply rate 17.5 cu.m./hr., Hose flange size 2.5

Water may also be taken by barge (prohibited during ca operations).

Fuel: Available by barge and must be taken at anchor.

Repairs: The main engines and other equipment for ship's manoeuv shall be in an operable condition and in a state of immediate readin while alongside the berth.

There are a number of contractors available for minor repairs, w the usual restrictions on hot work and the movement of large me objects. There is a large shipyard within the area which co presumably handle emergency repairs.

Surveyors: Nearest Lloyd's Surveyors are at Nagasaki and Moji.

Gangway/Deck Watchmen: Whilst alongside at the terminal be responsible member of crew shall be stationed at the ship's gangw to advise visitors of safety regulations and to check visitors and cr members.

Storing: Stores may be loaded from the quay but not whilst wor cargo.

Shore Leave: Ship's crew and visitors shall take the route through terminal shown on the map in the terminal information booklet.

Ship's crew should carry Landing Permit which is issued by Japan Immigration Officer.

No smoking shall be allowed in the terminal.

When taking photographs of the terminal, permission should obtained from the Terminal Representative.

Regulations: Following are extracts from the Terminal Sa Regulations.

Cargo handling operation shall be stopped and the vessel shal shifted to a safe anchorage under such conditions as follows:

1. When Harbour Master or Maritime Safety Agencies order sh Master to shift vessel.
2. Wind force is forecasted to increase to more than 15 m./sec.
3. Wave height is forecasted to be more than 1.0 m.
4. Visibility is poor (less than 200 m.).
5. Thunderstorm is forecasted to be approaching.
6. When LPG vapour accumulation is present on the deck.
7. When a fire occurs either on the vessel or in the vicinity.
8. When warning of approaching tidal wave is received.

Smoking shall be prohibited onboard when Chicksan arms are be connected or disconnected.

Fire wires shall always be lowered to sea level over the off-side b and quarter to enable tugs to connect up rapidly in an emergency.

Lubricant pressure of stern tube shall be maintained lower than s water pressure.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 copy Voyage Memo (last 3 months).
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, cam wrist-watch, radio, firearms/swords etc. (only at first port of cal Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Ca Manifest and Cargo Manifest in Transit using specific forms. There ship's Agent should be provided with necessary information about de of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and or Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication with Inland Sea pilot stations. Also see "Shipmaster's Report" before first port.

Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Moji". In event bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki Pilot Station.

ISHINOMAKI: 38.23 N. 141.19 E. (See Plan)

PORT LIMITS: Within the area of points A, B, C, D, E and F.

(A)	38° 24.70′ N.	(B)	38° 23.87′ N.	(C)	38° 23.74′ N.
	141° 20.05′ E.		141° 21.14′ E.		141° 19.30′ E.
(D)	38° 22.90′ N.	(E)	38° 22.55′ N.	(F)	38° 24.50′ N.
	141° 19.30′ E.		141° 15.33′ E.		141° 14.67′ E.

DOCUMENTS Necessary documents for speedy clearance are as follows:

5 Crew Lists.
5 Passenger Lists, if any.
Health Declaration.
Voyage Memo.
Ship's Stores List.
Crew's Baggage List.
Ship's Register.
Derat Exemption Certificate.
Bill of Lading.
Last Port Clearance.

PILOTAGE: Address: 35-8 Ban, 1-Choume Teizandoori, Shiogama City, Miyagi Pref., Japan. Tel: 022-364-1727.

Pilot's boarding and leaving positions:
Pilot boarding – 1.5 nautical miles off Hibarino breakwater.
Pilot leaving – around lighthouse off Hibarino breakwater.

Pilot not compulsory. Pilot requirement to be made by Agent on previous day. Tug normally used as pilot boat, and it can be contacted on VHF Channel 16 in daytime. Pilot ladder must be 2.0 m. above water. Pay attention to fishing nets around the Pilot Station.

ANCHORAGES: Quarantine Anchorage: Depth 11 m. – 14 m. Bottom is mud and sand. Anchorage is within the area surrounded by points A, B, C and D.

(A)	38° 23.25′ N.	(B)	38° 22.94′ N.
	141° 19.00′ E.		141° 19.05′ E.
(C)	38° 22.74′ N.	(D)	38° 23.06′ N.
	141° 17.00′ E.		141° 16.95′ E.

RESTRICTIONS: If Master requests a pilot for entry, pilot is available from 0630 hrs. to 1600 hrs. Winter time, and from 0600 hrs. to 1800 hrs. Summer time.

Draft restriction: Channel depth 10.0 m. at LW.

MAX. SIZE: Limited by draft. Minimum under-keel clearance of 10% of ship's draft required.

HEALTH: Normally Quarantine Officials board upon ship's arrival in daytime only. If ship has Sanitary Inspection Certificate, Radio Pratique is available. If ship arrives after calling at another port in Japan, Pratique is automatic.

RADIO: Choshi Radio and Nagasaki Radio are best. If ship is equipped with telex, it can be used to contact receivers.

VHF: No radio station at Ishinomaki. Only tug has VHF Channel 16.

RADAR: No port radio service at Ishinomaki.

TUGS: 2 tugs, 2,600 h.p. and 3,000 h.p.

BERTHING:

IWAKUNI, Yamaguchi Bay: 34.10 N. 132.14 E. (See Pla

DOCUMENTS: When vessel arrives direct from a foreign port, Custo Officials will board to search, and the following documents are to b submitted:

Ship's Register.
International Tonnage Certificate.
Voyage Memo (Ports of call).
Last Port Clearance.
3 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, came wrist-watch, radio, firearms/swords, etc. (only at first port of cal Japan).

Ship's Agents will prepare Inward/Outward Declaration, Ca Manifest and Cargo Manifest in transit using specific forms. There ship's Agent should be provided with necessary information about dis of cargoes in advance.

PILOTAGE: Not compulsory. Pilots available at Quarantine Anchorage, when required. Inland Sea Pilot not compulsory from Sekisaki to Iwakuni. Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Cable address "Ansin Moji". Inland Sea Pilot Association covers all Inland Sea ports.

Pilots obtained from 1 of 3 pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea Pilot Stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position Lat.. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Cable address "Anjin Moji". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGES: 7 anchorages, one for "Quarantine" and repairing, etc., others for discharging logs.

(a) Quarantine, Lat. 34° 11′ 12″ N., Long. 132° 14′ 21″ E. minimum depth 27 m.

(b) Discharging area as follows:

Vessel under 5,000 g.r.t. depth 23 m.	Vessel over 5,000 g.r.t. depth 24 m.
No.1 34° 11′ 26″ N., 132° 16′ 00″ E.	No.A 34° 10′ 34″ N., 132° 15′ 54″ E.
No.2 34° 11′ 10″ N., 132° 16′ 10″ E.	No.B 34° 10′ 07″ N., 132° 16′ 06″ E.
No.3 34° 10′ 48″ N., 132° 16′ 18″ E.	No.C 34° 09′ 42″ N., 132° 16′ 45″ E.

Nature of bottom mud. Minimum bottom width no limit.

RESTRICTIONS: Day and night entry possible.

HEALTH: Radio Pratique available. At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Tugs normally join vessel at Quarantine area. Tug's lines to be used free of charge. 3 tugs available, 1×3,000 h.p., 1×3,200 h.p. and 1×3,400 h.p.

BERTHING: No berthing from sunset to sunrise. At least 2 hours notice of arrival necessary to reach berth, in event of direct arrival from foreign country.

IZUHARA: 34.11 N. 129.17 E. (See Plan)

DOCUMENTS: The following documents are to be submitted on arrival:
Ship's Register and/or International Tonnage Certificate.
Last Port Clearance.
5 Crew Lists and Passenger Lists, if any.
3 Voyage Memos (Ports of call covering last 2/3 months).
1 Declaration of Health.
1 Ship's Stores List.
1 Declaration of Crew's Baggage.

Inward/Outward Declaration, Cargo Manifest and other necessary papers will be prepared by ship's Agents, using Customs forms. A vessel is, therefore, requested to provide Agents in advance with necessary information regarding cargoes, etc.

PILOTAGE: Not available.

ANCHORAGE: Lat. 34° 11.3′ N., Long. 129° 18.2′ E.

RESTRICTIONS: No restriction on entry into and/or departure from anchorage during daytime or night time.

MAX. SIZE: No restrictions on length or breadth for any vessel entering port, but max. safe draft is 5.2 m.

HEALTH: Radio Pratique is available provided vessel possesses valid Japanese Sanitary Inspection Certificate and Derat Exemption Certificate.

Radio Agent for Free Pratique not more than 36 hours before arrival, advising full details of vessel and health condition on board. When Free Pratique is granted by radio, vessel will be required to submit the following documents to Quarantine Office on arrival alongside the berth:
Maritime Declaration of Health.
Crew List, Passenger List and Voyage Memo.
Derat Exemption Certificate (copy).
Declaration Inward.

The following vessels will not be able to obtain Radio Pratique:
(i) A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.
(ii) If a vessel has on board any case, or suspected case, of infectious disease within 15 days of arrival. If a vessel does not possess a valid Derat Exemption Certificate.
(iii) If vessel arrives from cholera infected area within 10 days, Master must advise crew and passenger's health condition to respective Quarantine Office through ship's Agent, prior to arrival, and close all soil pipes before entering port.

RADIO: Recommended that Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. Westbound vessel to contact Choshi Radio, and Northbound vessel to contact Nagasaki Radio respectively.

VHF: No VHF service available.

TUGS: No tug available, but tugs can be brought from nearby ports (Hakata/Imari/Sasebo), if required.

BERTHING:

Name of Berth	*Length* (m.)	*Max. Permissible Draft* (m.)
Izuhara No. 1	105	5.0
Izuhara No. 2	180	5.2
Kuta Wharf	180	5.2

BRIDGES: None.

STEVEDORES: Not available. Cargo consignees will arrange gangs.

TANKERS: No facilities.

MEDICAL: Facilities available, but advance notice required.

FRESH WATER: Available from hydrants at Izuhara Wharves No. 1 and 2.

FUEL: Not available.

CONSULS: No consuls locally. Marine Note of Protest can be made at local Notary Public.

REPAIRS: No facilities locally. Technician despatched from Moji, if required.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: None.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages.

CUSTOMS ALLOWANCE: Only allowed 60 cigarettes to take ashore, but no spirits.

CARGO GEAR: No special requirements. See "Certificates".

REPATRIATION: Possible.

AIRPORT: Fukuoka Airport, about 40 minutes by airplane and 1 hour by ferry.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance and Fire 119.
TELEPHONES: Not possible to place telephones on board.
SHORE LEAVE: Local Immigration Offices issue shore passes valid for 15 days, when Izuhara is first port of call in Japan. Extension is possible if ship stays longer.
SERVICES: All services available from Moji, if required.
GENERAL:
Customs: Stationed at Moji Customs, Izuhara Branch Office. Tel: 09205-2-112.
Immigration Office: Stationed at Fukuoka Immigration Office, Izuhara Port Office. Tel: 09205-2-0432.
Quarantine Office: Stationed at Hakata Quarantine Office, Izuhara Hitakatsu Office. Tel: 09205-2-0089.
Maritime Safety Agency: Stationed at Izuhara Maritime Safety Agency. Tel: 09205-2-1100.
Port Authority: Stationed at Tsushima Branch Office, Nagasaki Pref. Tel: 09205-2-2961.
Tidal Range: Average HWL (+) 2.3 m.
AUTHORITY: Mayor's Office. *Tel:* 09205-2-2961.

AGENT: Sub-agents of Aall Barwil Agencies.

KAGOSHIMA: 31.35 N. 130.33 E. (See Plan)

DESCRIPTION: Port situated in Kagoshima Bay, the Southern part of Kyushu and consists of 8 sections as follows:

Old Harbour (Honko): Divided into Inner Harbour sheltered by breakwaters which can accommodate up to 3,000 tonners, and Outer Harbour, (open roads) where large size vessels lie at anchor.

New Harbour: Adjacent to Main Harbour on the South. This section also sheltered by breakwaters and a 10,000 tonner can be accommodated.

Kamoike Harbour: Located about 7 km. away from old harbour on South side. There is a ferry terminal to Osumi Peninsula.

South Harbour: Located about 7 km. away from old harbour on South side and used for small coasters.

Lumber Harbour: Located about 11 km. away from old harbour on South side and used for log carriers, a 15,000 tonner can be accommodated.

Taniyama District No. 1: Located about 14 km. away from old harbour on South side. Facilities include warehouses for feed storage and docking area for international passenger ships. A 65,000 tonner can be accommodated.

Taniyama District No. 2: Located about 16 km. away from old harbour on South side, and used for oil storage. A 10,000 tonner can be accommodated.

Hamahirakawa Harbour: Located about 21 km. away from old harbour on South side. Also has a yacht harbour.

DOCUMENTS:
Customs: When vessel arrives direct from foreign port, Customs Officials board for search. Following documents to be submitted:
Crew List.
Passenger List.
Manifest of crew personal effects (must be signed by individual crew member).
Stores List.
Arms and Ammunition List.
Narcotics List.
List of ports of Call on current voyage.
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration inward/outward.

Following will be checked on board: Ship's Registry; Last Port Clearance.

When vessel comes from Japanese port, Customs Officials will not attend on board, except in special case. Master or Agents to attend Custom House for entry formalities with following documents:
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration inward/outward.
Ship's Registry.
Last Port Clearance.
Documents entrusted with the Master by Customs at previous port.

On vessel's departure, a clearance is issued by Customs, after confirming payment of tonnage dues.

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

Immigration: Immigration Officials attend from Kagoshima Immigration Office. They board vessel on arrival at berth to examine Passports, Discharge Books and/or other equivalent travel documents, and provide 15 day landing passes for crew members. One copy each of Crew List and Passenger List are required by them. Providing ship's Agent with a Crew List beforehand will be a great help in expediting Immigration business on vessel's arrival.

When vessel stays in port more than 7 days and calling at one only, or 15 days and calling at several ports in Japan, the Land Passes will be extended every 7 days or 15 days on application. In ev that crew members without entry visas are to be landed for repatria or transfer, Immigration will not permit their landing unless passage either sea or air, ensuring the prompt departure from Japan (wi 72 hours) of these men, has been booked, or unless vessels to wh they are to be transferred, arrive in Japan within 5 days.

PILOTAGE: Not compulsory for Quarantine Anchorage or Taniya Wharves. Agent gives 24 hours notice to Kagoshima Pilot Associa and advises if ETA changes.

ANCHORAGE: Quarantine Anchorage: Lat. 31° 33′ N., Lon 130° 35.5′ E., depth of water 20 m. – 30 m. Anchorage is used vessel's Quarantine procedure, if the vessel comes from foreign po and by vessels waiting for orders.

Off Taniyama: Lat. 31° 30.5′ N., Long. 130° 34′ E., depth of wa 20 m. – 30 m. Anchorage is used by vessels waiting for a pilot, and a vessels which are not granted Radio Pratique.

RESTRICTIONS: Berthing and unberthing during daylight hours on If weather is good, unberthing is possible up to 2100 hrs.

HEALTH: Radio Pratique message will be accepted if vessel has a va Japanese Sanitary Certificate.

If vessel is not in possession of a certificate, Pratique formalities take place at the Quarantine Anchorage.

Radio Pratique message must be sent to vessel's Agent wi 36 hours before arrival. When Pratique is granted by radio, vessel be required to submit the following documents to Quarantine Officer arrival:
Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to obtain Radio Pratique:
(i) A vessel that has been in contact with an infected area, o suspected infected area, within 15 days prior to arrival.
(ii) If a vessel has on board any case, or any suspected case infectious disease, within 15 days of arrival.
(iii) If a vessel does not possess a valid Derat or Derat Exemp Certificate.

RADIO: Recommended that Master contacts Agent through Cho Radio or Nagasaki Radio which covers all ports in Japan. If Westbo via Chosi and Northbound to Nagasaki respectively.

TUGS:

"Wakashio Maru No. 2"	Twin diesel vessel 3,200 h.p.
"Kiire Maru No.8"	Twin diesel vessel 3,200 h.p.
"Eiko Maru"	Twin diesel vessel 3,200 h.p.
"Sinko Maru"	Twin diesel vessel 3,000 h.p.

BERTHING:

Berth	*Length* (m.)	*Depth* (m.)	*Max.Draft* (m.)	*Remarks*

STEVEDORES: Working hours are 0830 hrs. – 1630 hrs. Overtim working is normally only for finishing cargo. No work on Sundays holidays.
Discharge rates:
Bagged cargo (meal products) – 300 tonnes per gang/day.
Bulk cargo (meal products) – 700 tonnes per gang/day.
Bulk cargo (corn/sorghum at Grain Silo Dolphin) – 4,000 tonnes gang/day.
Logs – 5,000 cu.m. per gang/day.

MEDICAL: Chuo Hospital, Municipal Hospital, Yotsumoto Dental Pl Igo Oculist. No advance notice required unless urgent.
TANKERS: No tanker berths at Kagoshima, but Central Terminal Sta (C.T.S.) in Kagoshima Bay. See "Kiire".
FRESH WATER: One 200 ton water barge available with adva notice. Hydrants at wharves in main harbour. Rate of delivery: 50 t from hydrants at Taniyama Districts No. 1 and 2; 20 – 30 t.p.h. fr hydrants at Old Harbour and New Harbour.
FUEL: Not available. Lightered from another port. Ample notice so necessary lighterage can be arranged.
REPAIRS: Hull/engine repairs are available at Kagoshima Dockyard Iron Works and Kikukawa Iron Works.
GANGWAY/DECK WATCHMEN: Not specifically required unle passengers or valuable cargo on board.

English speaking watchmen are available but advance notice required.
OPENING/CLOSING HATCHES: Crew open/close hatches.
CERTIFICATES: Ship's Register to show Customs Inspector registe gross and nett tonnages. Valid Cargo Gear Certificates someti required by stevedores when cargo gear's maintenance appears po
CUSTOMS ALLOWANCES: 400 cigarettes and 3 bottles of spirits take ashore.
REPATRIATION: Possible.
AIRPORT: Kagoshima International Airport. Located to the Nor 50 minutes' drive from centre of Kagoshima City. Flights availab Fukuoka, Osaka, Tokyo, Okinawa, Hong Kong and Seoul.

TIME: GMT plus 9 hours. No alterations to clocks during year.
HOLIDAYS: See "Tokyo".
WIND/TIDE: N.W. wind prevails in Winter season and Easterly wind in Summer. Wet seasons in June and July. Average tidal range 2.74 m. in the outer harbour. Flood tide sets to North and ebb to South. Maximum speed of current 2 – 3 knots. Current in inner harbour is less than 1.0 knots.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 day extension possible if vessel stays longer. Also see "Regulations".
GARBAGE DISPOSAL: Garbage collection is not permitted for foreign vessels at this port.
WASTE OIL DISPOSAL: Three companies operate this service for domestic vessels. Because it is necessary for them to be authorised by the Ministry of Transport, this service is not available for foreign vessels. Further enquiries could be made at Nagasaki or Kitakyushu Port.
SEAMAN'S CLUBS: None. However, there is an inn called the Kagoshima Port and Harbour Labor Welfare Center (Kagoshima Kowan Loudo Fukushi Center in Japanese) for seafarers, which provides accommodation and meals only. Meals are provided at extra cost. The overnight charge at Yen 1550 is reasonable. Address: 22-1 Jyonan-cho, Kagoshima City. Tel: (0992) 26-0626.
CURRENCY: Yen.
There is no local currency restrictions placed upon seafarers.
REGULATIONS: Immigration Officials board vessel on arrival to examine Passports, Discharge Books and/or other equivalent travel documents and provide 72 hour landing passes for crew members and passengers. 1 copy each of crew list and passenger list required by them. Providing ship's Agent with a Crew List beforehand will be a great help in expediting immigration business on vessel's arrival. When vessel stays in port more than 72 hours, the landing passes may be extended 72 hours on application. In the event that crew members, without entry visas, are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men has been booked, or unless vessels to which they are to be transferred, arrive in Japan within 5 days.
SERVICES: Cargo Survey. Provisions and Stores. Fumigation – Toyo Fumigation attend from Moji on request.
AUTHORITY: Kagoshima Port and Harbour Office, 18-16 Izumi-Cho, Kagoshima City, 892 Japan. *Tel:* (0992) 23-3277. *FAX:* (0992) 24-2832. *Contact:* Tadao Sarukawa, Director.
AGENT: Sub-agents of Aall Barwil Agencies.
Green Shipping Ltd., Moji, 9-7 Minato Machi, Moji-ku, Kitakyushu City, Fukuoka Pref., 801 Japan. Tel: 093-321-4161. Telex: 7153-11 Greenm J. Fax: 093-321-4288. Cables: Greenship Moji.

KAKOGAWA (Including Higashi-Harima):
34.42 N. 134.50 E. **(See Plan)**

Port is for sole use of the Kobe Steel Co. Ltd. Declared open port as of 1st May 1970, but vessels should first call off Kobe to obtain Free Pratique, Customs clearance and Pilot.

Also see "Shipmaster's Report" dated June 1985.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
1 List of Ports of Call, for Customs.

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

Also see "Shipmaster's Report" dated June 1985.
PILOTAGE: Pilot will board at Tomogashima Pilot Station (Lat. 34° 10′ N., Long. 135° 00′ E.) due to compulsory pilotage. Pilot will be arranged by Agent subject advance request and usual ETA advices.
Also see "Shipmaster's Report" dated June 1985.
ANCHORAGES: There are 6 anchorages off Kakogawa. However anchorage is treated as Non-Open port, so nobody can visit the vessel, and nobody can come ashore from vessel during her stay at anchorage, except in an emergency.
RESTRICTIONS: Mooring/unmooring conducted daylight hours only.
MAX. SIZE: Kobe Steel, Berth No. 4: 165,000 d.w.t. (or 320,000 d.w.t., LOA 330 m. with part load).
HEALTH: Vessel must call off Kobe for Free Pratique. At first port call in Japan, vessel must obtain Free Pratique. Radio Free Pratique available if vessel has valid Japanese Sanitary Inspection Certificate and Derat Exemption Certificate. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel, to contact Chosi, and Northbound to contact Nagasaki Radio respectively.

BERTHING:

	Length	*Depth*	*Max. Size*
Pier W-5	240 m.	11.90 m.	35,000 d.w.t.
Pier W-6	275 m.	11.90 m.	35,000 d.w.t.
LPG Dolphin	77 m.	16.00 m.	70,000 d.w.t.
Scrap Pier	250 m.	11.10 m.	25,000 d.w.t.
South Pier	450 m.	6.80 m.	—

Depth at low water is 17 m. in the fairway which is 400 m. wide.

Kobe Steel:

Berth	*Length* (m.)	*Depth* (m.)	*Max.LOA* (m.)	*Max.Draft* (m.)
E-5 *	450	17.0	330	16.0
E-4	400	17.0	330	16.0
E-3	300	14.5	239	14.5
E-2	200	14.0	190	12.5

* Lay-by berth, not available for discharging cargo.

Products Handled Coal and ore.

Cranes: 4 × 1,500 t.p.h. at E.4; 1×700 t.p.h. at E.3; 2×35 ton at West Wharf (No. 5) and 2×35 ton at West Wharf (No. 6).
MEDICAL: Treatment has to be arranged at Kakogawa.
FRESH WATER: Available from quay. Rate 30 – 40 t.p.h.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

Bunkers supplied by barge at berth under the following conditions:
(a) Supply limited to 80% of tank capacity.
(b) Supply only during following times:
  (i) May – August, 0900 hrs. – 1600 hrs.
  (ii) September – April, 0900 hrs. – 1400 hrs.
(c) Two surveyors must be present during bunkering.

REPAIRS: Arranged from Kobe.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor. Ship's Register and International Tonnage Certificate must be shown to stevedores.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
REPATRIATION: Possible, through Kobe. Nearest airport is Osaka.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 7 days, but 7 days extension possible if ship stays longer.

SHIPMASTER'S REPORT: When the vessel anchors off Kobe in the Roads, "Kobe Harbour Control" will call on VHF Channel 16 and ask for anchoring time and position from Kobe Headlight.

The maximum draft at Higashi Harima is 16.0 m.

Vessels always berth port side alongside. The gangway should be lowered as soon as possible to let the officials aboard.

The vessel loaded 112,000 metric tons in 60 hours, previously the same amount had been loaded a little quicker.

Bilge water, oil or garbage should never be thrown overboard because owners have to pay compensation to the Fishermen's Union.

Berthing takes place 2 hours before high water.

SHIPMASTER'S REPORT: June 1985.
Pilotage/Sanitary Inspection: If vessel in possession of valid Japanese Sanitary Inspection Certificate and has been granted Radio Free Pratique, the Inland Sea Pilot boards 5 miles S.S.W. of Kobe Lt. This Pilot berths the vessel at Kakogawa.

Customs clearance and other formalities, in this event are carried out after berthing at Kakogawa.

Pollution: Penalties and mandatory compensation are particularly severe for any form of pollution. A floating save-all barrier is placed around the ship. This would appear to be as much for identifying offenders, as for preventing the spread of pollution.

When discharging coal, petroleum-coke or ore at the West Wharf (Kobe Steel Co.), scuppers must be efficiently plugged to prevent overside pollution in the event of rain or ballasting overflows. One selected scupper outlet is connected to a shore drainage hose.

Shore Leave: At West Wharf and LPG Jetty, ship's personnel are not permitted to traverse the wharf or any other roadway or part of the steelworks on foot.

Kobe Steel Ltd., Kakogawa Works, does not provide any form of transport inside the complex, so a taxi schedule must be arranged through the Agent, between ship and Kakogawa (JNR) railway station. Frequent trains to Kobe – about 35 minutes. Kakogawa, itself has reasonable shopping facilities in the vicinity of the railway station.

SHIPMASTER'S REPORT: May 1991.

Vessels arriving on maximum draft of 16.00 m. usually berth at No. E4, and then lighten to 13.5 m. before shifting to No. E3. The shore personnel say that 13.5 m. draft is ideal, but vessels may be 14.0 m. or maximum 14.5 m. for shifting. The cost of this shift is borne by Kobe Steel. Normally 3 tugs and 1 pilot are used, 1 tug each end at break of forecastle and starboard quarter, and 1 tug amidships just pushing.

Usually 2 pilots are used for berthing at this port. From anchorage, 4 tugs (1 each bow and 1 each quarter) are made fast before anchor is hove up. When inside the breakwater, the port side tugs let go and put up lines on the starboard side. A boom is put around the ship. The 2 pilots are a regulation, but only one pilot undertakes pilotage duties. "N" flag on the jetty indicates where the bridge front should be. For positioning the ship, for the last few metres the tugs are used and not the engines.

Crew signing off must be cleared through Immigration before the vessel departs from Japan. This is especially important during the "Golden Week", when the Immigration Office is closed on several days.

Kakogawa is a good place for shopping, especially around Kakogawa Central Station. Shop prices vary considerably, and it pays to look around.

We arrived in Japan just at the start of the "Golden Weekend". I am not sure if it is Golden Week or Golden Weekend. I received conflicting reports locally. It does apparently mean about 10 days of holidays for the local non-essential workers. The Emperor's birthday refers to the last Emperor. (I believe the new Emperor's birthday is 27th December). It seems every day is a holiday from 27th April to 6th May, except for the 2nd and 3rd of May, which were ordinary working days.

On the official holidays, telephone calls to the U.K. are 20% cheaper, about U.S.$ 2.00 per minute.

AUTHORITY: Kakogawa Doboku (Public Works) Office, 97-1, Tenjingi, Jike-machi, Kakogawa City, Hyogo Pref. *Tel:* (0794) 21-1101.

AGENT: Sub-agents of Aall Barwil Agencies.

Shinko Kakogawa Koun Co. Ltd., 35, Kanazawa-cho, Kakogawa City, Hyogo, 675-01 Japan. Tel: (0794) 35-1281/3. Telex: 5654568 Sk Koun J. Fax: (0794) 35-1917. Cables: Koun Kakogawa.

KAMAISHI: 39.16 N. 141.55 E. (See Plan)

DOCUMENTS:

Ship's Register. Last Port Clearance. 6 Crew Lists including Passport Numbers. 4 Passenger Lists. 1 Stores List and 2 Lists of Ports of Call.

1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Pilot not compulsory, but arrangeable at Master's request. Pilot arranged by Agent and vessel required to radio Agent ETA 24 hours before ship's arrival. Pilot boat has no facility to communicate, nor particular light or sound signals, but flies Pilot flag "H". Pilot boards at Lat. 39° 16′ N., Long. 141° 59′ E. About 1 mile N.N.E. of Osaki Point. No alternative area in event bad weather.

ANCHORAGE: Up to 4×30,000 d.w.t. vessels can safely anchor. Max. size at anchorage 120,000 d.w.t. Depth of water: 31 m. – 43 m. at Quarantine Anchorage.

RESTRICTIONS: Vessel free in and out anytime.

MAX. SIZE: Draft 14 m. and LOA 300 m. (915 ft.) Breadth no restriction.

HEALTH: *Quarantine Anchorage:* Located in Western semi-circle of 500 m. radius with centre at Lat. 39° 15′ N., Long. 141° 55′ E. This area is also used for urgent anchorage.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Chosi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Tugs (2) join vessel at anchorage and tugs' lines used free of charge.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agents to arrange stevedores. Vessel must constantly keep Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1630 – 2130 hrs. 60% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 100% additional.

MEDICAL: No advance notice required unless urgent.

DENSITY: Winter 1026-1027. Summer 1023-1024.

FRESH WATER: Available from wharf by hose. Rate of delivery: about 10 t.p.h. – 15 t.p.h. No water barge.

FUEL: Domestic diesel oil (Bunker A) is available. Bonded oil will be brought from Sendai, Yokohama and Kashima with sufficient advance notice.

CONSULS: None.

REPAIRS: Minor repairs such as welding, piping, lathing works, etc. only.

DRY DOCKS: None.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector sh registered gross and nett tonnages. Valid Cargo Gear Certifica sometimes required by stevedores when cargo gear's maintena appears to be poor.

REPATRIATION: Possible.

AIRPORT: Hanamaki, distance 100 km. (2 hours by car). Toa Dome Airlines (TDA); 3 flights between Hanamaki/Tokyo everyday, 2 fl between Hanamaki/Osaka everyday and 1 flight between Hanam Sapparo every day.

TIME: GMT plus 9 hours. No alterations made to clocks during yea

POLICE/AMBULANCE/FIRE: Police 2-4536 (Headquarters) and 3828 (Water Police Station); Ambulance 119; Fire 119.

TELEPHONES: No facilities for placing telephones on board.

SERVICES: Surveyor, tally, hold cleaning, tank cleaning.

GENERAL: Discharging ex-gearless vessel not possible at anchora

SHORE LEAVE: Local Immigration Offices issue shore pass valid only 3 days, but 3 days extension possible if ship stays longer.

AUTHORITY : Port and Harbour Dept, Iwate Prefecture Governme 10-1 Uchimaru, Morioka City, Iwate Pref., 020 Japan. *Tel:* (0196) 3111. *Contact:* Masanao Takeda, Director, Port & Harbour Departme

DOCUMENTS:

Ship's Register.
International Tonnage Certificate.
Last Port Clearance.
5 copies Crew List.
5 copies Passenger List (if passengers onboard).
1 copy Stores List.
1 copy Declaration of Crew's Baggage (only at first port of cal Japan).
Voyage Memo (last 3 months).
Crew Member's Passports/Seaman's Books (only at first port of c

Ship's Agent will prepare Inward/Outward Declaration, Cargo Mani and Manifest in Transit, using specific forms, therefore ship's Ag should be provided with necessary information about details of carg in advance.

Inward/Outward Declaration and Application of Crew Membe Landing Permits will be prepared by Ship's Agent.

PILOTAGE: Pilotage should preferably be arranged through Agent telegram, telex or telephone, 36 hours prior to vessel's arrival.

Pilot requests amendment to ETA at least 4 hours prior to vess arrival, but only during the daytime.

Pilot boarding position: 36° 37′ 51″ N., 136° 35′ 10″ E. (n Quarantine Anchorage).

In case of bad weather, and pilot cannot board at boarding positi which is located outside of breakwater, pilot will give advice to Mast Vessel will proceed to inner breakwater or change the boarding positi etc. Vessel will be advised by VHF radio.

ANCHORAGES: See "Pilotage".

RESTRICTIONS: Anchoring at Inner Harbour (breakwater) is prohibi But in emergency cases, vessel should contact Maritime Safety Agen

Passage inward or outward to/or from Inner Harbour at night tim not advisable.

MAX. SIZE: Max. LOA: No special requirements, but refer to Port Of when necessary.

Max. draft: 10% U.K.C. required when berthing at pier.

For Oil (Sekiyu) Pier: Draft must be under 6.20 m.

HEALTH: Radio Pratique is available. Master must submit follow documents to Quarantine Officer after entering the port (through sh Agent):

Maritime Declaration of Health, Derat Certificate, Sanitary Inspec Certificate, Crew List, Inward Declaration by Ship's Agent.

At first port of call in Japan, if Radio Pratique is not availa Quarantine Officers attend vessel, only from daylight to sunset, Master to show all Vaccination Lists/Cards and Derat Exemp Certificate.

In case vessel arrives from cholera infected area within 10 da Master must advise crew and passenger's health condition to Quarantine Officer.

RADIO: Recommended that Master communicates with Agent throu Choshi Radio or Nagasaki Radio, which cover all ports in Japan.

VHF: No Port Radio Station at Kanazawa. In emergency cases, ves should contact "Fushiki Hoam" (Maritime Safety Agency) on V Channel 16, but communication is limited to Port Regulation matt However, pilot can talk to you from pilot boat or from the pier (by p owned VHF-radio). When approaching or when within radio range whilst at the anchorage, vessel should maintain listening watch on V Channel 16.

TUGS: 1 tug of 2,700 h.p. is available ("Inuwashi Maru", owned Prefectural Government). Usually tug's line is used for berthing a unberthing. Additional tugs are not available.

BRIDGES: None.

MEDICAL: No advance notice required, except on Sundays, holid and in an emergency.

DENSITY: Average 1022. The density is not affected by tide.

FRESH WATER: Available from pipeline on piers. Cost: Yen 340

FUEL: No bunker supply facilities.

BERTHING:

Name of Berth	Length (m.)	Depth (m.)	Permissible Draft (m.)	LOA (m.)	Capacity (d.w.t.)
Sekiyu Pier	600	7.0	6.2	600	6× 5,000 (Tanker)
Muryoji Tottei	270	5.5	5.0	80	3× 2,000
Muryoji Pier	390	7.5	7.5	390	3× 5,000
Tomizu Pier	370	9.0	8.3	370	2×15,000
Gokuden Pier	370	9.7	8.7	370	2×15,000
Gorojima Pier	220	9.0	8.3	240	1×10,000

Usually load/discharge is done by ship's own gear.

CRANES:

Type of Crane	Owner	Working Load	Number
Tower Crane	Kanazawa Koun Co.	20 tons	1
Truck Crane	Kanazawa Koun Co.	50 tons	1
Truck Crane	Ishikawa Prefecture	50 tons	1
Truck Crane	Kanazawa Koun Co.	80 tons	1
Truck Crane	Ishikawa Prefecture	200 tons	1

BULK CARGO FACILITIES: No facilities available.

SPECIALISED CARGO HANDLING FACILITIES: Facilities for handling L.P.G. at Sekiyu Oil Pier No. 5 and 6.

STEVEDORES: Stevedores available in daytime on weekdays, except on national/local and stevedores' holidays.

At least 24 hours prior notice, excluding Sundays and holidays required in order for Agent to arrange stevedores.

TANKERS: See "Berthing".

3 oil fences are available at both ends and centre of the Sekiyu Pier.

FIRE PRECAUTIONS: Night time working is prohibited. Cars and trucks require permission from Fire Department to enter.

CONSULS: None.

REPAIRS: Only minor repairs possible.

DRY DOCKS: None.

SURVEYORS: None locally, can be arranged from Tokyo, Yokohama and Kobe area.

GANGWAY/DECK WATCHMEN: Not specially required.

HATCHES: Stevedores will open and close hatches if requested, but normally undertaken by crew.

CUSTOMS ALLOWANCES: Under Customs law, 200 cigarettes and 1 bottle of whisky for each crew member a week to be held out of bond.

REPATRIATION: Possible.

AIRPORT: Distance from Kanazawa Port to Komatsu Airport is about 50 km. Regular domestic flights: Komatsu – Tokyo: 6 flights a day. Komatsu – Fukuoka: 2 flights a day. Komatsu – Sapporo: 1 flight a day. Komatsu – Sendai: 1 flight a day (suspended during Winter). Komatsu – Okinawa: 1 flight a day.

International flights: Komatsu – Seoul (Republic of Korea): 2 flights a week (Tuesday and Friday). Seoul – Komatsu: 2 flights a week (Monday and Thursday).

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: Sundays, national holidays, local holidays, New Year's Holidays. Other provisional holidays arranged by stevedores.

POLICE/AMBULANCE/FIRE: Police Tel: 110. Ambulance/Fire Tel: 119.

TELEPHONES: No arrangements for placing telephones on board.

SERVICES: Radar repairs possible, but depends on manufacturer.

BANKS: Hokkoku Bank (Toiya/machi Branch), 66, Toiya-machi, 2-chome. Tel: 37-6404.

STORING: See "Prelims".

(1) Vessel will be stored by truck.
(2) Consultation needed with stevedores, in case of dangerous cargo stored on the pier or fumigation of logs going on at the pier. Trucks will be regulated by law (Harbour Master and Plant Quarantine Laws, etc.).
(3) Trucks can proceed alongside the berth, but only when stevedores are not working onboard or at the pier (after working hours, lunch time, stevedore's holiday, etc.).
(4) Forklift trucks not used on the jetty for storing.
(5) Must receive Customs permission before storing (Declaration of Loading of Ship's Stores).
(6) No local riggers available.

SHORE LEAVE: Local Immigration Officers issue shore passes valid for 15 days.

EMERGENCY CO-ORDINATION CENTRE:
Sea accident (Maritime Safety Office): 67-4999.
Port Fire Department: 38-1300.

GENERAL: Kanazawa Port is an artificial river port, designed at the mouth of the Ono River. Since outside of the breakwater is open sea, Master is requested to pay attention to safety while at the outside anchorage, particularly during Winter season. Also, requested to be very careful about fishing nets and fishing boats.

During and after the rain, a large quantity of river water flows into the port, and current near the pier becomes fast, about 1.5 knots, so Master must take it into account.

Official: Kanazawa Branch Customs: Tel. 67-4490.

Detached Office of Niigata Quarantine Station: Tel. 68-0062.

Plant Protection Station: Tel. 68-0001.

Kanazawa Maritime Safety Office: Tel. 68-0329.

Kanazawa-Nishi (West) Government Office, 12-103 Gaiku, Sainen, Kanazawa.

Immigration Office of Kanazawa: Tel. 22-2450.

The Port Office of Kanazawa, 12, 4-chome, Minato, Kanazawa. Tel. 68-1201.

Kanazawa West-Police Office, 1-1-1, Kanaiwa-machi, Kanazawa. Tel. 67-1241.

AUTHORITY: Kanazawa Port, Government Office Building, 13, 4-chome, Minato, Kanazawa.

AGENT: Sub-agents of Aall Barwil Agencies.

Kanazawa Koun Co.Ltd., 11, Minato 4-chome, Kanazawa City, Ishikawa Pref. 920-02, Japan. Tel: (0762) 68-1811. Telex: 5122-429 Kkoun J. Fax: (0762) 68-1816. Cables: Koun Kanazawa.

KANDA: 33.47 N. 131.00 E. (See Plan)

LOCATION: Kanda Port is located in the Southern part of Moji Port. N.E. side of this port is sheltered by the Suo-Nada open sea. Located at the port are Nissan Motor Vehicle's motor pool and export wharf, and some cement maker's wharves. Imported coal in bulk and export cement in bulk also handled.

DOCUMENTS: When vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:

Ship's Register.
International Tonnage Certificate.
Voyage Memo (ports of call)
3 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Pilotage in/out not compulsory. Cable address of pilot station "Anjin Moji". 48 hours and 24 hours advance notice of ETA required, and any change in ETA. Pilot boards off Kanda Anchorage (Lat. 33° 48′ 03″ N., Long. 131° 03′ 02″ E.). Inland Sea Pilots are available from Sekisaki, Hesaki or Mutsure, if required.

ANCHORAGE: Kanda Anchorage (See "Pilotage").

RESTRICTIONS: Strictly no entry after sunset.

MAX. SIZE: Max. permissible LOA 210 m., max. draft 10.0 m. (9.7 m.).

HEALTH: Pratique available at Hesaki or Mutsure Anchorages. If vessel from East, formalities will be carried out at the Hesaki Anchorage. If vessel from West, formalities will be carried out at the Mutsure Quarantine Anchorage. After Free Pratique granted, vessels have to pass the Kanmon Channel enroute to Kanda.

Radio Pratique available. Send cable to Agent within 36 hours of arrival.

RADIO: Recommended that Master communicates with Agent through Choshi Radio or Nagasaki Radio, which cover all ports in Japan. Westbound vessels to contact Choshi Radio and Northbound vessels to contact Nagasaki Radio respectively.

VHF: Master should call "Kanda Port Radio" on Channel 16. Service range 50 miles from port area.

TUGS: Tugs normally join vessel at Kanda Anchorage. 4 tugs available, 1×3,100 h.p. and 3×3,000 h.p.

Remarks: In case of vessel's draft exceeds 9.0 m., entry/departure only practicable at HW.

STEVEDORES: At least 24 hours prior notice, excluding Sundays and holidays, required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost.

Overtime surcharges: 1630 hrs. – 2120 hrs. (60%) additional of basic stevedorage. 2130 hrs. – 0500 hrs. next morning, 130% additional. Sundays/holidays 100% additional.

MEDICAL: No advance notice required, unless urgent.

DENSITY: Average 1025 in Winter.

FRESH WATER: Available from barge and hydrant.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports, bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

CONSULS: No local representatives. Marine Note of Protest can be attended by local notary public.
REPAIRS: All kinds of repairs can be undertaken by Moji repairers.
DRY DOCK: Mitsubishi Heavy Industries, Koyo Dockyard at Shimonoseki.
GANGWAY/DECK WATCHMEN: Not specially required, unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work, unless crew can complete before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificate sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 60 cigarettes to take ashore, but no spirits.
REPATRIATION: Possible.
AIRPORT: Nearest Fukuoka Airport, about 2 hours by train and taxi. JAL, ANA and overseas airlines operate services.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance and Fire 119. Public telephone booth available near by the berth.
TELEPHONE: No facilities for placing telephones on board.
SHORE LEAVE: Local Immigration Offices issue shore passes valid for only 15 days when Kanda is first port of call in Japan. Extension possible if ship stays longer.

SHIPMASTER'S REPORT: January 1994.
Radio: Communications as for "Hibikinada" were all made through the Agent, who advised the pilot boarding time some days in advance.
Anchorage: Anchorage recommended by the Agent was about 2 miles West of the channel entrance buoys. A number of vessels anchor in this area and there is no specific anchorage position.
Cleaning: Hold cleaning is not permitted in the Inland Sea or at Mutsure Anchorage. The Vessel was advised to go 50 miles offshore in order to clean the holds prior to loading.
Approaches: Found to be as charted on B.A. Chart No. 3225, except as follows:

Buoy No. 9: Green pillar buoy has been added in position 0.73 miles from the South Breakwater Head F.Fl (2) G light on the pecked dredged channel line.

Two additional buoys marking a channel for small vessels between the South and Outer Breakwaters in the following approximate positions – Red pillar buoy 085° × 0.27 miles and Green pillar buoy 103° × 0.39 miles from the South Breakwater Light.

The tower in position 081° × 0.53 miles from the South Breakwater Light has been partly demolished.
Pilotage: Pilotage is not compulsory, but recommended both inward and outward. The Pilot will board from a tug just off Buoys No. 1/2, and will leave by tug at any point after Buoys No. 5/6.
Berth: The vessel berthed port side to the Mitsubishi Berth in approximate position 33° 47.5′ N., 131° 00′ E.

The berth is well fendered. Berthing was port side to. The vessel turned off the berth with the assistance of 2 tugs made fast with tug's lines on the starboard bow and quarter. Line boats are used to run the head and stern lines, and the tugs hold the vessel alongside until mooring is finished.

Unberthed with 2 tugs pulling the vessel off the berth.

The berth is for loading cement and cement clinker, with small specialised cement carriers arriving and leaving regularly at berths forward and aft equipped with cement loaders.

Cement clinker is loaded through a dust protected spout lowered into the hold from a movable gantry. Loading rate for 38,500 tonnes was 895.35 tonnes/hr. overall, including shifting times for the gantry between holds.

The cargo comes in hot and loading is continuous, even in rain. The Charterers give a letter requesting the vessel not to stop loading for rain.

Airdraft under the loader is given as 12.0 m., but it was estimated that under the spout end it was about 1.0 m. more than this.

There is plenty of clearance under the gantry arm for side opening hatch covers.
Depths: The vessel was given a maximum permissible draft of 11.0 m. and sailed at 10.58 m. (aft), 2 hours before H.W. predicted at 2.9 m.

There is plenty of water in the harbour, the governing depths being in the Approach Channel at Buoy No. 9 (0.73 miles from the South Breakwater Head).
Clearance: Clearance inward and outward is carried out by the Agent. The port is restricted and no contact is permitted with ships at anchor, except normal radio communications.
Shore Passes: Shore passes issued at a previous port can be updated and will be collected at the final port in Japan.
Shore Leave: Shore leave is permitted, but access to the shore is by launch from the offshore gangway. Ship's personnel are not permitted to pass through the shore installation.
Fresh Water: Available by barge.
Services: All available at higher than average prices.

KANMON-KO (Kanmon Harbour). (See Pla

According to Japanese Harbour Area Regulations, Moji, Shimono Kokura, Tobata, Wakamatsu and Yawata are respective sec included in one port namely Kanmon Harbour. The expression of t port as "Kanmon" has been used in charter parties, where these 6 p are considered to be one port. Vessel's movements within these p is treated as shifting berth in the same port. Therefore, if vessel ca more than 2 ports within this area, such calls are covered by a payment of tonnage dues. However, at Tobata, Wakamatsu and Yawa port dues are levied in addition to tonnage dues.

Entry/departure procedures to Customs, Immigration and/or Harb Master should be effected at each port, as those officials are station individually at each port.

Pilotage is compulsory for vessels over 10,000 g.r.t. passing throu Kanmon Channel.

Also see "General" before first port.

Wakamatsu included in area of Hibikinada.

KANOKAWA: 34.11 N. 132.26 E. (See Pla

(PORT STATUS: CLOSED PORT)
DOCUMENTS:
Ship's Register.
International Tonnage Certificate.
Last Port Clearance.
5 Port of Call Lists (for Iwakuni and Kanokawa).
1 Maritime Declaration of Health.
10 Crew Lists including Passport Numbers. (For Iwakuni and Kanokawa.)
10 Passenger Lists. (For Iwakuni and Kanokawa.)
2 Stores Lists. (For Iwakuni and Kanokawa.)
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, came wrist-watch, radio, firearms/swords, etc. (only at first port of c in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Ca Manifest and Cargo Manifest in transit using specific forms. Therefo ship's Agent should be provided with necessary information about de of cargoes in advance.
Customs: Formalities are to be carried out at the ship's last calling p in Japan or Iwakuni Port for entering Kanokawa Port (Closed Port) pr to proceeding to Kanokawa Port.
PILOTAGE: Inland Sea pilotage should preferably be arranged throu Agent by cable via Nagasaki Radio or Choshi Radio, giving 72 hou notice. Urgent correction of ETA outside business hours should cabled direct to pilot station. Inland Sea Pilot Association covers Inland Sea ports. Pilotage compulsory for vessels over 10,000 g Pilots obtained from 1 of 3 pilot stations dependent upon vessels port of departure and at Master's discretion. Pilotage availa throughout 24 hours and 72 hours' advance notice preferred, thereaf advising any alterations. Most Inland Sea Pilots also act as Harb Pilots up to berth or anchorage at destination.
Note: VHF Communication available with Inland Sea Pilot stations. A see "Shipmaster's Report" before first port.

Inland Sea Pilots board at the following positions:

1. Vessels transitting Bungo Channel:
Inland Sea Pilot boards at Sekisaki Pilot Station (33° 13′ N., 131° 56′ Telegraphic address: "Anjin Saganoseki".

2. Vessels transitting Kanmon Strait:
Kanmon Strait pilot boards at Mutsure Pilot Station (33° 59.5′ 130° 52.6′ E.) (compulsory over 10,000 g.r.t.). Telegraphic addre "Kanmon Pilot Moji".

Inland Sea Pilot boards at Hesaki Pilot Station (33° 58.0′ 131° 01.1′ E.). Telegraphic address: "Anjin Moji".

3. Vessel transitting Kii Strait:
Osaka Bay Pilot boards at Tomogashima Pilot Station (34° 10′ 135° 00′ E.). Telegraphic address: "Osakabay Pilot".

Inland Sea Pilot boards at Wadamisaki Pilot Station (34° 35′ 00″ 135° 08′ 24″ E.) (compulsory over 10,000 g.r.t.). Telegraphic addre "Anjin Kobe".
Note: VHF communication with pilot station available as follows:

Name of Station	*Call/Answer Channel*	*Communication Channel*
Oita Port Radio (for Sekisaki)	16	14
Shimonoseki Port Radio (for Mutsure)	16	14
Kobe Port Radio (for Wadamisaki)	16	14

4. Most Inland Sea Pilots act as harbour pilots up to berth or ancho at destination. If vessel requires only harbour pilot, harbour pilot bo off Kanokawa in approximate position: 34° 08′ 00″ N., 132° 24′ 30″ E
ANCHORAGES: No anchorage at Kanokawa Port. Vessel is able anchor off Kanokawa Port in approximate position Lat. 34° 08′ Long. 132° 24′ 30″ E., if vessel arrives at night time, or if berth occu by preceeding vessel. Depth is 25.0 m.

RESTRICTIONS: No berthing or unberthing from one hour after sunset to one hour before sunrise.
MAX. SIZE: Length 270 m., draft 14 m., deadweight 125,000. See "Tankers".
HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Usually vessels anchor at Iwakuni Quarantine Anchorage, where the authorities board and grant Free Pratique.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West bound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively. Telex communication available with Agent if vessel equipped.
VHF: Hiroshima Port Radio. Channels 11, 12, 14 and 16.
RADAR: No radar station at Kanokawa Port.
TUGS: All kinds of tugs available, from 2,600 h.p. to 3,300 h.p. Tugs normally join off Kanokawa Port, and usually tug's lines used, without extra charge.
BERTHING: See "Tankers".
CRANES: None.
BULK HANDLING FACILITIES: None.
BRIDGES: No bridge restrictions.
STEVEDORES: None.
MEDICAL: No advance notice required, except after office hours and on Sundays and holidays. Vaccination against cholera available.
TANKERS: *MC Terminal:* (Private wharf).

Wharf No. 1:
Length/Depth: 99 m./12.2 m.
Permissible Draft/LOA: 11.2 m./240 m.
Capacity: 30,000 d.w.t.
Number and Size of Manifolds: 1 × 6 in.
Number and Size of Shore Lines: 1 × 8 in.
Max. Back Pressure on Shore Gauge: 3.0 kg./sq.cm.
Max. Rate for Discharging: 350 kl./hr.
Cargo handled: Ethanol.

Wharf No. 3:
Length/Depth: 159 m./15.4 m.
Permissible Draft/LOA: 14.0 m./270 m.
Capacity: 125,000 d.w.t.

	Crude Oil	Ethanol
Number and Size of Manifold:	2 × 12 in.	1 × 6 in.
Number and Size of Shore Line:	1 × 24 in.	1 × 8 in.
Max. Back Pressure on Shore Gauge:	5.0 kg./sq.cm.	3.0 kg./sq.cm.
Max. Rate for Discharging:	3,000 kl./hr.	350 kl./hr.

DENSITY: 1023.
FRESH WATER: Available at berth, ex-pipeline. Average delivery rate - 20 t.p.h. Cost per ton: Daytime Yen 600. Overtime, Sundays and holidays Yen 800.
FUEL: Most grades of domestic and bonded oil are available by barge only at anchorage after completion of discharge, with 3 days' advance notice (Anchorage is also Closed Port, therefore the "Closed Port Dues" will be assessed as same as entering Kanokawa Port).
FIRE PRECAUTIONS: Following standard tanker berth regulations apply:
(a) Cannot use ship's crane for loading vessel's stores.
(b) Cannot use radar after berthing.
(c) Barge cannot come alongside vessel for loading oil or storing after berthing.
(d) Cannot use fire.
CONSULS: No consuls at Kanokawa Port.
REPAIRS: Small repairs can be undertaken, subject to berth owner's permission. However, major repairs and the use of fire at the pier is strictly prohibited by the Hiroshima Maritime Security Board and the berth owner.
DRY DOCKS: No dry docks at Kanokawa Port.
SURVEYORS: Cargo inspections are available (attend from Kure Port). Name of surveyors:
Japan Marine Surveyor and Sworn Measurers Association.
New Japan Surveyors and Sworn Measurers Association.
Registration surveys are available (attend from Kure). Name of surveyors:
Lloyd's Register of Shipping.
American Bureau of Shipping.
GANGWAY/DECK WATCHMEN: Not required.
HATCHES: No cargo vessels enter Kanokawa Port (only tankers).
CUSTOMS ALLOWANCES: Allowed 60 cigarettes only.
REPATRIATION: Possible.
AIRPORT: Hiroshima Airport, approximately 60 km. from Kanokawa.
Hiroshima/Tokyo (Haneda Airport), 11 flights per day (domestic airlines).
Hiroshima/Seoul, 7 flights per week (international airlines).
TIME: GMT plus 9 hours. No alterations made to clocks during year.
HOLIDAYS: Port works on Sundays and national holidays, except 1st January.
POLICE/AMBULANCE/FIRE: Police Station (emergency), Tel: 110; Ambulance/Fire, Tel: 119; or Hiroshima Maritime Safety Agency, Tel: 082-253-3111.
EMERGENCY CO-ORDINATION CENTRE: Hiroshima Maritime Safety Agency. Tel: 082-253-3111.
TELEPHONES: No arrangements for placing telephones on board.
SERVICES: All navigation apparatus can be serviced as required with 2 days advance notice.
BANKS:
Hiroshima Bank, Kure Branch, 5-4, Hondori 3-chome, Kure, Japan. Tel: 0823-21-5141. Fax: 0823-24-5575.
Sumitomo Bank, Kure Branch, 1-14, Hondori 2-chome, Kure, Japan. Tel: 0823-22-4921. Fax: 0823-21-0724.
SHIP SUPPLY SERVICE: Makino Shipchandler, 5-1, Hondori 1-chome, Kure, Japan. Tel: 0823-21-4443. Fax: 0823-21-4899.
No craft/helicopter at Kanokawa Port.
STORING: See "Prelims".
1. Ship's stores loaded by hand.
2. Loading of ship's stores during discharging of cargo is possible.
3. Truck cannot proceed alongside at the berth (truck is to remain about 200 m. from ship).
4. Cannot use fork truck at berth.
5. Must obtain Customs clearance before loading ship's stores.
6. Riggers available to assist with storing.

SHORE LEAVE: Kure Immigration Officer issues shore passes, if crew members have valid Passport or Seaman's Book.
REGULATIONS: Special regulations for tankers apply for tankers berthing at MC Terminal.
DELAYS: If vessel arrives at night time, it must wait at the anchorage.
GENERAL: Kanokawa Port is local port, which makes it difficult to arrange all requirements. At least 3 days notice helpful.
AUTHORITY: Ohgaki Doboku (Public) Office, 25 – 3 Oaza Ohara, Ohgaki-Cho, Saiki-Gun, Hiroshima Pref., Japan. *Tel:* 0823 – 57 – 3434. (*Note:* This is a Closed Port, therefore there is no Port Authority.)

AGENT: Sub-agents of Aall Barwil Agencies.
Naigai Unyu Co. Ltd., 1-7, Nakadori 1-chome, Kure, Hiroshima, 737 Japan. Tel: 0823-21-4952. Telex: 662340 Naigai J. Fax: 0823-25-3728. Cables: Naigai Kure.

KASAOKA: 34.23 N. 133.26 E. (See Plan)

Located on central Northern coast of Setonaikai (Inland Sea) and on border of Hiroshima Prefecture and Okayama Prefecture.
DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 copy Voyage Memo (last 3 months).
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.
APPROACHES: Main approach channel (leading to raw material discharging berths and pipe loading berth). Depth 16 m. (52 ft. 6 in). Width 350 m. (1,148 ft.). Distance from quarantine anchorage to "A" Berth, 9,500 m.

Pilot undertakes berthing vessels at "A", "B", "M" or "L" Berths, with draft up to 16 m. Vessels drawing over 15.5 m. may berth at high tide.

Branch channel (leading to loading berths except pipe berth). Depth 11 m. (36 ft.). Width 300 m. (984 ft.). Distance from quarantine anchorage to Export Berth No. 1: 11,500 m.
PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio and/or Choshi Radio, giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of two pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.
Note: VHF communication available with Inland Sea Pilot Stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat. 34° 34.09′ N., Long. 135° 07.54′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse. (Vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Moji". In event bad weather, recommended vessels proceed shelter as near as possible, having due regard to safety, to Sekisaki pilot station.
ANCHORAGES: Quarantine anchorage position: Lat. 34° 22.5′ N. and Long. 133° 26.3′ E., an area of 750 m. radius.
RESTRICTIONS: Inland Sea (Setonaikai):

1. *Akashi Strait and Bisan Seto:* All vessels, over 200 m. LOA shall navigate on Bisan Seto in daytime only and also vessels over 250 m. LOA have to have an escort boat when navigating on Akashi Strait and Bisan Seto respectively in accordance with the Maritime Regulations. Permissible draft on arrival 16 m., but 12 m. on departure.

2. *Kurushima Strait:* The vessels, over LOA 200 m., shall navigate on Kurushima Strait at slack water in daylight and vessels over LOA 250 m. and up to 300 m. have to have an escort boat when navigating on Kurushima Strait.

The draft restrictions are as follows: The permissible draft for LOA from 200 m. up to 250 m. shall be less than 13 m. and LOA from 250 m. up to 300 m. shall be less than 11 m.
Escort Boat: 2 escort boats with VHF available. Max. speed 24 knots, cruising speed 18 knots.
MAX. SIZE: *Pipe Berth:* LOA 220 m., max. draft 11.0 m.
Also see "Berthing".

HEALTH: Radio Pratique available. At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards and Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound, to contact Nagasaki Radio respectively.

VHF: "Fukuyama Port Radio" on Channel 16 (0600 – 2000 hrs.).

TUGS: 5 tugs (3,600 h.p.) available in the Fukuyama Harbour. Additional tugs are available from other Inland Sea terminals.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio. Berthing/unberthing not carried out during hours of darkness.

Nippon Kokan K.K. – Fukuyama Works. Private Berths.

Pipe Berth: Length 399 m., depth 11.00 m., capacity 43,000 d.w.t. Cranes: 3 × 38 tons.

Public Berth at Kasaoka: Terama Berth: Length 180 m., depth 5.50 m., capacity 2,000 d.w.t.

STEVEDORES: *Pipe Berth:* Stevedores available for loading pipes, except Sundays and 30th December – 4th January.

For berth term contract on loading, at least 24 hours prior notice, excluding Sundays and holidays, is required, in order for Agent to arrange stevedores.

If stevedores cannot commence loading at the time notified by the Agent, the orderers must pay for waiting time.

Terama Berth: Stevedores available from Monday to Saturday, except holidays and 30th December – 4th January, for loading/discharging.

All cargo loading/discharging by ship's gear and mobile crane.

Working hours are from 0800 hrs. to 1800 hrs. only.

MEDICAL: No advance notice required except on Sundays, holidays and in an emergency.

DENSITY: Summer 1016 – 1022. Winter 1025. The density not much affected by tide, which is maximum 3.84 m.

FRESH WATER: Available at any berth. Supply capacity 10 t.p.h. Water barge also available, capacity 300 tons. Minimum order 200 tons.

FUEL: Bunkers by lighters from Kobe, Mizushima, Tokuyama or Moji area. Advance notice required, bunkering allowed at loading/discharging berth, daytime only. Oil fence required during bunkering.

CONSULS: None.

REPAIRS: Only minor repairs. For machinery, radio, radar, etc., are all arranged by firms located in Tokyo, Osaka and Kobe.

DRY DOCK: None. Available at Innoshima or Mukayima and Tsuneishi.

GANGWAY/DECK WATCHMEN: Not specially required unless valuable cargo on board. Steel Mill's guard are on watch at all gates.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches for loading steel products. Charge is assessed according to tariff. Recommend request stevedores for this work unless crew can complete it before berthing. For discharging raw materials opening/closing hatches must be carried out by ship's crew before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.

REPATRIATION: Possible.

AIRPORT: Nearest airport is Okayama (70 km.), but Tokyo and/or Osaka are preferable due to convenience of traffic.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Report to Guardmen's office located at Middle Gate of Nippon Kokan.

TELEPHONES: No arrangements for placing telephone on board. Private telephones connecting with offices in the compound of the Fukuyama Works are placed at each of the raw material berths.

For vessels alongside export berths, private telephone available at foremen's office located on berth.

SERVICES: Hold cleaning.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for 15 days.

GENERAL: Kasaoka is a local and new port, developed along with the expansion of Nippon Kokan, Fukuyama Steel Works.

AUTHORITY: Kasaoka Public Works Office, 2-5 Rokuban-cho, Kasaoka City, Okayama Pref., Japan. *Tel:* (08656) 3-5252.

AGENT: Sub-agents of Aall Barwil Agencies.

Nissan Senpaku Ltd., 1, Kokan-cho, Fukuyama City, Hiroshima Pref.721, Japan. Tel: (0849) 41-0535. Telex: 6436-11 Nissan J. Fax: (0849) 43-1104. Cables: Nissan Fukuyama.

KASHIMA: 35.54 N. 140.42 E. (See Plan)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
6 Crew Lists including Passport Numbers.
6 Passenger Lists.
1 Stores List.
1 Crew Declaration List, i.e. cigarettes, wine, spirits and others, at 1st port only.
3 Lists of Port of Calls, covering last 3 months.
Other documents will be prepared by Agents.

APPROACHES: Normally the approaches to Kashima are no congested as some of the other ports of Japan, but in good weath large number of fishing and pleasure craft may be met. Also, m fishing nets are placed on the sea bottom throughout the year.

Being free of off-lying dangers the approach to the Pilot Boar ground (except fishing nets) do not present any difficulty, however, presence of swell very often hampers the manoeuvre of the tug carrying the Pilot. A convenient lee is required to enable the Pilo board.

Approaches to Kashima Oil Co. Terminal: The berth approach is ma only during daylight hours. Pilots board, at the latest, one hour be sunset.

All traffic for entering into or departing from the port, and movements inside the port are controlled from the signal station at centre of the port. For the signals shown please refer to H.O. PUB N 156 or B.A. Japan Pilot Vol. 1 (No.41). The type of control is "one wa for larger vessels. The signal station is not equipped with radar or VH but may contact a vessel via telephone and Ibarki Port Radio.

The harbour entrance is marked by two buoys.

Leading lights, 183.5°, are exhibited for steaming up the channel. T depths in the outer channel are 24 m. and in the inner part 22 m. belo chart datum. Tidal currents in the channel are weak, less than 0.5 kno

No entry is made if wind velocity from Northerly directions is 7 m./se or over, or from other directions 10 m./sec. or more. Also, berth operations are suspended if the wave height is 1.5 m. or more.

The tug that brings the Pilot(s) on board joins the vessel immediate Other tugs join inside the breakwater.

During periods of Northerly swell the entry channel is fully expose Vessels at low speed generally have difficulty in steering therefore, lad VLCCs are also required to attain a speed up to 6 knots until as clo as 0.75 miles from C.O.P. (Crude Oil Pier) No. 1. The full power of t tugs is normally sufficient to timely reduce the headway but at tim vessels engines are also called for prompt and strong astern action

PILOTAGE: Pilot called through Agent. Pilot boards about 3 miles N.E. from the end of South Breakwater, in vicinity of Lat. 36° 00.5 Long. 140° 45′ E.

ANCHORAGE: No suitable anchorage at present. Quaran Anchorage indicated on chart is not used for quarantine purposes, a is too close to the channel. Vessel can choose her anchoring p herself, but should keep enough distance from the South Breakwa and Northerly directions from the breakwater is recommend Quarantine Officials board vessel upon berthing, but if requested Agents, and sea condition is good, Quarantine Officials can also bo vessel at the Anchorage, using a tug. Transportation between t Anchorage and shore is only by tug. Nothing is supplyable at t Anchorage. Generally, anchor holding ground is not good and ch causes dragging of anchor.

RESTRICTIONS: Pilots board vessel from 0600 hrs. to one hour bef sunset for inward operations, and from 0600 hrs. to 2100 hrs. for outwa operations. But for vessels of more than 50,000 gross tons, pilots boa only during daytime.

Passages:

Name	*Width* (m.)	*Depth* (m.)
Central Passage	400 – 600	19 – 13
South Passage	300 – 430	12 – 10
North Passage	300	13 – 10
Outport Passage	480 – 540	24 – 22

MAX. SIZE: *Tankers:*

Berth	*Max. d.w.t.* (tons)	*Max. L.O.A.* (m.)	*Max. Safe Draft* (m.)
C.O.P. No. 1 (Crude Oil Pier)	250,000	340	19.0
C.O.P. No. 2	100,000	258	13.8
C.O.P. No. 3	80,000	238.5	12.4

Bulk carriers have entered with draft up to 44 ft.

HEALTH: Radio Pratique is available if application is made accordance with Japanese Regulations. Quarantine Officers will att vessel only from daylight. Master to show all Vaccination Cards, De Exemption Certificate, Ship's Register and Crew List. In case ves arrives from cholera-infected area within 10 days, Master must adv crew and passengers' health condition to respective Quarantine Of through ship's Agent prior to arrival and close all soil pipes bef entering port.

RADIO: Recommended Master communicates with Agent thro Choshi Radio or Nagasaki Radio which cover all ports in Japan specifically Westbound vessel to contact Choshi and Northbound contact Nagasaki Radio respectively.

VHF: 50 Watt powered base station operates at Oh-aza Igiri, Kam machi, using call sign "Ibaraki Port Radio", continuous watch maintained 24 hours on Channel 16, all calling should be on Chan 16, and working Channels 14 and 12. Tugs (including Pilots) work 400 mHz.

Station handles all traffic about pilotage, etc. Station not yet mention in List of VHF stations (Radio Holland). Agents pay fee per ship per p call for using the station.

BERTHING: No specific requirements. Pilot boarding time will be notif by ship's Agent, mainly by radio.

*Public Berth.

TUGS: Usually joins vessel at anchorage where Pilot boards; Tug's lines used.

MEDICAL: No advance notice required unless urgent.

TANKERS: Requirements prior to arrival: Manifold position, number and external and internal diameters. Reducer: type (ASA or JIS, etc.) and external and internal diameters. Ship's ETA and draft are to be reported in advance. ETA is to be advised if any changes.

Berthing Procedure and Mooring at C.O.P. No. 1: Normally 3 to 5 tugs attend and are employed in a combination of "alongside" and "on the hook".

Vessels always berth port side to. The normal procedure is to bring the vessel to a stop, parallel to the berthing face, at a distance of 100 m. – 150 m., and then warp her alongside with the tug assistance. The sequence for handling ship's lines is: Spring lines, breast lines, and then bow and stern lines. 2 mooring launches are used.

Since the breasting dolphins at C.O.P. No. 1 used for the spring lines are rather a long distance apart, conventional spring lines from the main deck are frequently very short and often break when a swell is running. Therefore, it is advisable to try using longer springs from the forecastle and poop decks.

The normal mooring configuration is: 4 bow lines, 4 stern lines, and 4 breasting lines and 2 spring lines both forward and aft.

The berth is equipped with a sonar docking system.

Discharge Rates:

Berth	Product	Discharge Rate (Kl./Hr.)
C.O.P. No. 1	Crude Oil	14,000
	Naphtha	5,000
C.O.P. No. 2	Crude Oil	5-7,000
	L.P.G.	2,400
C.O.P. No. 3	Crude Oil	5,000
	Naphtha	2,000
	Kerosene	2,000

LPG:
Berth: Kashima Oil.
Max. LOA: 258.16 m.
Max. size: 100,000 tonnes s.d.w.t. (59,134 g.r.t.)
Max. draft: 13.43 m.
Cargo lines: 1×12 in. ASA 150 for Propane and 1×12 in. ASA 150 for Butane.
Vapour lines: 1×10 in. ASA 150 for Propane and 1×10 in. ASA 150 for Butane.
Line alignment: From right to left: PV-PL-BL-BV
(Butane and Propane lines can be interchanged).
Discharge rates: Butane and Propane 1,200 cu.m./hr.
Max. manifold pressure 9 kg./sq.cm.
Cargo temperatures: Propane −40°C – −45°C. Butane −2°C – −4°C.
Vapour pressure: 0.05 – 0.1 kg./sq.cm.
Shore tank capacity: Propane 2×35,000 cu.m., 1×43,000 cu.m. and 1×10,000 cu.m. Butane 1×37,000 cu.m. and 1×44,000 cu.m.
Fuel: Fuel by shore line (stems through Kyodo Oil or Kashima Oil direct). MDO by barge in daytime only and before or after discharging operations.
Fresh water: Available ex-shoreline at 30 cu.m./hr.

DENSITY: 1025.

FRESH WATER: Fresh water is available at all berths, except Asahi Glass, where the line is very poor and pumping rate is quite low. 20 t.p.h. at Kashima Oil.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, from where bunkers are lightered at maximum 7 days' prior notice. Depending on the case, bunkers are available from Kashima Oil, but bunker barge mostly comes from Tokyo Bay area.

FIRE PRECAUTIONS: No special precautions, but water curtain made alongside dolphin in case of fire, and there is a fire boat (15 gross tons, and airfoam system).

CONSULS: None.

REPAIRS: Hot work on deck is not allowed.

Electronic engineers for radar, radio, Inmarsat, etc., are available from Yokohama area.

GANGWAY/DECK WATCHMEN: Kashima Oil: 24 hour watch on dolphins.

Sumitomo Metal: If ship's gangway is located next to the discharging cargo hold (ore/coal berths), watchman stands by and controls the operation during discharging from the relative hold.

CERTIFICATES: Ship's Register and International Tonnage Certificate for Customs purposes.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits per person per week.

Sealing: Customs will seal guns and pornographic tapes and books. Cigarettes and alcohol are not sealed.

AIRPORT: Narita Airport (New Tokyo International Airport), 1 hour by car.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police Tel. 110; Ambulance/Fire Tel. 119.

TELEPHONES: Not available for placing on board.

SERVICES: No equipment or facilities, but service engineers arrangeable from Yokohama.

SHORE LEAVE: Local Immigration Office issues shore passes for Kashima Town and Kamisu Town, valid for 7 days, extension is possible, if necessary.

IDENTIFICATION CARDS: Not required, but shore pass is always to be carried.

DEVELOPMENTS: This artificial port started its construction in 1963, and is still under construction. When completed, total length of wharves will be about 17 km. for about 30 large industries, such as steel mill, oil refinery, chemical works, grain terminals and general cargoes.

AUTHORITY: Kashima Port Administration Office, 13 Oh-aza Higashi Fukashiba, Kamisu-City, Kashima-Gun, Ibarak-Ken, Japan. *Tel:* 0299-92-2111.

Ibaraki Prefecture Government, Department of Public Works, Ports and Harbours Division, 1-5-38 Sannomaru, Mito City, Ibaraki Pref., Japan. *Tel:* 0292-24-8027. *FAX:* 0292-28-6870.

AGENT: Sub-agents for Aall Barwil Agencies.

Kashima Futo Co.Ltd., Kashima Port South Transport Centre, Dewa 4186-19, Okunoya, Kamisu-machi, Kamisu-gun, Ibaraki Pref., Japan 314-02. Tel: 0299-97-0661. Telex: 3658937 Kfuto J. Fax: 0299-97-0665. Cables: Kfuto Kashima Ibaraki.

KAWASAKI: 35.32 N. 139.46 E. **(See Plan)**

LOCATION: Kawasaki Port is located in the Northwest of Tokyo Bay, connected with Yokohama Port (11 km. by land, 2 nautical miles by sea) in the West, and Tokyo Port (18 km. by land, 10 nautical miles by sea) in the North.

PORT LIMITS: The boundary of the Kawasaki Port consists of: The position of the central outfall of the border canal (Sakai Canal) of Ohkawa-cho, Kawasaki-ku, Kawasaki City and Anzen-cho, Tsurumi-ku, Yokohama City. From this position to a point of 151° 30′, 3,460 m. and from this latter position to a point of 126°, 2,310 m. The position of 136°, 5,150 m. from the Tamagawa River Haneda Light Beacon, the line drawn from the end point of the Tamagawa River administrative boundary border line and the sea surface which covers the shore. The water surface of the following canals: Sakai Canal (beyond the East of the administrative boundary border line), Siraishi Canal, Tanabe Canal, Minami Watarida Canal, Asano Canal, Ikegami Canal, Sakurabori Canal, Iriezaki Canal, Mizue Canal, Shiohama Canal, Yako Canal, Chidori Canal, Daishi Canal, Suehiro Canal and Tama Canal. The water surface of the area of Siraishi-cho No. 2, Asano-cho No. 1, Yako No. 3-1, Yako No. 1-1 and Ukishima-cho No. 100 of Kawasaki-ku, Kawasaki City and the downstream water surface of Kannongawa Iriebashi. The water surface area of Tamagawa River (beyond the West of the administrative boundary border line), downstream of the line drawn 43° 30′ from the S.E. side of Tono machi Kawasaki-ku, Kawasaki City.

DOCUMENTS:

Maritime Declaration of Health.
Certificate of Registry.
International Tonnage Certificate.
1 List of Crew's Personal Effects (to be signed by each crew member).
1 Ship's Stores List.
3 Lists of Port of Call (last 4-6 months).
7 Crew Lists.
7 Passenger Lists.

PILOTAGE: See "Yokohama".

RESTRICTIONS:

(A) Berthing/unberthing from sunrise (or after 0630 hrs.) till sunset.
(B) Max. draft in Kawasaki Fairway (or Kawasaki Passage) and Tsurumi Fairway is 12.0 m.
(C) Max. airdraft to be kept to less than 40 m. for tankers for berthing/unberthing at Tonen/NPRC Gas/General Sekiyu/Toyu (Tokyo Yuso), MC Terminal (Mitsubishi) and Showa GATX.

MAX. SIZE: Main Dry Cargo Berths:

Name of Berth	*Max. D.W.T. (tons)*	*Max. LOA (m.)*	*Max. Draft (m.)*	*Max. Airdraft (m.)*
NKK Ohgishima E – A	200,000	360	19.0	19.0
NKK Ohgishima E – B	100,000	240	17.0	19.0
Toyo Futo (Coal Berth)	50,000	230	12.0	14.5
Main Tanker Berths:				
Keihin Kawasaki Sea Berth	250,000	300	30.0	
Toa Nenryo Ohgishima Sea Berth	250,000	300	26.0	
Toa Nenryo Ukishima Sea Berth	100,000	250	16.6	
Tokyo Electric Ohgishima LNG Berth	65,000	—	17.0	

HEALTH: Radio Pratique applicable for vessels who possess valid Sanitary Inspection Certificate issued by Japanese Quarantine Authority.

Radio Pratique message can be sent by Master to ship's Agents between 6 hours and 36 hours prior to arrival as per specific format.

Following vessel not applicable for Radio Pratique:

(A) Vessel's navigation days to Japan less 7 days after departure from port designated as 'infected area'.
(B) If ship's crew suffered from infectious disease within 15 days before ETA in Japan.

Kawasaki Quarantine Inspector boards vessel at Kawasaki Quarantine Anchorage for Pratique.

RADIO: Choshi Radio and Nagasaki Radio.

VHF:

(A) VHF range is about 50 miles away from Bay Pilot Station at entrance of Tokyo Bay.
(B) Berthing information for next day can be obtained from Kawasaki Port Radio at 1500 hrs. by Channel 16.

RADAR: Traffic Control Centre (Tokyo Wan Traffic Advisory Service Centre) keeps watch round-the-clock for vessels within the radar service area. Vessels can make contact with the Traffic Control Centre on Channel 16.

TUGS: See "Yokohama".

STEVEDORES: Ordering of labour gangs is by 1600 hrs. on the previous day.

BERTHING: In addition to the berths below, there are many with less water.

Public Berths:

Name of Berth	*Length (m.)*	*Depth (m.)*	*Capacity (d.w.t.)*

MC Terminal	Fuel Oil	8 in.×2	800
Toyu	Fuel Oil (C)	12 in.×1	1,000
	Fuel Oil (A)	10 in.×1	800

Toyu: The berth consists of an "L" shaped jetty with a roadway an pipe trestle 20 m. long. It is provided with 2 breasting dolphins wh are connected to the platform by trestles. 2 bollards are installed on dolphins. Other bollards are installed ashore along the face of the qu

No capstans are provided and so it is difficult to send heavy w ashore. Therefore, it is advisable to have a number of synthetic ro readily available.

The back springs which are made fast to the bollards located on dolphins, have a very short lead and are at a steep angle.

The 2 dolphins are provided with resilient buffer fender systems hav hollow rubber tubes. No sonar doppler is provided.

The normal mooring configuration is:

3 head lines,
2 breast lines forward,
2 back springs forward,
2 back springs aft,
2 breast lines aft,
3 stern lines.

The terminal does not use hard arms. Rubber hoses are us generally consisting of a string of 3 lengths of 10 in. JLS flang connected with bolts and nuts.

The vessel's derrick must be used for handling the hoses.

High pour fuels are generally handled at this terminal but vess assistance is no longer required at the end of each discharge for flush the hoses and shore lines. The terminal now flushes back into the s the line's contents.

No gangway is provided.

Bunkers and fresh water are not available at this berth.

Berth A-1: Berth A-1 is designed to accommodate tankers up to ab 65,000 d.w.t. in light loaded condition. The berth consists of a T-sha jetty with a roadway and pipe trestle 40 m. long, and is provided w 2 breasting dolphins positioned at a distance of 80 m. and connect the platform by trestle. The dolphins are provided with small bollards which are seldom used for ship's lines. Usually the lines, including the springs are run ashore to bollards having adequate strength.

There are no capstans for pulling the lines ashore and some difficulties may be experienced, particularly when handling heavy wires. It is advisable to have ready a certain number of synthetic ropes.

2 smaller berths are located in the inner side of the jetty face. These berths are left vacant when a tanker is alongside Berth A-1. The structure on these berths may interfere with the vessel's mooring arrangement and may create difficulties when sending the vessel's lines ashore.

The dolphins are provided with rubber cell fenders (diamond shaped). Siding along the dolphins should be avoided so as not to damage the rubber fenders.

The berth is provided with a sonar doppler to monitor the berthing speed. The pilot is advised by walkie-talkie if the berthing velocity exceeds the safety limit.

The normal mooring configuration is:
3 head lines,
2 breast lines forward,
2 back springs forward,
2 back springs aft,
2 breast lines aft,
3 stern lines.

3 hard arms are installed on the platform. 2×12 in. diameter are used for discharging crude and fuels and 1×12 in. is used for the discharge of LPG liquid. No LPG vapour return line is installed on the jetty. Arms are connected by means of nuts and bolts. The flanges are ASA 150 p.s.i. for bunker fuel, the others for lubricating oil. Bunker can be supplied simultaneously with vessel discharge operations.

Esso controlled tonnage generally discharges fuel and diesels oils at Berth A-1. High pour fuels are also handled at this berth and the terminal may require vessel's assistance for flushing the arms and the lines after each discharge. No slop or deballasting facilities are provided.

A heavy and bulky gangway is provided which has to be lifted by the vessel's derrick.

The hooks on the end of the gangway are narrow and cannot grip the ship's sheer strake so have to be laid on the ship's handrail. On several occasions, vessel's handrails have been damaged by the gangway hooks. Fresh water is available at this berth through a 2.5 in. outlet.

TIDAL CURRENT: The littoral current running Westward along reclaimed industrial area of city is very slow and has rate of about 0.3 m. round the head of municipal wharf when tide is on the ebb.

FRESH WATER: Supplied at piers and by water barges, overtime on Sundays and legal holidays.

	Barge	*Loading Capacity* (ton)	*Remarks*
Water	Hoei Maru No. 12	350	Operated by Water Bureau of Kawasaki City
Barge	Kosie Maru	300	

FUEL: All grades available.

CONSULS: See "Yokohama".

REPAIRS: All repairs possible.

DRY DOCKS: Hitachi Dockyard.

Dry Dock	*Max. d.w.t.*	*Max. LOA*
No. 1	60,000	228 m.
Wet Basin No.	*Max. d.w.t.*	*Max. LOA*
A	25,000	163 m.
B	60,000	258 m.
C	60,000	246 m.

SURVEYORS: Lloyd's, ABS, BV, DNV, Salvage Association and U.S.Salvage from Yokohama. GL available from Kobe.

GANGWAY/DECK WATCHMEN: Normally not required.

OPENING/CLOSING HATCHES: Normally carried out by ship's crew.

CERTIFICATES: See "Yokohama".

CUSTOMS ALLOWANCES: *Daily Consumption allowed aboard by Customs:*
Cigarettes: 2 packets.
Beer: 1.3 litres.
Whisky: 144 ml.

REPATRIATION: Possible.

AIRPORT: Kawasaki to Haneda Airport (20 minutes by taxi). Kawasaki to Narita Airport (2 hours by taxi and limousine bus).

TIME: GMT plus 9 hours. Permanent.

HOLIDAYS: See "Yokohama".

POLICE/FIRE/AMBULANCE: Police Kawasaki 110; Ambulance and Fire Kawasaki 119.

EMERGENCY CO-ORDINATION CENTRE:
Maritime Safety Agency Kawasaki (Coast Guard): Tel. 044-266-1591.
Kawasaki Rinko Police Station: Tel. 044-266-9161.
Master of the vessel can also contact Kawasaki Port Radio by VHF Channel 16 for urgent matters.

TELEPHONES: Telephone can be placed onboard at most public berths.

SERVICES: Most services can be provided if advance notice given.

BANKS: Bank of Tokyo Ltd., 3-27-1 Honcho, Naka-ku, Yokohama. Tel: 045-201-2515. Hours: 0900 hrs. – 1500 hrs., Monday to Friday.

STORING: *Dry Cargo Vessels:*
Public Berths: Vessel can be stored by truck.
Private Berths (Dolphin Berths): Vessel can be stored by barge.
Private Berths (non-dolphin): Vessel can be stored by truck.
Tankers: Stores/bunkers/lubes can only be supplied at anchorage. Small quantities of stores can be delivered onboard by hand at the terminal.

SHIP SUPPLY SERVICE: See "Yokohama".

SHORE LEAVE: See "Yokohama".

IDENTITY CARDS: See "Yokohama".

GARBAGE DISPOSAL: See "Yokohama".

WASTE OIL DISPOSAL: See "Yokohama".

SEAMEN'S CLUBS: See "Yokohama".

SAFETY: *Voluntary Separation Scheme:* A voluntary separation scheme is in existence South of the Uraga Channel, and is an extension of the mandatory scheme. Northbound vessels keep to the East side of the channel, and Southbound vessels keep to the West side of the channel. Coasters do not comply with this scheme.

Signals for Large/Dangerous Cargo Carriers: Large vessels (LOA over 200 m.) require following placed onboard:

By day: Two black cylindrical shapes placed vertifically (0.6 m. × 1.2 m. or larger).

By night: One all-round green light, flashing at regular intervals, at a frequency between 180 and 200 times per minute.

Vessels carrying dangerous cargo require following placed onboard:

By day: "First Substitute" flag over "B".

By night: One all-round red light, flashing at regular intervals, at a frequency between 120 and 140 times per minute.

Restrictions on Overtaking: Large vessels and other particular vessels as prescribed by the Maritime Traffic Safety Law, and vessels of 10,000 g.r.t. or more should, if the circumstances of the case permit, avoid overtaking a vessel of 500 g.r.t. or more in the traffic routes.

Restriction on Speed: A vessel should not navigate at a high speed within the Bay.

Restriction on Entry into the Traffic Route in poor Visibility: Unless otherwise instructed by the Tokyo Wan Traffic Advisory Service Centre, vessels of 10,000 g.r.t. or more should not enter the traffic route when the visibility in the traffic route and its vicinity is less than 1,000 m.

Restriction on Use of Auto-Pilot: A vessel navigating in Tokyo Bay should not use auto-pilot.

Preparation of Emergency Wires: A vessel carrying dangerous cargo prescribed by the Maritime Traffic Safety Law should prepare emergency fire wires at the bow and the stern for immediate use in case of emergency.

The Pledge for Safety Measures: The owner or operator should submit "The Written Pledge for Safety Measures" to the Maritime Safety Agency, and fulfil its requirements when a tanker of 220,000 d.w.t. or more carrying dangerous cargo enters Tokyo Bay for the first time, and a liquified (natural petroleum) gas tanker of 25,000 g.r.t. or more enters Japanese waters for the first time.

Notification of Traffic Routes and Notification of Change:

(a) Vessels of 10,000 g.r.t. or more should report the "Notification of Traffic Routes" and the "Notification of Change" to the Tokyo Wan Traffic Advisory Service Centre at Kannon Saki in the same way as in the case of a large vessel.

(b) With the "Notification of Traffic Routes", following items should be reported:
  (i) Port of destination and section of the port, when they are known.
  (ii) Port of departure and section of the port, in case of a departing vessel.
  (iii) Whether a pilot is arranged or not.
  (iv) Whether a special vessel with foam-type or powder-type fire fighting facilities is arranged or not.

Communication with the Centre: Vessels equipped with VHF radiotelephone (Channel 16) should keep watch on VHF while navigating within the radar service area, since information might be provided by the Centre.

Preparation of Charts: Vessels navigating in Tokyo Bay should prepare at least some of the following charts issued by Hydrographic Department of the Maritime Safety Agency and published by Japan Hydrographic Association, and obtain recent information of ports in advance:

Chart No.	Title
90	Tokyo Wan
1062	Middle Part of Tokyo Wan
1081	Uraga Suide
H-301B, H-302B	Maritime Traffic Information Chart for Tokyo Wan

SHIPMASTER'S REPORT: *The Tonen Ohgishima Sea Berth:*

1. Suggest Mikimoto Lighthouse used for end of passage as from there inwards to Uraga Channel (58 miles) heavy concentrations of traffic frequently experienced.

2. Entry to Uraga Channel for VLCC's permitted only during daylight (i.e. sunrise to sunset).

3. Pilot boards in vicinity Uraga No. 1 Buoy from 1 of the 2 tugs which escort the vessel to Yokohama/ Kawasaki and requires fire fighting tug standing by at Uraga Buoys Nos. 1–6.

4. Deep draft signal to be displayed including the red flashing light and Code "First Substitute over Flag 'B'" and 2 black cylindrical shapes (0.6 m. × 1.2 m.) placed vertically (refer Maritime Traffic Safety Law).

5. ETAs (No. 1 Buoy Uraga) should be updated as promptly as possible. Considerable importance attached to the vessel's arrival/ sailing time by Tokyo Wan Traffic Advisory Service Centre (TWTASC).

6. Vessel must anchor at Kawasaki Anchorage where Port Health boards (pilot hoist used).

7. Berthing/Unberthing Ohgishima Sea – berth during daylight only (sunrise to sunset).

8. Berthing pilots (2) embark at Quarantine Anchorage, 6 tugs all using nylon tow ropes with eye on bitts. Always port side alongside. Refer mooring diagram for details. No additional mooring ropes available on loan or hire from berth. Shore gangway, Chicksan arms 4×16 in. connections.

9. A spill boom completely surrounds the vessel on the berth. A comprehensive book (in English) of the Terminal Regulations placed on board on arrival. Tonen Company require a tape recording concerning oil pollution to be broadcast throughout the vessel's p/a system before cargo discharge commences.

10. Ullaging is witnessed by Oil Co. representative. Samples taken from all tanks necessitating the opening of tank hatches. All tanks dipped after discharging completed.

11. The loading of stores, provisions, etc. (either by crane or derrick) is not permitted on this berth. No restrictions on items being *carried* on board via the gangway, e.g. laundry. Necessary to anchor after discharging/ballasting to take on stores.

12. During severe weather conditions tug assistance was requested to stand by the vessel on the berth. Tugs cannot approach unless the spill boom is removed and this will only be removed if cargo discharge ceases and Chicksan arms disconnected.

13. A shore liberty boat was arranged through Agent. This service is to Yokohama, approx. 1 hour journey. A boat service to nearby Kawasaki is permitted and take 40 minutes. All boat services suspended when weather deteriorates. Shore passes issued by Immigration Authorities on board and must be collected in before vessel leaves berth.

SHIPMASTER'S REPORT: December 1991.
Charts: B.A. Charts No. 3548, 3108 and 3109.
Documents:
First Port:
*4 copies Crew List.
*2 copies Stores List.
*1 copy Maritime Declaration of Health.
*1 copy Crew Effects List.
1 copy Ports of Call List.
* These must be completed on Japanese forms (Japanese version of IMO forms).
At subsequent ports the following are required:
1 copy Crew List.
1 copy Stores List.
1 copy Ports of Call List.
In addition the "Riders" from the first port should also be available.

Formalities: Sanitary Certificate/Pratique: Vessels without a Sanitary Certificate can obtain temporary pratique but must undergo a sanitary inspection. The galley, toilets, showers and void spaces under bunks and settees are checked for dirt and vermin.

The vessel must be in possession of rat traps, rat guards, rat bait, water purification liquid, disinfectant and a spray. The certificate lasts from 1 – 3 years, depending on cleanliness. Prior to arrival at the first port a standard message prefixed by "RPM" must be sent.

Approaches: The high headlands and islands to the South of Uraga Channel are easily identified visually and by radar. There is the usual volume of traffic and fishing vessels around the coast. Vessels should keep a good lookout for ferries when about one mile South of the 'OE' Racon Buoy which marks the Southern end of the Uraga Channel. The buoy is large and conspicuous.

A voluntary separation scheme is in existence South of the Uraga Channel and is an extension of the mandatory scheme. Northbound vessels keep to the East side of the channel and Southbound vessels keep to the West side of the channel. Coasters do not comply with this scheme.

Pilotage: The Uraga Channel pilot boards in position Lat. 35° 10′ N., Long. 139° 47′ E. from a tug boat with a boarding platform forward. The pilot is based at Kurihama Wan which is about 2.2 miles South of Kannon Saki.

Pilotage is compulsory for vessels over 10,000 g.r.t. It is also recommended that foreign vessels under 10,000 g.r.t. take a pilot into Tokyo Bay.

Within Keihin (Yokohama, Kawasaki area) harbour pilotage is compulsory. Uraga Pilot is on VHF Channel 13.

Traffic Control: Vessels over 10,000 g.r.t. must report to "Tokyo Martis Control" as per Admiralty List of Radio Signals.

Visibility: Uraga Channel is closed to vessels over 200 m. LOA when visibility falls below one nautical mile and is closed to vessels over 10,000 g.r.t. when visibility is below 0.5 nautical miles. Ships with dangerous cargo may be restricted depending on their circumstances and size of vessel.

Anchorages: There are numerous anchorages in the area. Foreign vessels inside Tokyo Bay anchor in accordance with instructions from pilot and/or "Tokyo Martis Traffic Control". A favoured waiting anchorage is Naka-No-Se which is centred on Lat. 35° 23′ N., Long. 139° 45′ E. in a depth of 14 m. – 18 m.

We used Yokohama No. 5 area (Lat. 35° 22.5′ N., Long. 139° 41′ E.) for discharging lub oil additives into coasters. Anchorage position given by "Tokyo Martis". In this area vessels should beware of the depths, as to the S.E. of the anchorage depth increases sharply from 15 m. to 40 m., so plenty of cable is required.

Berth: Vessel berthed portside to at Nippon GATX in Kawasaki (Lat. 35° 29.2′ N., Long. 139° 42.8′ E.) The max. draft allowed is 7.7 m.

This is a typical tanker type pier and projects out into the channel. The berth face has a length of 30 m. and is equipped with Chicksans and hoses. There are breasting dolphins 20 m. each side of the jetty face which are used for backsprings. Headlines and sternlines are sent to shore bollards, the berth is well fendered.

As a brow gangway only is possible we used a pilot ladder and the offshore gangway for the launch service.

Cargo: When at the anchorage we discharged into 2 coasters using 6 in. flexi-hoses. The coasters can receive as fast as the ship can pump.

When alongside we discharged additives with 6 in. shore hoses. The plant also handles other chemicals. There was negative back pressure. Discharge of Amoco Grade A8083 went very slowly into the shore tanks, about 30 tonnes/hr.

There are plenty of surveyors available and total safety was given by safety boat.

Fresh Water: Not available at the GATX berth. Water can be obtained by barge either alongside or at the anchorage. The minimum supply is 50 tonnes and the cost is Yen 3,285 per tonne.

Shore Leave: Shore leave is not allowed through the plant so a launch is used when alongside and at the anchorage.

Launch cost: 0800 hrs. – 1700 hrs. – Yen 18,000.
1700 hrs. – 2200 hrs. Yen 27,000.
2200 hrs. – 0600 hrs. Yen 36,000.
0600 hrs. – 0800 hrs. Yen 27,000.

Yellow shore passes are required and they have to be surrende on return from ashore.

Shifting: Vessels with dangerous cargoes cannot move at night (betw sunset and sunrise) and this includes shifting from berth to berth, mov from anchorage to berth or sailing outwards.

Transit: Vessels normally transit Keihin Unga Fairway Kawasaki in a Easterly direction. Most vessels enter through Tsurumi and lea through Kawasaki entrances.

The bridge across Tsurumi Fairway is not yet completed.

Stores: Prices for fresh food are high but quality is good. Stores can b supplied by barge while at the anchorage or whilst alongside. By pri arrangement small amounts of spares or stores can be delivered to th quayside but only up to 70 m. from the ship.

Ship's Register.
Last Port Clearance.
5 Crew Lists including Passport Numbers.
5 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, came wrist-watch, radio, firearms/swords, etc. (only at first port of cal Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Ca Manifest and Cargo Manifest in Transit using specific forms. Thereb ship's Agent should be provided with necessary information about deta of cargoes in advance.

PILOTAGE: No particular regulations for navigating in Kagoshima B Suggest enter Bay on course close to Osumi Peninsula. 3 Light Beac South of oil piers for ships approaching and manoeuvring. Bay Pi not provided but Mooring Master provided for assistance to Master berthing without charge. No VHF available for ship-sho communication.

ANCHORAGES: Anchorage area ranges in depth from 30 m. to 60 Holding ground in these areas only fair; recommended vessels le long scope of chain. Locally tide rise approximately 3 m. in springs a 1.5 m. neaps. Maximum tide currents Northerly 0.32 knots, Southe 0.47 knots. Ample anchorage and manoeuvring area N.E. of termi

Since the holding ground in Kagoshima Bay is not very good, m vessels prefer to proceed to the open sea, outside the bay, if a typho is predicted to pass nearby.

RESTRICTIONS: Night entry and departure permitted subject weather conditions. However, Harbour Master will not permit vess loaded with oil cargoes to berth between sunset and sunrise.

MAX. SIZE:

Berth	*Max. LOA* (m.)	*Max. Draft* (m.)	*D.W.T.* (tons)
1	300	16.2	33,000–150,000
2	300	16.2	33,000–150,000
3	400	25.2	33,000–450,000
4	450	30.6	up to 500,000

HEALTH: Radio Pratique available. Quarantine Officers board t vessel either at the Quarantine Anchorage or at the pier, depending availability of berth.

RADIO: Recommended Master communicates with Agent throu Choshi Radio or Nagasaki Radio which cover all ports in Japa If specifically Westbound vessel to contact Choshi and Northbound contact Nagasaki Radio respectively.

TUGS: Mooring and unmooring assistance provided by 4×3,200 h.p. tu

BERTHING: No specific requirements. Pilot boarding time will be noti by ship's Agent mainly by telex.

MEDICAL: Advance notice required if arriving at weekend.

TANKERS: (Crude oil only).

Berth No.	*Connections*	*Discharge Rate*
1	4×12 in.	10,000 k/l (loading/unloading)
2	4×12 in.	10,000 k/l (loading/unloading)
3	6×16 in.	27,600 k/l (unloading) 12,000 k/l (loading)
4	2×16 in. 3×24 in.	9,200 k/l (loading/unloading) 30,000 k/l (unloading) 12,000 k/l (loading)

Berthing Procedures and Mooring: The counter current in the bay is anti-clockwise and in the berthing area runs in a S.E. to South-Southeasterly direction, parallel to the berthing face of the berths, at a rate of about 0.5 knots. As a result, vessels always berth port side to.

The normal berthing procedure is to bring the vessel to a stop at a position about 150 m. off the berth, parallel to berthing face, and then to warp her alongside with tug assistance.

Since all berths are surrounded by submersible oil booms, anchors cannot be used when close to the berths.

Berth No. 4 has been designed to permit safe berthing of a 500,000 d.w.t. tanker with a berthing velocity of 20 cm./sec., but normally the berthing velocity is less than 10 cm./sec.

The sequence of bringing out mooring lines depends on tide and wind direction, but normally spring lines first (heaving lines first) and then the other lines (direct in the launch). 2 mooring launches attend (115 h.p. and 165 h.p.)

The usual mooring configuration at Berth No. 4 is forward: 4 headlines, 3 breast lines, 3 spring lines; aft: 4 stern lines, 3 breast lines, 3 spring lines. (A total of 20 lines). During the Winter Northwesterly storm periods, it is usual to add forward and aft each one breast line and one spring line, making a total of 24 lines. At Berth No. 3 under normal conditions, 18 lines are used and in Winter, 18 lines. During the Winter Northwesterly storm periods moorings at Berth No. 3 moorings are same as Berth No. 4.

Tension winches must be set to manual operation and the brakes must be securely applied.

All mooring lines will be inspected by the terminal prior to commencing cargo operations and they have to be in good condition. Also, regular inspections of moorings are carried out during the cargo operations.

DENSITY: 1025.

FRESH WATER: Water obtainable at berth on oil piers at rate of 30 t.p.h.

FUEL: Domestic oil is available from Kagoshima and bonded oil will be lightered from Moji area, when required.

FIRE PRECAUTIONS: Very strict Safety Regulations.

Disregard of regulations will result in stopping all loading or unloading operations and the vessel being ordered off berth for appropriate action to be taken.

CONSULS: None.

REPAIRS: Minor repairs, including equipment/instrument service, can be carried out by Tokyo Tanker Kikoh Co.Ltd. Advance notice required.

DRY DOCKS: None.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

REPATRIATION: Possible.

AIRPORT: Distance from airport about 2 hours by car. ANA, JAL and JAS (TDA) airlines serve daily.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police station Tel: 110; Fire brigade station is located at terminal and Ambulance available at that station.

TELEPHONE: Telephone placed on board at Terminal free of charge for inter-office communication.

SERVICES: All services available.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.

GARBAGE DISPOSAL: Service not available.

WASTE OIL DISPOSAL: Service not available.

SEAMAN'S CLUBS: Kiire Seamen's Club, 1033 Nakamyo, Kiire-Cho, Kagoshima, 891-02 Japan. Tel: 0993-45-0156. Facilities: International telephone and public bar.

AUTHORITY: Nippon Oil Staging Terminal Co., Ltd., 2856-5 Uenohama, Nakamyou Kiire-Cho, Ibusuki-gun, Kagoshima, Japan.

Kiire Port Office, Public Works, 301 12-Cho, Takanohara, Ibusuki City, Kagoshima Pref., Japan. *Tel:* 0993-22-2171. *FAX:* 0993-22-3344.

AGENT: Sub-agents of Aall Barwil Agencies.

Tokyo Tanker Marine Service Co. Ltd., 2856-5, Nakamyo, Kiire-cho, Ibusuki-gun, Kagoshima Pref. 891-02, Japan. Tel: (0993) 45-2511. Telex: 7867-22 Marine J. Fax: (0993) 45-1143. Cables: Tankmarine Ibusuki.

KIKUMA: 34.03 N. 132.51 E. (See Plan)

LOCATION: Sea Berth: Lat. 34° 03′ 34.2″ N., Long. 132° 51′ 52″ E. Dolphin Berth: Lat. 34° 03′ 0.8″ N., Long. 132° 51′ 21″ E.

DOCUMENTS:

Ship's Register.
International Tonnage Certificate.
3 Voyage Memos (Ports of call).
Last Port Clearance.
5 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent, giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from 1 of 3 pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours' and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position: Lat. 34° 35′ N., Long. 135° 08.24′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse. (Vessels transitting Bungo Channel). Position: Lat. 33° 13′ N., Long. 131° 55′ 38″ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot Station.

3. Mesaki, at East side of Kanmon (Shimonoseki) Straits. Position: Lat. 33° 57′ N., Long. 131° 03′ E.

ANCHORAGE: Lat. 34° 03′ N., Long. 132° 51′ E. Water depth: 15 – 30 m.Anchorage located about 350 m. off beach. Holding ground good and Port faces Iyo-Nada and located Bungo Channel. Current at berth and off shore very strong. During Winter months strong N.W. wind prevails.

RESTRICTIONS: Mooring and unmooring daytime only and to be carried out on flood tide.

MAX. SIZE: 88,450 d.w.t., LOA 237 m. and Max. draft 16.0 m.

HEALTH: Closed port. Vessels should obtain Pratique at Matsuyama and Sekisaki, also Radio Pratique available in this port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West bound vessel to contact Choshi and North bound to contact Nagasaki Radio respectively.

TUGS: Join vessel at sea anchorage, always using tugs line without charge. 2 to 4 tugs are required for berthing, depending on size of vessel. 3 tugs are normally used for unberthing.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

MEDICAL: No advance notice required unless urgent.

TANKERS: *Taiyo Oil Co. Terminal.* 2 tanker berths available.

Berth	*Type Cargo & diameter/Number of shore pipes*	*Discharge rate* Kl.p.h.
Dolphin Berth	Crude oil 24 in.×1(12 in.×2)	4,500
	Motor Gasoline 18 in.×1(12 in.×1)	1,600
	Kerosene 12 in.×1 (10 in.×1)	800
	Gas Oil 8 in.×2 (10 in.×1)	800

DENSITY: Anchorage 1021. Berth 1021.

FRESH WATER: Fresh water not available but usually brought by barge from Onomichi (about 6 hours run to Kikuma). Rate of delivery 80 tons to 200 t.p.h. dependent on barge.

FUEL: Can only be supplied by barge from Hanshin and Kanmon area, provided 5 days notice is given. All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from nearest bunker stock ports at maximum 7 days prior notice.

CONSULS: No consuls. The nearest Consulates in Kobe.

REPAIRS: Only minor repairs.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

REPATRIATION: Possible. Nearest Immigration Office situated at Matsuyama.

AIRPORT: Nearest Matsuyama, distance 50 km.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.

TELEPHONES: No facilities for placing telephones on board.

SERVICES: See "Kobe".

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 7 days, but 7 days extension possible if ship stays longer.

GARBAGE DISPOSAL: Not compulsory.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Japanese Yen.

GENERAL: As this port is a closed port, the undermentioned procedures required: In conformity with regulations vessel required to obtain special permission to enter from Shikoku Maritime Bureau.

Customs request vessel call at Kikuma to obtain special permission for entering at preceding port, by paying the charge at the same rate of tonnage dues.

Prior to arrival of a vessel, the above procedures will be undertaken by Agent.

No quarantine available, the nearest quarantine station is located at Matsuyama.

No Immigration Office at this port (coming from Matsuyama).

AUTHORITY: Taiyo Oil Company Ltd., Kikuma Refinery, 63 Tane, Kikuma-Cho, Ochi-Gun, Ehime-Prefecture, Japan. 799-23. *Tel:* 0898-54-5170. *Telex:* 584-5542. *FAX:* 0898-54-5367. *Contact:* Manager of Oil Handling Section.

KIN WAN (Okinawa): 26.22 N. 127.58 E. (See Plan)

DOCUMENTS:
Customs:
Required upon vessel's arrival by:
Customs Officer: Okinawa Customs Branch, Henza Sub-Branch Office. Location: 2972 Aza Henza Yonashiro-Son, Okinawa (Tel: 09897-7-8558).

1. When ship arrives direct from foreign port, Customs Officer will board vessel for search. Following documents to be submitted.

5 copies Crew List.
3 copies Passenger List.
1 copy Stores List.
1 copy Crew's Baggage List.
4 copies Ports of Call List.
1 copy International Health Declaration.
Ship's Register.
International Load Line Certificate.
Last Port Clearance.
Bill of Lading.

Ship's Agent will prepare Inward Declaration, one Cargo Manifest, Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

2. When ship comes from Japanese port, Customs Officer will not attend on board except special case. Agent to attend Customs House for entry formalities with following documents.

Crew List and Passenger List.
Stores List.
List of ports of call on current voyage.
(Last Port Clearance and Documents entrusted with the Master by Customs at previous port).

Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

Immigration:
Required upon vessel's arrival by:
Immigration: Naha Immigration Kinwan Sub-Branch Office.
Location: 2628-2 Ishikawa City, Okinawa (Tel: 09896-4-2858).

1. When ship arrives direct from foreign port, Immigration Officer will board vessel for check. Following documents to be submitted.

Crew List. . . . . 2 copies
Passenger List. . . . . 2 copies

Please collect the Crew Seaman's Book in order such as No. 1, No. 2 . . . till the end as per Crew List stated.

Please collect the passports in order such as No. 1, No. 2 . . . till the end as per Passenger List stated.

Ship's Agent will prepare Inward Vessel Declaration, one application for shore pass, one application for extension of the area of movement using specific forms.

2. When ship comes from Japanese port, Immigration Officer will not attend on board, except special cases. Agent to attend Immigration Office for entry formalities with following documents.

Crew List. . . . . 2 copies
Passenger List. . . . . 2 copies
Seamens' Books
Passports

Documents (Shore Passes) entrusted with the Master by Immigration at previous port. Ship's Agent will prepare Inward Declaration, one application for Shore Pass, one application for Extension of the Area of Movement using specific forms.

APPROACHES: See "Berthing" – Report dated 1983.

PILOTAGE: Also see "Approaches".

Berthing Masters will normally board from a tug having a blue hull and cream upperworks, with a tall mast bearing a number (1, 2, 3 or 4). Since the tugs have a fairly high freeboard, pilot ladders should be rigged with the bottom step about 6 ft. (2 m.) above the water level, otherwise the lower steps may be crushed or damaged. Vessels with a freeboard exceeding 30 ft. are requested to rig the pilot ladder in conjunction with an accommodation ladder in the approved manner.

Masters of calling vessels are reminded of their obligation to comply with statutory rules and are requested to comply with International recommendations concerning pilot ladders. If the ladder is not safe, the Berthing Master may refuse to board and thus cause unnecessary delay to the ship.

ANCHORAGES: Recommended anchorages: Also see "Berthing" – Report dated 1983.

For mammoths in order of arrival:
K1: Lat. 26° 24′ 00″ N., Long. 127° 57′ 48″ E.
K2: Lat. 26° 23′ 30″ N., Long. 127° 57′ 12″ E.
KE: Lat. 26° 25′ 00″ N., Long. 127° 58′ 10″ E.
KW: Lat. 26° 25′ 12″ N., Long. 127° 55′ 24″ E. (for vessels over 100,000 g.r.t. and requiring long stay).

(Subject Japanese Coastguard M.S.A. approval is obtained by Agent.)

For vessels 50,000 d.w.t. – 150,000 d.w.t.
KS: Lat. 26° 23′ 06″ N., Long. 127° 56′ 43″ E.
S1: Lat. 26° 22′ 30″ N., Long. 127° 56′ 48″ E.
S2: Lat. 26° 22′ 00″ N., Long. 127° 56′ 48″ E.

Products anchorage: The area bounded by a line joining the follo positions:
1. Lat. 26° 22′ 00″ N., Long. 127° 56′ 29″ E.
2. Lat. 26° 22′ 13″ N., Long. 127° 56′ 33″ E.
3. Lat. 26° 22′ 00″ N., Long. 127° 57′ 19″ E.
4. Lat. 26° 21′ 51″ N., Long. 127° 57′ 05″ E.

The holding ground is good in anchorages, but depths in the first gro between 22 and 25 fathoms; it is therefore recommended that at lea shackle of chain be walked back on the windlass before letting go the anc

Depths in the product anchorage vary between 10 and 14 fathom

Prior to anchoring, vessel must obtain permission from Nakagusu Maritime Safety Agency Office, who designates the anchoring posi

Prohibited Anchorage: Owing to the existence of underwater pipeline telephone cables and obstructions, anchoring is prohibited anywhe S.E. of a line joining the following 2 positions:
1. Lat. 26° 22′ 31″ N., Long. 127° 58′ 08″ E. (i.e. the N.E. dolphin the Sea Island)
2. Lat. 26° 21′ 37″ N., Long. 127° 56′ 44″ E. (i.e. the N.E. dolphin No. 3 Berth on the Products Pier)

For berthing, Masters of vessels are requested to have the prope submerged and vessel in a reasonable trim for ship-handling purpo (not exceeding 3.5 m.).

RESTRICTIONS: Berthing operation is permitted during daylight o Unberthing operations take place throughout 24 hours.

There are no specific restrictions on draft, but in order to ensure sa handling characteristics it is recommended that vessels arriving in balla arrange that the propeller is fully submerged, with a stern trim n exceeding about 10 ft. Vessels which do not meet this requirement m be delayed in berthing until additional ballast has been run in.

MAX. SIZE: 5 berths are available for calling tankers. Berth No. 1 c accommodate vessels up to 500,000 d.w.t., and Berth No. 2 vessels to 150,000 d.w.t. These 2 berths are situated at the offshore platfo Berths No. 3, No. 4, No. 5 are situated at the Product Dock.

Berth No.	*Max. d.w.t.*	*Least depth of water below datum*	*Remarks*
Sea Berth 1	500,000	102 ft.	
Sea Berth 2	150,000	90 ft.	
Prod. Pier 3	60,000	50 ft.	Max. dist. stern t manifold 320 ft.
Prod. Pier 4	20,000	36 ft.	
Prod. Pier 5	10,000	30 ft.	

In addition to the above tanker berths a dry-cargo berth is a available. This berth is 110 m. in length and has a least depth of 2 below Okinawa Datum.

HEALTH: Quarantine Office: Naha Quarantine Office.
Location: Naha Godo Chosha Bldg., 11-1, 2-chome, Minato-Ma Naha, Okinawa (Tel: 0988-68-1674).

At first port of call in Japan, vessel may obtain Free Pratique.

Quarantine Officer will attend vessel only from daylight to sunset, a Master to show all vaccination cards and Derat Exemption Certifica If vessel arrives from infected area crew and passengers' hea condition to be cabled to Quarantine Officer through ship's Agent p to arrival, and close all soil pipes before entering port.

(1) *Radio Pratique:* Free Radio Pratique Telegrams to Quarant Station not less than 12 hours and not more than 36 hours before arri advising full details of vessel and health condition on board. When Fr Pratique is granted by radio, vessel will be required to submit t following documents to Quarantine Officer on arrival.

Maritime Declaration of Health. 1 co
Crew List and Passenger List. 1 co
Vaccination List. . . . . 1 co

(2) The following vessels will not be able to obtain Radio Pratiqu

A vessel that has been in contact with an infected area or a suspec infected area within 15 days of arrival.

If a vessel has onboard any case, or any suspected case, of infectio disease within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemp Certificate.

RADIO: When on route to the Kin Wan Port at Okinawa a vessel's E must be communicated to his Agent, 72, 48 and 24 hours prior to arri If VHF is not available arrival information can also be passed to y Agent by "Ship Telephone Service". Naha: 09885-4-5155.

It is important that ETAs are confirmed 12 hours before expec arrivals and amendments communicated when known.

VHF station "Kin Wan Tug" located on Henza Island keeps a 24 h listening watch on Channel 16 (156.800 MHz) and Channel 13 (156. MHz). Tel: 09897-7-8341 is also manned 24 hours per day.

RADAR: The port is not equipped with radar. Poor visibility may oc in heavy rain, but fog is rare. Coastlines and buoys within the bay p good echo returns on ship's radar. All tugs are fitted with radar, and occasions vessels have been guided into the port by them in hea rainstorms, the tug keeping close alongside within sight of the brid and communicating by VHF.

TUGS: 4 tugboats are stationed at the Terminal. The Berthing Mas in consultation with the Master will decide the number of tugs requ for each berthing operation and as stand-by tugs during the vesse stay in port.

Vessels are berthed with the assistance of up to 4 tugs accordin the vessel's size and weather conditions. Such tugs will either se alongside, "American style", or will secure forward or aft by their to hooks. Tugs' lines are always used. The tugs are 2×3,400 h.p. Z-pelle 2×2,600 h.p. Z-peller and 2 small twin-screw tugs 400 h.p., and m manned by highly skilled crews. It should be noted that the port char for vessels are a fixed amount based on deadweight tonnage, and t charge is not affected by the number of tugs used or not used. Mas may thus follow the Berthing Master's recommendations regarding t requirements without having to consider what may well be dange economies.

READINESS: A vessel is "arrived" for Notice of Readiness purposes, when the Berthing Master boards or, if vessel proceeds to anchorage without a Berthing Master, when she drops her anchor.

BERTHING: In normal circumstances no lines are run out until the vessel is alongside the berth and in position. Tugs will hold her there whilst the mooring takes place, springs usually being run first, followed by breastlines, then head- and stern-lines. On the larger berths all lines except springs are lowered to the water and taken to the dolphins by line-handling boats, where they are secured to quick-release hooks. Nothing is required in the way of pennants, tails or shackles. Springs are passed direct to the dolphins by heaving-lines.

Owing to the depth of water, anchors are not normally used when berthing at the sea-berth. However, the outboard anchor should in all cases be ready for emergency use.

Weather permitting, vessels secure starboard side alongside at Berth No. 3. At Berths No. 4 and 5 vessels can only berth starboard side to the pier, owing to the construction of the berths. Therefore if wind conditions do not permit of berthing in this way, the berthing will be delayed until the wind is suitable. At the sea-berth, mammoth vessels normally berth port side to the pier, but this is only to reduce the time taken for the operation, and they can be berthed starboard side to if conditions require it. Smaller vessels are berthed either way according to requirements and conditions.

The Marine Office is equipped with a Weather Facsimile Recorder, and Masters can obtain the latest information regarding possible storm conditions by contacting the Berthing Master on VHF Channel 13 or by dialing 580 on the internal telephone system from the berths. When typhoons are imminent all cargo operations cease and vessels are required to vacate the berths and are recommended to proceed to sea.

Berth No. 1: Also see "Report" dated 1983 (below).
Owners: Okinawa Terminal Company Ltd.
Position: Lat. 26° 22′ 25″ N., Long. 127° 58′ 01″ E.
Depth: 30 m. (MLWS).

Max. Size: 110 m. LOA, 17 m. beam, 8.5 m. draft limiting condition 1,000 d.w.t.
Services: Fuel oil, 6 in. hose, 70 kl/h diesel, 6 in. hose, 700 kl/h. Fresh water available, but not fit for drinking.
Loading Rates: JP4, JP1, kerosene, diesel and fuel oil "A" 700 kl/h. Max. pressure 20 kg./sq.cm. sulphur, 120 kl/h, max. pressure 15 kg./sq.cm. low sulphur fuel, 600 kl/h max. pressure 20 kg./sq.cm. LPG 200 kl/h max. pressure 27 kg./sq.cm.
Vessels berth port side to.

Operator's Report: 1983.
Okinawa Terminal Co. Ltd. (OTC) Sea Berth (Discharging and loading terminal): Operated by OTC.

Terminal operates 24 hours per day, 7 days a week. Ships moored and unmoored at anytime, weather or other circumstances permitting. Terminal will not be closed on any holidays.

Location: Lat. 26° 22′ 25″ N., Long. 127° 58′ 01″ E.
Pilotage: Compulsory.
Anchorage: (See "Plan") Anchorages are in the following positions. Approval of The Captain of the Port of Kim-Nakagusuku must be obtained through Agent prior to arrival

K1: Within a radius 700 m. Lat. 26° 24′ 00″ N., Long. 127° 57′ 48″ E. For vessels of 100,000 g.r.t. or over.

K2: Within a radius 700 m. Lat. 26° 23′ 30″ N., Long. 127° 57′ 12″ E. For vessels of 100,000 g.r.t. or over.

KE: Within a radius 700 m. Lat. 26° 25′ 00″ N., Long. 127° 58′ 10″ E. For vessels of 100,000 g.r.t. or over.

KW: Within a radius 700 m. Lat. 26° 25′ 12″ N., Long. 127° 55′ 24″ E. For vessels of 100,000 g.r.t. or over.

KS: Within a radius 600 m. Lat. 26° 23′ 06″ N., Long. 127° 56′ 43″ E. For vessels of maximum 100,000 g.r.t.

S1: Within a radius 400 m. Lat. 26° 22′ 30″ N., Long. 127° 56′ 48″ E. For vessels of maximum 10,000 g.r.t.

S2: Within a radius 400 m. Lat. 26° 22′ 00″ N., Long. 127° 56′ 48″ E. For vessels of maximum 10,000 g.r.t.

Approaches: For the purpose of Traffic Separation and Control, the approach to Kin Bay is divided by a channel centre line joining the following positions. Lat. 26° 26′ 00″ N., Long. 128° 02′ 00″ E. and Lat. 26° 24′ 47″ N., Long. 127° 59′ 26″ E.

Vessel should make for position Lat. 26° 26′ 00″ N., Long. 128° 04′ 00″ E. off the East coast of Okinawa and from there steer to the West, passing Menguisho light beacon abeam to port at a distant of about 1.25 miles. The Berthing Master will board VLCC's (150,000 d.w.t. or over) or any ship which is on a first visit to the port.

When vessels are abeam of the beacon (but if circumstances should prevent this, the ship should continue on the Western course for one mile past the beacon) alter course to 242°, after about 1.4 miles on this new course the ship will be at the inner pilot boarding area.

Berthing:
Maximum rate 4,000 kl/h
West side of sea berth (No. 1 berth)
Max. size 500,000 d.w.t., Max. draft 26.0 m.
East side of sea berth (No. 2 berth)
Max. size 150,000 d.w.t., Max. draft 20.0 m.

Ballast: Disposal of dirty ballast water over the side is strictly prohibited by the Authorities and any pollution of the sea will result in heavy claims and fines.

No ballast is to be taken from the bay unless required for the ship's segregated clean ballast system. Ballast for cargo tanks will be supplied by the terminal.

LOADING: Loading lines at the berths are as follows: (*Note:* Hoses are listed from N.E. to S.W.)

Berth No.	*Dia. (in.)*	*To handle*	*Type*
1	16	Products	Chicksan arm with Q/C
	16	Crude/HFO	Chicksan arm with Q/C

	4	LPG vapour return	Flexible hose
	6	LPG/propane/butane	Flexible hose
	6	Liquid sulphur	Mechanical arm
	6	Bunkers (FO, DO)	Flexible hose

During cargo transfer or ballast operation all vessels shall show signal flag "B" during the day, and a red light during the night.

Transfer operation shall not be started, or if started shall be discontinued by either the duty officer of the vessel or the Terminal supervisor, when any of the following conditions come to his attention:

- *(a)* During severe electrical storms.
- *(b)* If a fire occurs on the pier or on the vessel.
- *(c)* If there is not sufficient competent personnel aboard the vessel or on the pier to safely handle cargo operation in progress.
- *(d)* Should any condition develop which represents a hazard to the vessel or Terminal installation.

MEDICAL: Agents should be given advance notice of medical or dental attention required. Clinic and hospital facilities are available, and in emergencies helicopter evacuation is possible. There is also a Company ambulance on Henza Island, for emergencies only. Tel: 119. If no answer, or at night, telephone 318. Or contact C.C.D. (Central Control Desk) on VHF Channel 16 or 13 or Tel: 580.

DENSITY: The bay is open to the sea, and normal density is 1025.

FRESH WATER: Available at Berth Nos. 3, 4 & 5, but not fit for drinking.

FUEL: All grades of bunkers are available at Nos. 3, 4 and 5.

FIRE PRECAUTIONS: Smoking and use of naked lights is strictly prohibited on board vessels alongside the berths, except in those enclosed spaces aboard ship specifically designated by the Master as "Smoking Areas".

Fire wires of steel must be hanging over the side of the offside bow and quarter whilst alongside to enable tugs to connect readily in an emergency situation. The towing eyes should be maintained at water level.

Boiler tubes must not be blown whilst vessel is alongside and every precaution must be taken to prevent sparks and soot particles escaping from the funnel.

Mooring of boats or craft with mechanical propulsion alongside a vessel loading/discharging crude oil or in the process of ballasting, is not allowed, unless special permission has been given by the Terminal.

In case of a fire aboard a vessel alongside the pier the following sequence of procedure should be adhered to:

(a) "Kin Wan Tug" to be informed immediately.
(b) All cargo operations to cease forthwith.
(c) MOV's and gate valves on loading arms, nitrogen and battery limit valves to be closed as soon as possible.
(d) Dock personnel to stand-by for disconnecting loading arms, unberthing or fire-fighting in accordance with instructions issued by the Berthing Master or "Kin Wan Tug".

During an emergency situation on board a vessel alongside, the Berthing Master will be in charge of organising the preliminary fire-fighting assisted by "Kin Wan Tug". He is to make use of all available means at his disposal, such as tugboats, launches, personnel, terminal equipment and other facilities to assist the vessel and protect lives and Terminal installations. Should the Berthing Master be unavailable or unable to communicate, "Kin Wan Tug" will direct the preliminary fire-fighting.

Kin Bay area comes under the jurisdiction of the 11th District of the Japanese Coast Guard and lies in Kin Nakagusuku Port. The telephone number of the Captain of the Port-Coast Guard Offices, 11th District is 098895-4874 or 5439.

CONSULS: At present the only Consulates on Okinawa are those of U.S.A., Korea and Philippines.

REPAIRS: Only minor repair facilities are available in Kin Wan, for such small components as can be sent ashore, e.g. repairing of valves or piping, re-winding of electric motors.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Shore gangways are fitted at Nos. 1, 2 and 3, and are supplied free of charge. Ship's gangways must be provided at Nos. 4 and 5. Watchmen are not required since access to the berths is controlled by the Company's security guards at the installation gates.

REPATRIATION: Crew changes and/or repatriation can be arranged by the Agent.

AIRPORT: Kin Wan Port is about 2 hours by car from Naha Airport (depending on traffic conditions) from where there are frequent services by several major airlines to all parts of the world via Tokyo, Honolulu, Taipei or Hong Kong.

TIME: Local time is 9 hours ahead of GMT, unchanged throughout the year.

HOLIDAYS: Local holidays do not normally affect operations in the port. Bank Holidays are now basically the same as those in other Japanese ports.

POLICE/AMBULANCE/FIRE: Ambulance 119 after hours or 580 (C.C.D.) or VHF 16; Fire 119 after hours or 580 (C.C.D.) or VHF 16; Police inform C.C.D. by VHF Ch. 16 or Tel: 580, or Berthing Master Tel: 578.

TELEPHONES: Telephones are not placed on board, but for urgent ship's business arrangements can be made for calls to be placed through the Company switchboard.

SERVICES: Tank-cleaning alongside is prohibited, but facilities for discharge of tank washings are available. See "Pollution Control".

SHORE LEAVE: For reason of safety the Terminal and the Off-Shore Platform are restricted areas. However, ship's personnel and visitors to ships are permitted to disembark and embark via the dolphins, which are also the personnel landing areas. Loitering at the loading platform will not be permitted.

Unauthorised or apparently intoxicated or disorderly persons shall be prohibited from entering the pier and the Terminal.

Shore passes will be issued by the Agent. These passes must be surrendered to the Agent prior to the ship's departure, unless the vessel is bound for another port in Japan when they can, after stamping, be used in the second port. The pass is sufficient, and no other means of identification need be carried when ashore.

POLLUTION CONTROL: Gas-freeing is not allowed on tankships alongside the pier.

To minimise the chances of pollution *all* ballast, whether clean or dirty, *must* be discharged ashore, except that which is contained in independent "permanent" ballast tanks. Also all ballast loaded into cargo tanks must be taken from ashore, and not from the Bay. The shore ballast tank has a capacity of 550,000 barrels and is connected to all tanker berths.

Caution: The sea berth is surrounded by a new type of sink/float oil fence to contain any oil that may be spilled on the sea. This fence is moored in place by 36 anchors and ropes. Vessels are therefore warned against approaching this fence or using any anchors in the vicinity of the sea berth. Nor should they throw overboard any old wires, ropes or other rubbish which may foul or damage the fence or its moorings.

The Terminal will, in case of an oil spill, take such steps as may be deemed necessary to fight the pollution before it spreads. If the spill is due to faulty equipment or materials on the vessel or to negligency on the part of ship's personnel, the Terminal shall be indemnified for any expenses incurred in connection with the preventive action taken.

No ballast is to be taken from the Bay unless required for the ship's clean permanent ballast system. Ballast for cargo tanks will be supplied by the Terminal.

AUTHORITY: Okinawa Prefectural Government, 1-2-32, Izumisaki, Naha, Japan 900. *Contact:* Nobuo Oshiro, Chief of Port Division.

AGENT: Sub-agents of Aall Barwil Agencies.

For Vessels at OCC: Okinawa Maritime Industries Co. Ltd., 1, Hiramiya, Yonashiro-son, Nakagami-gun, Okinawa Pref. 904-24, Japan. Tel: (098) 977-7733. Telex: 795-6160 Kikai J. Fax: (098) 977-7220. Cables: Okship Naha.

For Vessels at OTC: Okinawa Terminal Co. Ltd., 6483, Aza Heianza, Yonashiro-son, Okinawa Pref. 904-24, Japan. Tel: (098) 977-8226. Telex: 795-605 Kps J. Fax: (098) 977-7411. Cables: Kinwanport Svc Naha.

KINUURA: 34.50 N. 136.56 E. (See Pla

DOCUMENTS:

Ship's Register.
International Tonnage Certificate.
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
2 Ports of Call Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, came wrist-watch, radio, firearms/swords, etc. (only at first port of cal Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Car Manifest and Cargo Manifest in transit using specific forms. Therefo ship's Agent should be provided with necessary information about deta of cargoes in advance.

PILOTAGE: Compulsory in Isewan (including Mikawawan) for vesse exceeding 10,000 g.r.t.

When pilot required, cable Agent at least 1 day before arrival w ETA Pilot Station. Pilot boards at/off Irago No. 1 Buoy (Lat. 34° 30.8′ N Long. 137° 06.9′ E.) when coming from East, or Lat. 34° 28.3′ N., Lon 137° 03.8′ E. when coming from West or South, and Kinuura Harbo Anchorage (Lat. 34° 48.1′ N., Long. 136° 57.3′ E.). If there is a change, cable "Handakoun Handa", who pass messages to pilot.

Also see "Nagoya" – Pilotage: "Shipmaster's Report".

ANCHORAGE: Kinuura Anchorage located in position Lat. 34° 49′ N Long. 136° 57′ E. Depth of anchorage: Outside high tide bank abo 38 ft. – 39 ft., inside high tide bank about 32 ft. – 33 ft.

RESTRICTIONS: *Depth in Channel:*

South of Central Roads: 12.0 m.
North of Central Roads: 10.0 m.

MAX. SIZE: See "Berthing".

HEALTH: Radio Pratique available. Formalities will be carried ou Lat. 34° 48.7′ N., Long. 136° 57.24′ E., or in a position with Taket Lighthouse bearing 155° × 5,000 m.

At first port of call in Japan, vessel must obtain Free Pratiq Quarantine Officers will attend vessel only from daylight to sunset Master to show all Vaccination Cards, Derat Exemption Certificate case vessel arrives from cholera-infected area within 10 days, Ma must advise crew and passengers health condition to respec Quarantine Office through ship's Agent prior to arrival, and close all pipes before entering port.

RADIO: Recommended Master communicates with Agent throu Choshi Radio or Nagasaki Radio which cover all ports in Japan specifically Westbound vessel, to contact Choshi and Northbound contact Nagasaki Radio respectively.

BERTHING: No specific requirements. Pilot boarding time will be notifi by ship's Agent mainly by radio.

VHF: Mikawawan Port Radio on Channels 16, 11 and 12. Irago Pilot on Channels 13 and 16.

TUGS: No tug required when vessels enter anchorage, only alongside wharves. 2×3,500 h.p., 1×3,400 h.p., 1×3,200 h.p. and 1×1,460 h.p.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost.

MEDICAL: No advance notice required unless urgent.

DENSITY: About 1023 – 1027.

FRESH WATER: Available, but only 1 water barge – capacity 70 tons. Water available alongside by pipeline (rate 75 t.p.h.) at Kawatetsu Wharf; Chuo Wharf East No. 2, 3 and 4, and Chuo Wharf West No. 4; Chuden Dolphin and Kamezaki Wharf No. 1 and 2.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days' prior notice.

Domestic oil also available.

CONSULS: None.

REPAIRS: Minor repairs possible.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

AIRPORT: No airport locally.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: 20th July.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.

TELEPHONES: No telephones available to place on board.

SHORE LEAVE: Local Immigration Offices issue shore passes valid for 15 days.

AUTHORITY: Kinuura Port Office, 1-1, 11-Gochi, Handa-shi, Japan. Tel: (0569) 21-2451.

AGENT: Sub-agents of Aall Barwil Agencies.

KISARAZU (Kimitsu): 35.22 N. 139.52 E. **(See Plan)**

PORT LIMITS: Refer to Marine Chart No. 1067. Published by Surveys of the Hydrographic Department M.S.A., Japan.

DOCUMENTS: Arrival

Quarantine Service:

Maritime Declaration of Health – WHO Form, 1 copy.
Crew List – free form, 1 copy.
Passenger List (if any) – free form, 1 copy.
Derat (Exemption) Certificate, presentation.

Immigration Service:

Crew List – free form, 1 copy.
Passenger List (if any), – free form, 1 copy.
Passport or Seamen's Book (all of them), presentation.

Customs Inspection:

Ship's Register, presentation.
Last Port Clearance, presentation.
Crew List – free form, 1 or 2 copies.
Passenger List (if any) – free form, 1 copy.
Stores List (Japanese Customs form required).
Declaration of Crew's Baggage, (Japanese Customs Form required) i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan.)
List of ports of call including last foreign port.

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: *Berthing Pilot:* Compulsory for foreign trade vessels over 10,000 g.w.t. Application to be made to Yokohama Pilot Office, via local Agent. Pilot boards on Kisarazu Quarantine Station or entrance of approaching passage. Pilot available 0600 hrs. – 1900 hrs. for inward vessels, and 0600 hrs. – 2000 hrs. for outward vessels. Large vessels (over 60,000 d.w.t.) can enter until 1 hour before sunset and may leave up until 30 minutes before sunset.

Bay Pilot: Uraga & Nakanose on entering: Bay Pilot became compulsory in January 1977 for foreign trade vessels over 10,000 g.w.t. Application required 24 hours prior to entering by Cable to Anjin Yokosuku through Agent or direct. Pilot boarding position located on point 5.0 miles and 161° from Kannon Zaki L.H. Available any time, if any delay, change must be cabled to Anjin Yokosuka.

On leaving: Application same as on Entering. Pilot boarding on pier or off harbour.

ANCHORAGE: Refer to Japanese Chart No. 1062 (middle part of Tokyo Bay). Kisarazu Quarantine Anchorage boundary.

RESTRICTIONS: See "General".

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port. A vessel may be berthed without a stay at the anchorage if Radio Pratique system used and permission of Chief of Quarantine Office. If Pratique formalities carried out locally vessel anchors 1.5 miles off No. 1 Entrance Buoy in position: Lat. 35° 21′ 54″ N., Long. 139° 50′ 35″ E.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

VHF: Port Radio Station at Yokohama works 24 hours. Channel 16. Call sign "Yokohama Port Radio".

RADAR: Radar station at Kannonzaki which controls all vessels in Uraga Channel.

TUGS:

2 tug boats belonging to Kimitsu tug boat station.

3,200 h.p.	2 tugs

Another 16 tug boats listed belonging to Yokohama tug boat station.

2,000 h.p. – 2,500 h.p.	4 tugs
2,500 h.p. – 3,000 h.p.	8 tugs
3,000 h.p. – 3,500 h.p.	4 tugs

Tug boat's lines used free of charge.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by VHF.

Public: Kisarazu Quay E. Max. draft 7.5 m. at high tide. Length 260 m. Capacity 5,000 d.w.t.

Private: Kisarazu Lumber Association dolphin pier. Max. draft 10.0 m. Length 250 m. Capacity 25,000 d.w.t.

Kimitsu Works of Nippon Steel Corporation.

Centre Pier:

No. 1–4	Coastal chemical tanker, tug boat basin.
No. 5	Coastal Raw material discharging berth.
No. 6	Discharging berth of iron ore and coal. Max. draft 16.0 m. at high tide. Length of berth 304 m. Capacity 150,000 d.w.t. or 270,000 d.w.t. (Part load). Dischage rate for coal 25,000 tonnes per day.
No. 7	Discharging berth of iron ore and coal. Max. draft 18 m. at high tide. Length of berth 350 m. Capacity 200,000 d.w.t. Discharge rate for ore 30,000 tonnes per day.
No. 8	Discharging berth of iron ore and coal. Max. draft 18 m. at high tide. Length of berth 422 m. Capacity 310,000 d.w.t. Discharge rate for ore 30,000 tonnes per day.
No. 10	Coastal Limestone carrier berth.
No. 11, 12	Coastal tanker berth.

Centre Pier unloader at No. 6 & 7 – 4 units each capacity 1,500 t.p.h.
Centre Pier unloader at No. 8 – 1 unit capacity 2,500 t.p.h.

Also see "Shipmaster's Report" dated December 1991.

West Pier:

No. 1–6	Coastal small ships only.
No. 7	Loading berth of steel products. Max. draft 11 m. Length of berth 250 m. Capacity 30,000 d.w.t. Shore crane 1 unit 20 tons, 1 unit 30 tons.
No. 8	Loading berth of steel products. Max. draft 11 m. Length of berth 250 m. Capacity 30,000 d.w.t. Shore crane 1 unit 30 tons, 1 unit 20 tons.
No. 9	Loading berth of steel products. Max. draft 11 m. Length of berth 285 m. Capacity 30,000 d.w.t. Shore crane 1 unit 30 tons, 1 unit 35 tons.

No. 10 Loading berth of steel products. Max. draft 11 m. Length of berth 230 m. Capacity 40,000 d.w.t. Shore crane 2 units each 30 tons.

East Pier:
No. 2 Loading berth of steel pipes. Max. draft 11 m. Length of berth 240 m. Capacity 30,000 d.w.t. Shore crane 3 units on Berths No. 2 & No. 3 berth 30 ton.
No. 3 Loading berth of steel pipes. Max. draft 11 m. Length of berth 240 m. Capacity 30,000 d.w.t. (See No. 2 Berth).
No. 4–13 Coastal ships only used for loading wire rod, angle bar, etc. and discharging materials.

CRANES: See "Berthing".
BULK CARGO FACILITIES: See "Berthing".
SPECIALISED CARGO-HANDLING FACILITIES: See "Berthing".
BRIDGES: None.
STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost.

Average loading rates: Coils 75 t.p.h.
Plates 50–60 t.p.h.
Pipes 40 t.p.h.
Angle 40 t.p.h.
Wire rods 15–25 t.p.h.
Average discharging rates: Coal 700 t.p.h.
Iron ore 750–800 t.p.h.
1,500–1,600 t.p.h.
(2,500 ton unloader)
Manganese ore 600 t.p.h.
Iron sand 900 t.p.h.
Coke 700 t.p.h.

MEDICAL: No advance notice required unless urgent.
TANKERS: Only coastal tankers.
DENSITY: Summer 1020, Winter 1025·5.
FRESH WATER: Available from shore line. Rate of delivery 40-50 t.p.h.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay. Bunkers will be lightered from the nearest bunker stock ports (Yokohama and Chiba) at maximum 7 days' prior notice.
CONSULS: None.
REPAIRS: Minor repairs only.
DRY DOCKS: 500,000 d.w.t. dry dock at Chiba.
SURVEYORS: Nippon K.K.K., Kimitsu Branch.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches except steel hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.
CARGO GEAR: Usually load/unload by shore cranes.
REPATRIATION: Possible.
AIRPORT: Narita (Tokyo) International Airport is about 2 hours by car or railway.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
HOLIDAYS: No cargo loaded on January 1st. Cargo discharged on all holidays.
POLICE/AMBULANCE/FIRE: Kisarazu Police Station tel. 0438-23-4011; Kisarazu Fire Brigade and Fire Station tel. 0438-23-7121.
TELEPHONES: No telephones installation direct to vessels alongside wharf.
SERVICES: Provisions, laundry, ship's stores, garbage, hold cleaning, navigation aids. Special service are called from Chiba, Yokohama and Tokyo.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 7 days, but 7 days' extension possible if ship stays longer in Japan (up to 15 days if vessel calling at 2 or 3 ports).
IDENTIFICATION CARDS: Shore Pass and Seaman's Book required.
GARBAGE DISPOSAL: Not available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: Japanese Yen.
REGULATIONS: See "General".
GENERAL: Notification to Maritime Safety Agency:

According to Maritime Traffic Safety Law, The Master of large vessel (over 200 m. in LOA and 10,000 g.w.t.) is required to give to Regional Maritime Safety Agency an advance report of estimated time passing the traffic route and other matters and also required to obey the instruction given by the Agencies.

Notification cable definitely to be given by 1200 hrs. (JST) on the day prior to entering, directly from Master or through local Agent. Any change in reported matters, to be reported 3 hours before the time of entering by radio communication or telephone.

Seaweed cultivation to be carried out in the vicinity of Nippon Steel Corporation Kimitsu Works so Master's co-operation with regards to the following items would be appreciated.

1. The discharge of oil or oily waste into the water is strictly prohibited by Marine Pollution Law and other related ordinance.
2. Proceeding to the cultivation area is prohibited.
3. Numerous buoys each exhibiting flashing yellow lights have been established to mark the outer side-line of the seaweed cultivation area.
4. Bunkering possible daytime only whilst in berth (sunrise to 1 hour before sunset) in the Port of Kimitsu. Bunkering also possible at anchorage.

SHIPMASTER'S REPORT: December 1991.
Vessel: 188,000 d.w.t.
Berth: Kimitsu Works – Central Pier – Berth No. 8.
Tugs: Vessel used 4 tugs for berthing and 3 tugs for unberthing. Tu make fast between Buoys No. 5 and 6.

When berthing, the two starboard side tugs let go and push on t port side.

Signals: Inbound vessels fly intention signals and berth signal. Outw bound vessels do not fly any signals.
Pilot: The undocking pilot will normally use the accommodation lad
Moorings: Order of moorings: Headlines, forward breasts, forw springs, after breasts, after back springs and finally stern lines, wh are passed by mooring boat which comes from forward.

AUTHORITY: Kisarazu Port and Harbour Office, 3-13-34, Kaifuch Kisarazu City, Chiba Pref. 292, Japan. *Tel:* (0438) 25-514
Contact: Atsuko Nojima, Director.

AGENT: Sub-agents of Aall Barwil Agencies.

Daito Corporation, Sodegaura Branch, 1-1-21, Nagaurat Sodegaura City, Kimitsu-gun, Chiba Pref. 299-02. Cables: D Kisarazu. Tel: (0438) 62-5886. Telex: 3785-880 Dukca J. Fax: (04 62-1000.

Seitetsu Unyu Co. Ltd., 1, Kimitsu, Kimitsu City, Chiba Pref., 2 01 Japan. Cables: Tetsuun Kisarazu. Tel: (0439) 52-2320. Telex: 3 5861 Tetsuun J. Fax: (0439) 52-5744.
Kimitsu: (Tepco Futtsu): Utoku Express Co. Ltd., Hiranohaitsu, 10 3-6, Higashisakata, Kimitsu City, Chiba Pref. Tel: (0439) 55-13 Fax: (0439) 55-1354.

KOBE: 34.40 N. 135.12 E. (See Pl

DOCUMENTS:
Ship's Register.
Last Port Clearance.
1 Stores List.
1 Declaration of Crew's Baggage.
4 Crew Lists.
4 Passenger Lists (if any).

Ship's Agents will prepare other documents such as Inward/Outw Declaration, Cargo Manifest, etc., using Japanese Custom's Forms
PILOTAGE: Osaka Bay Pilot is compulsory for vessels over 10,000 g Pilot boarding point is 7 miles South of Tomogashima Lighthou (approximately Lat. 34° 10′ N., Long. 135° 00′ E.). Cable addre "Baypilot Kobe". If Bay Pilot is required, inform them 24 hours prior vessel's arrival at Tomogashima Pilot Station.
Harbour Pilot: Pilot boards at Quarantine Anchorage at Wada-Mis Point. Cable address: "Pilot Kobe". 24 hours' prior notice is requi When vessel moors to buoy, chain cable should be prepared.
ANCHORAGES: Quarantine Anchorage: Lat. 34° 38′ N.; 34° 38.6′ Long. 135° 10′ E.; 135° 11′ E.

All vessels requiring anchorage for awaiting berth, repairs, bunker etc., must obtain anchoring position from Harbour Master for per within 3 days.

RESTRICTIONS: Quarantine officials are available during dayl hours. Berthing is not permitted after 2000 hrs., except full contai vessels.

Draft limitation in channel:
1st Fairway: 8.70 m.
2nd Fairway: 11.80 m.
3rd Fairway: 11.40 m.

MAX. SIZE:

Name of Berth	*Max. LOA (m.)*	*Max. Safe Draft (m.)*	*Depth a Berth (m.)*
Showa Sangyo	230	10.45	12.60
Tomen Silo	230	10.45	12.40
Zenno Silo	223	10.45	12.20
Kohnan Silo	250	10.82	12.20
Hanshin Silo	240	10.36	11.60

RADIO: Recommend Master communicates with Agent through Ch Radio or Nagasaki Radio which cover all ports in Japan. If specific Westbound vessel to contact Choshi, and Northbound to con Nagasaki Radios respectively.
Kobe-Radio details:

	Security and Port message	*Port message*	*Public message*

BULK HANDLING FACILITIES: Hanshin Silo Company Berth, 11.60 m. depth alongside available for vessels up to 50,000 tons d.w.t. Discharge effected by 2 pneumatic unloaders with capacity 400 t.p.h. per unit.

Kohan Silo Berth, length 214 m., depth alongside 12.2 m. equipped with 2 discharging units which can be used for grain, sugar, or general cargo, also 1 pnuematic unloader, with capacity 300 t.p.h. and 2 grab buckets with capacity 500 t.p.h. per unit.

Kobe Steel, Berth No. 3: Length 334 m., depth 13.0 m., max. LOA 260 m., beam 40.0 m., draft 11.82 m. 2 cranes available for coal and ore. Discharge rate 1,400 tonnes/p.h.

In the current development programme a total of 7 container berths are to be provided at Kobe.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores.

MEDICAL: No advance notice required unless urgent. Hospital facilities available.

TANKERS:

Name of Berth	*Max. d.w.t. (approx.)*	*Max. LOA (m.)*	*Max. safe Draft (m.)*	*Mooring–Pipeline–discharging rate*
Shell. Bunkers ex-barge only. No slop discharge facilities.	70,000	250	12.6	To 4 buoys. 1×24", 1×12" for F.O., D.O. Minas/Seria Waxy Residue. Average discharge rate (1 Pipe) 1,000 t.p.h. Max. (2 Pipe) 3,000 t.p.h. (mooring possible when tide runs towards West)
MKS. Bunkers ex-barge only.	40,000	234 (breadth 33)	11.20	To 3 buoys. 2×16" for F.O. and D.O. Average discharge rate 1,000 t.p.h. Max. 1,300 t.p.h. mooring possible when tide runs towards West)
MC Terminal (ex-Mitsubishi Shoji) (for L.P.G.tankers).	62,000	231 m.	10.48 m.	Alongside Pier.

Liquid: 12 in. (2 for Butane and 1 for Propane).
Vapour: 1×8 in. and 1×6 in. rubber hose.

Line alignment based on port side to, from ship's bow: PV-PL-PL-BL-BV.

Discharge rate: Propane 600 t.p.h. with max. manifold pressure 5 kg./sq.cm. Butane 800 t.p.h. with max. manifold pressure 5 kg./sq.cm.

MKS Buoy Berth (Noda Terminal): When approaching the berth, the vessel heads straight for the middle of the berth, taking into account the direction and velocity of the tidal stream. Vessels can berth either heading East or West, depending on the direction of the tidal stream, and always use only 3 of the 4 buoys and 2 bow anchors. When heading East the manoeuvre is as follows: When the bow approaches the line connecting the 2 Southerly buoys, drop starboard anchor, swing to starboard paying out about 8 or 9 shackles. When the vessel is about half its length past the 2 Easterly buoys, drop port anchor. Then work vessel astern, paying out port chain and heave in starboard chain to about 4 shackles. Send ropes to 3 buoys, 2 or 3 ship ropes to each buoy, depending on weather and then secure the 40 mm. preventer wires. In this case the Southeasterly buoy is not used. 2 or 3 tugs attend. When heading West, the manoeuvre is similar, but first drop anchor, swing over to port, drop starboard anchor. In this case the Southeasterly buoy is not used. Normally 2 mooring launches are used.

TIDE: Mean height of tide 1.030 m. Some of tanker berths in West part of port affected by tide. Currents less than 1 knot inside harbour.

DENSITY: Winter: 1023 – 1026. Summer: 1018 – 1022.

FRESH WATER: Supplied from the quays at rates of 40 to 50 cu.m. Three water barges available, largest with capacity 325 cu.m., supply vessels at rates up to 300 cu.m./hr.

Possible to supply fresh water at anchorage weather permi 24 hours' prior notice is required.

FUEL: All grades are obtainable from major oil companies and supp by barge.

FIRE PRECAUTIONS: LPG tankers instructed by Maritime Sa Headquarters to strictly observe safety rules. Example: checking on w is carried by those who go aboard; banning ship's stores to be loa on to ship which is working.

CONSULS: The following countries are represented by Consuls in Ko and Osaka area:

Argentina
Australia
Austria
Belgium
Bolivia
Brazil
Canada
Central African Rep.
Chad
Chile
China
Colombia
Costa Rica
Denmark
El Salvador
Finland
France
Gabon
Germany
Greece
Guatemala
India
Indonesia
Italy
Ivory Coast
Jordan
Korea
Luxemborg
Madagascar
Mexico
Netherlands
Norway
Pakistan
Panama
Philippines
Portugal
Russia
Singapore
Spain
Sri Lanka
Sweden
Switzerland
Thailand
Turkey
United Kingdom
U.S.A.

REPAIRS: All repairs possible.

DRY DOCKS:

Kawasaki Heavy Industries Ltd.	2 floating docks 2 dry docks

SURVEYORS: Lloyd's Register, Germanischer Lloyd, American Bur of Shipping, Bureau Veritas, Norske Veritas, Nippon Kaiji Kyokai.

WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: By Stevedores or crew, ship's op

CERTIFICATES: Ship's Register to show Customs Inspector registered gross and nett tonnage. Valid Cargo Gear Certifica sometimes required by stevedores when cargo gear maintena appears to be poor.

CUSTOMS ALLOWANCES: Tobacco (per passenger or crew membe Temporary shore-leave up to 50 cigarettes (duty free); Disembarkati up to 200 cigarettes (duty free). Maximum allowable (only in case disembarkation) up to 800 cigarettes duty free (however, 600 cigare – taxable).

Wines and/or Spirits: Crew member: When the ship at sea for m than 1 month, up to 6 bottles (1 bottle – duty free); less than 1 mo up to 6 bottles (no duty free). Passengers: When a passenger tra for less than a fortnight up to 12 bottles (1 bottle – duty free); more th a fortnight up to 12 bottles (up to 3 bottles – duty free).

REPATRIATION: Possible.

AIRPORT: Osaka International Airport. Distance from Airport ab 1 hour by car.

Domestic: Following regular airlines, Japan Air Lines, All Nippon Lines, Nippon Air System and Air Nippon.

International: For Far East: Japan Air Lines 27 flights per a we Thai International Air Lines 7 flights per a week, Cathay·Pacific Air Li 21 flights per a week, China Air Lines 5 flights per a week, Korean Lines 28 flights per a week, Japan Asia Airways 18 flights per week

For Europe: Lufthansa 4 flights per week, British Airways 2 flights week.

For U.S.A.: Japan Air Lines 13 flights per week, North West Airl 15 flights per week, United Airlines 18 flights per week.

TIME: GMT plus 9 hours. No alteration to clocks throughout year.

HOLIDAYS: 1st January (New Year's Day); 15th January (Coming- Age Day); 11th February (National Founding Day); 21st March (Sp Equinox Day); 29th April (Green Day); 3rd May (The Constitution D 5th May (Children's Day); 15th September (Respect for the Aged D 23rd September (Autumn Equinox Day); 10th October (Health Sp Day); 3rd November (Culture Day); 23rd November (La Thanksgiving Day), 23rd December (Emperor's Birthday).

POLICE/AMBULANCE/FIRE: *Police:* 110; Water Police Station 3 2351, 331-2354, Ikuta Police Station 331-0044, Fukiai Police Sta 231-4441, Hyogo Police Station 551-0051.

Ambulance: 119.

Fire: 119; Water Fire Department 331-9951, Fukiai Fire Depar 291-0401.

TELEPHONES: Possible to place telephone on board.

SERVICES: Compass adjusting, radio/radar services, etc.

SHORE LEAVE: Crew members free to go ashore with landing pa issued by Immigration Authorities.

DELAYS: 1. Weather condition (where strong wind prevents ships entering port). 2. Tide (berths in West part of port). 3. Berths where no ships permitted berth alongside at night. 4. Where a quarantine officer or Pilot being awaited. 5. Shortage of gangs, weather.
GENERAL: When typhoon approaching, Port Captain requires ships to proceed outside breakwater.
DEVELOPMENTS: 5 additional berths (P.C. 13 – 17), each 350 m. length and depth 15 m. are planned for the Port Island in 1996.
3 additional berths, each 300 m. LOA and depth 12 m. planned for Maya Piers.

SHIPMASTER'S REPORT: February 1980 (Updated 1992).
Sakai to Kobe:
Transit: For LPG ships this can only be accomplished in daylight.
Pilots: In normal conditions Sakai Pilot will depart at about No. 5 Buoys madera Passage and vessel proceed to Kobe No. 6 Breakwater embarking Pilot at No. 3 Buoy. In weather with poor visibility take 'Bay' Pilot, no movements with visibility less than 1 mile.
Kobe:
Pilot: For vessels proceeding to Mitsubishi Storage Terminal, Pilot is embarked at No.3 Buoy and leaves at same.
Anchorage: Outside Kobe Breakwaters in areas marked on Japanese Chart. We anchored in Lima 3 area, very congested.
Best to obtain up to date Japanese Hydrographic Office Charts of Kobe and Osaka Bay as frequent changes, also BA. charts do not have incidentals like anchorage areas, Tomogashima traffic routes, lava beds, etc.
VHF: Kobe Port Radio.
N.O.R.: 1st Line ashore.
Tugs: Two powerful tugs join vessel just inside No.7 Breakwater. Cost of one tug Yen 101,700 per hour.
Terminal:
Moorings: 3,2,2, each end, Line boat available.
Tanker type jetty with mooring dolphins each end connected by catwalks.
Berth situated West end of No.2 Industrial area.
Port side to.
Gangway can be difficult to land on narrow catwalk.
No transport near ship, about 5 minutes walk to gate.
Depth: 12.50 m.
Connections: Chicksans: 12 in. liquid, 8 in. vapour return. The forward vapour return line has a right angle elbow in it. Connection and disconnection by shore personnel, can take 1.5 to 2 hours.
Quite often a vapour mixture is returned to the vessel if discharging two grades, generally acceptable if propane and butane.
Max. Rate: About 700 tonnes/p.h. both grades.
Surveyor: NKKK in attendance.
Microbus: We hired microbus for 20 persons on contract hire for 9 hours at Yen 70,000 – about £125. Easy to arrange through Agent.
Doctor: Obtainable, about £40 per visit.
Fresh Water: From the pier through Mitsubishi – will only give what Master has ordered. At 20 t.p.h. Difficult to connect American couplings. Yen 500 per tonne.
Stores: Nil on berth.
Facilities: All repairs off berth.
Walport Film and Video exchange through Agent.
Safety: Normal requirements plus fire axes each end at moorings.
General: As usual the shore line is continually changing and care is required in taking positions.
BA. 2265: Kobe Ko. New breakwater marked by temporary light buoys from Breakwater No. 6 in position 34° 39.99′ N., 135° 14.86′ E. to 34° 39.63′ N., 135° 15.19′ E. in direction 324° – 144° for 830 m.
BA. 3614: Osaka Bay. New Osaka International Airport Buoy 34° 26.9′ N., 135° 16.15′ E. in a Southerly direction for 3.5 miles and Westerly direction for 2.5 miles with causeway to shore in approx. position 34° 24.5′ N., 135° 18.2′ E. Many barges crossing from Awaji Shima.
Also see "SAKAI" – "Shipmaster's Report" – Kobe was 2nd Port of Call.

SHIPMASTER'S REPORT: December 1991.
Charts: B.A. Charts No. 2265, 3615 and 3614.
Documents: We arrived from Yokohama so the agent required:
1 copy Crew List.
1 copy Stores List.
1 copy Previous Ports List.
and the "Rider" from Yokohama.
Pilotage: Osaka Bay Pilot is compulsory for all vessels over 10,000 g.r.t. and is recommended for all foreign vessels due to the traffic density in Tomogashima Straits and from Lat. 34° 30′ N., which is very busy with traffic from the Inland Sea.
Pilots are based at Sumoto on Awaji Shima which is 12 miles from the boarding position. On departure the pilot disembarks off Olshino Hana which is at the tip of Awaji Shima in Tomogashima Straits, The pilot boat is a large craft painted orange. Vessels should call "Bay Pilot Kobe" on VHF Channel 68, they speak good English.
Approaches: Currents through Tomogashima Straits can be strong. Osaka Bay is closed to LNG/LPG vessels if the visibility falls below 0.5 miles.
Anchorage: We anchored in Area "M5" to discharge cargo into barges, the depth of water was 14.0 m. and we used 4 shackles.
Cargo Operations: Vessels discharge into coasters as fast as the pumps can handle. We used 4 in. flexi-hoses. The coasters have good fenders. Cargo Safety Personnel and Surveyors are in attendance.
Fresh Water: Fresh water is available by barge between 0900 hrs. and 1800 hrs.
The minimum supply is 50 tonnes and the cost is Yen 3,000 per tonne.
Shore Leave: A shore leave boat is available but was not used on our visit.

KOCHI: 33.31 N. 133.34 E. (See Plan)

LOCATION: Located on central Southern coast of Kochi Prefecture of Shikoku Island, and on border of Ehime Prefecture and Tokushima Prefecture.
DOCUMENTS:
Ship's Register.
Last Port Clearance.
5 copies Crew List, including Passport numbers.
3 copies Passenger List.
1 copy Stores List.
1 copy Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore, ship's Agents should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Not compulsory, but necessary unless Master well acquainted with locality, because the fairway, channel in vicinity of the Harbour Entrance is regularly dredged, but the channel is long and narrow and the tidal streams are strong. Kochi Harbour Pilot should preferably be arranged through Agent by cable via Nagasaki Radio and Choshi Radio because VHF communication is unavailable.

The pilot is available at the Quarantine Anchorage (Lat. 33° 29′ 00″ N., Long. 133° 35′ 30″ E.) for vessels requiring pilot services. Draft limitation in the channel, depth 7.50 m. (24 ft. 7 in.) and width 170 m. (557 ft.). The pilot undertakes berthing vessels at Niida and Ushioe Berths, with draft up to 7.00 m. Vessel drawing over 6.50 m. may berth at high tide.
ANCHORAGES: *Quarantine Anchorage and Pilot Station:* Lat. 33° 29 ′00″ N., Long. 133° 35′ 30″ E. Quarantine procedures will be carried out at this point.
RESTRICTIONS: The length overall of the vessel must be less than 180 m., because the channel is long, narrow and bending, and the tidal streams are strong.

The draft restrictions are as follows: The permissible draft for LOA over 150 m. at Niida Berth (5-1/5-2), forward shall be less than 5.30 m. and aft shall be less than 7.00 m., and at Ushioe Berth (1-7), fore and aft draft of less than 6.80 m., may berth, except at low tide.
MAX. SIZE:

Ordinary Berths	*Length* (m.)	*Max.LOA* (m.)	*Max.Draft* (m.)	*Remarks*
Niida (5-1)	140	140	7.00	
Niida (5-2)	130	130	5.30	
Ushioe (1-4)	364	100	6.80	Ferry
Ushioe (1-6)	315	80	6.80	Ferry
Ushioe (1-7)	260	130	6.80	

Special Berths	*Max.LOA* (m.)	*Max.Draft* (m.)
Niida (5-1) + (5-2)	180	(F.) 5.30
Shifting not necessary		(A.) 7.00
Ushioe (1-7) + (1-6)	160	6.80

Client must pay shifting charge of vessel/ferry.
HEALTH: Radio Pratique available. At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset, and Master to show all Vaccination Cards and Derat Exemption Certificate.

In case vessel arrives from cholera infected area within 10 days, Master must advise crew and passengers' health conditions to Quarantine Office through vessel's Agent prior to arrival, and close all soil pipes before entering port.
RADIO: Recommended that Master communicates with Agent through Nagasaki Radio or Choshi Radio, which cover all ports in Japan.
VHF: No port radio, except Maritime Safety Office. Maritime Safety Office available only in emergency. The Maritime Safety Office does not accept pilot boarding times, etc.
RADAR: None.
TUGS: 2 tugs (2,200 h.p.) available in Kochi Port. Tug's lines to be used.
BERTHING: No specific requirements. Pilot boarding time will be notified by vessel's Agent mainly by radio.

Berth No.	*Cargoes*	*Remarks* (per day)
Niida (5-1) + (5-2)	American logs	700,000 Scr.
Ushioe (1-4)	Domestic cargo	
Ushioe (1-6)	Domestic cargo	
Ushioe (1-7)	Bulk cargo, coal	1,500-2,500 tonnes

Also see "Max. Size".
BRIDGE: Urado Bridge: The height from the top of the mast of the vessel to sea level must be less than 39 m., regardless of tidal conditions.

Arch-type Bridge: Vessel's height will be checked and calculation prepared for Port Authorities. Centre of the bridge is more than 39 m. from sea level.

STEVEDORES: Log gangs (3-4 gangs) available. Working time: 0800 hrs. to 1700 hrs., excluding Sunday and holidays.
MEDICAL: No advance notice required, except on Sundays, holidays and in an emergency.
DENSITY: 1019, average in the port.
FRESH WATER: Available from shore hydrants, except at Niida Berth. Rate of delivery about 30 t.p.h. Water not available at Niida Berth or to log carriers, as water barge has been scrapped.
FUEL: Bonded oil will be brought from Kobe or Shimotsu. Domestic oil is available by barge. Advance notice required.
CONSULS: None.
REPAIRS: No facilities.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Not specially required, unless valuable cargo on board.
HATCHES: Opening/closing normally carried out by crew.
CERTIFICATES: Ship's Register to show Customs Inspector vessel's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 60 cigarettes to take ashore, but no spirits.
REPATRIATION: Possible. Kochi/Osaka by airplane about 1 hour, and ferry about 10 hours.
AIRPORT: Kochi Airport about 30 km. (40 minutes by car), and connects with nearest international airport (Osaka Airport). For Osaka 19 flights, and others 10 flights (Tokyo, Nagoya, Fukuoka and Miyazaki) per day.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Report to Minami-Sho, nearest Police, and inform your vessel's and Agent's name and reason for call. Emergency Tel: 0888-31-1233 (Minami-Sho Police). They know how to contact Agent in case of emergency.
TELEPHONES: No arrangements for placing telephone on board.
SERVICES: Supply of charts available.
SHORE LEAVE: Local Immigration Office issues Landing Permit and Shore Pass, valid for 15 days.
REGULATIONS: Normal port regulations.
GENERAL: *Traffic Signals:* Vessels of over 1,000 g.r.t. and tankers of over 500 g.r.t. should inform the Harbour Authorities of their ETA/ETD at the Harbour Entrance by noon of the day previous to entry/departure, in Japanese. Vessels entering/departing Kochi Port are controlled by Katsurahama and Urado signals. VHF Channel 16. Tel: 0888-42-6493. Call: "Kochi-Hoan".
DEVELOPMENTS: Kochi new port and new breakwater under construction since 1988.
AUTHORITY: Kochi Maritime Safety Office, 5-4-55, Sanbashi-dori, Kochi City 780, Japan. *Tel:* 0888-32-7111. *Contact:* Harbour Master.

AGENT: Sub-agents of Aall Barwil Agencies.
Irimajiri Kaiun Co.Ltd., 5-10, Sanbashi-dori, 5-chome, Kochi City 780, Japan. Tel: 0888-31-5151. Telex: 5882-140 Irikai J. Fax: 0888-31-5155. Cables: Irimajirikaiun Kochi.

KOKURA: 33.54 N. 130.53 E. (See "Kanmon-Ko")

(See Plan)

LOCATION: Kokura is situated between Moji and Tobata. On the East is contiguous to Moji Port, on the West to Tobata Port and on the North it opens to the Kanmon Straits.
DOCUMENTS: When vessel arrives direct from a foreign port, Customs officials will board to search, and the following documents are to be submitted:

Ship's Register.
International Tonnage Certificate.
Voyage Memo (ports of call).
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent via Nagasaki Radio, giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address: "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Moji". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGE: Anchorage not in use as the area is being dredge the purpose of navigation fairway.

RESTRICTIONS: Vessel enters port only within 1 hour before and a slack tide in daytime. Night departure available up to 2200 hrs. at Hiag Wharves No. 1-7, but departure for East side only from Nos. 5-7 vessels up to 10,000 g.r.t., vessel moored port side alongside.

MAX. SIZE: See "Berthing".

HEALTH: At first port of call in Japan, vessel must obtain Free Pratiq Quarantine Officers will attend vessel only from 0830 hrs. to 1630 h at anchorage. Master to show all Vaccination Cards and De Exemption Certificate. In case vessel arrives from cholera-infected a within 10 days, Master must advise crew and passengers' hea condition to respective Quarantine Office through ship's Agent prio arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent throu Choshi Radio or Nagasaki Radio which cover all ports in Japan specifically Westbound vessel, to contact Choshi and Northbound contact Nagasaki Radio respectively.

VHF: Shimonoseki Port Radio Station on Channels 16, 12, 14, 20 a 22. Pilots on Channel 13.

TUGS: See "Moji".

Towa Shipbuilding K.K. 1 dockyard (max. 1,000 g.r.t.).

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.

REPATRIATION: Possible.

AIRPORT: Fukuoka, about 2 hours by train and taxi from Kokura station to airport. Kitakyushu Airport about 40 minutes by taxi.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119. Public telephone booth available near by the berth.

TELEPHONES: Possible to place telephone on board.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 15 days when Kokura is first port of call in Japan. Extension possible if ship stays longer.

SERVICES: All services available.

SHIPMASTER'S REPORT: 1975 (Updated 1992).

Vessel discharged iron ore at Sumitomo Metal Industries.

Pilotage: Arriving from East. He Saki: Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

Arriving from West. Mutsure: Lat. 33° 58′ 30″ N., Long. 130° 53′ 00″ E.

Anchorage:

He Saki: Lat. 33° 56.2′ N., Long. 131° 02.9′ E. Depth 6.7 m. – 16.7 m.

Mutsure: Lat. 34° 00.0′ N., Long. 130° 52.5′ E. Depth 19.0 m.

Departing from He Saki anchorage to arrive to port of destination in Kanmon Straits in Slack Water and only in daylight.

Normally Pilot boarding 1 hour before tide change. Allowable drafts to transit Kanmon Straits, max. 30 ft. anytime. Max. 32 ft. 10 in. at HW.

Radio Pratique: Obtained if in possession of valid Sanitary Certificate and all Certificates valid. Send cable to Agent with prefix RPM following the standard text.

Docking: Always starboard side.

Anchor: Port anchor ready for emergency.

Fenders: Prismatic rubber.

Gangway: Ship's accommodation ladder.

Discharging Facilities: 3 cranes – capacity 180 t.p.h. each.

Departure from Dock: Undocking only in daylight and about 1 hour before slack water. 3 tugs are necessary for turning the vessel in the narrow basin to head out.

Under construction 2 unloaders, cantilever bridge type, with capacity of 1200 t.p.h. each.

AUTHORITY: Kitakyushu Port and Harbour Bureau, 2-7 Nishi-Kaigan, 1-chome, Moji-ku, Kitakyushu City, Fukuoka Pref., 801 Japan. Tel: (093)-321-5941. *FAX:* (093) 321-5915.

AGENT: Sub-agents of Aall Barwil Agencies.

NOTES

Please also advise Shipping Guides Ltd.

KUDAMATSU: 34.00 N. 131.52 E. (See Plan)

DOCUMENTS: When vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:

Ship's Register.
International Tonnage Certificate.
Voyage Memo (Ports of call).
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent via Nagasaki Radio, giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from 1 of 3 Pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea Pilot Stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Moji". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Saganoseki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGE: Kudamatsu loading anchorage Lat. 33° 59′ 40″ N., Long. 131° 51′ 20″ E.

RESTRICTIONS: No restriction for entry into and/or departure from anchorage during night and daytime. But berthing/unberthing effected during daytime only.

MAX. SIZE: No restriction on length, breadth, and draft for any vessel entering port, but maximum safe draft for Nippon Oil Jetty 19 m., 178,000 d.w.t., Hitachi Seisakusho 9.5 m. and Toyo Kohan Wharf 9.0 m.

HEALTH: Radio Agent for Free Pratique not more than 36 hours before arrival, advising full details of vessel and health condition on board. When Free Pratique is granted by radio, vessel will be required to submit the following documents to Quarantine Officer on arrival at Quarantine Anchorage (Lat. 33° 56′ N., Long. 131° 51′ 30″ W.):

Maritime Declaration of Health.
Crew List.
Passenger List.
Voyage Memo.
Derat Certificate.
Declaration Inwards.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or suspected case, of infectious disease within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to contact Choshi Radio, and Northbound to contact Nagasaki Radio respectively.

TUGS: Tugs normally join vessel proceeding to Nippon Oil Refinery Wharf at Lat. 33° 58′ 20″ N., Long 131° 53′ 30″ E. and proceeding to Toyo Kohan Wharf at Lat. 33° 59′ 40″ N., Long. 131° 51′ 20″ E. Tug's line used and charges for line's use is included in tug-boat operation charge. 8 tugs available, 2,000 h.p. – 4,000 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

	LOA (m.)	*Depth* (m.)	*Capacity* (g.r.t.)	*Cargo*
Hitachi Wharf	175	9.5	12,000	Plant/Carrier
Toyo Kohan Wharf	200	9.0	20,000	Steel Plate

DOCUMENTS:

Ship's Register.
International Tonnage Certificate.
5 copies Ports of Call.
Last Port Clearance.
6 copies Crew List, including Passport numbers.
6 copies Passenger List.
1 Stores List.
Maritime Declaration of Health.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, came wrist-watch, radio, firearms/swords, etc., (only at first port of ca Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Ca Manifest and Cargo Manifest in transit using specific forms. There ship's Agent should be provided with necessary information about de of cargoes in advance.

PILOTAGE: Inland Sea pilotage should preferably be arranged thro Agent via Nagasaki/Choshi Radio, giving 72 hours' notice. Urg correction of ETA outside business hours should be cabled direct to p station. Inland Sea Pilot Association covers all Inland Sea Ports. Pilota compulsory for vessels over 10,000 g.r.t.

Inland Sea Pilots board at the following positions:

1. Vessels transitting Bungo Channel:

Inland Sea Pilot boards at Sekisaki Pilot Station (33° 13′ 131° 56′ E.). Telegraphic address "Anjin Saganoseki".

2. Vessels transitting Kanmon Strait:

Kanmon Strait Pilot boards at Mutsure Pilot Station (33° 59.5′ 130 ° 52.6′ E.) (compulsory over 10,000 g.r.t.). Telegraphic add "Kanmon Pilot Moji", and Inland Sea Pilot boards at Hesaki Pilot Sta (33° 58′ N., 131° 01.1′ E.). Telegraphic address "Anjin Moji".

3. Vessel transitting Kii Strait:
Osaka Bay Pilot boards at Tomogashima Pilot Station (34° 10′ N., 135° 00′ E.). Telegraphic address "Osakabay Pilot", and Inland Sea Pilot boards at Wadamisaki Pilot Station (34° 35′ N., 135° 08′ 24″ E.) (compulsory over 10,000 g.r.t.). Telegraphic address "Anjin Kobe".
Note: VHF communication with Pilot Station available as follows:

Name of Station	Call/Answer Channel	Communication Channel
Oita Port Radio (for Sekisaki)	16	14
Shimonoseki Port Radio (for Mutsure)	16	14
Kobe Port Radio (for Wadamisaki)	16	14

4. Most Inland Sea Pilots act as harbour pilots up to berth or anchorage at destination. If vessel requires only harbour pilot, harbour pilot boards at Kure Quarantine Anchorage (approx. 34° 13′ 30″ N., 132° 31′ 00″ E.).

Also see "Shipmaster's Report" before first port.

ANCHORAGES:

Anchorage	*Position*		Depth (m.)
	Latitude	*Longitude*	
C	34° 13′ 51″ N.	132° 31′ 30″ E.	21.0
D	34° 13′ 29″ N.	132° 31′ 45″ E.	20.0
Y-1	34° 14′ 50″ N.	132° 31′ 08″ E.	20.0
Y-2	34° 14′ 54″ N.	132° 31′ 35″ E.	17.0
C, D & Y-1	For vessels of less than 200 m. LOA.		
Y-2	For vessels of less than 150 m. LOA.		

RESTRICTIONS: Berthing and unberthing from one hour after sunrise to one hour before sunset.

Portion of Nasami Strait (Hiroshima Bay) has depth of 17.0 m., therefore Maritime Safety Agency request bottom clearance 10% of ship's draft plus 0.5 m.

In the following cases, Inland Sea Pilot and Maritime Safety Agency request escort tug at Nasami Strait:

1. Tankers (over 50,000 d.w.t.), if vessel loaded with dangerous cargo.
2. Large vessels (LOA over 250 m.).
3. If vessel's draft over 15.0 m.

MAX. SIZE: Nisshin Steel Wharf: LOA 360 m., 276,000 d.w.t., draft 17.40 m. (as per tidal condition).

HEALTH: Vessel must obtain Free Pratique at first port of call in Japan. Radio Pratique available if vessel has Japanese Sanitary Inspection Certificate. Ordinary Pratique takes place at Kure Quarantine Anchorage.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound/Eastbound to contact Nagasaki Radio respectively. If vessel fitted with telex, they may communicate direct with Agent.

VHF: Hiroshima Port Radio on Channels 11, 12, 14 and 16.

RADAR: No port radar.

TUGS: Tugs normally join vessel at quarantine anchorage area, and tug's lines used at no extra charge (2,600 h.p. – 3,300 h.p.).

BERTHING: Berthing and unberthing from one hour after sunrise to one hour before sunset.

Nisshin Steel Wharf (Private Wharf):
Cargo : Iron ore and coal.
Length : 330 m.
Depth : 18.00 m.
Permissible LOA : 360 m.
Permissible Draft : Under 200,000 d.w.t. – 17.00 m. (draft available – 17.40 m. as per tidal condition). Over 200,000 d.w.t. – 16.30 m.
Cranes : 2×1,500 t.p.h.
Capacity : 276,000 d.w.t.

Kawaraishi South Wharf (Public Wharf):
Length : 370 m.
Depth : 10.00 m.
Permissible Draft : 9.00 m.
Capacity : 2×15,000 d.w.t.
Cranes : None.

Kawaraishi West Wharf (Public Wharf):
Length : 260 m.
Depth : 7.50 m.
Permissible Draft : 6.70 m.
Capacity : 4,000 d.w.t.
Cranes : None.

Hiro Bay:

Hiro is a part of Kure Port and Port Authorities such as Customs and Immigration will attend from Kure.

Quarantine Anchorage: Lat. 34° 11′ 57″ N., Long. 132° 36′ 33″ E.

Anchorage: Anchorage A: Lat. 34° 12′ 00″ N., Long. 132° 37′ 00″ E. Depth 18.0 m.

Anchorage B: Lat. 34° 12′ 03″ N., Long. 132° 37′ 26″ E. Depth 40.0 m. For vessels of less than 200 m. LOA.

Berthing: Berthing and unberthing from one hour after sunrise to one hour before sunset.
Name of wharf : Oji Paper Dolphin
Length : 89 m.
Permissible LOA : 195 m.
Permissible Draft : 9.0 m.
Capacity : 36,600 g.r.t.

Restrictions: Passage from anchorage to dolphin has depth of 8.0 m., therefore berthing about 2 hours before high tide.

Other conditions same as Kure.

CRANES: Floating cranes (lifting capacity from 100 tonnes to 300 tonnes) and mobile cranes (lifting capacity from 20 tonnes to 120 tonnes) are available.

BULK CARGO FACILITIES: See "Berthing".

SPECIALISED CARGO HANDLING FACILITIES: None.

BRIDGES: No bridge restrictions at Kure Port (Hiroshima Bay area).

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep Agent advised of ETA. If stevedores cannot commence loading/unloading at time notifed by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630 hrs. – 2130 hrs. approx. 60% additional of basic stevedorage; 2130 hrs. – 0430 hrs. next morning 130% additional; Sundays/holidays approx. 100% additional.

Discharging of raw materials is on "Free in/out" basis. Therefore stevedorage is to receiver's account.

MEDICAL: No advance notice required, except after office hours, Sundays and holidays. Vaccination against cholera available.

TANKERS: No facilities.

DENSITY: 1023.

FRESH WATER: Nisshin Steel Wharf: No water supply facilities at Wharf. Water available by barge (capacity 330 tonnes) from Hiroshima Port. 3 days advance notice required.

Cost per tonne:
(1) Daytime on weekday Yen 1,000. Overtime Yen 1,500.
(2) Daytime on Sundays/holidays Yen 1,500. Overtime Yen 2,000.

Public Wharf: Available from shore pipeline.

Cost per tonne: Daytime Yen 300. Overtime/Sundays/holidays Yen 450.

FUEL: Most grades of domestic and bonded oil are available, by barge with 3 days advance notice.

CONSULS: No consul available at Kure.

REPAIRS: All types of deck and engine repairs are possible.

At Nisshin Steel Wharf, small repairs can be undertaken subject to berth owner's permission.

DRY DOCKS: Ishikawajima-Harima Heavy Industries Co.Ltd.

Dry Dock	*Length* (m.)	*Width* (m.)	*Depth* (m.)	*Capacity* (g.r.t.)

No. 3	370	68.0	8.96	251,000
No. 4	273	41.7	12.80	69,000

Docks No. 2 and No. 3 are building docks, and Dock No. 4 is a repair dock.

SURVEYORS: Japan Marine Surveyor & Sworn Measurers Association and New Japan Surveyors and Sworn Measurers Association available for cargo inspections.

Lloyd's Register of Shipping and American Bureau of Shipping available for registration surveys.

GANGWAY/DECK WATCHMEN: Not specially required, unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Usually opened by crew.

CERTIFICATES: Ship's Register to show Customs Inspector for confirmation of ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore, but no spirits.

REPATRIATION: Possible.

AIRPORT: Hiroshima Airport, distance from Kure approximately 35 km. Hiroshima/Tokyo (Haneda Airport) 11 flights per day (domestic airline). Hiroshima/Seoul 7 flights per week (international airline).

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: Nisshin Steel Wharf: No stoppages, unless charter party says "excluding from the laydays January 1st".

Public Wharf: No working at year end (New Year from 31st December to 3rd January), daytime only on 30th December and 4th January. Sunday and holiday working, if required, at additional charge.

POLICE/AMBULANCE/FIRE: Police Station (emergency) Tel: 110. Ambulance/Fire Tel: 119. Kure Maritime Safety Agency Tel: 0823-21-0110.

TELEPHONES: No arrangements available for placing telephones aboard.

SERVICES: All navigational apparatus can be serviced as required with minimum 48 hours' advance notice.

BANKS: Hiroshima Bank, Kure Branch, 5-4, Hondori 3-chome, Kure, Japan. Tel: 0823-21-5141. Fax: 0823-24-5575.

Sumitomo Bank, Kure Branch, 1-14, Hondori 2-chome, Kure, Japan. Tel: 0823-22-4921. Fax: 0823-21-0724.

STORING: See "Prelims".

1. At Nisshin Steel Wharf, ship's stores loading by barge.
2. Available to load ship's stores during discharge of cargo.
3. At Nisshin Steel Wharf, trucks cannot proceed alongside the berths.
4. At Nisshin Steel Wharf, cannot use forklift trucks at berth (usually load ship's stores direct to vessel by ship's crane).
5. Must obtain Customs Clearance before loading ship's stores.
6. Riggers available to assist with storing.

SHIP SUPPLY SERVICE: Makino Shipchandler, 5-1, Hondori 1-chome, Kure, Japan. Tel: 0823-21-4443. Fax: 0823-21-4899.

No craft/helicopters at Kure Port.

SHORE LEAVE: Kure Immigration Officers issue shore passes, if crew members have valid Passports or Seaman's Books.

REGULATIONS: Normal port regulations.

DELAYS: If vessel arrives at night-time, it must wait for berth at anchorage.

GENERAL: Kure Port is a local port which makes it difficult to arrange all requirements. At least 3 days' notice helpful.

AUTHORITY: Port and Harbour Dept. – Kure City, 1-6 Chuo 4-chome, Kure City, Hiroshima Pref. *Tel:* (0823) 25-3336.

AGENT: Sub-agents of Aall Barwil Agencies.

MATSUSHIMA: 32.56 N. 129.36 E. (See Plan)

DOCUMENTS: When vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:
Ship's Register.
International Tonnage Certificate.
Voyage Memo (Ports of Call).
4 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Last Port Clearance.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore, ship's Agents should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Pilotage is compulsory for all vessels over 10,000 gross tons by the private regulation of Electric Power Development Co. Ltd., Matsushima Terminal Power Station.

Berthing Master boarding area is normally 2 miles × 300° from Matsushima Breakwater Lighthouse. Lat. 32° 57′ 49″ N., 129° 34′ 14″ E.

Berthing Master is employed by EPDC Marine Co.,Ltd., Matsushima Kouwan Service Center.

Berthing Master boarding time:
Berthing: From one hour after sunrise (usually 0700 hrs.) until 1.5 hours before sunset.
Unberthing: From one hour after sunrise until one hour before sunset.

The pilot ladder must be rigged in accordance with the provision of the Navigation (SOLAS) Regulations.

ANCHORAGES: The recommended anchorage at Matsushima is in position Lat. 32° 58.32′ N., Long. 129° 35.15′ E.
RESTRICTIONS: Pilot available daylight hours only for berthing and unberthing.
MAX. SIZE: Basic design Panamax type (60,000 d.w.t.) is acceptable. Max. draft 14.00 m.
HEALTH: If the vessel is in possession of the Japanese Sanitary Certificate, Radio Free Pratique can be obtained by sending a message to the Quarantine Office in Nagasaki via Agent (not more than 36 hours and not less than 12 hours prior to arrival), after which the vessel can proceed directly to Matsushima. If vessel is not in possession of Japanese Sanitary Certificate, it has to call at Nagasaki or Sasebo for ordinary quarantine service, Customs and Immigration formalities, etc.

If vessel is to proceed to Nagasaki for quarantine, the pilot will anchor the vessel at the outer roads (Anchorage A, Harbour Section No. 6), in position Lat. 32° 42′ N., Long. 129° 48′ E.

Quarantine formalities are possible between 0830 hrs. and 1600 hrs., therefore the vessel has to arrive at Nagasaki Roads before 1600 hrs., otherwise vessel will have to stay overnight in the roads. As soon as formalities are completed, the vessel may sail for Matsushima without a pilot.
RADIO: Recommended that Master communicates with Agent through Choshi Radio or Nagasaki Radio, which cover all ports in Japan. Westbound vessels to contact Choshi Radio, and Northbound vessels to contact Nagasaki Radio respectively.
Advice of Arrival: The Port of Matsushima is a first port of entry, and all ships bound for this port to discharge send their message by telex to Telex No. 754788.
TUGS: Over 60,000 d.w.t. vessels to use 3 tugs when berthing, and 2 tugs when unberthing. Over 10,000 d.w.t. vessels to use 2 tugs when berthing and unberthing. Tug "Tomi Maru" (2,600 h.p.) based at Matsushima, and other tugs assist from Sasebo or Nagasaki.
VHF: Call sign: "Matsushima Kouwan Service Centre".

Frequencies: Channels 16, 12, 6 (via "Tomi Maru").

Continuous Watch: Channel 16.

Vessels should commence a listening watch on Channel 16, 2 hours before arrival and while at anchor.
BERTHING:

Name of Berth	*Length* (m.)	*Max.Draft* (m.)	*Capacity* (d.w.t.)
P-1	255	14.00	60,000
P-2	114	8.00	5,000
P-3	114	8.00	2,000
P-4	114	8.00	2,000 (oil berth)

Matsushima is a small island with an electric plant of the Electric Power Development Co.Ltd. It is a well organised plant with its own port. The concrete berth is well fendered, and there are ample mooring bollards and additional storm bollards. Off the Northern end of the wharf, there is a dolphin joined to the shore by a 65 m. long catwalk. The Northern end of the berth will accept vessels over 60,000 d.w.t. (depth 16.0 m.). The Southern end is for vessels of 5,000 d.w.t., 2,000 d.w.t. and 2,000 d.w.t. respectively.

It is the Custom of the Port to berth port side alongside, but if requested by the Master, vessel may berth starboard side alongside.

The berthing pilot, who is a EPDC Marine Co. employee, hands over a berthing plan when he arrives, which contains information about mooring lines, depth alongside and strength and numbers of bollards. All the bollards are painted and are numbered. The plant and the berth are always kept clean.

There is an approach velocity meter on the quay, and tugs are fitted with receivers.

On average, 4 vessels over 60,000 d.w.t. and 30 vessels of less than 5,000 d.w.t. a month call at Matsushima.
CARGO HANDLING FACILITIES: There are 4 grab unloaders with capacity of 23 tons each. Discharging rate with grabs is 700 t.p.h. maximum each crane, or 2,800 t.p.h. in total (max. daily rate 26,000 tons). The average discharging rate is 1,600 t.p.h. The unloader's travelling distance is 345.0 m. Maximum outreach from fender face 22.00 m. Vessel must keep air draft within 16.50 m.

Normal working hours are from 0630 hrs. to 2130 hrs., 7 days a week, including holidays. The only day not worked is January 1st (New Year's Day).
MEDICAL: There is a hospital at Oseto Cho. 2 days advance notice necessary to Agent before arrival. Only cholera vaccination available.
DENSITY: 1025 (salt).
FRESH WATER: Available. Rate 12 t.p.h. Cost is Yen 450 per kilolitre.
FUEL: Possible by barge. Bonded oil (fuel and diesel) will be brought from Seto Island port.
CONSULS: No local representatives. Marine Note of Protest can be attended by local notary public at Nagasaki City or Sasebo.
REPAIRS: Minor repairs possible.
DRY DOCKS: Nearest dry dock is Oshima Dockyard, which is 6 miles from Matsushima.
SURVEYORS: All surveyors, such as Lloyd's Register, American Bureau, Bureau Veritas, Nippon Kaiji Kyokai, etc., available. They will attend from Sasebo or Nagasaki.
GANGWAY/DECK WATCHMEN: Compulsory. Cost of watchmen Yen 25,440 per day. One watchman on board to attend to the telephone, which is placed on board on arrival. The watchman remains on board until vessel's departure.
OPENING/CLOSING HATCHES: Hatch operations by crew.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid cargo gear certificates sometimes required by stevedores, when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore, but no spirits.
REPATRIATION: Immigration Office is located at Nagasaki City. 2 or 3 days advance notice of crew replacement requested by Agent.
AIRPORT: Nagasaki Airport, 70 km. from Matsushima, about 1.5 h by taxi. This airport serves only domestic airlines. Destination: T 7 flights; Osaka 5 flights; Okinawa, Sapporo, Kagoshima, Miyazaki Nagoya one flight daily.
TIME: GMT plus 9 hours. No alterations made to clocks during ye
POLICE/AMBULANCE/FIRE: Police 110; Ambulance and Fire 11
TELEPHONE: Compulsory to have telephones placed on board du stay. Cost Yen 10,500 for setting up lines onboard, and rental Yen 1,060 per day.
SHORE LEAVE: Local Immigration Office issues shore passes, for only 15 days when Matsushima is first port of call in Japan. Exte possible if ship stays longer. Shore passes are issued for Matsus and Oseto town only. Oseto town is opposite Matsushima Island. T is a ferry boat service between 0700 hrs. and 2200 hrs.

In case Master needs to go to Nagasaki City, for example, Sea Pr or other kind of shipping business, special permission must be obta
SERVICES: All special services available, except tank clea equipment and facilities for discharge of tank washings.
Ship Supplier: Mazda Shinto Senpaku Co.Ltd., 5-5 Hizukushi-ma Sasebo City, Nagasaki Pref., Japan. Tel: 0956-33-9106. Fax: 0956 6231.
WEATHER/TIDES: *Weather:* The Port of Matsushima is situated i North of Kyushu. An incidence of about 2 typhoons per year ca expected during the typhoon season between July and October.

Prevailing winds are Northwesterly, and velocities in exces 27 knots (15 m./sec) are infrequent.

The port facilities are sheltered from swell by the breakwater island. However, prolonged Westerly winds of more than 20 knots occasionally make conditions unsafe for boarding/unboarding of P and Masters are advised to order Pilot and tugs in sufficient time, sh these conditions occur.
Tides: Tidal streams are generally weak, reaching strength of 1.5 k at Spring tides.

The flood tide sets North and the ebb sets South. With the dire of stream, however, near the breakwater tidal stream set to a Southerly.

Tidal height/hour of Port of Matsushima is calculated by tidal da Port of Nagasaki (Standard Port).

Tidal Time: Add 5 minutes.
Tidal Height: 1.06 times.
Mean High Water Interval: 7 hours 59 minutes.
Mean Sea Level above Chart Datum: 1.73 m.
Spring Rise: 3.00 m.
Neap Rise: 2.20 m.

REGULATIONS: Normal port regulation (strictly prohibited to disch bilge oil and other kinds of oil during stay in this port). No smokin the deck or in port area.
GENERAL: *Chart:* Japanese Chart No. 1230.

SHIPMASTER'S REPORT: May 1988.
Health: If vessel is to proceed to Nagasaki for quarantine the Pil anchor the vessel at the outer roads (Anchorage A, Harbour Se No. 6) in position 32° 42′ N., 129° 48′ E. The mooring buoy with a light on BA. Chart No. 2815 in position 32° 41.8′ N., 129° 47.45′ E no longer in existence.
Tugs: In general, vessels over 60,000 d.w.t. use 3 tugs and ves under 60,000 d.w.t. use 2 tugs. On departure 2 tugs are used unberthing. Tugs tow lines are used. The port tugs have a blue hul white superstructure and orange mast.
Berthing: Moorings consisted of 5 head/stern lines and 1 spring li each end. On approaching the berth, 2 headlines can be sent awa one time by the line boat.

On average 5 vessels a month call at Matsushima.
General: Provisions: It is possible to obtain stores at the port.
Tidal Range: Maximum +3.50 m. Minimum −0.50 m.
Hotels: There is no hotel accommodation at Matsushima or Oseto
Tax Free Shop: Should crew wish to buy electrical goods, the Ma should contact Kaijima Company in Sasebo City via the Agent. suggested that a cable/telex is sent well in advance in order th salesman may be sent aboard on arrival.

MATSUURA: 33.21 N. 129.41 E. (See P

LOCATION: Lat. 33° 21.5′ N., Long. 129° 41.5′ E.

The port is located on the Northern coast of Nagasaki Pref. a South Western part of Imari Bay.
PILOTAGE: A vessel berthing or unberthing at Matsuura Coal B (CB-1) has to take a pilot (Berthing Master).

Pilot boarding position is around Lat. 33° 28′ N., Long. 129° 4 which is about 340° × 2.85 miles from Ogonoshima Lighthouse.

Inward pilot boards vessel on lee side at the above position fro "Kyoei-Maru" (3,000 h.p., based in Matsuura), and outward pilot bo at the berth.

DOCUMENTS: The following documents are to be submitted on arrival for formalities:

Ship's Register and/or International Tonnage Certificate.
Last Port Clearance.
5 Crew Lists and Passenger Lists, if any.
3 Voyage Memo (Ports of Call covering last 2/3 months).
1 Declaration of Health.
1 Ship's Stores List.
1 Declaration of Crew's Baggage.

Inward/Outward Declaration, Cargo Manifest and other necessary papers will be prepared by ship's Agents, using Customs forms. A vessel is therefore requested to provide Agents in advance with necessary information regarding cargoes, etc.

ANCHORAGES: No quarantine anchorage in Matsuura.

Proper anchoring area outside of Imari Bay on night arrival or for waiting berth is located about 1.5 miles – 3.0 miles N.W. of Izu-Shima.

Special attention to the many fishing boats and nets should be paid when the vessel approaches the port.

RESTRICTIONS: Entry into Imari Bay (passing Aoshima Strait) is prohibited during night time.

Berthing/unberthing will be carried out during daylight hours only.

Pilot boarding time will be advised by ship's Agents through VHF, telex and/or radio.

MAX. SIZE: Acceptable cape size vessel (approx. 130,000 d.w.t.) with max. draft 16.30 m., LOA 270 .00 m. and beam 47.00 m.

HEALTH: Radio Pratique only acceptable if the vessel holds valid Japanese Sanitary Certificate. Otherwise vessels have to call at a convenient port for ordinary quarantine service, before arrival at Matsuura.

RADIO: Recommended that Master communicates with Agents through Nagasaki Radio or Choshi Radio, which cover all ports in Japan.

VHF: "Matsuura Port Radio" on Channel 16 from 0600 hrs. – 2000 hrs.

TUGS: 4 tugs (about 3,000 h.p.) required for vessels over 100,000 d.w.t. for mooring, and 3 tugs for unmooring. Vessels over 60,000 d.w.t. require 3 tugs for mooring and 2 tugs for unmooring. Vessels over 10,000 d.w.t. require 2 tugs for mooring/unmooring, under normal weather conditions.

One tug ("Kyoei-Maru" 3,000 h.p.) available in the Matsuura Port. Other tugs are available from Imari, Sasebo and Nagasaki.

BERTHING:

Name of Berth	*Length* (m.)	*Max.Draft* (m.)	*Capacity* (d.w.t.)
CB-1	370	16.30	130,000
CB-2	370	16.30	130,000 (under construction)
D-3	105	7.30	2,000
D-4	126	7.30	5,000
K-5	126	7.30	5,000
K-6	105	5.30	2,000

CB-1 and CB-2 are the berths for discharging coal only. Others are utility berths for discharging/loading oil, chemicals, etc.

All berths are privately owned and belong to Kyushu Electric Power Co.Inc., Matsuura Power Station Electric Power Development Co.Ltd. and Matsuura Thermal Power Station.

Vessels are usually required to dock starboard side alongside, unless there is a special reason.

STEVEDORES: Normal working hours are between 0800 hrs. and 2130 hrs. with 2 gangs by 2 unloaders with capacities up to 1,800 tons per hour each.

MEDICAL: No advance notice required, except Sundays, holidays and in emergency cases.

FRESH WATER: Available from shore connection, rate about 20 t.p.h. Charge is Yen 500/cu.m.

FUEL: Possible to supply bonded oil (IFO/MDO) by barge from Kanmon area.

CONSULS: None.

REPAIRS: Only minor repairs possible.

GANGWAY/DECK WATCHMEN: Not specially required, but possible to arrange.

HATCHES: Opening/closing must be done by ship's crew.

CERTIFICATES: Ship's Register or International Tonnage Certificate to show Customs Inspector ship's gross and nett tonnages.

REPATRIATION: Possible, but a few days advance notice of crew replacement to Agents required, since Immigration Office is located in Imari City and Customs House in Sasebo City.

AIRPORTS: International airport is in Fukuoka, distance about 120 km., and local airport is in Nagasaki, distance about 100 km. from Matsuura.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Report to Security's Office located at West end of Berth "CB-1".

TELEPHONES: No arrangements for placing telephones on board vessels. Calls may be made from telephone booth located on the berth.

SHORE LEAVE: Local Immigration Offices issue Crew Landing Permit valid for 15 days and for Matsuura City only. Special permission is required in case of crew going outside of the city limits for ship's official business.

MATSUYAMA: 33.52 N. 132.42 E. (See Plan)

DOCUMENTS:

Ship's Register and International Tonnage Certificate.
Last Port Clearance.
6 Crew Lists including Passport Numbers.
6 Passenger Lists.
1 Stores List.
3 Ports of Call Lists.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. when passing Osaka Bay, Akashi Route, Bisan Seto Route and/or Kurushima Channel. Pilots obtained from 1 of 3 pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea Pilot stations. Also see "Shipmaster's Reports" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat: 34° 35′ N., Long: 135° 08′ 24″ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse (vessels transitting Bungo Channel). Position Lat: 33° 13′ N., Long: 131° 55′ 38″ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki pilot station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat: 33° 57′ N., Long: 131° 03′ E.

4. Tomogashima Pilot Station: Lat. 34° 10′ N., Long. 135° 00′ E.

ANCHORAGE: The port faces Iyo-Nada and located near Bungo Straits. Entrance open to Iyo-Nada towards West, but port protected by West breakwater and small island off Northern part of approaches where holding ground good. During Winter months strong N.W. wind prevails causing heavy swell at anchorage. Depth of water 17 m. – 25 m.

RESTRICTIONS: *Oil tanker berth:* Vessel drawing less than 11.5 m. can moor and unmoor at half-flood during daytime but vessels drawing 11.5 m. or more advised to await high water.

Dry cargo is logs only and cargo working carried out at anchorage of Umaiso and Yura Bay.

Yura Bay: Vessels no longer than 110 m. can berth. Daytime entry only regardless of tide and current.

MAX. SIZE: *Cosmo Matsuyama Oil Co. Ltd., Matsuyama Factory, Genyu Sambashi:* Max. 60,000 d.w.t. Max. LOA, 240 m. Max. safe draft 11.5 m.

Umaiso Bay: Length of vessel 160 m.; breadth no limit; draft 15 m.

Yura Bay: Length 110 m.; breadth no limit; draft 10 m.

Also see "Berthing".

HEALTH: Radio Pratiqu available. At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: For tankers: Join vessel at Quarantine anchorage, using tug's lines without charge. For dry cargo vessel, no tug required for berthing and unberthing in normal conditions.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

General cargo to be loaded/discharged at the following wharves in Matsuyama.

Berth	*Length* (m.)	*Depth* (m.)
Gaiko-Futo Wharf		
No. 1	366	9.5
No. 2	390	7.5
Imazu Wharf	370	10.0

There are no deadweight restrictions at the wharves.

Restrictions: Due to tidal condition (strong current) Pilot requires 2 tugs for mooring and unmooring, even if vessel is less than 5,000 g.r.t.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 0630 hrs. – 0830 hrs., 1630 hrs. – 2130 hrs. 60% additional of basic stevedorage; 2130 hrs. – 0600 hrs. next morning 120% additional; Sundays/holidays 100% additional.

TANKERS: No advance notice of diameter of load/discharge lines required. See "Max. Size".

Manifold: 1×12 in. for loading/discharging Naphtha and Kerosine (rate 1,800 cu.m./hr.). 1×12 in. for loading/discharging diesel oil and fuel oil (rate 1,100 cu.m./hr.). 3×6 in. (rubber hoses) for loading/discharging Mono-Ethylene Glycol (rate 300 cu.m./hr.).

MEDICAL: No advance notice required unless urgent.
DENSITY: Anchorage 1015. Berth 1015.
FRESH WATER: *Cosmo Matsuyama Oil Co.Ltd., Genyu Sambashi:* Can be supplied by shore line with capacity 25 t.p.h.
Anchorage: Can be supplied by 60 ton barge with capacity 60 t.p.h. Strong winds prevail during Winter months, when no water can be supplied.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days' prior notice. Also see "Moji - Fuel".
CONSULS: Consulates in Kobe.
REPAIRS: Only minor repairs.
DRY DOCKS: None. Nearest at Kawasaki Heavy Industries Ltd., Sakaide; Hitachi Shipbuilding & Engineering Co. Ltd., Innoshima and Mukaishima, dimensions of those docks as follows:
Kawasaki Heavy Industries Ltd., Sakaide. Dock No. 2 for 500,000 d.w.t. vessel 450 m.×72 m.×12.3 m. Only used presently for shipbuilding and after services.
Hitachi Shipbuilding & Engineering Co. Ltd., Innoshima Dockyard. Dock No. for 20,000 d.w.t. vessel 175 m.×25 m.×25.62 m.×9.10 m. Dock No. 3 for 130,000 d.w.t. vessel 282.50 m.×47 m.×11.33 m.
Hitachi Shipbuilding & Engineering Co. Ltd., Mukaishima Dockyard. Dock No. 1 for 3,000 d.w.t. vessel 86.18 m.×13.60 m.×6.80 m. Dock No. 2 for 8,500 d.w.t. vessel 125 m.×18 m.×7.40 m. Dock No. 3 for 25,000 d.w.t. vessel 175 m.×29 m.×9 m.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless ship's crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
REPATRIATION: Possible.
AIRPORT: Matsuyama Airport. Services to Tokyo, Osaka and Nagoya by ANA and JAL. Services to Fukuoka, Miyazaki and Kagoshima by Japan Air Systems.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.
TELEPHONES: No facilities for placing telephones on board.
SERVICES: Only at Kobe.
SHORE LEAVE: Immigration issue shore passes valid for 7 days if vessel only calling at one port in Japan or 15 days if vessel calling at more than 2 ports in Japan, further extension possible.
AUTHORITY: Matsuyama Marine Safety Agency, Kaikan-Dori, Matsuyama, Japan. *Tel:* (0899) 51-1197. *Contact:* Port Captain.

AGENT: Sub-agents of Aall Barwil Agencies.
Morizane Transportation Co. Ltd., 2-13, Sobiraki-cho, Niihama City, Ehime Pref. 792. Tel: (0897) 32-6119. Telex: 5844-711 Mrzn J. Fax: (0897) 32-3322. Cables: Morizane Niihama.

MATSUZAKA: 34.37 N. 136.34 E. (See Plan)

Status: Closed Port.

LOCATION: Located at centre of Mie Prefecture, about 55 km. South from Yokkaichi in position Lat. 34° 36′ 47″ N., Long. 136° 33′ 51″ E.
Closed port (not open port) for Japanese Customs and Maritime Laws. Foreign flag ships are not allowed to enter the port directly, and vessel is requested to obtain the permission of Maritime Transport Bureau and Customs' House at one of the open port in Japan before proceeding to Matsuzaka.

To Yokkaichi Transport Bureau: The vessel must obtain permission to enter "Closed-Port" beforehand.
Application for Permission to enter Closed-Port. – 1 original and 4 copies.
Ship's Register – 1 copy.
Crew List – 1 copy.
Cargo Manifest – 1 copy.
Bills of Lading – 1 set of copies.
At Yokkaichi Anchorage: If vessel comes directly from foreign port (Agents board for formalities after Free Pratique).
To Yokkaichi Transport Bureau:
Ship's Register – 1 original.
Crew List – 1 copy.
* Yokkaichi Transport Bureau issues Permission for Entry into Closed-Port.
To Yokkaichi Customs:
Ship's Register – 1 original.
International Tonnage Certificate – 1 original.
Inward/Outward Declaration – 1 copy/2 copies (Prepared by Agents).
Ports of Call List – 1 copy.
Crew List – 1 copy.
Crew's Baggage List – 1 copy.
Ship's Stores List – 1 copy.
Free Pratique Certificate – 1 original.
Permission for Entry into Closed-Port – 1 original.
Application for Permission for Entry into Closed-Port – 3 s (prepared by Agent).
Application for Exemption Tonnage Dues Payment. – 3 s (prepared by Agent).
To Yokkaichi Quarantine: At anchorage, Quarantine Inspector bo to issue Free Pratique.
Declaration of Health – 1 copy.
Vaccination List – 1 copy.
Crew List – 1 copy.
Ports of Call List – 1 copy.
Ship's Register – 1 original.
Matsuzaka Berth:
To Yokkaichi Immigration (issuing Shore Pass):
Inward/Outward Declaration (Prepared by Agent) – 2 copies for ar departure.
Crew List – 1 copy.
Ports of Call List – 1 copy.
To Tsu Customs:
Nearly same as Yokkaichi Customs above.
To Matsuzaka Port Authority and Yokkaichi Maritime Safety Age (For each Authority):
Inward/Outward Declaration – 1 copy.
Crew List – 1 copy (M.S.A. only).
* Agents carry out above formalities.
Entry Formalities:
Customs: (a) If vessel is coming from a foreign port to Matsu directly, Customs formalities must be done at Yokkaichi Ancho After entry and paying "Closed-Port Dues" at Yokkaichi Customs vessel is allowed to proceed to Matsuzaka. After berthing in Matsu entry to Matsuzaka is done at Tsu Customs. Agents carry out the a entry formalities.
(b) If the vessel is coming from a Japanese port, Customs en done at Tsu Customs, after berthing, by Agents.
Immigration: Yokkaichi Immigration Office only.
M.S.A.: Maritime Safety Agency at Yokkaichi has jurisdictio Matsuzaka.
PILOTAGE: Daytime service for berthing/unberthing. Pilot is compu for vessels of 10,000 g.r.t. or more. Vessels of less than 10,000 take a pilot at Master's option.
Pilot boarding point for Irago Bay Pilot:
Entering Ise Bay: Lat. 34° 30.8′ N., Long. 137° 06.9′ E. (Coming East). Lat. 34° 28.3′ N., Long. 137° 03.8′ E. (Coming from South).
Unberthing: Pilot boards at berth. Pilot comes from Morozaki Station.
Harbour Pilot for berthing/unberthing: Harbour Pilot comes on b from Yokkaichi or Nagoya, by tug or car.
ANCHORAGES: In vicinity of Lat. 34° 38′ N., Long.136° 36′ E., sa mud bottom.
APPROACHES: Matsuzaka Port Fairway is 130 m. wide and h depth of 7.5 m.
Tidal Range: H.W.L. + 2.102 m. L.W.L. + 0.144 m.
HEALTH: No quarantine station at Matsuzaka. Ships callin Matsuzaka directly from a foreign port have to call Yokkaichi first, w Quarantine Anchorage is located in vicinity of Lat. 34° 56′ 15.5 Long. 136° 40′ 40.0″ E., where Free Pratique is granted, after w vessel proceeds to Matsuzaka.
Also see "Documents".
VHF: No VHF service in Matsuzaka. Nagoya Port Radio on Channel 16.
RADAR: No radar service in Matsuzaka.
TUGS: No tugs stationed in Matsuzaka. Tugs come from Yokka Nagoya or Mikawa Bay Station.
Two tug companies in service:
Tug charge by Sanyo Kaiji Co.Ltd.
Yen 448,400/day/tug.
Yen 685,700/two days or more/tug.
Tug charge by Nishinihon Eisen Co.Ltd.
Yen 240,000 + (tug charge/hr. × hrs.) for one day's work.
Yen 240,000 × 1.5 + (tug charge/hr. × hrs.) two days' or m
Line Handling: Available in Matsuzaka.
BERTHING: 16 public berths available.

Name of Berth	*Depth* (m.)	*Length* (m.)	*Capacity* (d.w.t.)	*No.of Berths*
Ohguchi	7.5	390.0	5,000	3
North	5.5	86.5	2,000	1
North	4.5	476.9	700	7
Central	4.5	306.0	700	5

CRANES: No shore cranes at the wharves. Mobile crane ava locally.
BRIDGES: None.
STEVEDORES: This service is rendered from Yokkaichi or Nag
MEDICAL: Hospital and clinics are located in Matsuzaka.

MIIKE: 33.00 N. 130.23 E. (See Plan)

DOCUMENTS: When vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:

Ship's Register.
International Tonnage Certificate.
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
3 Ports of Call Lists (Voyage Memo).
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Compulsory; Pilots board at the point Lat. 32° 59′ N., Long. 130° 23′ E.

Shimabara Bay Pilot (Kuchinotsu Pilot) not compulsory. Pilots board 1 mile South of Kuchinotsu Lighthouse, Lat. 32° 35′ N., Long. 130° 12′ E. (Advise ETA Kuchinotsu 48 hours prior to arrival.)

Vessel should proceed to Miike Anchorage by itself in case of Pilot not being arranged.

Bay pilot boat time restricted to 0600 hrs. – 2200 hrs.

ANCHORAGES: Lat. 32° 59′ N., Long. 130° 23′ E. Harbour limit within circle of 2,700 m. radius centering on lighthouse at West end of Northern Breakwater. Roadstead affords safe anchorage, mud and sand.

RESTRICTIONS: Vessel shall dock or depart on HW. Ebb stream begins about 30 minutes before HW and runs to South for 6 hours. Max. current 3 knots at entrance of channel. Flood stream begins at about LW time and runs to North for 6 hours. Maximum of 3 knots at lighthouse. Channel 1,800 m. long, 137 m. broad from jetty to jetty, 45.7 m. width at bottom. 7.3 m. depth at LWOST.

MAX. SIZE: No limitation for breadth and length, but max. drafts are as follows: 29 ft. 6 in. up to 20,000 d.w.t.; 26 ft. 4 in. up to 25,000 d.w.t.; 24 ft. 6 in. up to 30,000 d.w.t.

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset, and Master to show all Vaccination Cards and Derat Exemption Certificate. In case vessel arrives from cholera infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival, and close all soil pipes before entering port.

Formalities will be carried out 2 miles off lighthouse (Lat. 33° 0′ 8″ N., Long. 130° 23′ 50″ E.). Radio Pratique available.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: 3 tugs available. 2×1,100 h.p.; 1×800 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Berth	*Length* (m.)	*Depth* (m.)	*Draft* (m.)	*Capacity*	*Shore cranes & pipelines*
North Quay (No. 6, 7, 8)	558	10.3	10.0	2 ×10,000	1×10 tons 1 unloader*
Dock Pier	90	8.5	8.2	1 × 8,000	1×10 tons
Dock Quay	421	8.5	8.2	2 × 8,000	2 coal loaders
Quay No. 5	91	10.7	10.0	1 × 8,000	1 coal loader
New Quay No. 5	68	10.7	10.0	1 × 6,000	1 coal loader

*One shore unloader at North Quay No. 8. Mainly used for vessels over 5,000 d.w.t.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 100% additional.

MEDICAL: No advance notice required unless urgent.

DENSITY: Average 1025 in Winter, 1020 in Summer, subject to weather and tide current.

FRESH WATER: Available at wharf only. Delivery 20 t.p.h. – 25 t.p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports, bunkers will be lightered from the nearest bunker stock port, at maximum 7 days' prior notice.

CONSULS: No local representatives. Marine Note of Protest can be attended to by local notary public.

REPAIRS: Minor repairs only.

DRY DOCKS: See "Moji".

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches (according to charter party). If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.

SURVEYORS: (1) NKKK cargo inspectors available. (2) Lloyd's Register, American Bureau and Bureau Veritas in Miike.

REPATRIATION: Possible.

AIRPORT: Nearest airport is Fukuoka Airport, about 2 hours drive from Miike. Served by JAL, ANA, JAS and Cathay Airlines.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: 15th August and 1st January are stevedores holidays.

POLICE/AMBULANCE/FIRE: Police 110, Ambulance/Fire 119.

Public telephone booth available near the berth.

TELEPHONES: No facilities for placing telephones on board. KDD Overseas public telephone booth in the port.

STORING: See "Prelims".

1. By truck.
2. Barge storing only when loading steel products.
3. Trucks can proceed alongside at berth.
4. Fork lift trucks available.
5. If any regulations in force agent will arrange documents.
6. Only a few riggers available. Extra riggers come from Moji or Kobe.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Japanese Yen (Y).

SHORE LEAVE: Local Immigration Offices issue crew permit valid for only 15 days, but 15 days' extension possible if ship stays longer.

AUTHORITY: Miike Port Office, Mitsui Mining Co., Ltd., 1 Shinkomachi, Omuta, Fukuoka 836, Japan. *Tel:* (0944) 57-3131. *Telex:* 744405 Omtmpo J. *Cables:* MPO Omuta. *FAX:* 0944-53-5914. *Contact:* Sadao Yufu, General Manager.

MINAMATA: 32.11 N. 130.21 E. (See Plan)

PORT LIMITS: The sea surrounded by the circular arc with a radius of 1,700 m. centred upon Myojin-Zaki (Lat. 32° 11′ 59″ N., Long. 130° 22′ 30″ E.), and the line from the point of Myojin-Zaki to Tsutsuwa-Zaki (Lat. 32° 10′ 50″ N., Long. 130° 22′ 27″ E.) and the coast.

PILOTAGE: Not compulsory, inward or outward. Pilot station Lat. 32° 11′ N., Long. 130° 04′ E. (1 mile South of Toshima-Lighthouse of

Ushibuka). (Acting also as an Agent for foreign vessels). Senko Co. Ltd., Minamata Branch, located at 2-34 Umedo-Cho 1-chome, Minamata City, Kumamoto Pref. Tel: 09666-3-4117. Telex: 764941 Senko J.

ANCHORAGE: Within port limits.

RESTRICTIONS: A Pilot is not available after dark for an outgoing vessel but around-the-clock for incoming vessels. Availability of pilot is dependent on the tidal conditions.

DOCUMENTS: When vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:
Ship's Register.
International Tonnage Certificate.
Voyage Memo (Ports of Call).
3 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc., (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

MAX. SIZE: Max. d.w.t. 40,000 tons at anchorage – Length 190 m., depth 10.5 m. Max. d.w.t. 10,000 tons at Hyakken Wharf – Length 220 m., depth 6.5 m. The tidal difference between high and low water (spring tides) is 4.1 m.

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset, and Master to show all Vaccination Cards and Derat Exemption Certificate. In case vessel arrives from cholera infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior arrival, and close all soil pipes before entering port.

Ordinary quarantine must be undertaken at the Minamata-Yatsushiro Branch Office of the Nagasaki Quarantine Station. Quarantine inspection will be carried out in position Lat. 32° 12′ 30″ N., Long. 130° 20′ 40″ E. This position is about 20 minutes by boat from the port.

Radio Pratique available. Quarantine Office: Tel. 0966-62-4016.

RADIO: Recommended that Master communicates with Agent through Choshi Radio or Nagasaki Radio, which cover all ports in Japan. Westbound vessels to contact Choshi Radio, and Northbound vessels to contact Nagasaki Radio respectively.

VHF: Not available.

TUGS: 2 tugs available. 1×2,300 h.p. and 1×200 h.p. Owned by Senko Co. Ltd.

BERTHING: Hyakken Midori Pier: Length 220 m., depth 6.5 m.
Also see "Developments".

CRANES: Not available. A vessel is required to use her own gear alongside the quay.

STEVEDORES: At least 24 hours' prior notice, excluding Sundays and holidays, required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630 hrs. – 2130 hrs. 60% additional of basic stevedorage; 2130 hrs. – 0500 hrs. next morning 130% additional; Sunday/holiday 100% additional. Name of company: Senko Co.Ltd., Minamata Branch.

MEDICAL: Advance notice required.

FRESH WATER: Available from hydrant of Hyakken Midori Pier, rate approx. 150 – 200 t.p.h.

CONSULS: None. Marine Note of Protest can be undertaken by local notary public.

REPAIRS: Only minor repairs possible.

DRY DOCKS: Not available.

SURVEYORS: Will attend from Miike (N.K.K.K.).

GANGWAY/DECK WATCHMEN: Not specially required, unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work, unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificate sometimes required by stevedores, when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore, but no spirits.

REPATRIATION: Minamata Branch Office of the Fukuoka Immigration Office arranges necessary repatriation.

AIRPORT: Nearest is Kumamoto Airport, about 2 hours drive from Minamata. ANA and JAS for domestic service.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110, Ambulance and Fire 119. The Minamata Police Station located at 2-4 Tenjin, Minamata City. Tel: 09666-3-2171.

Minamata Fire Department, 523, Jinnai-Kitazono, Minamata City. Tel: 09666-3-1191.

TELEPHONES: There are no arrangements for placing telephones on board.

SHORE LEAVE: Local Immigration Offices issue shore passes valid for only 15 days, when Minamata is first port of call in Japan. Extension possible if ship stays longer.

DELAYS: An incoming foreign vessel is to be given priority, but delays will be expected when the quay is occupied by vessels.

DEVELOPMENTS: Hyakken New Wharves (7.5 m. and 10 m. depth) to be completed in 1993/94.

AUTHORITY: Minamata Port Office, 2-21 Minatomachi, 3-Chome, Minamata City, Kumamoto Pref., Japan. *Tel:* 0966-63-2449.

AGENT: Sub-agents of Aall Barwil Agencies.

MITSUKOJIMA: 34.11 N. 132.31 E. (See Plan)

Port Status: Closed Port.

DOCUMENTS:
Ship's Register.
International Tonnage Certificate.
Last Ports Clearance.
Declaration Inward/Outward of Vessel (Agent will prepare).
5 copies Port of Call List.
6 copies Crew Manifest.
6 copies Passenger List.
1 copy List of Ship's Stores.
1 copy Declaration of Crew's Baggage.
Cargo Manifest (Agent will prepare).
1 copy Maritime Declaration of Health.
Customs Formalities: Formalities are to be carried out at ship's last port of call in Japan or Kure Port for entering Mitsukojima (Closed Port), prior to proceeding Mitsukojima Port.

PILOTAGE: Inland sea pilotage should preferably be arranged through Agent, by cable via Nagasaki/Choshi Radio, giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station.

Inland Sea Pilot Association covers all inland sea ports.

Inland Sea Pilot boards at the following positions:

1. Vessels transiting Bungo Channel: Inland Sea Pilot boards at Sekisaki Pilot Station (33° 13′ N., 131° 56′ E.). Telegraphic address "Anjin Saganoseki".

2. Vessels transiting Kanmon Strait: Kanmon Strait Pilot boards at Mutsure Pilot Station (33° 59.5′ N., 130° 52.6′ E.) (compulsory for vessels over 10,000 g.r.t.). Telegraphic address "Kanmon Pilot Moji". Inland Sea Pilot boards at Hesaki Pilot Station (33° 58.0′ N., 131° 01.1′ E.). Telegraphic address "Anjin Moji".

Note: VHF communication with pilot station available as follows:

Name of Station	Call/Answer Channel	Communication Channel
Oita Port Radio (for Sekisaki)	16	14
Shimonoseki Port Radio (for Mutsure).	16	14

3. Most Inland Sea Pilots also act as harbour pilots up to berth or anchorage at destination. If vessel only requires harbour pilot, harbour pilot boards at Kure Quarantine Anchorage.

ANCHORAGES: No anchorage at Mitsukojima.

Vessel is able to anchor off Kure Port, if it arrives at night-time, or if berth is occupied by preceeding vessel. Depth is 20 m.

RESTRICTIONS: Berthing/unberthing from one hour after sunrise to one hour before sunset.

A portion of Nasami Strait (Hiroshima Bay) has a depth of 17.0 m. The Maritime Safety Agency request bottom clearance 10% of ship's draft plus 50 cm.

In the following cases, Inland Sea Pilot and Maritime Safety Agency request escort tug boat at Nasami Strait:

1. Tankers (over 50,000 d.w.t.), if vessel loaded with dangerous cargo.
2. Large vessels (LOA over 250 m.).
3. If vessel's draft over 15.0 m.

MAX. SIZE: LOA 303.59 m., 156,649 d.w.t., draft 17.40 m. (as per tidal condition).

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique.

Radio Pratique is available.

If vessel has no Japanese Sanitary Inspection Certificate, ordinary quarantine procedure takes place at Kure Quarantine Anchorage.

RADIO: Recommend that Master communicates with Agent through Choshi Radio or Nagasaki Radio, which cover all ports in Japan. Communication available with Agent, if vessel equipped with telex.

VHF: Hiroshima Port Radio on Channels 11, 12, 14 and 16.

RADAR: No radar station at Mitsukojima.

TUGS: Available from 2,600 h.p. to 3,300 h.p.

Normally tugs join off Kure Port, and usually tug's line used without extra charge.

BERTHING: Berthing/unberthing from one hour after sunrise to one hour before sunset.

Name of Wharf: Mitsukojima Wharf (private wharf).

Cargo: Salt.

Length/Depth: 192 m./17.0 m.

Permissible Draft/LOA: 16.5 m./303.59 m., draft of 17.4 m. available, depending on tidal conditions.

Capacity: 76,000 g.r.t.

CRANES: No cranes at Mitsukojima. Floating cranes (lifting capacity from 100 tonnes to 300 tonnes) are available from Kure or Hiroshima.

BULK CARGO FACILITIES: See "Berthing".

Discharge is by vessel's belt conveyor.

SPECIALISED CARGO HANDLING FACILITIES: None.

BRIDGES: No bridge restriction at Mitsukojima (Hiroshima Bay area).

STEVEDORES: Discharging of salt is on "Free in/out" basis. Therefore stevedorage is to receiver's account.

TANKERS: No facilities.

MEDICAL: No advance notice required, except after office hours, Sundays and holidays. Vaccination against cholera available.

DENSITY: 1023.

FRESH WATER: Available by water barge (capacity 330 tonnes) from Hiroshima port, 3 days' advance notice required.

Cost per tonne:

(1) Daytime of weekday Yen 1,000/tonne, overtime Yen 1,500/tonne.

(2) Daytime on Sundays/holidays Yen 1,500/tonne, overtime Yen 2,000/tonne.

FUEL: Most grades of domestic and bonded oil are available by barge with 3 days advance notice.

CONSULS: None.

REPAIRS: Minor repairs possible (attend from Kure or Hiroshima).

DRY DOCKS: No dry docks available (available at Kure port).

SURVEYORS: Cargo inspection is available (attend from Kure). Name of surveyors: Japan Marine Surveyor & Sworn Measurers Association, and New Japan Surveyors and Sworn Measurers Association.

Registration surveys are available (attend from Kure). Name of surveyors: Lloyd's Register of Shipping, American Bureau of Shipping.

GANGWAY/DECK WATCHMEN: Not required.

HATCHES: Opening/closing by crew.

CUSTOMS ALLOWANCES: Allowed 60 cigarettes only.

CARGO GEAR: No shore cranes at Mitsukojima port. Discharge is by vessel's belt conveyor.

REPATRIATION: Possible.

AIRPORT: Hiroshima Airport, distance from Kure approximately 35 km. Hiroshima/Tokyo (Haneda Airport), 11 flights per day (domestic airline).

Hiroshima/Seoul, 7 flights per week (international airlines).

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: Working possible on Sundays and national holidays, ex New Year's Holidays (1st, 2nd and 3rd January).

POLICE/AMBULANCE/FIRE: Police Station (emergency) 1 Ambulance/Fire 119; or Kure Maritime Safety Agency (See below

EMERGENCY CO-ORDINATION CENTRE: Kure Maritime Sa Agency. Tel: 0823-21-0110.

TELEPHONES: No arrangements for placing telephones on board.

SERVICES: All navigation apparatus can be serviced as required w 2 days advance notice.

BANKS: Hiroshima Bank, Kure Branch, 5-4, Hondori 3-chome, Ku Japan. Tel: 0823-21-5141. Fax: 0823-24-5575.

Sumitomo Bank, Kure Branch, 1-14, Hondori 2-chome, Kure, Japa Tel: 0823-22-4921. Fax: 0823-21-0724.

STORING: See "Prelims".

1. Ship's stores loaded by barge.
2. Available for loading ship's stores during discharging cargo.
3. Trucks cannot proceed alongside at the berth due to Mitsukoj being an island.
4. Cannot use forklift trucks at berth (usually loading ship's st direct to vessel by ship's crane).
5. Must obtain Customs Clearance before loading ship's stores.
6. Available to employ riggers to assist with storing.

SHIP SUPPLY SERVICE: Makino Shipchandler, 5-1, Hondori 1-cho Kure, Japan. Tel: 0823-21-4443. Fax: 0823-21-4899.

No craft or helicopters at Mitsukojima port.

SHORE LEAVE: Kure Immigration Officers issue shore passes, if members have valid passports or Seaman's Books.

REGULATIONS: Normal port regulations.

DELAYS: If vessel arrives at night-time, vessel must wait at anchor

GENERAL: Mitsukojima is a local port, which makes it difficult to arra all requirements. At least 3 days notice required for most services.

AUTHORITY: Mitsukojima Transshipment Co.Ltd., 24-1, Tono chome, Ondo-Cho, Akigun, Hiroshima Pref., Japan. *Tel:* 0823-52-

AGENT: Sub-agents of Aall Barwil Agencies.

Naigai Unyu Co.Ltd., 1-7, Nakadori 1-chome, Kure, Hiroshima P 737 Japan. Tel: 0823-21-4952. Telex: 662340 Naigai J. Fax: 082 3728. Cables: Naigai Kure.

MIYAKO: 39.39 N. 141.58 E. (See P

DOCUMENTS:

For Quarantine

1 Statement by Ship's Master.
1 Crew List.
1 Passenger List (if any).
Yellow cards for all.
1 Derat Certificate.

For Immigration

1 Declaration of Inward Vessel.
Passport or Seamen's Book for all.
1 Crew List.
1 Application for shore pass.

For Customs

1 Last Port Clearance.
1 Declaration of Inward Vessel.
1 Crew List.
1 List of Crew's Baggage.
1 List of Ship's Store.
2 Cargo Manifest (Discharging).
1 Cargo Manifest (Through).
Certificate of Ship's Registry.

For Port Management Office

1 Declaration of Inward Vessel.

For Maritime Safety Base

1 Declaration of Inward Vessel.
1 Crew List.
1 Cargo Manifest (Discharging).
1 Cargo Manifest (Through).

Above documents to be prepared by Master before arrival.

Master to telegraph ETA and crew's health condition direct Quarantine Miyako before arrival.

PILOTAGE: Not compulsory, but arrangeable at the Master's requ Pilot ordinarily boards at/around Quarantine anchorage, also avai boarding at the Master's request at outer harbour which positi Heisaki light Northward 1.5 miles (Lat. 39° 40.5′ N., Long. 142° 1.2

ANCHORAGES: Quarantine anchorage located at Lat. 39° 37.8 Long. 141° 59.3′ E. Depth 16 m. – 22 m. Bottom mud and sand. Ou breakwater, care should be taken not to foul fishing nets.

Depth in inner anchorage 12 m. – 15 m.

RESTRICTIONS: Night entry and departure permitted subjec weather conditions.

MAX. SIZE: Draft 12 m. and LOA 240 m., breadth no restrictions.

Also see "Berthing".

HEALTH: Radio Pratique available. Formalities carried ou anchorage.

RADIO: Recommended Master communicates with Agent thro Choshi Radio or Nagasaki Radio which cover all ports in Ja Westbound vessel, via Choshi Radio, and Northbound via Naga Radio.

TUGS: Normally join vessel on passage from anchorage. Tugs used. One tug available 2,400 h.p. Additional tugs available f Kamaishi.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Berth	*Max.LOA* (m.)	*Max.Draft* (m.)	*Capacity* (d.w.t.)
Fujiwara Wharf			
F1, 2	260	7.5	2×5,000

F8, 9	555	10.0	20,000
F10	390	7.5	5,000 (under construction)
F11	270	13.0	40,000 (under construction)

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 - 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
MEDICAL: No advance notice required unless urgent.
TANKERS: No facilities.
DENSITY: Average 1019.
FRESH WATER: Available from wharf about 50 t.p.h. but no water barge. In case vessel urgently requires water at anchorage, tug-boat arrangeable for this purpose.
FUEL: Domestic oil is available; Bonded oil will be brought from Tokyo or Sendai, when required.
CONSULS: None.
REPAIRS: Minor deck and engine repairs available.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Not especially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommended request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register, Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: 60 cigarettes to take ashore but no spirits.
REPATRIATION: Possible.
AIRPORT: Hanamaki Airport distant 150 km. from Miyako (2.5 hours by car). 1 flight between Hanamaki/Tokyo Monday/Thursday/ Friday and Saturday and 2 flights Tuesday/Wednesday and Sunday by Toa Domestic Air Lines (TDA).
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police 62-5011 (Headquarters) and 62-6037 (Water Police Station); Ambulance 119; Fire 119.
TELEPHONES: No facilities for placing telephones on board.
SERVICES: Surveyor, Tally, Hold cleaning, Tank cleaning.
SHORE LEAVE: Local Immigration Office issues shore pass valid for only 3 days; 3 days' extension possible if ship stays longer. If vessel advises longer stay in port on arrival, Immigration can issue shore pass for 9 days.
GENERAL: Discharging ex-gearless vessel at wharf not possible as no shore crane for discharge.
AUTHORITY: Miyako Port Administration Office, 114, Fujiwara 3-chome, Miyako City, Iwate Pref. *Tel:* (0193) 62-1471.

AGENT: Sub-agents of Aall Barwil Agencies.
Ohshyuya Kaisoten, 64-67, Fujiwara 3-chome, Miyako City, Iwate Pref. 027, Japan. Tel: (0193) 62-3688. Telex: 8344-08 Koun J. Fax: (0193) 62-4755. Cables: Marushime Miyako.

MIYAZU: 35.32 N. 135.12 E. (See Plan)

DOCUMENTS:
Ship's Register (and International Tonnage Certificate, if Register does not show gross and nett tonnages).
Last Port Clearance.
6 Crew Lists, including Passport numbers.
4 Passenger Lists.
2 Stores Lists.
2 Declarations of Crew Baggage.
PILOTAGE: Not compulsory. Pilots board at Kurosaki Anchorage.
ANCHORAGES: See "Plan".
RESTRICTIONS: Draft limitation in the channel is about 10.0 m. Berthing is only allowed during daytime. Unberthing and sailing is permissible at night-time, subject to advance notice (and pilot's consent if employing a pilot).
HEALTH: Neither Radio Pratique or ordinary quarantine inspection are undertaken at Miyazu, so quarantine must be granted at a way port, such as Maizuru or Moji.
TUGS: 3×330 h.p., 1×80 h.p. and 1×50 h.p.

BERTHING:

Name of Berth	*Length* (m.)	*Depth* (m.)	*Permissible Draft/LOA* (m.)	*Capacity* (g.r.t.)	*Shore Cranes & Pipelines*

MIZUSHIMA: 34.31 N. 133.45 E. (See Plan)

DOCUMENTS:
Ship's Register (Certificate of Nationality).
International Tonnage Certificate.
Last Port Clearance.
6 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
2 Ports of Call Lists (Last 3 months).
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: *(a)* Osaka Bay pilotage should preferably be arranged through Agent by cable via Nagasaki Radio or Inmarsat telex, giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Pilotage compulsory for vessels over 10,000 g.r.t. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations.
Note: VHF communication available with Osaka Bay Pilot Station by calling "Bay Pilot Kobe" through Channel 16 (Telex 5622617 Baykobe J).

Position of pilot station: Lat. 34° 10′ 00″ N., Long. 135° 00′ 00″ E., 7 miles off South of Topmogashima Lighthouse.

(b) Inland sea pilotage should preferably by arranged through Agent by cable via Nagasaki Radio or Inmarsat telex, giving 72 hours notice. Urgent correction same as Osaka Bay Pilot. Inland Sea Pilot Association covers all inland sea ports. Pilotage is compulsory for vessels over 10,000 g.r.t. Pilots available at one of 3 pilot stations, depending on vessel's last port of departure, and at Master's discretion. Pilotage available throughout 24 hours, and 72 hours' advance notice prefered, thereafter advising any alterations. Most inland sea pilots also act as harbour pilots up to berth or anchorage at destination.
Note: VHF communication available with Inland Sea Pilot Station via Kobe Port Radio by Channel 16.

1. Wadamisaki, at entrance to Kobe (vessel transiting Kii Straits). Position Lat. 34° 37′ 50″ N., Long. 135° 10′ 00″ E. Telegraphic address "Anjin Kobe". Telex: 5623011 Anjin J.

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessel transiting Bungo Channel). Position Lat. 33° 13′ 00″ N., Long. 131° 56′ 00″ E. Telex: 751345 Anjin J.

In event of bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E. Telex: 715303 Anjin J.

(c) There is a draft/LOA restriction for passing Kurushima Channel, which is located between Sekisaki/Hesaki and Mizushima, as follows:
Max. LOA is 285 m. for tankers and 300 m. for cargo vessels.
Max. allowable draft is:
For tankers of LOA less than 230 m.: 12 m.
285 m.: 11 m.
For cargo vessels of LOA less than 250 m.: 13 m.
300 m.: 11 m.

Tidal restriction is also applied at Kurushima for vessels of LOA more than 200 m., i.e. such vessel is forced to transit Kurushima with following current of less than 3 knots.

(d) Harbour Pilot: Pilots of the Inland Sea Pilots Association are also employed for this pilotage, if required, and pilot boards at Mizushima Quarantine Anchorage (Lat. 34° 26′ 30″ N., Long. 133° 34′ 30″ E., approximate centre position of quarantine area). However, if an Inland Sea Pilot is employed at the above mentioned pilot station, the same pilot acts for Harbour Pilotage.
ANCHORAGES: Anchorages inside Mizushima port available only for vessels of 3,000 g.r.t. or less. Mizushima Quarantine Anchorage is located outside of Mizushima port and, being treated as "Closed Port", i.e. non-open port, is allowed use by vessels of less than 50,000 d.w.t. and LOA less than 200 m. Other large vessels waiting for berthing can anchor off Kobe with depth 43 m. – 47 m., under approval of MSA Kobe, for limited period, i.e. maximum period of 6 hours for tankers and a maximum of 3 days for cargo vessels.

RESTRICTIONS: *(a)* Entering and departing from port shall be in accordance with instructions to be given by Signal Station.

(b) No restriction imposed upon entering or leaving port during night-time, nevertheless such movements are next to impossible in consideration of the nature of the structures of the port. In addition Pilots refuse to board during night-time.

(c) Tidal restriction is applied for passing Mizushima Traffic Route by pilots as follows:

D.w.t. less than 30,000 : Any time
D.w.t. 30,000 – 50,000 : 2.0 hours either side of slack water.
D.w.t. 50,000 – 100,000 : 1.0 hour either side of slack water.
D.w.t. more than 100,000 : 0.5 hour either side of slack water.

Draft restriction is also applied for passing Mizushima Traffic Route, especially super-size vessels with deep draft (14.5 m. or more) can enter only with high water. 10% of draft plus 0.5 m. of UKC is required basis depth 16.00 m. Height of tide can be added.

MAX. SIZE: See "Berthing".

HEALTH: Radio Pratique available. Formalities will be carried out at Quarantine Anchorage – Lat. 34° 26′ N., Long. 133° 44′ E.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively.

TUGS: Tugs normally join the vessel at the Quarantine Anchorage area. Usually tug's lines used free of charge.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 11

TELEPHONES: No telephone installation service on board.

SERVICES: All navigational apparatus can be served, as reques but technicians are to be sent from Kobe.

SHORE LEAVE: Local Immigration Offices issue shore pass val 7 days for one port call or 15 days for more than 2 port calls, exten possible if ship stays longer.

REGULATIONS: Quarantine Anchorage is outside harbour li therefore (a) no persons allowed ashore from this anchorage, (b supplies permitted to vessels and, (c) No Agency services availab

REPORT: (Ship's Agent) 1984 (Updated 1992).

As you are aware, a vessel over 200 m. in length or 50,000 d.w not allowed to anchor off Mizushima whilst waiting for a berth or d purposes as the space in the Roads is narrow. Therefore, if a ber not available at the expected time of ship's arrival, the ship has to an off Kobe, which is the nearest available place to wait for berthing However, anchoring period is limited to 3 days for cargo vessels, 6 hours for tankers. During vessel's stay in Kobe Roads, quaran service from Kobe Quarantine Station is not available except i emergency as this service is available at Mizushima. The Customs which requires payment of tonnage dues is not made at K Furthermore, if time for waiting berth is longer than period allow stay off Kobe, a vessel is obliged to drift in open sea, keeping 12 nau miles off coast (normally off Kii Suido, but at Master's option adjusting time embarking Osaka Bay Pilot.

In the above circumstances, we, in order to protect the Ow interests, have been instructing the Masters of the vessels to te Notice of Readiness when they arrived off Kobe or drifting posit customary waiting area for Mizushima for waiting berth, although Receivers or Charterers only accept the NOR when Free Prati granted at Mizushima if the vessel is not qualified to obtain Pratique.

It is apparent that when calculation of laytime is made contro arises between Shipowners and Charterers as to who is to bear th of waiting off Kobe or drifting position, for a discharging berth Charterers may contend that the Master is not allowed to tender without Free Pratique and Customs clearance whilst the Owners that the ship was lying at a place for waiting berth solely for Rece Charterers convenience, being her voyage ended.

In order to avoid a dispute of this kind, we would respectfully suggest modifying the charterparty clause for a vessel of the above category calling at Mizushima as follows:

Quote:

If berth is not available on arrival at discharging port, vessel shall be allowed to tender Notice of Readiness from place of anchorage ordered by Port Authorities or drifting position whether in berth or not, whether in port or not, whether Customs cleared or not, whether in Free Pratique or not. Time for shifting from a waiting area to discharging berth not to count.

Unquote.

AUTHORITY: Mizushima Port & Urban Development Bureau, Okayama Pref. 1-12, Mizushima Fukuzaki-cho, Kurashiki City, Okayama Pref. Tel: (0864) 44-7141.

AGENT: Sub-agents of Aall Barwil Agencies.

Dry Cargo: Naigai Unyu Co. Ltd., Kaigan Bldg., 1, Mizushima Kaigan-dori 2-chome, Kurashiki City, Okayama Pref. 712, Japan. Tel: (086) 444-5211. Telex: 5933-330 Naigi J. Fax: (086) 444-5229. Cables: Naigai Mizushima.

Tankers: Nippon Marine Co. Ltd., Nikko Mizushima Pef, 2-1, Ushio-dori, Kurashiki City, Okayama Pref. 712, Japan. Tel: (086) 455-5362. Telex: 5933-306 Marine J. Fax: (086) 456-3326. Cables: Nipponmarine Kurashiki.

MOJI (Kitakyushu): 33.57 N. 130.58 E. **(See Plan)**

(See "Kanmon-Ko").

LOCATION: Moji port is located in the Kanmon Straits between Shimonoseki on Honshu Island and Moji at the Northeast tip of Kyushu and is well sheltered from the open sea by steep hills on all sides. According to the Harbour Regulations, the port is one of the sections in Kanmon Harbour which consists of Moji, Shimonoseki, Kokura and Dokai (Tobata, Wakamatsu and Yawata). In 1963, five cities, Moji, Kokura, Tobata, Wakamatsu and Yawata situated in North-Eastern part of Kyushu were combined in one city, as Kitakyushu.

Moji is now known as Moji-ku of Kitakyushu City.

DOCUMENTS: When ship arrives direct from foreign port, Customs Officials will board to search vessel. Following documents to be submitted:

Crew List, including Passport numbers.
Passenger List.
Ship's Stores List.
Manifest of crew personal effects (must be signed by individual crew member).
Arms and ammunition List.
Narcotics List.
List of ports of call on current voyage.
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration Inward/Outward (Form No. C2000).

The following will be checked on board:

Ship's Registry.
Last Port Clearance.
International Tonnage Certificate.

When ship comes from Japanese port, Customs Officials will not attend on board, except special case. Master or Agent to attend Custom House for entry formalities with following documents:

Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration Inward/Outward.
Ship's Registry.
Last Port Clearance.
Documents entrusted with the Master by Customs at previous port.

On ship's departure, clearance issued by Customs, after confirming payment of tonnage dues.

PILOTAGE: (1) *Harbour Pilotage:* Compulsory for entry, departure and when vessel passing through Straits if g.r.t. exceeds 10,000 tons. Pilots embark Eastbound vessels at Mutsure Quarantine Anchorage position half mile East Mutsure L.H. Lat. 33° 58′ 15″ N., Long. 130° 53′ 43″ E. and Westbound vessels at Hesaki Quarantine Anchorage position 125°, 1,500 m. from Hesaki L.H. Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E. Two Pilots embark vessels exceeding 30,000 gross tons for entry and departure charging double pilotage (×85%).

(2) *Sea Pilotage:* Vessels approaching from East can obtain Pilots by radio request made at least 24 hours in advance. Pilot embarks at position 3 miles South from Sekisaki L.H. Lat. 33° 13′ 00″ N., Long. 131° 56′ E.

(3) Pilots should be kept closely advised of vessel's accurate ETA at pilot station. If any change in vessel's movements, Master requested to immediately communicate by radio or VHF to pilot offices directly or through Agent reporting revised ETA. Cable addresses of pilot offices are: Harbour Pilot "Kanmonpilot Moji", Inland Sea Pilot "Anjin Moji".

(4) *VHF:* Vessels keep in direct contact with port authorities with regard to arrival, berthing instructions and Pilot's requirements through VHF as follows:

(a) Call sign: Kitakyushu Port Radio (or Shimonoseki Port Radio).
(b) Location of Radio facilities: Transmitting and receiving station located at the top of Mt. Hinoyama, Shimonoseki.
(c) Type of wave: Channel: Simplex 16 (calling, responding); Simplex 12 (communicating); Simplex 14 (communicating); Duplex 20 and 22 (communicating). Output 50 W.
(d) Operating hours: 0000 – 2400 hrs.
(e) Communicating range: Within a radius of 50 miles from the Hinoyama Station.
(f) Communicating language: Japanese/English.

ANCHORAGE:

Tanoura No. 1 Anchorage (83° from Moji Saki Light Buoy, 1,340 m.). Draft 9.1 m.

Tanoura No. 2 Anchorage (83° from Moji Saki Light Buoy, 1,770 m.). Draft 9.1 m.

Tanoura No. 3 Anchorage (80° from Moji Saki Light Buoy, 2,300 m.). Draft 9.1 m.

WIND, TIDE: Easterly winds prevail in warm seasons. N.W. winds prevail in Winter season. Dense fog frequently prevails in Spring and Autumn.

Tidal range 3.07 m. Current near entrance of port runs Westward at flood and Eastward at ebb. Speed of current in vicinity of narrowest section of Straits sometimes reaches 7 – 8 knots. In stream of port, it is about 3 – 5 knots.

RESTRICTIONS: *(a)* Berthing: During daytime only. Occasionally large vessels drawing deep draft made to await high water and/or suitable current to berth alongside wharves.

(b) Departure: With adequate notice, no restrictions from anchorage and/or buoys. Night departure from wharves generally practicable, except No. 7 Wharf and Nos. 8, 9, 10 Wharves, the latter 3 berths however only permitting vessel to sail against tide.

(c) Tug assistance may be required at Pilot's discretion for large vessel mooring to and/or unmooring from buoy, depending upon efficiency of engine and conditions of weather, tidal current, etc.

(d) Vessels with draft over 10.0 m. (33 ft.) but not exceeding 11 m. can pass through Kanmon Straits with favourable tide.

MAX. SIZE: *Tankers:* 1 tanker berth, Mitsui & Co. Berth "B". Max. d.w.t. 33,000 tons. Max. LOA, 200 m. Max. safe draft 9.10 m.

Also see "Berthing" and "Tankers".

HEALTH: Radio Agent for Free Pratique not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When Free Pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Declaration Inward.
Voyage Memo (Port of Call).
Maritime Declaration of Health.
Crew List.
Passenger List.
Derat Certificate (copy).

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case of infectious disease, within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

(a) Quarantine Station at Western entrance: half mile East from Mutsure Lighthouse Lat. 33° 58′ 15″ N., Long. 130° 53′ 43″ E.

(b) Quarantine Station at Eastern entrance: 125°, 1,500 m. from Hesaki Lighthouse Lat. 33° 56′ 24″ N., Long. 131° 30′ 12″ E.

(c) Quarantine inspection not allowed inside port except when weather or other special reasons prevent quarantine boat from approaching ship at anchorage.

(d) "Q" flag should be hoisted until ship is in Free Pratique.

(e) Vessels exceeding 20,000 gross tonnage may undergo quarantine on application when they berth inside port.

(f) Quarantine service is rendered from 0830 hrs. – 1630 hrs.

(g) When ship arrives from plague infected or suspected area within 10 days after she left such place, a 24 hour special quarantine is required. All sanitary scuppers must be closed and garbage must not be thrown overboard after ship reaches 60 miles off Japanese coast.

(h) Radio Pratique is obtainable according to the Radio Pratique Regulations.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively.

VHF: See "Pilotage".

TUGS: Normally join vessel at suitable position for mooring in judgment of Pilot and tug. In operation, tug's line to be used for mooring and unmooring without any charge. 10 tugs, 1,500 h.p. – 3,520 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Shinmoji: Shinmoji Wharf is equipped to handle raw materials and goods used in the Shinmoji marine industrial area. The second term reclaiming construction has been carried out, so that it will be able to function as an intensive centre for middle-distance and long-distance ferrying in the future. Depths alongside 4.5 m.–10.0 m.

Developments: See "Developments".

CONTAINER HANDLING FACILITIES:

Tanoura Container Terminal

Total area:	61,100 sq.m.
Area per berth:	One berth only
	Sea depth: 10 m. under low water level (LWL)
	Length of wharf: 300 m.
	Marshalling yard: 46,894 sq.m.
	CFS: 3,390 sq.m.
	Office, control tower: 596 sq.m.
Gantry crane:	Single/twin: Single
	Height of span above quay: 9.2 m.
	Max. outreach: 36 m.
	Max. backreach: 7.5 m.
	Lifting capacity: 37.5 tons
	Spreader sizes: Capable of handling containers of ISO-IS & IC also Matson type
	Width of rail: 30 m.
Reefer plugs:	220 V×12
Illumination:	3 (25 Lux) 1 kW×28
Track scale:	Scaling maximum 50 tons
Straddle carriers:	3

Tachinoura No. 1 Container Terminal:

Total area:	128,720 sq. m.
Area per berth:	Two berth
	Sea depth: 12 m. under low water level (LWL)
	Length of wharf: 620 m.
	Marshalling yard: 96,665 sq. m.
	CFS: 818 sq. m.
Gantry crane:	Single/Twin: Twin (three cranes)
	Height of span above quay: 10.8 m.
	Max outreach: 38 m.
	Max. backreach: 11 m.
	Lifting capacity: 48.6 tons
	Spreader sizes: Capable of handling containers of 180-ISO and IC, also Matson type
	Width of rail: 16 m.
Reefer plugs:	220 V×68
Illumination:	4 (25 Lux)
Track scale:	Scaling maximum 50 tons
Straddle carriers:	14

Tachinoura No. 2 Container Terminal

Total area:	118,720 sq.m.
Area per berth:	Three berth
	Sea depth: 10 m. under low water level (LWL)
	Length of wharf: 555 m.
	Marshalling yard: 108,110 sq.m.
Gantry crane:	Single/Twin: Single (3 cranes)
	Height of spain above quay: 10.8 m.
	Max. outreach: 37.2 m.
	Lifting capacity: 48.1 tons
	Spreader sizes: Capable of handling containers of 180–ISO and IC, also Matson type
	Width of rail: 16 m.
Reefer plugs:	220 V × 40
Illumination:	4 (25 Lux)
Straddle carriers:	13 (common use with Tachimoura No. 1 Container Terminal).

STEVEDORES: At least 24 hours prior notice excluding Sunday holidays required in order for Agent to arrange stevedores. Vessel constantly keep her Agent advised of ETA. If stevedores ca commence loading/unloading at time notified by the Agent, the orde must pay for waiting time. If cargo gear not rigged on ber stevedores will do same for ship's crew.

Average loading/discharging:

Bulk cargo:	Coal	50	t.p.h./gang/hatch
	Iron ore	45–50	t.p.h./gang/hatch
	Grain	50	t.p.h./gang/hatch
Baled cargo:	Cement	50	t.p.h./gang/hatch
	Fertilisers	40	t.p.h./gang/hatch
	Grain	30–50	t.p.h./gang/hatch
	General	40	t.p.h./gang/hatch
Steel cargo:	Under 20 ft. long	25–30	t.p.h./gang/hatch
	Over 20 ft.	15–20	t.p.h./gang/hatch
Scrap steel:	Pressed	20	t.p.h./gang/hatch
	Ordinary	10	t.p.h./gang/hatch
	Bulky and awkward	5	t.p.h./gang/hatch
Lumber/logs:	Lumber	15–20	t.p.h./gang/hatch
	Logs	30	t.p.h. gang/hatch

2 shifts; 0800 to 1700 hrs. and 1800 to 0500 hrs. Normal wor hours 0800 to 1700 hrs. Overtime work is possible by applyin Customs. No work can be arranged on 31st December and during N Year holidays (1st to 3rd Jan.). No work on 1st and 3rd Sunday of month.

BRIDGE: Kanmon Bridge – Clearance 61 m. Over 59 m. must ad Pilot Office in advance.

MEDICAL: No advance notice required unless urgent.

TANKERS: No slop discharge facilities. Mobil Oil Berth situate Okubo, near Tanoura. In the vicinity of the berth, the current runs tow West nearly all the time. Maximum rate of current 3 knots. Ves berthed during period that tide sets to West, in daytime only. Moo berth consists of 1 oil pier (length 80 m. width 5 m.) and 2 dolp Two 10 in. pipes connected to vessel; discharge rate 1,000 t.p.h. and diesel oil).

Also see "Max. Size".

FRESH WATER: Good fresh water supplied from water barg vessels lying at anchorage; from hydrants to those alongside wha The rate of delivery per hour is 20 – 40 tons from hydrant and 50 from barge.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Osaka Bay and Kanmon Port. At all other ports bunkers will be ligh from the nearest bunker stock ports at maximum 7 days prior noti

Bonded bunker oil is supplied by oil barges. The rate of deli 80 t.p.h. – 100 t.p.h.

CONSULS: Honorary British Consulate concurrent with Hon Swedish Consulate.

REPAIRS: Mitsubishi Heavy Industries, Ltd. Shimonoseki; Industries Co., Ltd. Moji; Kitakyushu Iron Works, Wakamatsu.

DRY DOCKS: Refer "Shimonoseki".

GANGWAY/DECK WATCHMEN: Not specially required un passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening closing hatches. If any time lost by ship's crew doing this w stevedores charge ship for waiting. Recommended request steved for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register and International Tonnage Certi to show Customs Inspector ship's registered gross and nett tonna Valid Cargo Gear Certificates sometimes required by stevedores w cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take as but no spirits.

REPATRIATION: Possible.

AIRPORT: Fukuoka Airport 2 hours by train and taxi.

TIME: GMT plus 9 hours. No alterations made to clocks during ye

POLICE/AMBULANCE/FIRE: Police station (tel. 110) and F Ambulance (tel. 119).

TELEPHONE: Telephone placed on board.

SERVICES: All services available, including hold cleaning and fitting.

SHORE LEAVE: Immigration Officials board vessel on her arrival in to examine passports, discharge books and/or other equivalent documents and provide 15 day landing passes for crew members passengers. One copy each of Crew List and Passenger Lis required by them. Providing ship's Agent with a Crew List befor will be a great help in expediting Immigration business on ship's arrival. When ship stays in port more than 15 days, the landing passes may be extended every 15 days on application. In the event that crew members without entry visas are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men, has been booked, or unless the ships to which they are to be transferred arrive in Japan within 5 days.

DEVELOPMENTS: Dredging work is being carried out for deepening the draft to 13 m. and extending the pier aprons. This construction, dredging and reclaiming is expected to be completed by 1995.

Masters are to keep in close contact with Agent on this work, as sometimes vessels cannot pass through Kanmon Channel, due to dredging materials.

AUTHORITY: Kitakyushu Port and Harbour Bureau, 2-7 Nishi-Kaigan, ome, Moji Ward, Kitakyushu City, 801 Japan. *Tel:* (093) 321-5941. FAX: (093) 321-5915.

AGENT: Sub-agents of Aall Barwil Agencies.

Green Shipping Ltd., Moji, 9-7, Minato-machi, Moji-ku, Kitakyushu City, Fukuoka Pref. 801, Japan. Tel: 093-321-4261. Telex: 7153-11 Greenm J. Fax: 093-321-4288. Cables: Greenship Moji.

MONBETSU: 44.21 N. 143.22 E. (See Plan)

DOCUMENTS:

Ship's Register (and International Tonnage Certificate, if Register does not show gross and nett tonnages).
Last Port Clearance.
6 Crew Lists, including Passport numbers.
4 Passenger Lists.
2 Ship's Stores Lists.
2 Declarations of Crew's Baggage.

PILOTAGE: Not compulsory. Pilot available from Kushiro with sufficient advance notice.

ANCHORAGES: See "Plan".

RESTRICTIONS: Draft limitation in the channel is 7.5 m.

Berthing/unberthing is permissible at any time, but pilot is only available during daytime.

HEALTH: Radio Pratique is available, and ordinary quarantine inspection takes place at the Quarantine Anchorage.

TUGS: 1×1,500 h.p., 1×1,000 h.p., 1×750 h.p., 1×720 h.p., 1×550 h.p., 1×460 h.p., 1×360 h.p., 1×340 h.p. and 1×250 h.p.

BERTHING:

Name of Berth		*Length* (m.)	*Depth* (m.)	*Capacity* (d.w.t.)
No. 1 Pier	East Wharf	131	7.5	1×5,000
	South Wharf	90	5.5	1×2,000

	East Wharf	390	7.5	1×5,000
	South Wharf	130	7.5	1×5,000

STEVEDORES: Normal working time 0830 hrs. – 1700 hrs. Log gangs available.

FRESH WATER: Available.

FUEL: Domestic oil is available. Bonded oil to be brought from Hakodate or Muroran with sufficient advance notice.

GENERAL: *Immigration:* The authorities come from Wakkanai.

Lightering: Not possible.

Shipchandlers: Provisions obtainable.

AGENT: Sub-agents of Aall Barwil Agencies.

Nippon Express Co.Ltd., Sales Dept., 1-8, 5-chome, Saiwai-cho, Monbetsu City, Hokkaido 094, Japan. Tel: (01582) 3-5246. Fax: (01582) 3-5965. Cables: Nexco Monbetsu.

MURORAN: 42.20 N. 140.58 E. (See Plan)

DOCUMENTS:

Ship's Register.
International Tonnage Certificate.
Derat Exemption Certificate.
3 Port of Call Lists (Voyage Memo).
Last Port Clearance.
6 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare 2 Inward/Outward Declarations, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory, but advisable for VLCC's. Arranged by Agent subject receipt of ETA advice at least 24 hours prior arrival. Pilot boarding area in vicinity of 250° × 1.5 miles from South Breakwater Lighthouse (never drop anchor North or area above 270°, due to fouling when anchoring).

Also see "Restrictions".

ANCHORAGES: Outside harbour limits: Subject to notice having been given to Authorities prior arrival.

Inside harbour limits: Permitted in any part.

RESTRICTIONS: Berthing must be finished 1 hour before sunset on VLCC's and oil tankers. Unberthing possible daytime only.

Pilots usually work from 0600 hrs. to 1 hour before sunset in Summer season, and from 0730 hrs. to 1 hour before sunset in Winter season.

Vessels over 30,000 g.r.t. usually have 2 pilots onboard for operations.

MAX. SIZE: *Nisseki Pier (Nippon Petroleum):*

	Max. d.w.t.	*Max. LOA*	*Max. Safe Draft*	*Max. Beam*
	*59,200 (*35,600 g.r.t.)	240 m.	9.90 m.	33.0 m.
	Sea Berth (258,374)	321.45 m.	15.00 m.	58.0 m.

*For vessels of deadweight tons, gross tons and LOA in excess of above limits, it is necessary to obtain entry permission from the Harbour Master, Pilot and the Refinery in advance.

Ore Carriers: Max. LOA 313 m., max. draft 16.0 m.

HEALTH: Radio Pratique available. Vessels usually anchor at Muroran, where the authorities board and grant Free Pratique.

RADIO: Suitable radio stations to communicate with Agents are Sapporo Radio and/or Choshi Radio.

VHF: Harbour Master "Muroran Hoan" is usable via "Otaru Hoan", only in case of emergency or official use. Agents can contact Master by using VHF Channel 16 of tug.

TUGS: 8 tugs, up to 3,200 h.p. Usually meet vessel near Inner Harbour breakwater. 10% additional charge if tug's lines used.

BERTHING: Pilot boarding time will be notified by ship's Agent mainly by radio.

DENSITY: Average 1025.

FRESH WATER: Delivery at piers: Average rate about 30 t.p.h. Delivery by barge: Rate about 60 t.p.h.

FUEL: Available.

CONSULS: None.

REPAIRS: Only minor repairs available, but Hakodate Dockyard able undertake all types of repairs.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register and International Tonnage Certificate to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.
AIRPORT: Sapporo International Airport is situated only 100 km. from the port. International direct flights are available to Hong Kong, Seoul, Honolulu and Guam Island. Domestic flights every 30 minutes to Tokyo and other places every day.
TIME: GMT plus 9 hours. Permanent.
POLICE/FIRE: Police Muroran 25-5191; Fire Muroran 22-2111.
TELEPHONES: May only be connected on board at No. 2–2 West Pier.
SHORE LEAVE: Local Immigration offices issue shore pass valid for 15 days. Extension possible if ship stays longer.
SERVICES: Shipchandler, laundry services, diver and cargo and hull surveyor are arrangeable.
AUTHORITY: Port & Harbour Bureau, Muroran City, Mubanchi, 20-30 1-chome, Kaigan-cho, Muroran City, Hokkaido, Japan. *Tel:* (0143) 22-3191.

AGENT: Sub-agents of Aall Agencies.
Kuribayashi & Co. Ltd., Muroran Head Office, 22, 1-chome, Kaigan-cho, Muroran, Hokkaido, Japan 051. Tel: (0143) 24-7022. Telex: 987631 Kuri M J. Fax: (0143) 24-4193. Cables: Kuribayashi Muroran.

NAGASAKI: 32.45 N. 129.52 E. (See Plan)

DOCUMENTS:
Ship's Register.
International Tonnage Certificate.
Last Port Clearance.
5 Crew Lists, including Passport/Seaman's Book Numbers.
5 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in Transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Not compulsory, but necessary unless Master well acquainted with locality. Pilot embarks in vicinity of Ioshima Lighthouse, Lat. 32° 43′ 20″ N., 129° 46′ 43″ E. Pilot available any time, subject to adequate notice (no VHF system). All communication with Pilot through Agent. Pilot boat carries International signals. "G" flag in daytime and "Morse" signals at night to call Pilot. In event bad weather Pilot boards at anchorage off Megami.
ANCHORAGES: Megami Anchorage located in Harbour Division No. 3 (within line between Kagenoo Lighthouse and West end of Kogo Wharf) 60 ft. depth and capacity of 3 vessels of 20,000 d.w.t. Safe anchorage.

Onaka Anchorage, Harbour Division No. 6: Located in line between Onaka Seto Beacon and Tan Saki, having ample space with 140 ft. depth, accepting 500,000 d.w.t. tankers.
RESTRICTIONS: *Berthing:* During daytime only, except for emergency purposes. Entering into anchorage at Megami is generally permitted anytime with Harbour Master's permit.
Departure: No restriction from buoy or wharf with adequate notice.
MAX. SIZE: Max. permissible length 1,200 ft., breadth 120 ft., draft 15.0 m.
Tankers:

Berth	*Max. d.w.t.*	*Max. LOA*	*Max. Safe Draft*
Zengyoren (Kozaki Depot)	60,000	230 m.	13.00 m.
Hayashikane Oil Co. (Doinokubi Depot)	60,000	230 m.	13.00 m.

HEALTH:
(a) Quarantine Station: Sea area surrounded by the following lines:
1. From Senbonyama Beacon to Megami Beacon.
2. From Megami Beacon to Naginata Lighthouse.
3. From Senbonyama Beacon to Takaboko Island.

(b) Quarantine service is rendered from sunrise to one hour before sunset.
(c) Radio Pratique is effective.
RADIO: Recommended Master communicates with Agent through Chosi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively.
TUGS: Tugs normally join vessel at anchorage for swinging and/or at berth for assisting vessel. Tugs available: 3×3,200 h.p. owned by Dokai Tug Co.; 3×3,500 h.p., 3,000 h.p., 2,880 h.p. and 2×2,400 h.p. owned by Kowa Kogyo Co.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Wharf	*Length*	*Depth*	*Capacity*	*Remarks*
Dejima	413 m.	9 m.	10,000 g.r.t. × 2 vessels	
Yanagi (Western)	270 m.	12 m.	46,000 g.r.t. × 1 vessel	
Yanagi (Southern)	185 m.	10 m.	7,000 g.r.t. × 1 vessel	
Yanagi (Northern)	185 m.	10 m.	7,000×1	
Matsugae	275 m.	12 m.	50,000 g.r.t. × 1 vessel	Passenger ships

Buoy	*Ship's Length (O.A.)*	*Permissible draft*	Capac g.r.t.
Nos. 1 – 2	270 m.	14 m.	105,000

Nos. 3 – 4	200 m.	14 m.	20,000
Nos. 4 – 5	175 m.	14 m.	6,000
Otao Nos. 1 – 2	347 m.	21 m.	150,000
MHI MC–MD	256 m.	10 m.	25,000

CRANES: *Floating Cranes:* 120 tons owned by Kowa Kogyo 330 ton floating crane available with adequate prior notice originally located in Moji area.
STEVEDORES: At least 24 hours' prior notice excluding Sundays holidays required in order for Agent to arrange stevedores. Vessel constantly keep her Agent advised of ETA. If stevedores ca commence loading/unloading at time notified by the Agent the orde must pay for waiting time. If cargo gear not rigged on bert stevedores will do same for ship's crew at additional cost. Over surcharges 1630–2130 hrs. 60% additional of basic stevedore 2130–0500 hrs. next morning 150% additional; Sundays/holidays 1 additional.
MEDICAL: No advance notice required unless urgent.
TANKERS:

Berth	*Product*	*Shoreline*	*Discharge Ra (t.p.h.)*
Zengyoren (Kozaki Depot)	Diesel	8″×1	700
Hayashikane Oil (Doinokubi Depot)	Diesel	8″×1	700

A slop discharge station operated by Nishi Nippon Tanker Se located at Ioshima.
DENSITY: 1025.
FRESH WATER: Capacity of water barges: 500 tons and 300 2 barges in total. Rate of delivery: 100 t.p.h. Wharf hydrants at Ya Matsugae and Dejima.
FUEL: Available ex-barge only. 3–5 days' prior notice required company.
FIRE PRECAUTIONS: No specific precautions.
CONSULS: People's Republic of China, Consul-General. Tel. 49-
REPAIRS: All types of repair can be carried out.
DRY DOCKS:

	Length	*Width*	*Depth*	*Capacity (*
Koyagi Dock (MHI)	400 m.	100.0 m.	14.5 m.	250,00
No. 2 Dock (MHI)	335 m.	54.0 m.	9.5 m.	165,00
No. 3 Dock (MHI)	268 m.	37.2 m.	8.8 m.	65,00

SURVEYORS: Cargo surveyors able to attend from Moji or other if prior notice given. LR, ABS and BV are available in Nagasaki. Sa Association or U.S. Salvage are able to attend from Moji to Naga
GANGWAY/DECK WATCHMEN: Not specially required u passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening closing hatches. If any time lost by ship's crew doing this stevedores charge ship for waiting. Recommend request stevedore this work unless crew can complete it before berthing.
CERTIFICATES: Valid Cargo Gear Certificates sometimes require stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take as but no spirits.
REPATRIATION: Possible.
AIRPORT: Distance 54 km. (centre of town to air terminal). Time hours by car. All Nippon Airways have regular daily service with 6 f for Tokyo and Osaka, Japan Air System have regular daily service 2 flights for Tokyo and Japan Airlines have regular daily service 1 flight to Tokyo.

Overseas services: Japan Air Lines (JAL) and General Administ of Civil Aviation of China (CAAC) have regular service with 2 flig week to Shanghai, China. Japan Airlines and Korean Airlines (KAL) regular service with 3 flights for Seoul and Busan, Korea.
TIME: GMT plus 9 hours. No alterations made to clocks during ye
POLICE/AMBULANCE/FIRE: Police 22-2141; Ambulance/Fire 22- (Fire station).
EMERGENCY CO-ORDINATION CENTRE: Contact Harbour Ma
TELEPHONE: Shore telephone can be installed on board vess wharves of Yanagi, Matsugae and Dejima. Vessels at Mitsubishi can communicate via shipyards' switchboard with town.
STORING: See "Prelims".
1. Yes.
2. No restrictions, vessel can store at anytime if adequate n given.
3. Trucks can proceed alongside at the berth.
4. Yes.
5. No special regulations, but a simple style application must be to Customs before storing.
6. Yes.

SHORE LEAVE: Local Immigration Officers issue shore pass val only 15 days. Extension possible if ship stays longer.
AUTHORITY: Nagasaki Port Authority, 2-11 Dejima, Nagasaki *Tel:* (0958) 22-1257. *FAX:* 0958-22-2265 (Head office).
Harbour Master (Maritime Safety Agency): 7-29 Matsugae, Naga *Tel:* (0958) 27-5133.

NAGOYA: 35.05 N. 136.53 E. (See Plan)

LOCATION: Situated at Northern head of Ise Bay. Harbour protected by breakwater 7.6 km. in length stretching from Chita Peninsula to bank of Kiso River at opposite side of harbour.

DOCUMENTS:

Quarantine (only when arriving at first port of Japan from a foreign port): One copy of each.
Maritime Declaration of Health.
Crew List.
List of Passengers.
Cargo Manifest.
Declaration Inward (required when vessel granted Radio Free Pratique and prepared by Agent).
Also Log Book and Ship's Register should be readily available.
Customs: One copy of each.
Declaration Inward/Outward with Ports of Call (prepared by Agent).
Ship's National Registry.
Ship's International Tonnage Certificate.
Last Port Clearance.
Stores List (including arms and narcotics).
Cargo Manifest (Discharge/through).
Crew List.
Passenger List.
Crew's Baggage List (the first port of call in Japan).
List of Ports of Call.
Immigration: One copy of each.
Declaration Inward with Ports of Call (prepared by Agent).
Crew List.
Notification of Arrival (prepared by Agent).
Application for Crew's Shore Passes.
Passenger List.
Report on Departure.
Declaration Outward (prepared by Agent).
Harbour Master:
1 Crew List.
1 Declaration Inward/Outward.
Port Authority:
1 Declaration Inward/Outward.

PILOTAGE: Pilotage is compulsory in Ise and Mikawa Wan Bays (where Nagoya, Yokkaichi and other ports located) for vessels of 10,000 g.r.t. or more.

Irago Bay Pilot: Pilotage from entrance of Irago Suido up to Nagoya Anchorage, vise-versa.

Irago Pilot is arranged by Agents, and Master of vessel is requested to maintain contact with Irago Pilot Station, and advise ETA to Irago Pilot by the following means of communication:
(a) Telex: 4563668 Iragop.
(b) Cables: Iragopilot Handa.
(c) VHF: Channel 16, then turn to Channel 13, call sign "Irago Pilot".
(d) Telephone: 0569-21-7489.

Vessel should make contact 3 hours and 1.5 hours prior to arrival at pilot station.

Boarding Points:
(a) 34° 30.8′ N., 137° 06.9′ E., when coming from Eastward.
(b) 34° 28.3′ N., 137° 03.8′ E., when coming from Westward and Southward.
(c) 34° 24.8′ N., 137° 03.8′ E., L.N.G. tankers.
(d) 34° 24.6′ N., 137° 00.1′ E., deep draft vessels (14.0 m. or more).

Requirements for vessel when taking a pilot:
1. Pilot ladder: To be fitted with spreaders in accordance with Solas Convention, Chapter V, Reg. 17, on ship's lee side, and kept clean and in good order. The lowest rung to be 1.0 m. above the water.
2. Manropes: 3.5 in. manilas to be rigged when pilot disembarking.
3. A ring buoy with a self-igniting buoy should be provided.
4. Speed: Keep vessel's head way at about 7 knots.
5. Light: Sufficiently illuminate the ladder at night.

Harbour Pilot: Agents arrange harbour pilot, and Master of vessel is requested to contact Harbour Pilot Station through Nagoya Port Radio by VHF Channel 16.

Boarding point: Vicinity of Buoy No. 6 in Nagoya Outer Harbour.

ANCHORAGES: Quarantine Anchorage, located outside High Tide Breakwaters, between No. 1 and No. 2 Harbour Fairways, offers safe anchorage for vessels awaiting Pilot or quarantine service. Depth of this anchorage area ranges from 10.0 m. to 20.0 m. Sea bed is silty clay. Vessels loaded with dangerous cargo are to be anchored by Harbour Master's instructions.

Anchoring places are:
Crude oil carriers – 2 miles × 180° from Isewan Sea Berth.
LPG carriers – 3 miles × 200° from Isewan Sea Berth.
LNG carriers – 4 miles × 186° from Isewan Sea Berth.

The above three kinds of vessels must obtain anchoring permission from Harbour Master in advance.

RESTRICTIONS: Vessels (LOA 200 m. or more, carrying dangerous cargo, draft 13.20 m. or more, or g.r.t. 20,000 and over) are restricted to enter the fairways of Nagoya Port, and advance permission for entry/departure must be obtained from Harbour Master. Agents do the necessary procedures, and all Master has to do is adhere to the signal control.

Also at Irago Suido Traffic Route, the following vessel size is restricted to enter the route and the permission for entry must be obtained in advance from Maritime Safety Agency (Irago Traffic Signal Control).
1. LOA 200 m. and over.
2. G.r.t. 1,000 or more with dangerous cargo.
3. G.r.t. 300 or more with 80 tons or more of ammunition, or 200 tons or more of organic peroxides.

VHF: Nagoya Port Radio (also as call sign), covering 110 km. from Kamishima Island with 24 hour service. Call on Channel 16, working on Channels 12 or 20.

MAX. SIZE:

	Berth	*Capacity* (d.w.t.)	*Depth* (m.)	*Length* (m.)
Tanker	Isewan Sea Berth	280,000×2 (Max.LOA 350 m., max.draft 20 m.	25.5	500
Ore Carrier	Nippon Steel Corp.	310,000×1	14.0	350
Container Ship	Public Berth No.94	50,000×1	14.0	350
Car Carrier	Toyota	65,000×1	11.0	250
General Cargo	Nisshin Seifun	65,000×1	12.0	240
	Toyo Grain	66,000×1	12.0	227
	Oji Seishi	50,000×2	12.0	227+249

HEALTH: Vessels must obtain Free Pratique from Quarantine Authorities at the first port of call in Japan from a foreign country.

Ordinary quarantine inspection will be undertaken by officials in Quarantine Anchorage at Nagoya. Quarantine Office hours: 0900 hrs. – 1700 hrs., Saturday, Sundays and holidays included for this service.

However, Radio Free Pratique is applicable and obtainable, so that vessel can save time and get cargo work underway in port. The mentioned Radio Pratique is given only if vessel holds a valid Certificate of Sanitary Inspection and Derat Exemption Certificate, issued by Japanese Government. If so, Master is requested to send Pratique message to quarantine station through Agent within 36 hours before arrival, except for 1200 hrs. – 2400 hrs. on the 2nd and 4th Saturdays of each month, and Sundays and holidays.

Vessel will not be able to obtain Radio Free Pratique in some cases (e.g. If vessel has been in an infectious area or a suspected area within 15 days of arrival).

RADIO: Call sign: JHY, range 200 km. (24 hour service).

Frequency: 500 kHz., working frequency 429.5 kHz.

This station is not in service of sending international cable messages to Agent's office. To despatch ship's message to Agents, Choshi or Nagasaki Radio is available.

TUGS: Usually join at point where vessel directs course toward allocated berth. Tug's lines normally used without charge.

Tugs are available at any time but advance notice should be given to the service companies and Port Authority.

BERTHING:

Public Wharves: (With a depth of 4.5 m. or more).

CONTAINER – RO/RO FACILITIES: The public container terminal at West-4 has 3 berths (W91, W92 and W94). W91 and W92 have a quay length of 435 m. with a depth alongside of 10.0 m. – 12.0 m., and a terminal area of 15.3 ha. The container yard has an area of 7.6 ha. There are 80 points for refrigerated containers. The terminal is equipped with 3 container gantry cranes of 46.4 tons, 48 tons and 49.1 tons capacity. Straddle carriers are shared with the Nagoya Container Terminal. Berth W94 covers 13.3 ha., of which 6.4 ha. is a container yard with a quay length of 350 m. and depth alongside of 14.0 m. There are 50 points for refrigerated containers. It is equipped with 3×55 ton post-Panamax gantry cranes, both with an outreach of 44.5 m. and backreach of 15.0 m.

Another 3 public container berths located at Kinjo Pier have a combined quay length of 640 m., and a depth of 10.5 m. alongside. Berths W76 and W77 are each equipped with a 37.5 ton capacity container gantry crane, and in addition there is a third container gantry crane with a 47.7 ton capacity that serves Berth W77 and W78. There are 32 points for refrigerated containers and 12 straddle carriers. Overall the terminal area covers 15.1 ha., of which 11 ha. are used as a container yard.

Nagoya Container Berth Terminal (NCB) has a quay length of 850 m. with a depth alongside of 12.0 m. Comprising of 3 berths (R1, R2 and R3), the total area is 28.5 ha. of which 13.5 ha. are used as a container yard. The terminal is equipped with 6 container gantry cranes, two of which have a capacity of 51.1 tons, and four of which have a capacity of 46.1 tons. Other handling equipment includes 51 straddle carriers.

Toyota Pier with its four berths is for the exclusive use of Ro/Ro vessels for loading and discharging vehicles. Ro/Ro vessels also berth alongside some of the public wharves for loading vehicles.

BULK CARGO FACILITIES: Iron ore and coal are discharged at Area No. 10 (See "Berthing" – Public Wharves) and Nippon Steel Co. Pier (See Wharf F11-14 in "Berthing" – Private Wharves).

Grain cargo facilities with efficient discharging equipment are available at private wharves of Rinoru Yushi Pier (BH), Nisshin Seifun Berth (G1), Zenno Silo Berth (JS), Toyo Grain Terminal (JT), and Chita Futo Co. Dolphin (J5).

STEVEDORES: Stevedores arranged by Agents by 1500 hrs. on the day prior to the working day.

Normal working hours: 0830 hrs. – 1630 hrs.

Overtime work is possible from 1630 hrs. – 2130 hrs. with overtime fee 60% of basic charge. 2130 hrs. – 0830 hrs. with overtime fee 130% of basic charge. Saturday: Overtime fee 60% of basic charge. Sunday: Overtime fee 100% of basic charge (0830 hrs. – 1630 hrs.).

At private berths, working hours of stevedores vary from berth to berth.

MEDICAL: Hospitals conveniently located near port.

Medical clinics for vessel's crew also available in port, and the crew to the medical offices from vessel, and vice-versa. Advance to Agent is preferable.

TANKERS:

Berth	*Depth* (m.)	*Length* (m.)	*Max.Draft* (m.)	Capacit (d.w.t.)
Idemitsu Kosan Aichi Ref. (K-5) (Owner: Idemitsu Kosan Co.Ltd.)	14.0	433	12.72	100,000

Showa Shell Petroleum (U5) (Nippon Petroleum, Marubeni & Showa Shell as owners.)	12.0		10.80 LOA restriction 94.	38,000

Also see "Berthing".

Isewan Sea Berth: Location: Lat. 34° 55.2′ N., Long. 136° 44.36′ E

Isewan Sea Berth is operated by Isewan Seaberth Co.Ltd.

Terminal operates 24 hours a day, 7 days a week. Ships are mo and unmoored during daytime. Discharging commences during day

Berthing/unberthing is prohibited when wind velocity over 15 m. or height of waves is over 0.8 m. and/or visibility under one nautical Discharging is suspended when height of waves is over 1.5 m. or velocity over 15 m./sec.

Loading arms (4 arms) 4,500 kl./arm, max. rate 18,000 kl./hr., max. pressure 10.0 kg./cm. at manifold.

Berth Depth: 25.0 m.

Max. Size: Draft 20.0 m.; max. d.w.t. 280,000; max. LOA 34 (approx.).

Berth Length: 500 m. each, West and East.

No. of Berths: Two.

Side Alongside: Usually portside alongside at East berth, starboard side at West berth.

Pilotage: Vessels over 10,000 g.r.t. must use a pilot.

Tugs: Terminal requests that vessels use tugs for berthing unberthing. Tugs horse power is calculated as follows:

For berthing: Ship's d.w.t. × (6% – 8%) = Required h.p.

For unberthing: Ship's d.w.t. × (4% – 5%) = Required h.p.

Guard Boat: Cargo consignee arranges guard boat.

DENSITY: 1019 – 1020.

FRESH WATER: Water supplied direct from pier or by barge.

FUEL: Most grades of domestic and bonded oil are available.

Important Notice: Bunkering at anchorage can be carried out w harbour limit line. If a vessel finds safe anchorage only outside harbour limit line, bunkering is not allowed without special permis from Nagoya Customs and Ministry of Transport.

Firstly, the permission from Transport Ministry should be obtai and secondly, the Closed-Port-Dues in substitution for tonnage due the Customs should be paid. With those legal procedures done, a ve outside the limit line can take bunkers.

CONSULS: Belgium, Brazil, Costa Rica, Ecuador, France, Germ Korea, Mexico, Netherlands, New Zealand, Portugal, Sri La Sweden, Thailand and U.S.A.

REPAIRS: All types of repairs possible. Repairs by Ishikawajima-Har Heavy Industries Co. Ltd., Aichi Works.

DRY DOCKS: Ishikawajima-Harima Heavy Industries Co. Ltd., A Works. (IHI), length 810 m., width 92 m. Capacity: Repair 161,000 build 95,000 g.r.t.

SURVEYORS:

1. Cargo inspectors, bunker soundings, hulls for delivery, etc. Japanese Government Sworn Surveyors, S.N.K.K. (Shin-Nihon K Kyokai) and N.K.K. (Nippon Kaiji Kentei Kyokai).
2. Class Surveyors: Lloyd's Register, American Bureau, Nippon

Other class surveyors should be arranged in advance as their of are not located in Nagoya.

GANGWAY/DECK WATCHMEN: Not compulsory but available.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: Tobacco, wine and spirits are not s in ship's bonded stores by the Customs, and each crew member consume freely on board the vessel. This arrangement of the Cus service came into effect in February 1991.

REPATRIATION: Facilities available, but the legal procedures required to be carried out during the Immigration office hours (0900 hrs. – 1700 hrs. from Monday to Friday).

The Immigration Office of Nagoya Port is not open outside office h or Saturdays, Sundays and holidays.

AIRPORT: Nagoya Airport, 1 hour and 10 minutes by car from the a to the Immigration Office (Nagoya Port), depending on traffic.

TIME: JST (Japan Standard Time), 9 hours ahead of GMT.

HOLIDAYS: Cargo work not arranged on the following day: July (Maritime Day).

Stevedores' no-working days: 2 Sundays in each month, Year New Year holidays.

National holidays: January 15th; February 11th; March 21st; April May 3rd, 4th, 5th; September 15th, 23rd; October 10th; November 23rd; December 23rd.

It is getting difficult to arrange stevedores even on these na holidays, due to the recent labour shortage. Negotiations with steve required in advance, in order to arrange for cargo work.

POLICE/AMBULANCE/FIRE: Police 110, Ambulance 119, Fire 11

EMERGENCY CO-ORDINATION CENTRE: If emergency (fire, pi robbery, etc.) breaks out, contact Nagoya Maritime Safety Agen the following ways:

1. VHF: Channel 16, call sign "Nagoya Hoan".
2. Cable: Code J.N.T.
3. Telex: No. 4934961 Jmsana.

4. Distress: Call 2182 kHz.
5. Telephone: No. 052-661-1611 (0900 hrs. – 1700 hrs., Monday to Friday, or 052-661-1616 (outside office hours).

TELEPHONES: Shore telephone available on board at most public piers.

SERVICES: Hold cleaning and tank cleaning available.

Local repair shop for radio and radar available but advance notice preferable, in order to get spare parts for repairs.

Supply of Japanese Charts available at Asahi Service Co.Ltd. For British Admiralty and other charts, advance notice required.

Shipchandlers, laundry, garbage disposal and Notary Public for Marine Note of Protest available.

SHIP SUPPLY SERVICE: Launch service for crews:

Ferry, speed boat/bus service:
Nagoya Ship Service Co.Ltd. Tel: 052-661-1322. Fax: 052-652-1156.
Speed boat service to anchorage:
Chita Boat Co.Ltd. Tel: 052-653-0127.
Heisei Marine Co.Ltd. Tel: 052-653-1505. Fax: 052-653-2424.
Delivery of ship's parts/machinery:
Heisei Marine Co.Ltd. See above.
Fujita Senyo. Tel: 052-661-1117.
Shipchandlers/parts and machinery:
Fuji Trading Co.Ltd. Tel: 052-652-0241. Fax: 052-652-0242.
Chita Senshoku. Tel: 0562-55-3888. Fax: 0562-55-4110.

BANKS: Tokai Bank, Nagoyako Branch, 1-17-11, Meiko Minato-ku, Nagoya, 455 Japan. Tel: 052-653-2111, 052-652-9663 (foreign exchange section).

SHORE LEAVE: Allowed with shore passes issued by Immigration.

IDENTIFICATION CARDS: Shore passes to be issued by Immigration at the first port of call in Japan, so either Seaman's Book or Passport (valid) required for issuing of shore passes.

GARBAGE DISPOSAL: Authorised Marine Disposal Companies:
Genyo-Kosan Co. Ltd. Tel: (052) 661-6050. Fax: (052) 661-6011.
Heisei Marine Co. Ltd. Tel: (052) 653-1505. Fax: (052) 653-2424.

WASTE OIL DISPOSAL: Contact: Daiko Marine Co. Ltd. Tel: (052) 681-3887. Fax: (052) 681-3223.

SEAMAN'S CLUBS: None.

CURRENCY: Japanese Yen.

DEVELOPMENTS: A new deepwater container berth (W93) is being constructed to the North of Berth No. 94 in West-4 Section, and is scheduled to be in operation in 1997. It will be equipped with 2 post-Panamax gantry cranes, one of which has been in operation at Berth No. 94. Construction of five berths at West-5 Section is also planned, one of which with a quay length of 350 m., a depth of 14.0 m. alongside, and a container yard of 17.5 ha., will be in operation in 1996. One berth (W7) in West-3 Section for multiple use will be in operation in 1994.

AUTHORITY: Nagoya Port Authority, 8-21, Irifune, 1-Chome, Minato-Ku, Nagoya, 455-91 Japan. *Tel:* (052) 654-7840. *FAX:* (052) 654-7995. *Contact:* Akio Someya, Executive Vice-President.

AGENT: Aall Barwil Agencies, Nagoya Branch, Kaiun Bldg., 4th Floor, 2-46, Irifune 2-chome, Minato-ku, Nagoya City, Aichi Pref. 455, Japan. Tel: (052) 652-2266. Telex: 446-3751 Aallng J. Fax: (052) 652-2269. Cables: Aallbarwil Nagoya.

NAHA, Okinawa: 26.12 N. 127.40 E. (See Plan)

DOCUMENTS:
Ship's Register.
Last Port Clearance.
5 Crew Lists, including Passport or Seaman's Book numbers.
5 Passenger Lists, including nationality, if any on board.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wines/spirits, camera, wrist-watch, radio, firearms/swords, etc. (Only at first port of call in Japan.)

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest, Cargo Manifest in transit using specific forms. Therefore Ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Pilot service is compulsory when entering Naha Port (Naha Wharf), but not compulsory for Shinko Wharf (New Wharf). Pilot boards in position Lat. 26° 13′ 49″ N., Long. 127° 38′ 20″ E.

When entering Naha Wharf, signal controls will apply, and the vessel must hoist and fly following flags:
1. Entering Naha Wharf: Hoist No. 2 and "N" flag.
2. Entering Shinko Wharf (New Wharf): Hoist No. 2 and "S" flag.
3. Sailing out from Naha Wharf or Shinko Wharf: To Touguchi Entrance – hoist No. 1 and "T" flag.
4. Sailing out from Naha Wharf or Shinko Wharf: To Yamatogichi Entrance – hoist No. 1 and "Y" flag.

RESTRICTIONS: Vessels entering Naha Port are controlled by the limiting depth in the entrance channel of 11 m. Entry and departure possible 24 hours.

MAX. SIZE: Length and beam not limited. Max. draft 11 m. If vessel over 30,000 g.r.t., it should be discussed with Maritime Safety Agency and Port Office.

HEALTH: Radio Pratique only available if vessel has Japanese Sanitary Inspection Certificate. Quarantine formalities carried out at the Quarantine Anchorage (Lat. 26° 14′ 18″ N., Long. 127° 38′ 57″ E.) from 0830 hrs. to 1700 hrs.

RADIO: Recommended communicate with Agent through Choshi Radio or Nagasaki Radio, which cover all ports in Japan. If specifically Westbound vessel to contact Choshi, and Northbound to contact Nagasaki Radio, respectively. Also see "VHF".

VHF: Vessels may call Naha Hoan (Japanese Maritime Safety Agency) on Channel 16, especially when there is an emergency.

TUGS: 3 tugs available, 2,000 h.p. – 3,000 h.p.

BERTHING:

Berth	*Length* (m.)	*Depth* (m.)	*Capacity* (d.w.t.)

No. 7	451	11.0	2×20,000

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required, in order for Agent to arrange stevedores.

MEDICAL: All medical and hospital facilities available.

TANKERS: No facilities.

FRESH WATER: Fresh water available alongside and at anchorage by barge.

FUEL: All grades of fuel available.

OPENING/CLOSING HATCHES: Usually opening and closing hatches done by crew, but may, upon request, be done by stevedores, after discussion with stevedores through Agent.

REPAIRS: Facilities available for minor repairs.

CUSTOMS ALLOWANCES: Each man allowed take 60 cigarettes ashore, but no spirits.

TIME: GMT plus 9 hours all year round.

SHORE LEAVE: Local Immigration Office issues shore pass valid for 7 days. Extension possible if ship stays longer.

DEVELOPMENTS: Large scale developments underway with completion expected in 1996 – 2000.

AUTHORITY: Port & Harbour Bureau:

Naha Wharf: 95 Tondo-cho, Naha City, Okinawa 900, Japan. *Tel:* 098-868-1843.

Shinko Wharf: 1-2, Minato Machi, Naha City, Okinawa 900, Japan. *Tel:* 098-862-2339.

AGENT: Sub-agents of Aall Barwil Agencies.

Okinawa Express Company Ltd., Famille Nishimachi Portside Bldg., 15th Floor, 12-1, Nishi 2-chome, Naha City, Okinawa Pref. 900, Japan. Tel: (098) 868-3159. Telex: 795-413 Okiex J. Fax: (098) 868-7664. Cables: Okiex Naha.

NAKANOSEKI: 34.00 N. 131.34 W. (See Plan)

Port Status: Open Port (Mitajiri-Nakanoseki Port).

DOCUMENTS: When vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:
Ship's Register.
International Tonnage Certificate.
Voyage Memo (Ports of Call).
3 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore, ship's Agents should be provided with necessary information about details of cargoes in advance.

Officials:
Customs: Stationed in Nakanoseki.
Maritime Safety Office: Stationed in Nakanoseki.
Quarantine: Not stationed in Nakanoseki. Free Pratique is to be obtained through Tokuyama, Ube or Mutsure Quarantine Station prior to proceeding to Nakanoseki.
Immigration: Official stationed at Tokuyama Office.
Port Authority: Stationed in Nakanoseki.

PILOTAGE: Not compulsory for berthing or unberthing.

Also see "Shipmaster's Report".

ANCHORAGE: See "Shipmaster's Report".

RESTRICTIONS: Berthing is carried out between sunrise and sunset. Unberthing is carried out between sunrise and one hour before sunset.

MAX. SIZE: No. 3 Wharf: LOA 220 m., draft 9.5 m.

HEALTH: See "Documents" – "Officials".

RADIO: Recommended that Master communicates with Agent through Choshi Radio or Nagasaki Radio, which cover all ports in Japan. Westbound vessels to contact Choshi Radio, and Northbound vessels to contact Nagasaki Radio respectively.

TUGS: Available as required. Stationed at Tokuyama, Ube and Moji. Usually using 2 tugs on berthing and 1 tug for unberthing.

BERTHING:

Wharf Name	*Length* (m.)	*Max.Draft* (m.)	*Capacity* (d.w.t.)	*Cargoes*
Pier No. 1	360	5.50	2,000	Domestic cargo.
No. 2	260	7.40	5,000	CKD, Steel products, etc.
No. 3	480	9.50	30,000	Mazda vehicles, CKD, plant.

STEVEDORES: At least 24 hours prior notice, excluding Sundays and holidays required, in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost.

For loading Mazda CKD/vehicles:
Nippon Express Co.Ltd., Hofu Branch.
Mazda Logistics Service Co.Ltd., Hofu Branch.
Naigai Unyu Co.Ltd., Hofu Branch.

Loading rate: Approximately 80 units per hour per gang, subject to stowage.

Labour: Basically 3 or 4 gangs, but a maximum of 6 gangs are available.

MEDICAL: No advance notice required, unless urgent.

FRESH WATER: Available from shore hydrant, rate approximately 10 tons per hour. The basic charge is 297 Yen per ton. Barge supply is also available, but this must be brought up from Tokuyama.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports, bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

CONSULS: No local representatives. Marine Note of Protest can be attended by local notary public.

REPAIRS: No facilities.

GANGWAY/DECK WATCHMEN: Not specially required, unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work, unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores, when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore, but no spirits.

REPATRIATON: Possible.

AIRPORT: Nearest Ube Airport, about 2 hours drive from Nakanoseki, JAS and ANA Lines.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.

Public telephone booth available near by the berth.

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Local Immigration Offices issue shore passes, valid for only 15 days, when Nakanoseki is first port of call in Japan. Extension possible if ship stays longer.

SHIPMASTER'S REPORT: December 1988.

Documents:
Ship's Register.
Last Port Clearance.
5 copies of Crew List, including Passport Numbers.
3 copies of Lists of Ports of Call.
1 copy Stores List.
1 copy Through Cargo Manifest.

Please note that Nakanoseki was not the first Port of Call in Japan. If such is the case then at least one Declaration of Crew's Baggage and one Maritime Declaration of Health will probably be required.

Pilotage: Available, but not compulsory.

According to information received by the vessel prior to arrival off the port, Harbour Pilot boards in the vicinity of a 250 m. radius circle (true bearing 159°, 1,590 m. from Nakanoseki Lighthouse), depth of water approximately 11.10 m. This boarding area is used for vessels with a deadweight in excess of 10,000 tons or if the LOA exceeds 150 m.

Information was also received from the vessel's Agent prior to arrival regarding the pilot boarding area. They advised me that the Pilot would board in position Lat. 33° 58′ N., Long. 131° 33′ E. (090°, 2.0 miles from Saba Shima Lighthouse). In my opinion this is the more practical of the 2 boarding areas as it keeps the vessel well clear of the numerous fish havens in the vicinity of the channel entrance and allows plenty of room to manoeuvre to seaward should the vessel have to drift and await the Pilot during periods of high winds.

If required, Inland Sea Pilotage service is available either from Sekisaki, Kobe, Hesaki, Tokuyama and/or Kadamatsu Pilot Station.

The Pilot boarded the vessel using one of the local tugs.

The Pilot advised me that during flood tide a current of up to 1.2 knots can be experienced across the channel entrance, flowing from East to West. During ebb tide the flow is in the opposite direction.

Anchorages: There is no suitable waiting anchorage for vessels of this size (PCC/Lumber Carrier, 33,000 g.r.t.). Vessels are requested to adjust their ETA so that they arrive at the Pilot Station without having to anchor. I questioned the Pilot as to why it was not permissible to anchor in the vicinity of the Pilot boarding ground and he advised me that it was because of the numerous fishing havens in the area and objections received from local fishermen.

Should the vessel be compelled to anchor for any reason, the Pilot advised a position 138°, 3,000 m. from Ryugu Saki Light. Care must be taken when anchoring in this position due to the close proximity of underwater cables.

Max. Size: Dependent on height of tide. Vessel must have 10% under keel clearance in the approaches, where the depth of water is 10.50 m.

VHF: During the early morning approach to the port the vessel was unable to contact the Pilot by VHF.

Tugs: Available as required. Stationed at Tokuyama Port. This vessel used 2 tugs for berthing and 1 tug for unberthing. Vessel is equipped with bow thruster and was berthed starboard side to, head out.

Berthing: Nakanoseki Wharf No. 3 (Owned/Controlled by Yamaguchi Prefecture).

The berth is used exclusively for Mazda vehicles/CKD but occasionally for Log/Plant carriers.

Depth of water in approaches: 10.50 m.
Depth of water alongside: 12.00 m.
Length of Wharf: 240 m.
Side alongside: Basically port side to, but starboard side to is also acceptable.

The berth is very exposed to the W/N.W. and strong winds blo from this direction could prove to be a problem for high-sided PCC vessels.

Stevedores: For loading Mazda cars/CKD.
Nippon Express Company Limited, Hofu Branch.
Mazda Logistics Service Company Limited, Hofu Branch.
Naigai Unyu Company Limited, Hofu Branch.

Loading Rate: Approximately 80 units per gang hour, subject to stow
Labour: Basically 3 or 4 gangs, but a maximum of 6 gangs are availa

General: Charts: There is no large scale BA. Chart of the area availa at present. For the purpose of our visit, Japanese Chart No. 1134 purchased.

AGENT: Sub-agents of Aall Barwil Agencies.

Green Shipping Ltd., Moji, c/o Sankyu Inc., Yamaguchi-Nishi Bra 415-15 Ichinomasu, Aza Ohama, Ooaza Hamakata, Houfu Yamaguchi Pref., 747 Japan. Tel: 0835-25-0039. Telex: 678 Sankyu J. Fax: 0835-24-3039. Cables: Hamasankyu Tokuyama.

NAMIKATA: 34.07 N. 132.55 E. (See P

Port Status – Closed Port.

DOCUMENTS:
Ship's Register.
International Tonnage Certificate.
Last Port Clearance.
3 Ports of Call Lists.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage.

PILOTAGE: Inland Sea Pilotage should preferably be arranged th Agent giving 72 hours' notice. Urgent correction of ETA outside bus hours should be cabled direct to pilot station.

Inland Sea Pilot Association covers all Inland Sea ports. Pilotag compulsory for vessels under 10,000 g.r.t., but recommended in of great number of islands causing navigational hazards. Pilot obta from one of three pilot stations dependent upon vessel's last po departure and at Master's discretion. Pilotage available throughou hours and 72 hours' advance notice preferred, thereafter advising alterations. Most Inland Sea Pilots also act as Harbour Pilots up to

1. Wadamisaki. (In this case Pilots compulsory if over 10,000 Position: Lat. 34° 35′ N., Long. 135° 08′ 24″ E. Cable address: Kobe".

2. Sekisaki. Position: Lat. 33° 13′ N., Long. 131° 54′ E. address: "Anjin Saganoseki".

3. Hesaki. Position: Lat. 33° 57′ N., Long. 131° 03′ E. Cable add "Anjin Moji".

ANCHORAGE: No anchorage at Namikata.

RESTRICTIONS: Mooring and unmooring daytime only with slack

MAX. SIZE: Oil tankers: 125,000 d.w.t. Gas tankers: 67,000 d.w.t.

HEALTH: Closed port. Vessels should obtain Pratique at Matsuya

RADIO: Recommended Master communicates with Agent thro Choshi Radio or Nagasaki Radio.

TUGS: Join vessel off Namikata, always using tug's line without ch 2 to 4 tugs are required for berthing, depending on size of vessel.

BERTHING: Berthing time will be notified by ship's Agent by radi

MEDICAL: No advance notice required unless urgent.

TANKERS: *Namikata Terminal Co. Ltd.* only. Located approx position Lat. 34° 07′ 07″ N., Long. 132° 54′ 32″ E. See "Max. Size

FRESH WATER: Available by shore line. Rate of delivery: 20 t.p

FUEL: Not available.

REPAIRS: Not possible.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take as but no spirits.

REPATRIATION: Possible. Nearest Immigration Office situate Niihama.

AIRPORT: Nearest at Matsuyama.

TIME: GMT plus 9 hours.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 1

TELEPHONE: No facilities for placing telephones on board.

SHORE LEAVE: Crew members free to go ashore by designated bus with landing passes issued by Immigration Authorities.

GENERAL: As this port is a Closed Port, special permission to into closed port is required from Shikoku Maritime Bureau.

No quarantine available, the nearest Quarantine Station Matsuyama.

No Immigration Office at this port (Officials come from Niihama

The above procedures of Quarantine/Customs and Shikoku Ma Bureau will be undertaken by Namikata Agent.

SHIPMASTER'S REPORT: May 1987.

Pilotage: Inland Sea Pilot from Seki Saki inwards who also unde berthing/unberthing, etc. Inland Sea can be traversed by day or although daylight is preferable.

Pilot should be ordered in advance, telexes sent to "Oita Kyush Moji MSA Radio and confirmed by VHF when within range of Oita

Restrictions: Berthing/unberthing daylight only when current is les 0.5 knots for LPG tankers and 1.0 knots for other tankers.

Vessels must proceed to Matsuyama Anchorage for Quarantine and Immigration clearance and to await suitable berthing conditions.

Anchorage: No anchorage off Namikata, waiting vessels must anchor off Matsuyama.

Obstructions: There is a 10 m. patch just North West of Kazitori-No-Ha.

Tugs: 3 tugs used for berthing and 2 tugs used for unberthing with the usual guard tug in attendance inwards and outwards from Matsuyama and whilst vessel alongside.

Berth: Berth is of modern construction and design. Vessels usually berth starboard side to with 4 head/stern lines, 2 breast lines and 2 springs fore and aft. Arms: Liquid 2 × 12 in. ASA. Vapour return line 1 × 8 in. ASA. Discharge rate 1,800 tonnes/hour. Shore gangway provided.

Fuel: No bunkering allowed at Namikata, however can be supplied off Matsuyama where additional tonnage dues must be paid.

SHIPMASTER'S REPORT: September 1991.

Vessel: 83,800 d.w.t., 244.5 m. LOA and 12.00 m. arrival draft.

Cargo: 27,000 tonnes of Naphtha.

API	78.5
Gravity	0.65 – 0.70
Flash Point	– 43°C
Boiling Point	2.3
Fire Point	390°C

Safety Measures:

(1) The route to be tanken to/from oil terminal at Seto Naikai (Inland Sea):

Bungo Suido (Suido means narrow channel) – Iyo Nada – Tsurishima Suido – Aki Nada and reach to Namikata Terminal, and return to Bungo Suido.

(2) General measures for safety navigation in Inland Sea:

The vessel shall take the following safety measures in accordance with the maritime traffic law for safety navigation and with the assistance of a pilot.

1. When in poor visibility, the vessel shall maintain the safety speed and also keep the maritime traffic laws. If necessary, the vessel shall anchor and wait for favourable conditions.
2. The vessel shall arrange fire wires and auxiliary ropes at the bow and the stern of the vessel for immediate use.
3. The vessel shall pay careful attention to the crossing ferryboats.
4. The vessel shall not manoeuvre by auto-pilot except in Suo-Nada.
5. The vessel shall proceed by the maritime traffic law and also keep to the right of the recommended course shown on the chart.
6. The vessel shall take appropriate steps to ensure safe navigation, including maintaining safe speed in addition to the observation of laws and keep a radar watch and also, the vessel has to arrange sufficient watchmen if required.
7. The vessel shall listen for all notices given by coast guard and international VHF radio.
8. The vessel shall check the weather forecast closely and always be ready for unexpected weather changes. Furthermore, the vessel shall navigate safely.
9. When visibility is poor and may interfere with safe navigation, the vessel shall anchor in a safe place, avoiding the fishing area and recommended course and wait until weather/visibility improves.

(3) Passing Hayasui-Seto:

1. This channel is frequently congested with vessels, ferryboats and fishing boats. The vessel will not pass through this channel in fog if visibility is less than one mile.
2. When passing through this channel, the vessel shall keep to the righthand side of the centre line on a course of North Northwest (South Southeast).
3. The vessel shall not overtake another vessel whose g.r.t. is greater than 500 tons, except in an emergency case, and she shall not pass another vessel during the night.
4. The vessel shall not pass through this channel during the night, if possible.

(4) Passing Iyo-Nada:

The vessel shall pay attention to the prevailing Westerly winds, especially to the seasonal wind in Winter.

(5) Passing Eastern area of Aoshima:

The vessel shall pay special attention to safety and navigation during the night at this area.

(6) Passing Tsurishima Suido:

The vessel shall take the following safety measures for passing Tsurishima Suido and/or narrow channel which is often congested with vessels.

1. When visibility is poor, the vessel shall take appropriate steps to ensure safe navigation and/or anchor temporary until favourable weather returns.
2. Concurrently with enforcement of visual watch on the vessel, radar shall be used effectively to see the surrounding traffic conditions.
3. The vessel will not overtake another vessel whose g.r.t. is greater than 500 tons, except in an emergency.
4. The vessel shall pass the Tsurishima Suido according to the recommendations of the 6th Regional Maritime Safety Headquarters which was issued on November 1st 1977 (See "Approaches" below).

(7) Passing Aki-Nada:

The vessel shall proceed along the recommended course with Aki-Nada Light Beacons No. 2, 3 and 4 on the port side, and confirm passing Ogon-Shou (Reef).

(8) Navigation from Aki-Nada to Namikata Terminal Main Berth:

1. The vessel shall reduce her speed to approximately 4 knots and rendezvous with tugs at Aki-Nada No.4 Light Beacon.
2. The vessel shall proceed to Namikata Terminal Main Berth with forward escort tug which possesses foam fire fighting equipment.
3. The vessel shall approach Namikata Terminal Main Berth after passing Ogon-Sho (Reef).

(9) General safety measures in port:

The vessel shall take the following safety measures in port in keeping with the Japanese Port Regulation Laws.

1. The vessel shall take a harbour pilot for mooring and/or unmooring.
2. Berthing and unberthing shall not take place in adverse weather, such as strong winds (wind speed 15 m./sec.), poor visibility (less than 1 mile), etc.
3. The vessel shall maintain a necessary and ample under keel clearance during stay in port.
4. Concurrently with taking sufficient fire control measures, a strict watch over the area shall be maintained for approach of any vessel suspected of having an insufficient fire control system, and if necessary a warning shall be given to such approaching vessel.
5. Fire fighting equipment furnished onboard shall be inspected and prepared for immediate use.
6. During the cargo operation, the vessel will not carry out any bunkering, otherwise special safety measures will be taken.
7. Prior to start of the cargo operations, the operational procedures and the accident prevention measures shall be fully agreed between the cargo handling parties concerned and the safety check shall be carried out in accordance with a check list.
8. The vessel shall fully carry out safety measures generally taken by vessels carrying general inflammable dangerous cargoes, including arranging fire wires and auxiliary ropes on her bow and stern for immediate use.
9. The ballasting operation shall be carried out during daytime, as far as possible.
10. The vessel shall arrange sufficient duty staff in order to discover oil leakages as soon as possible.
11. A communication system for emergency cases will be organised (communication table will be given to Master).
12. The vessel shall follow all safety measures issued by berth owner and Maritime Safety Headquarters.

(10) Safety measures at Namikata Terminal:

The vessel shall take the following safety measures at Namikata Terminal in addition to the aforesaid safety measures.

1. The vessel shall take a harbour pilot for mooring and/or unmooring.
2. The berthing and unberthing shall not take place under the following weather conditions:
   (a) When average wind speed is 10 m./sec. and /or max. 15 m./sec.
   (b) When wave height is likely to reach 1.5 m.
   (c) When visibility is likely to become less than 1 mile.
   (d) When thunderbolt strike is likely.
   (e) When tidal current is over 0.5 knots.
   (f) When the vessel is recommended to take shelter by Chief of Imabari Maritime Safety Agency due to typhoon approaching.
   (g) When berth owner and/or Master judges that conditions of weather and sea are too poor.
3. Berthing/unberthing available from sunrise to sunset.
4. The approach speed to berth shall be less than 10 cm./sec.
5. The vessel shall use sufficient tug assistance for berthing and/or unberthing.
6. The berthing and/or unberthing shall not be at the same time as coaster operations.
7. When approaching Namikata Terminal Main Berth, the vessel shall refer to current table near the berth.
8. Linehandlers shall be positioned at the forward and after end of terminal dock apron. Linehandling boat is also used.

The adjustment of vessel's position between shore connection and ship's manifold shall be done with utmost careful attention.

(11) Notice of arrival/navigation:

The vessel shall keep in close communications with Namikata Terminal prior to entering the Terminal for her safety, and the Terminal shall notify Imabari Maritime Safety Agency of vessel's schedule in advance.

(12) Waiting and/or anchoring:

The vessel shall adjust arrival at Namikata Terminal at sea in order to berth on arrival, however in cases of an emergency, the vessel shall proceed to anchorage, where Master shall report position to Imabari Maritime Safety Agency.

(13) Gas purge operation:

The vessel will not carry out gas-purge operation as a rule, however if it is necessary, she shall carry it out only at sea and in following conditions:

1. In favourable weather and good visibility.
2. When wind speed is over 5 m./sec.

(14) Pilotages and towage:

1. Inland Sea Pilot shall embark/disembark at Sekisaki Pilot Station.
2. The vessel shall arrange sufficient tugs in accordance with the towage requirement scale prepared by licensed inland/sea pilot (See "Tugs/Tides" below).

Approaches: Recommendation for Traffic in Turushima Suido (Seto Naikai Western Part): (See Plan).

Issued by 6th Regional Maritime Safety Headquarters. Dated: 1st November 1977.

Keep on the starboard side in Turushima Suido.

A vessel proceeding along the course of Turushima Suido shall keep near to the outer limit on the channel which lies on her starboard side, not less than 150 m. distant from a line drawn from Akinada Minami-Koro Light Buoy No.1 (33° 57.3′ N., 132° 43.1′ E.) to Turushima Light Buoy (33° 54.4′ N., 132° 38′ E.).

Tugs/Tides: Towage scale and restrictions for mooring/unmooring operations:

Towage scale at Namikata Terminal Main Berth:

Vessel (d.w.t.)	*No. of Tugs and H.P. for Mooring*	*No. of Tugs and H.P. for Unmooring*
Under 6,000	1 Tug (over 1,000)	1 Tug (over 1,000)
6,000 – 20,000	2 Tugs (over 2,000)	2 Tugs (over 2,000)
20,000 – 35,000	2 Tugs (over 2,500)	2 Tugs (over 2,000)
35,000 – 70,000	3 Tugs (over 2,500)	2 Tugs (over 2,500)
70,000 – 100,000	2 Tugs (over 2,500) 1 Tug (over 3,000)	3 Tugs (over 2,000)
100,000 – 125,000	4 Tugs (over 2,500) (Based Z-type propeller tugboat)	3 Tugs (over 2,500)

Restriction of tidal current for mooring and/or unmooring operations:

1. Mooring Operation:
   Vessel's D/W
   Under 10,000 – Tidal current is less than 1.0 knots (against).
   Over 10,000 – Tidal current is less than 0.5 knots (against).
2. Unmooring Operation:
   Vessel's D/W
   Under 35,000 – Tidal current is less than 1.0 knots.
   35,000 – 50,000 – Tidal current is less than 0.7 knots.
   Over 50,000 – Tidal current is less than 0.5 knots.

AGENT: Sub-agents of Aall Barwil Agencies.

Morizane Transportation Co. Ltd., Namikata Branch Office, 439, Miyazaki, Kou Namikata-cho, Ochi-gun, Ehime Pref. 799-21, Japan. Tel: 0898-52-2855. Telex: 584-4711 Mrzn J. Fax: 0898-52-2856. Cables: Morizane Niihama.

NANAO: 37.02 N. 136.58 E. (See Plan)

LOCATION: Located on the East side of Noto Peninsula in Ishikawa Pref., in the Southern part of Nanao Bay. Arrival of vessel is to be considered the anchoring time in port, or the starting time of waiting for pilot outside the port.

DOCUMENTS:
Ship's Register and International Tonnage Certificate, if available.
Last Port Clearance.
4 Crew Lists and Passenger Lists, if any on board.
1 Stores List on arrival.
1 Declaration of Crew's Baggage (only at first port of call in Japan).
1 Maritime Declaration of Health (only at first port of call in Japan).
Inward/Outward Declaration and Cargo Manifests for Discharging and Transit shall be prepared by ship's Agents.

Necessary blank forms will be provided by ship's Agents, if required.

PILOTAGE: Ordered by cable via Choshi Radio, or by telex, possible to request local ship's Agents to arrange pilot, informing ETA accurately. For entering and berthing, pilot boards in position Lat. 37° 06′ 50″ N., Long. 137° 04′ 30″ E., or 2 – 3 miles off from this position on bearing 259°, for vessel over 10,000 g.r.t. Anchoring outside port is very difficult, due to stationary fishing nets. If vessels arrive at night-time, it is better for large vessels to drift at about 10 miles off the coast and wait for pilot. Pilot also available at inward Quarantine Station for berthing. It is only possible to contact pilot one hour before berthing (VHF Channel 16).

ANCHORAGES: Quarantine Anchorage position: Lat. 37° 05′ 40″ N., Long. 136° 59′ 16″ E., with depth 16.0 m. and radius 400 m.

RESTRICTIONS: Large LPG vessels are prohibited to enter or sail at night-time, and are also prohibited from anchoring inside the bay.

MAX. SIZE: Draft 12.5 m., length 232 m., and d.w.t. 60,000 tonnes.

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Radio Pratique available, if vessel has valid Sanitary Certificate, through local ship's Agents, otherwise Quarantine Officer will attend vessel at Quarantine Anchorage or soon after berthing, during official working hours, from Kanazawa Quarantine Office. Sanitary inspection for Radio Pratique shall be carried out by Quarantine Officers, attending from Kanazawa Office. In case any patient aboard, inform local ship's Agents the condition of patient.

RADIO: Master is able to send cable to local ship's Agents via Choshi Radio or Nagasaki Radio. Telex communication also available by Inmarsat, even at great distances.

BERTHING: Berthing not carried out in night-time, but unberthing is possible in night-time with pilot, if weather permits.

Berth	*Length (m.)*	*Depth (m.)*	*Permissible Draft (m.)*	*LOA (m.)*	*Capacity (g.r.t.)*
Wharf No. 1 West	230	7.5	7.0	135	5,000
Wharf No. 2 East	210	9.0	8.5	165	8,000
Ohta Bussen Futo	185	10.0	9.5	180	15,000
Ohta No. 2 Pier	185	10.0	9.5	180	15,000
Ohta Dolphin	200	8.0	7.5	150	8,000
LGT Nanao Jetty (LPG)		14.0	12.5	230	60,000

VHF: Contact "Fushiki Hoan" (name of local Maritime Safety Age on Channel 16 at any time there is an emergency.

TUGS: 1×2,000 h.p., 1×320 h.p. and 1×200 h.p. In case of nece other large tugs come from Toyama or Niigata.

CRANES: Crawler cranes of 50 tons and 45 tons, and truck cra 50 tons available. Heavy lift shore cranes or floating crane with gr capacity can be arranged if requested in advance.

STEVEDORES: 5 log gangs available if working by ship's gear, gangs available in daytime 0730 hrs. – 1730 hrs. in Summer, bu bulk cargo available up to 2130 hrs.

MEDICAL: No advance notice required, except on Saturdays, Sund and holidays, also available in emergency. Dental treatment vaccinations available on usual working hours.

TANKERS: One jetty for LPG vessels only. Discharging lines: 4 fle rubber hoses (2 liquid and 2 vapour). Flange size: 12 in. for liquid 8 in. for vapour, both Ansi 150 PSI. Max. flow rate: 2,000 cu.m./hr liquid and 3,000/cu.m./hr. for vapour. Temperature: −42° for Prop and −2° for Butane. Pressure: Propane and Butane 0.100 kg./sq Storage on shore for Propane and Butane, each 30,000 k/t.

DENSITY: 1021 – 1023. Density is not affected by tide.

FRESH WATER: Available at pier, except Ohta Dolphin and LGT J at about 20 tonnes/hr. Cost Yen 470/per tonne. (1992) At Ohta Do or at inner anchorage available by barge. One barge with max. cap 80 tonnes. Cost Yen 700/tonne, plus Yen 180/km. of distance available for LPG vessels.

FUEL: Delivered by small vessel or tank lorry from the neighbou port of Fushiki. Bonded oil not available. Advance notice required.

CONSULS: None locally.

REPAIRS: Small repairs can be undertaken.

DRY DOCKS: None.

SURVEYORS: Staff of Japan Marine Surveyors and Sworn Measu Association available from Toyama.

GANGWAY/DECK WATCHMEN: Usually not required. But if reque watchmen can be arranged.

HATCHES: Hatch operations by stevedores, if requested.

CUSTOMS ALLOWANCES: Same as other ports in Japan.

REPATRIATION: Possible.

AIRPORT: Nearest local domestic airport is Komatsu (100 km.). F to Tokyo take 50 minutes, and there are 7 flights per day.

TIME: GMT plus 9 hours. No alterations made to clocks during y

HOLIDAYS: National holidays: January 1st; February 11th; March April 29th; May 1st, 3rd, 5th; September 15th, 23rd; October November 3rd, 23rd; December 23rd. End Year holidays December and 31st. New Year holidays January 2nd – 4th; City Festival May Port Festival July 20th.

In some cases holidays are workable with additional charges.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119 stations are in Nanao City. In an emergency, contact local Mar Safety Agency. Tel: 52-4999. If at sea, contact "Fushiki Hoan" by Channel 16.

TELEPHONES: No arrangements for placing telephones on board. can be made from office on shore near the pier within 5 minutes

SERVICES: Hold cleaning possible.

BANKS: Two banks for exchange of currency in Nanao, Hokkoku B and Hokuriku Bank.

STORING: See "Prelims".

1. Available by barge or truck.
2. At LGT Jetty available only by barge after discharging at daytime.
3. Possible, except Ohta Dolphin and LGT Jetty.
4. Not available.
5. Formalities of Customs required for loading.
6. Local riggers available to assist with storing.

SHIP SUPPLY SERVICE: Provisions and some ship's stores avai to be supplied by local shipchandlers, but impossible to arrange cr helicopter for transfer.

SHORE LEAVE: Crew members only allowed ashore with valid s passes, issued by Immigration at the first port in Japan. Shore pa available at Nanao, but for renewal have to attend Kana Immigration Office.

GENERAL: Many fishing nets located near the shore at the outer within about 3 miles off coast line. If entering or sheltering near s proceed with caution, especially at night-time.

DEVELOPMENTS: New dolphin for coal carriers available. Perm max. draft 12.5 m. and capacity 60,000 d.w.t.

AUTHORITY: Ishikawa Prefectual Port Administration Office of Na Yatashin-Machi, Nanao City, Ishikawa Pref., 926 Japan. *Tel:* 076 0440.

AGENT: Sub-agents of Aall Barwil Agencies.

Nanao Kairiku Unso Co.Ltd., Chisaki Umetatechi, Yatashin-M Nanao City, Ishikawa Pref. 926, Japan. Tel: (0767) 52-7 Telex: 5128-898 Kairiku J. Fax: (0767) 52-7120. Cables: Kairiku N

NAOETSU: 37.11 N. 138.14 E. **(See Plan)**

DOCUMENTS:
1 Inward Declaration of Vessel.
1 Cargo Manifest.
1 Through Cargo Manifest.
1 List of Provisions and Stores.
1 List of Tobacco and Personal Effects.
7 Crew Lists (preferably airmailed in advance).
2 Passenger Lists.

PILOTAGE: Pilot embarks at Quarantine Anchorage to take vessel directly to berth during daytime. All transmitting and receiving through Niigata Radio Station (call sign JCF, Type of Wave: 438454) or Choshi Radio Station and/or Nagasaki Radio Station. Cable Agent 1 week's notice of ETA and accurate ETA 24 hours before arrival, thereafter advising any change in arrival time. No pilot boat. Pilot uses tug-boat.

ANCHORAGES: Half-circle drawn at a point of Lat. 37° 11′ 31″ N., Long. 138° 13′ 59″ E. (lighthouse) with radius 1,600 m.

RESTRICTIONS: Berthing and unberthing daytime only.

MAX. SIZE: LOA 160 m. draft 9.50 m. in Summer, and 9.00 m. in Winter.

HEALTH: Radio Pratique available. Formalities will be carried out at the Anchorage. Quarantine Station 321° – 2,200 m. (Lat. 37° 11′ 45″ N., Long. 130° 14′ E. 700 m. radius) from Naoetsu Lighthouse.

RADIO: Niigata Radio Station: JCF. Nagasaki Radio Station: JOS. Choshi Radio Station: JCS.

VHF: Channel 16.

TUGS: Normally joins vessel at entrance of port. Ship's lines used. One tug 1,300 h.p. Additional tugs will be brought from Niigata when required.

BERTHING:

Tanker Berth N	105	6.0	5.0	3,000	Coasters
Tanker Berth L	150	6.0	5.0	2,000	Coasters

STEVEDORES: ETA, draft and hatch cargo quantities to be advised before arrival. Main bulk commodities: unloader crane (1) 150 t.p.h.; wer cranes (3) 120 – 130 t.p.h. and equipment.

MEDICAL: No notice required except in emergency, and attendance on Sundays/holidays.

DENSITY: 1023 – 1025.

FRESH WATER: Available from shore. 30 t.p.h.

FUEL: Domestic oil is available. Bonded oil will be brought from Moji or Hakodate, with sufficient advance notice.

CONSULS: None.

REPAIRS: Minor repairs only.

GANGWAY/DECK WATCHMEN: No professional watchmen available.

OPENING/CLOSING HATCHES: Stevedores if Owner guarantees payment of operation charges.

CUSTOMS ALLOWANCES: Tobacco: Each crew member allowed to retain for his private use 200 cigarettes, 50 cigars, 250 grams of tobacco, etc. Wine/and/or Spirits: 1 bottle of liquor, to last 1 week.

REPATRIATION: Necessary documents to be submitted to Immigration and Customs Authorities in Naoetsu.

AIRPORT: Niigata. 2.5 hours by train. One flight per day to Tokyo.

TIME: GMT plus 9 hours. Permanent.

HOLIDAYS: No work 31st December and 1st, 2nd and 3rd January. Subject to gangs on other holidays.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.

TELEPHONE: No facilities for placing telephones on board.

SERVICES: Technicians for repair and/or adjustment of radar or wireless despatched from Niigata or Tokyo. Hold and/or tank cleaning operations by shorehands available, however gangs are from Niigata.

SHORE LEAVE: Crews allowed ashore within limit of Johetsu City.

IDENTIFICATION CARDS: Passport and/or Seaman's Book required.

DELAYS: Due to port congestion.

GENERAL: During Winter and bad weather, hire of nylon rope (00 mm.) desirable in order to avoid hull damage. Rope owned by Naoetsu Agency Association. Charge made for use.

AUTHORITY: Naoetsu Port Administration Office, 6-8, Minato-machi 1-chome, Johetsu City, Niigata Pref. *Tel:* (0255) 43-4167.

AGENT: Sub-agents of Aall Barwil Agencies.
Nippon Express Co. Ltd., 2-9-4, Minato-cho, Jyoetsu City, Niigata Pref. 942, Japan. Tel: (0255) 43-1131. Telex: 3252-411 Nexnao J. Fax: (0255) 43-3494. Cables: Nexconaoetsu Joetsu.

NAOSHIMA: 34.28 N. 133.58 E. **(See Plan)**

Port Status: Closed Port.

DOCUMENTS: In addition to the documents required (See "Uno"), vessel must be provided with Customs's Closed Port Entrance Permission by Agents before entering Naoshima, as it is a non-open port.

PILOTAGE: Not compulsory in the port. However, for vessels over 10,000 g.r.t., Inland Sea Pilot is compulsory, especially through navigation routes like Akashi, Bisan-Seto, etc., as defined by Japanese Maritime Traffic Safety Law.

RESTRICTIONS: No restrictions on entering or sailing, even night-time, but pilot is only available during daytime.

MAX. SIZE: 20,000 g.r.t., LOA 180 m., max. draft 9.7 m.

HEALTH: Radio Pratique not available. Vessels usually anchor at Wada-Misaki (off Kobe) or nearest quarantine port, where the authorities board and grant Free Pratique.

TUGS: None. Tugs from Mizushima are available.

BERTHING: Mitsubishi Metal Wharf: Length 160 m. Depth 10.2 m.

Outreach of crane 14.4 m. Distance to stockyard 500 m. Cargo handled is copper/lead concentrate.

Lightenning can be undertaken at anchorage of port of Uno, located in vicinity to Naoshima, in which case one set of port charges will be incurred additionally.

When the berth is congested and cargo is urgently needed, the receivers, Mitsubishi Materials, sometimes arrange for lightering at Uno Anchorage of which depth of water is about 29.0 m.

STEVEDORES:

Hours	*Cargo discharged per shift*
0800 – 1700	2,500 tonnes
0800 – 1900	3,000 tonnes
0800 – 2200	3,650 tonnes

FRESH WATER: Water barge will be brought from Okayama, when required.

Cost: Up to 100 tonnes – Yen 1,100/tonne; over 100 tonnes – Yen 800/tonne.

FUEL: Domestic oil is available. Bonded oil will be brought from Kobe, when required.

REPAIRS: Small repairs can be undertaken.

HOLIDAYS: See "Uno". No work on local holidays, but usually work on national holidays.

AUTHORITY: Port & Harbour Dept., Kagawa Pref., 1-10, Bancho 4-chome, Takamatsu City, Kagawa Pref. *Tel:* (0878) 31-1111, 62-3653, 34-9302.

AGENT: See "Uno".

NIIGATA-NISHI: 37.54 N. 139.04 E. **(See Plan)**
NIIGATA-HIGASHI: 38.01 N. 139.13 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Ports of Call Lists.
3 Crew Lists including Passport Numbers.
3 Passenger Lists, if any onboard.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in Transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory. Pilot embarks at Quarantine Anchorage (Lat. 37° 58′ N., Long. 139° 03′ E.) to take vessel directly to berth during daytime. All transmitting and receiving must be normally effected through Niigata Radio Station (call sign: JCF, Wave: 438454), or Choshi Radio Station and/or Nagasaki Radio Station. Radio ETA 1 week's notice and accurate ETA at least 24 hours before arrival. Notify any changes to ETA.

ANCHORAGES: Anchorage is a rectangle located N.W. of lighthouse at West Breakwater at a distance of 1,600 m. covering an area of about 160,000 sq.m. Lat. 37° 57′ 37″ N., Long. 139° 04′ 00″ E. Depth: 18-24 m. Bottom: fine sand.

Safe Anchoring: Warning and instructions have been given by Niigata Harbour Master to secure safety of vessels anchoring off Niigata Port especially in Winter season, when the port is greatly affected by N.W. gale.

1. Vessels anchoring outside the breakwater within the Harbour limit must maintain their position West side of N.W. line drawn from Niigata Lighthouse (Fl. R. 3 sec. 15 m. 11 miles) and must avoid the vicinity of the mouth of the Shinano River or Showa Sekiyu K.K. Sea-berth (which is connected with shore facilities by submerged pipelines).

2. Vessels anchoring outside the breakwater must maintain their positions in the sea area where the depth of water is 25 m. or more. This rule does not apply to vessels waiting for quarantine inspection and/or Pilot. Vessels under 10,000 gross tons should also keep a sufficient distance from shore.

3. Vessels over 10,000 gross tons with dangerous cargoes or oil anchoring outside the breakwater must advise their positions to the Harbour Master by radio.

4. Vessels anchoring outside the breakwater must keep a bridge watch unless they are equipped with radio. (According to the governing law, any vessel staying outside the breakwater is treated as a navigating vessel even if she is within the harbour limit).

5. Vessels waiting at anchorage must keep watching weather forecast. In case bad weather is reported, the following necessary actions should be taken; namely, officers on duty, confirmation of ship's position, engines on standby, the use of extra anchors, sheltering, etc.

6. In case a vessel requires shelter from N.W. wind in Winter, it is suggested that such vessel proceed to Sado Island and anchor off Ryotsu Port, Akadomari Port, Sado Island South Coast or Sado Channel.

7. When approaching the entrance of the port, a vessel can be drawn too close to the East Breakwater or the shallows existing East of the port entrance by force of N.W. gale, N.E. current and river flow. Therefore, vessel must enter from N.W. of Niigata Lighthouse, approaching from Quarantine Anchorage and alter course as West Breakwater Lighthouse and Niigata Port Light Beacon are seen in a line. It is dangerous for vessel to anchor at any areas East of Shinano River.

8. Prior to arrival, Japanese Charts No. 1155A, 1155B, 122 and 1197 or substitutes should be provided on board. Charts 1181, 1198 may also be needed.

RESTRICTIONS: Berthing and unberthing anytime. Entry and/or departure at time authorised by Port Authority. Shinano Fairway from port entrance to Rinko Wharves, maintained depth 10.5 m.

MAX. SIZE: *Tankers:*

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630 – 2130 hrs. 60% additional of basic stevedorage; 2130 – 0830 hrs. next morning 100% additional; Sundays/holidays 100% additional.

CRANES: See "Berthing".

MEDICAL: No advance notice required unless urgent.

DENSITY: Average in Municipal Wharves in Niigata-Nishi (approx.) 1002. Average in Niigata-Higashi (approx.) 1024.

FRESH WATER: Available from all wharves. Cannot be supplied at anchorage.

FUEL: Domestic oil is available. Bonded oil will be brought from Hakodate or Moji with 7 days' advance notice.

CONSULS: Republic of Korea.

DRY DOCKS: No facilities for ocean going vessel.

TANKERS: Slop (residues): No discharge facilities.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. Note: VHF communication available with Inland Sea pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat. 34° 34.35′ N., Long. 135° 08′ 24″ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 55′ 38″ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat. 33° 57′ 00″ N., Long. 131° 03′ 00″ E.

4. Bay Pilotage-Tomogashima/Wada is also compulsory for vessels over 10,000 g.r.t. Pilot boarding position: Lat. 34° 10′ N., Long. 135° 00′ E.

Inland Sea Pilotage: Pilotage at Kurushima Channel/Bisan-Seto/Akashi Channel is compulsory for ships over 10,000 g.r.t. Pilot boarding position unchanged, namely, Sekisaki/Hesaki/Wada, even if ship requires only foregoing area's service.

ANCHORAGES: Approved anchorage area just inside harbour limit. A circle drawn at a point Lat. 33° 59′ 18″ N., Long. 133° 16′ 31″ E. with radius of 430 m. where holding ground good and depth of water 12 m. -15 m. No buoy moorings. Harbour protected by breakwater.

TIDE: (Springs) Max. 263 cm.; min. −9 cm. (Neaps) max. 182 cm.; min. 136 cm.

RESTRICTIONS: Pilot does not take vessel in during darkness. Vessel has to wait if depth during LW 8.50 m. is insufficient to pass channel.

MAX. SIZE: See "Berthing".

HEALTH: Quarantine Inspectors go aboard during day. Master to keep waste until Quarantine inspected in event of any suspected disease or fever on board after entered Japan.

RADIO: Choshi Radio, Nagasaki Radio.

TUG: Joins vessel at Quarantine Anchorage or Section II, always using tug's lines without charge. "Niihama Maru" 2,600 h.p. If more powerful tugs required, can be obtained from Matsuyama or Mizushima.

BERTHING: Harbour Pilot operates during day.

Berth A: Public berth for general purposes, no buoy, just anchorage. However, vessel anchoring at this berth sometimes ordered by port authority to shift in order vessel approaching or leaving Berth No. 4 may pass.

CRANES:

Berth "B3"	2× 5 tons
Berth "K4"	1× 5 tons
Berth "K6"	2×25 tons
Besshi Isoura Berth	1×19 tons

MEDICAL: Hospitals and medical facilities available weekdays only.

TANKERS: No facilities for oil carriers.

DENSITY: Entrance 1023 (rate of tide, 1 knot); channel 1022; anchorage 1021.

FRESH WATER: Water is available from the berths "K-4", "K-6" and Besshi Isoura Berth only after normal working hours – 10 t.p.h. Water is not available from any other berths. A 70 ton barge is available, it can supply 300 tons per day.

FUEL: Bunkers in bond available from main ports or oil stations in tranship. 2 days' notice.

CONSULS: None. Nearest in Kobe.

REPAIRS: Minor repairs only. Main engine piston overhauling possible.

DRY DOCKS: None. For nearest see "Imabari".

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Stevedores.

LOADING/DISCHARGE RATES:

Average rate of Discharging Cargo:

Coal	450 – 500 t.p.h. by ship's gear
Bauxite	700 – 800 t.p.h. by 2 shore cranes
Chemical Oil	200 – 250 t.p.h. by ship's pump
Copper Concentrates	450 – 500 t.p.h. by shore crane
Logs	600,000 – 800,000 BFM/day by ship's gear
Salt in bulk	500 t.p.h. by 2 shore cranes

Average Rate of Loading Cargo:

Alumina in bags	80 – 90 t.p.h. by ship's gear
Fertiliser in bags	50 – 60 t.p.h. by ship's gear
Fertiliser in bulk	80 – 100 t.p.h. by ship's gear

CUSTOMS ALLOWANCES: Only 60 cigarettes to take ashore. No spirits.

CARGO GEAR: Valid Cargo Gear Certificate sometimes required by stevedores when cargo gear maintenance appears to be poor.

REPATRIATION: Arranged by Agent.

AIRPORT: None. Nearest at Matsuyama and Takamatsu. All Nippon Airways – 11 flights per day to Osaka and one to Tokyo.

TIME: GMT plus 9 hours. Permanent.

HOLIDAYS: National Holidays: New Year's Day, January 1st; Adult's Day, January 15th; Foundation Day, February 11th; Vernal Equinox Day, March 21st; Green Day, April 29th; Constitution Memorial Day, May 3rd; Children's Day, May 5th; Respect-for-age Day, September 15th; Autumnal Equinox Day, September 24th; Physical Culture Day, October 10th; Culture Day, November 3rd; Labour Thanksgiving Day, November 23rd; Emperor's Birthday, December 23rd.

Local holidays: New Year's Day (Lunar Calendar), January 30th; May Day, May 1st; Memorial Day of the Sea, July 20th; Bon Festival (Lunar Calendar), August 8th; Autumnal Festival, October 16th-18th.

Vessels may enter/leave *except* January 1st, and cargo work can be done as usual at overtime rates on above national/local holidays *except* for *Niihama* (December 31, January 1, 2, 3, and October 17, 18).

Vessels may enter/leave port at overtime rates and cargo work will be done up to 1700 hrs. (daytime) against surcharges.

No cargo will be handled *Niihama* (December 31, January 1, 2, 3, and October 17, 18). No ship's movement (as well as cargo handling) can be done on January 1st.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Crew allowed ashore with pass, by ferry boat.

GENERAL: *Quarantine:* Hiroshima Quarantine Office, Niihama Detached Office, Nishibara-cho, Niihama, Tel: Niihama 32-3966.

Customs: Kobe Customs, Niihama Branch Customs, Nishibara-cho, Niihama, Tel: Niihama 32-3405.

Maritime Bureau: Sanbashi-dori, Niihama, Tel: Niihama 32-2855.

Maritime Safety Agency: Nishibara-cho, Niihama, Tel: Niihama 33-0055.

Emergency Procedure: No Harbour Master radio available, therefore cable Agent. Telephone sub-agent since one person will be in attendance even during night, who in turn will contact person in charge.

Salvage: No salvage tug stationed, nearest from Kure.

AUTHORITY: Niihama Marine Safety Agency, Nishibara-Cho, Niihama. *Tel:* (0897) 33-0055. *Contact:* Port Captain.

AGENT: Sub-agents of Aall Barwil Agencies.

Morizane Transportation Co. Ltd., 2-13, Sobiraki-cho, Niihama City, Ehime Pref. 792, Japan. Tel: (0897) 32-6119. Telex: 5844-711 Mrzn J. Fax: (0897) 32-3322. Cables: Morizane Niihama.

NISHIHARA (Nakagusuku Wan), Okinawa: 26.14 N. 127.50 E. (See Plan)

LOCATION: The Nansei Sekiyu Ltd. Refinery (NSS) is located in Nishihara Town on the East coast of Okinawa, towards the Southern end of Nakagusuku Bay. Also see "Max. Size".

DOCUMENTS:

- 3 Manifests
- 8 Crew Lists
- 2 Passenger Lists
- 2 Stores Lists
- 2 Personal Effects Lists
- 3 Ports of Call Lists
  (Voyage Memo...past 3 months)
- 2 Transit Cargo Manifests
- 2 International Health Declarations
- Ship's Register
- International Loadline Certificate
- Safety Equipment Certificate
- Derat Certificate
- Last Port Clearance.

Each Crew member will be issued with an Official Pass, which must be returned prior to vessel sailing.

PILOTAGE: Normally vessels will be expected to enter Nakagusuku Bay through entrance marked Tatsu Kuchi, and pick up Berthing Master inside bay – South of Tsuken Jima. Inside bay Berthing Master requests that vessel keeps South of buoy marking Chikunigaa Shoal. Berthing shall be carried out at day time only.

A safe convenient pilot ladder is to be provided for the Berthing Master. Berthing Master stays aboard vessel throughout discharge, except vessel berthed at the pier.

ANCHORAGES: Navigation and anchorage in the waters near the NSS Product Pier and Crude Berth will in so far as possible be restricted to those ships directed into these waters by Berthing Master. In the interests of safety, ships will not enter the restricted area unless so directed by Berthing Master.

RESTRICTIONS: *Shipmaster's Report:* March 1992: Berthing in daylight only, up to 1500 hrs.
MAX. SIZE: For crude vessels a single point mooring (SALM – Single Anchor Leg Type Mooring), capable of handling vessels from 90,000 d.w.t. to 270,000 d.w.t. is established in approximate position Lat. 26° 14′ N. Long. 127° 50′ E., about 2.5 miles offshore.

Products are shipped from a pier connected to the shore – the pier has 2 berths, one for vessels up to 97,000 d.w.t. and one for small vessels up to 4,000 d.w.t.
PRATIQUE: Port Officials will board the vessel after berthing.
RADIO: Crude vessels discharging at Nishihara should report ETA at pilot station (Lat. 26° 13′ N., Long. 127° 52′ E.) 72, 48, 24 and 12 hours prior arrival. Berthing instructions and time of Pilot boarding will be relayed by a telegraph appointed Agent. Refinery has no VHF radio.

Weather reports essential – particularly during typhoon season. Naha Radio – JCX medium wave 500 kHz. Traffic lists broadcast at odd hours GMT. Short wave 6470 kHz, traffic lists broadcast at even hours GMT.
TUGS: 2 tugs and a launch are available for assisting with mooring and unmooring. The Berthing Master in consultation with the Master will decide the number of tugs required for the berthing operation and for standby during the time at berth.
CRUDE BERTH: Single buoy mooring with vessel secured by 2 heavy polypropylene lines from buoy. Lines connected to chains through bow mooring lead and secured inboard. Chains secured direct to Brega Pin (bow stopper). There is 72 ft. of water at buoy position. Vessels may remain in berth in winds of up to 30 m.p.h.
Floating Hoses: 2×24 in. into 2×20 in. connected to 2×16 in. are connected on vessel's port side. There is a 42 in. line from buoy to shore. The maximum pumping rate is 75,000 b.p.h.
PRODUCT PIER: A 110° – 290° orientated pier allows tankers to approach the berth in a ballasted condition in either of 2 opposite directions. Vessels of 4,000 d.w.t. size and above will be handled at Berth No. 1 and smaller vessels at Berth No. 2

The water depth at the pier is approximately 47 ft. The extreme tidal variation is +7.9 ft. to −1.0 ft. and maximum storm tide will add approximately 3 ft. The maximum current is less than 1 knot.

Berth No. 1 is equipped with 1×16 in. loading arm for clean products and 2×16 in. loading arms for dark products. Each of these all-metal hydraulically controlled loading arms is fitted with a remotely operated coupling device to connect to a nominal 10 in. ASA, DIN or BS flanged connection without bolting.

Berth No. 2 is equipped with 2×6 in. loading arm for dark and clean products. These arms are part metal, part hose and are fitted with flanges to be bolted to a nominal 6 in. ASA, DIN or BS flanged connection.

Each berth is provided with a gangway.

Vessels will deballast through the loading arms into a 24 in. ballast water line leading to refinery tankage. Under no circumstances should vessel discharge any ballast water directly into the bay.

Fire protection at the pier consists of a foam concentrate tank and proportioning pump, a fire water pump and distribution system, fixed combination water-foam monitors and air-foam play-pipes.
OIL POLLUTION WARNING: We wish to alert all vessels entering this port of the extreme sensitivity on the part of the community and governmental authorities regarding any incident involving oil pollution of the seas. Any oil spill, regardless of size, is considered a criminal act, and offenders are dealt with accordingly. We urge all vessels to make complete pre-arrival checks for cargo and ballast system tightness, and to strictly adhere to all pollution prevention practices, procedures and policies while discharging or deballasting at this port. Officers and crews should be extremely alert during all phases of vessel operation for potential oil spill risks and seek assistance from shore representatives should any unusual risk arise.
FUEL: No facilities available.
TIME: GMT plus 9 hours. Summertime is not used. All ETAs and other messages should be made in local time.
SHORE LEAVE: Shore leave is permitted – launch service may be arranged but is at vessel's expense.

No person will be given permission to enter the refinery unless they are in the microbus which will be provided by ship's Agent.
AUTHORITY: Nansei Sekiyu K.K., 858 Aza Onaha, Nishihara-Cho, Okinawa, 903-01 Japan. Postal Address: P.O.Box 525, Naha, Okinawa, 900-91 Japan. *Tel:* 098-945-3220.

Captain of the Port: Kin-Nakagusuku, 46 Yagihamabara, Nakagusuku-Son, Okinawa, Japan. *Tel:* 098-895-4999.

AGENT: See "Tokyo".

NOSHIRO: 40.13 N. 140.00 E. (See Plan)

DOCUMENTS:
Ship's Register/New Tonnage Certificate.
Last Port Clearance.
5 Crew Lists, including Passport numbers.
5 Passenger Lists, or "Nil" Lists.
1 Declaration of Crew's Baggage.
2 Ports of Call Lists (date of arrival/departure for previous ports).
Copies of Bills of Lading to show Customs Inspectors.
Ship's Agent will prepare Inward/Outward Declaration.
Ship's Agent should be provided with necessary information about details of cargoes in advance.

All Port Authorities (Customs/Immigration/Quarantine) will attend from Akita Office. Akita/Noshiro 55 km., 1.5 hours by car.
PILOTAGE: Pilot boards off Noshiro. Pilot attending comes from
Present pilot boarding position: 40° 11′ N., 139° 57.5′ E.
Note: VHF communication not available. Communication only ava through Choshi Radio, which covers this area. Vessel should shelter at Funakawa Anchorage (39° 51′ N., 139° 53′ E.), if heavy weather from N.W., or manoeuvre without anchor in order to anchor dragging.
ANCHORAGE: Off Noshiro about 1 mile from breakwater. No and no lighthouse. Depth exceeds 30.0 m. Bottom is soft clay with
RESTRICTIONS: Berthing/unberthing in daylight only.
MAX. SIZE:

	LOA (m.)	*Max.Draft* (m.)	*Remarks*
15,000 ton Pier	130	9.4

STEVEDORES: Working hours: Weekdays 0830 hrs. – 163 (extension possible if required).

Stevedores available at weekends (except 1st and 3rd Sunda holidays (except December 31st – January 3rd).

Log gangs available.
FRESH WATER: Available.

UEL: Domestic oil is available. Bonded oil will be brought from okohama or Tokyo, with sufficient advance notice.
EPAIRS: No facilities.
ENERAL: *Lightering:* Not possible.
hipchandlers: Provisions and stores can be obtained.
rain Fitting: Not available.
old Cleaning Facilities: Not available.
oating Cranes: Not available.
GENT: See "Shimizu".

FUNATO: 39.03 N. 141.44 E. (See Plan)

ORT LIMITS: On the line between Goishi Si. Lighthouse 8° 58′ 59.5″ N., 141° 44′ 42″ E.) and Kori Si. Lighthouse 9° 00′ 53″ N., 141° 45′ 42″ E.).
OCUMENTS:
hip's Register.
nternational Tonnage Certificate.
3 Ports of Call Lists.
1 Maritime Declaration of Health.
ast Port Clearance.
5 Crew Lists, including Passport Numbers.
5 Passenger Lists.
1 Stores List.
1 Declaration Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
hip's Agent will prepare Inward/Outward Declaration, 1 Cargo anifest and Cargo Manifest in transit using specific forms. Therefore ip's Agent should be provided with necessary information about details f cargoes in advance.
ILOTAGE: Not compulsory but strongly recommended by Port anagement as many fishing obstructions in the harbour, and accidents ave occurred when no pilot onboard. Pilot boards vessels under ,000 g.r.t. in position Lat. 39° 00.7′ N., Long. 141° 44.8′ E., and vessels ver 5,000 g.r.t. in position Lat. 39° 00.3′ N., Long. 141° 45.3′ E., during aylight only.
PPROACHES: Proceed to point Lat. 38° 59.2′ N., Long. 141° 47.3′ E. order to avoid stationary fishing nets.
NCHORAGES: In vicinity of pilot boarding ground, in depth of 40 m. -50 m. Anchorage not suitable in strong Easterly or Southerly winds.
ESTRICTIONS: Depth of water at entrance of passage 14 m. Entry/sailing not recommended at night.
AX. SIZE: Channel: LOA 190 m., beam 30 m. and draft 14.0 m.
Also see "Berthing" and "Tankers".
EALTH: Radio Pratique available if vessel has Japanese Sanitary Certificate. Formalities carried out at the anchorage.
ADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. Specifically Westbound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively. Vessels equipped with telex may contact Agent direct.
HF: No VHF at the port. Vessels approaching port should keep watch n Channel 16, as Agent may use VHF of a ship in port to contact an pproaching vessel.
UGS: Small tugs 800 h.p. and 600 h.p. available. Large tugs ,800 h.p., 2,400 h.p. and 2,900 h.p.) can be arranged from Kamaishi ith advance notice, they usually join vessel about 400 m. in front of etty and discharging wharf. Ship's lines used if necessary.
ERTHING:
ublic Berths:

Berth	*Length* (m.)	*Depth* (m.)	*Max.Draft at L.W.* (m.)

onoda 5,000 ton Wharf	260	7.5	7.5

oreign trading cargo vessels only berth at above public berths.
onoda Wharf available for handling only clean cargo for food factory nearby.
RANES: No shore cranes or floating cranes available. Mobile crane up to about 50 tons available with advance notice.
ULK HANDLING FACILITIES: Coal, petroleum coke, gypsum, iron ore and quartz handled at public berths. Discharging by ship's gear to portable shore hopper and carried by truck to stockyard. Maximum discharging rate about 1,000 tons/gang per day (0800 hrs. – 1900 hrs.).
PECIALISED CARGO HANDLING FACILITIES: None.
RIDGES: None.
TEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. Normal working hours 0830 hrs. – 1630 hrs. Overtime surcharges 1630 hrs. – 2130 hrs. 60% additional of basic stevedorage; Sundays/holidays 100% additional.
EDICAL: No advance notice required unless urgent. Cholera vaccination available at hospital.
ANKERS: *Kamei Pier:* Max. size 35,000 d.w.t. Max. draft 9.0 m. Loading Arm: 1×8 in. Diesel oil only handled at 600 t.p.h. No slop (residue) discharge facilities available.
ENSITY: Average density 1022 – 1024.
RESH WATER: Available only by shore hydrant. 24 hours advance notice required, excluding Saturdays, Sundays and holidays. Delivery capacity about 10 t.p.h. – 25 t.p.h. Cost is about Yen 253/ton in daytime. Overtime surcharge of about 30%.
UEL: Domestic diesel oil is available. Bonded oil will be brought from Yokohama or Hakodate, with sufficient advance notice.
CONSULS: None.
REPAIRS: Minor deck and engine repairs available.
DRY DOCKS: None.
SURVEYORS: Available from Tokyo with advance notice.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board. Usually ship's crew.
OPENING/CLOSING HATCHES: Usually ship's crew.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 20 cigarettes to take ashore, but no spirits.
REPATRIATION: Possible via Tokyo by train.
AIRPORT: Nearest is Hanamaki Airport, about 97 km. from Ofunato by taxi. Hanamaki/Osaka 2 flights/day; Hanamaki/Sapporo 2 flights/day; Hanamaki/Nagoya 1 flight/day; Hanamaki/Tokyo no flights.
Use of Hanamaki Airport is not recommended.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
HOLIDAYS: National holidays: January 1st and 15th; February 11th; March 20th (changing); April 29th; May 3rd, 4th and 5th, September 15th and 23rd (varies); October 10th; November 3rd and 23rd; December 23rd.
Local holidays: January 2nd and 3rd; August 14th, 15th and 16th; December 31st.
National holidays and local holidays available for working after discussions with stevedores.
POLICE/AMBULANCE/FIRE: Police 110 (emergency); Ambulance/Fire 119 (emergency).
EMERGENCY CO-ORDINATION CENTRE: Maritime Safety Agencies:
Shiogama Hoan. VHF Channel 16. Tel: 022-362-4999 (24 hours).
Kamaishi Hoan. VHF Channel 16. Tel: 0193-22-4999.
TELEPHONES: No facilities for placing telephones on board.
SERVICES: No tank cleaning equipment; no facilities for discharge of tank washings; compass adjusting difficult; radio and radar repairs available by travel from other port, with advance notice; supply of charts available by sending from Tokyo area, with advance notice; nautical publications, sounding paper, course recorder paper, Notice to Mariners, Safety equipment available, only by sending from Tokyo area, with advance notice; extension of certificates available by surveyor travelling from Tokyo area, with advance notice.
Provision/stores supply available, but deck/engine stores not available at Ofunato. Laundry available if long stay in port.
STORING: Public Berth: Trucks proceed alongside and can use forklifts.
Kamei Pier: Truck can proceed to within 70 m. and then only by hand. No forklift available.
Anchorage: Difficult and dangerous due to ocean/bay.
Customs permit required for all storing.
Local riggers can be employed to assist with storing.
SHIP SUPPLY SERVICE: No craft or helicopters for transfer of stores. Ferry service available to anchorage, weather permitting.
SHORE LEAVE: Possible.
IDENTIFICATION CARDS: Immigration issue shore passes on Master's application. Valid for 7 days to 15 days, and possible extension.
REGULATIONS: Normal port regulations.
GENERAL: Be aware of dense fog during April through to August. Be aware of fishing vessels operating in the neighbourhood and fishing nets and tackle. Be aware of continuous blowing of seasonal strong N.-N.W. wind during Winter season, so prepare many good lines for mooring to berths.
AUTHORITY: Iwate-Ken Ofunato Doboku-Jimusho, 6-1, Maeda,Ikawa-cho, Ofunato-shi, Iwate-ken, 022 Japan. *Tel:* 0192-27-9919.

AGENT: Sub-agents of Aall Barwil Agencies.
Morita & Co.Ltd., 1-1, Nonoda, Ofunato-cho, Ofunato City, Iwate Pref. 022, Japan. Tel: (0192) 26-5131. Telex: 838232 Morita J. Fax: (0192) 26-5133. Cables: Morita Ofunato.

OITA: 33.17 N. 131.40 E. (See Plan)

DOCUMENTS: When vessel arrives direct from a foreign port, Customs officials will board to search the vessel.
The following documents are to be submitted:
Quarantine: (Tel: 0975-21-2394)
See "Health".
Customs: (Tel: 0975-2-2691)
Crew Manifest (1) (state full name/rank/passport nos./date of birth).
List of Ship's Stores (1) (to be attached Arms/Ammunition and Narcotics List).
Declaration of Crew's Baggage (1).
Inward/Outward Declaration (1) (Ship's agents will prepare).
Cargo Manifest for Discharging (1) (Ship's agents will prepare).
Cargo Manifest for Through (1) (Ship's agents will prepare).
Declaration for Payment of Tonnage Dues (1) (Ship's agents will prepare).
The following ship's documents will be checked by Customs:
Ship's Register.
International Tonnage Certificate.
Last Port of Clearance.
Immigration: (Tel: 0975-27-3754)
Crew Manifest (2).
Ports of Call List (1).
Inward/Outward Declaration (1).
1st Japanese port: Ship's agent is to take Passports and/or Seaman's Books to Immigration Office and obtain the Crew Landing Passes.

Harbour Master: (Tel: 0975-21-0115)
Crew Manifest (1)
Inward/Outward Declaration (1).
Vessel's with dangerous cargo: Application for Permission for ship's stay in port and Application for Permission for dangerous cargo work to be obtained from the M.S.A. in daytime.
Port Authority: (Tel: 0975-58-5111)
Inward/Outward Declaration (1).

PILOTAGE: Inland Sea Pilots' Association, Moji office. (Tel: 093-332-7191).
(a) Harbour and Sea pilotage are not compulsory, but foreign vessels are recommended to employ pilots in view of the many fishing boats/nets in the area between Sekisaki/Oita (via Bungo Suido) and/or Hesaki/Oita (via Kanmon Strait).
(b) Request for pilot must be made at least 24 hours in advance and Pilot should be kept closely advised of vessel's ETA at the pilot station.
(c) Sekisaki Pilot Station, 3 miles South of Sekisaki Lighthouse (vessel transitting Bungo Channel). Position: Lat. 33° 13.5′ N., Long. 131° 58′ E., for VLCC's Lat. 33° 13′ N., Long. 131° 58′ E.
(d) Hesaki Pilot Station at East side of Kanmon (Shimonoseki) Straits. Position: Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.
(e) Communication with Pilot: VHF Channel 16 through Oita Port Radio. Tel: 093-332-7191. Telex: 715313 Anjin J. Cable Address: "Anjin Moji".

Shipmaster's Report: April 1988.

Inland Sea Pilot not compulsory in the Inland Sea from Se Saki to Oita or from Oita to He Saki (entrance to Kanmon Kaikyo)

Nor is pilotage compulsory from Se Saki (Bungo Suido) to He Saki.

In the Inland Sea, pilotage is compulsory for vessels over 10,000 g.r.t. in Kurishima Kaikyo, Bisan Seto and Akashi Kaikyo.

At Oita, Harbour Pilot is not compulsory, however it is advisable to make use of the services of a Harbour Pilot as the tug Captains do not speak English, which might cause language problems if no Harbour Pilot is employed.

ANCHORAGES:

No.	*Depth* (m.)	*Capacity* (g.r.t.)	*Position*
No. 1	37–38	Under 20,000	Lat. 33° 16.5′ N., Long. 131° 38.7′ E.

(294°, 1,000 m. from "B" point).			
No. 7	31–32	No limit	Lat. 33° 15.9′ N., Long. 131° 45.3′ E.
(304°, 2,050 m. from "B" point).			
Shin Nittetsu off Anchorage		5,000×3 3,000×3	(Area encircled by 4 points of: (a) 278°, 1,310 m. (b) 249°, 1,200 m. (c) 219°, 170 m. (d) 330°, 550 m. from Otozu Breakwater West Lighthouse).
Quarantine Anchorage	25 m. – 43 m.		Lat. 33° 16′ N., Long. 131° 46′ E.

*It is necessary to obtain permission from Harbour before vessel's arrival.

RESTRICTIONS:

Berthing: During daytime only (Summer: 0600 hrs. – 1800 hrs.; Winter: 0700 hrs. – 1700 hrs.

Tankers and LPG Carriers must be berthed in time to start cargo operations before sunset.

Departure: Night departure from wharves is generally impracticable, except for dry cargo vessels at N.S.C. Sea-Berth and Seihin Berth which can depart up to 2000 hrs. However, this will depend upon condition of weather, etc.

Fishing Nets: Fishing nets are laid during the night between August and December, even in fairway and approaches.

MAX. SIZE: See "Berthing" and "Tankers".

HEALTH: Tel: 0975-21-2394.
(a) Quarantine Station: Lat: 33° 16′ 00″ N., Long: 131° 46′ 00″ E.
(b) Quarantine inspection is not allowed inside port except when weather or other special reasons prevent the quarantine boat from approaching ship at anchorage.
Quarantine is effected in berth for vessels of more than 10,000 g.r.t., provided the vessel possesses valid (i) Derat Exemption/Fumigation Certificate. (ii) all crew/passengers are healthy. (Radio message from ship's Master for these items are required 2 days in advance).
(c) Quarantine service is rendered between 0830 hrs. – 1700 hrs. in Summer and between 0830 hrs. – 1600 hrs. in Winter.
(d) "Q" flag should be hoisted until ship has Free Pratique.
(e) When ship arrives from plague infected or suspected area within 10 days after she left such place, a 24 hour special quarantine is required.
(f) Radio Free Pratique is possible, provided the ship has valid
Exemption/Sanitary Inspection Certificates.
The Master has to radio or telex the Quarantine Office via
agent 36 hours prior to arrival, except Saturday, Sunday
holidays, in compliance with rules.
The following documents are to be submitted:
Declaration Inward/Outward.
Crew List.
Maritime Declaration of Health.
Ports of Call list.

RADIO: Recommended Master communicates with Agent thr
Choshi Radio or Nagasaki Radio which cover all ports in Japa
specifically Westbound vessel, to contact Choshi, and Northboun
contact Nagasaki Radio respectively.

VHF: Vessel can keep in direct contact with port authorities in re
to their arrival, berthing instructions and Pilot's requirements,
through VHF, the details of which are as follows:–
(a) Call sign: Oita Port Radio. Tel: 0975-75-1819.
(b) Location of radio facilities: The transmitting and receiving sta
is located at the top of Mount Tohmiyama, Saganoseki (Seki
(c) Channel: Simplex 16 (Calling)
12 (Communicating)
14 (Communicating)
Antenna power: 50 W.
(d) Operating Hours: 24 hours.
(e) Communicating range: Within a radius of 100 km. from the st
at sea.

	Kamigumi (Raw material)	Shore crane for discharging Ore/Coal, etc. 81 Ton×3. Discharging rate: Ore: 1,600 t.p.h./crane/hatch. Coal: 1,300 t.p.h./crane/hatch. Working hours; 0600 – 1400, 1400 – 2200, 2200 – 0600.
ippon Steel Chemical	Tsurukai	Berth No. 1 Cargo out (See Note 1) 4 in.×1: 300 t.p.h. Cargo in (See Note 2) 6 in. JIS×1: 300 t.p.h. Berth No. 2 Cargo in (See Note 2) 8 in. JIS×1: 300 t.p.h. Berth No. 3 Cargo out (See Note 1) 8 in. JIS×1: 400 t.p.h.

Note 1: Stylene Monomer, Benzene, Tolene and Xylene.
Note 2: Crude Benzene.

Oita LPG	Oita LPG	Number of arm: 3 liquid, 2 vapour. Diameter: 12 in. ANSI. Discharging rate: 2,500 kl./hr.
Oita LNG	Oita LNG	Number of arms: 3 liquid, 1 vapour. Diameter: 16 in. ANSI. Discharging rate: 11,000 kl./hr.

EDICAL: No advance notice required except on Sundays, holidays and in an emergency.

Oka Hospital (appointed by Immigration Authorities)	22-3131.
Higuma Hospital (appointed by Immigration Authorities)	34-2658.
Kageyama occulist	27-5409.
Jinkei Dental office	27-2743.
Yoshimura, ear, nose & throat hospital.	

TANKERS: See "Berthing" and "Stevedores/Cargo Handling Facilities".

Oil Fence: It is compulsory to stretch an oil fence around the vessel during its stay at Sea-berth of Nippon Steel Corporation and No. 1 Dolphin berth of Kyushu Oil Co., (submarine type of rubber oil fence is being installed) from arrival until departure.

Port Fire Precautions: Each tug is equipped with a fire extinguishing system for attending to emergency cases on request.

Kyushu Oil Co. owns a special boat equipped with an extinguishing system and is ready to stand-by when a tanker is berthing or unberthing, at vessel's expense.

Dirty Ballast Facilities: Facilities have been constructed by the Oita New Industries City Development Bureau at No. 2 Reclaimed Land. The facilities can accommodate 2 ships (1 berth, length 60 m. × depth 4.5 m. and 1 berth, length 100 m. × depth 5.5 m.) of maximum 3,000 g.r.t. and 2 tanks capable of storing 600 cu.m. each, also 2 sets of separators for oily water.

The fixed charge is 170 Yen per ton for ballast water and 1,700 Yen per ton for bilge water.

Additional charge for overtime is 50%.

DENSITY: (Average):

1023 in Summer season at Sumiyoshi.
1023 in Summer season at Sea-Berth.
1021/1023 in Summer season at Otozu Hakuchi.
1024 in Winter season at Sumiyoshi.
1025 in Winter season at Sea-Berth.
1021/1025 in Winter season at Otozu.

FRESH WATER:

Public Wharves:

District	Rate of Delivery t.p.h.	No. of Hydrants	Vendor
Sumiyoshi	15	8	Oita Kairiku. Tel: 32-3156.
Otozu	20	3	Tsurukai. Tel: 21-1135.
Ohzai	20	13	Tsurukai Unyu. Tel: 92-2266.
Hiyoshibaru	20	4	Tsurukai Unyu. Tel: 92-2266.

150 ton water barge available at Oita (Tsurukai. Tel: 21-1135).

Private Berths:

Kyushu Oil	25/30	1	Kyuseki.
Showa Denko	25/30	1	Shoden.
N.S.Chemical	1	1	Shinnikka.

Japan Inspection Co.	0975 – 58 – 7020

REPATRIATION: Possible.

AIRPORT: Oita Airport: approx. 56 km. to the airport via land. Approx. 16 miles to the airport via sea (hovercraft). Hovercraft run between Oita City and the New Oita airport. Domestic line only, Japan Air System – JAS (Tel: 09786-7-1191) and All Nippon Airways – ANA (Tel: 09786-7-1161).

TIME: GMT plus 9 hours. No alteration made to clocks during year.
POLICE/AMBULANCE/FIRE: Police tel. 110; Ambulance and Fire 119.
TELEPHONES: Telephones can be placed on board at 3-4 days notice.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 7 days, but 15 days' extension possible if ship stays longer or is visiting more than one port.

According to Customs regulation, ship's crew members are requested to land ashore by designated Mini bus or launch from ship at Sea-berth and by launch from ship at Seihin wharves via Customs House.

GENERAL: *Japan Maritime Disaster Prevention Centre:* Tsurusaki Sealand Transportation Co. Ltd. is appointed by the Japan Maritime Disaster Prevention Centre as 2 hours base, in regard to the stockpiling and use of the materials for removal of discharged oil by the Marine Pollution Prevention Law (Law No. 136 of 1970).

Oil recovery boat "Yunoshio" is under the management of Oita Rinkai Kogyo.

Restrictions: It is prohibited to pump out bilges, to throw overboard sweepings, waste or garbage of any kind and cleaning dust out of holds, whilst the vessel is in port or in pilotage waters according to regulations. Also, not permitted to wash ship's deck and painting ship's outside shell platings.

SERVICES:
Tally:

Japan Cargo Tally Corporation	0975-58-0704.
All Nippon Checkers Corporation	0975-34-1749.

Provisions, Stores and Charts:

(a) Fresh and sea provisions and deck and engine stores are obtainable.
Provisions: Tsurusaki Sealand Transportation Co., Tel: 0975-21-1135; Maruman Senshoku Co., Tel: 21-6161; S.U. & Co. Ltd. (Moji); Kanaya & Co. Ltd. (Moji).
Stores: Toyo Ship Chandler Co. Ltd., Tel: 0975-21-2333; Machine Co. (Moji).
Dunnage: Mitsubishi Corporation, Tel: 0975-58-7101.

(b) Charts: Oita Rinkai Kogyo, Tel: 0975-58-9588. Only Japanese charts are available locally. B.A. and H.O. charts can be obtained from Kobe and Yokohama, repectively, with adequate notice.

Crew Handling Service, Watchmen and Hold Cleaning:
(a) Crew Handling Service: Oita Marine Service Co., Tel: 0975-21-5178.
(b) Hold Cleaning: Koei Shokai and Ginyo Shoji Co. Ltd., (Moji).
(c) Watchmen: Can be arranged.

Ferry and Mini-Bus Service: Tsurusaki Sealand Transportation Co. Ltd., tel: 0975-21-1135.
Laundry: Sanyo Cleaning Co., Ltd., Tel: 0975-27-4366.
Fumigation: Koei Shokai and Toyo Fumigation Co. Ltd. (Moji).
Car Ferry:
(a) Diamond Ferry boats are in regular service between Oita and Kobe via Matuyama, two trips a day.
(b) Kansai Kisen Ferry is in regular service between Beppu and Kobe-Osaka, 3 trips a day.

DEVELOPMENTS:
(a) Oita Prefectural Office plans to develop Marine Recreation Zone at Nishi Oita District (Port Renaissance 21: Water front plan) which will contain a yacht harbour, artificial beach, ocean traffic zone and marine terminal, etc.
(b) Showa Denko is developing 201,000 sq.m. for petrochemical industries on reclaimed land at Berths No. 6A and 6B.
(c) Nippon Shokubai is developing 337,000 sq.m. on reclaimed land at Berth No. 6C. for manufacturing catalyst.
(d) Nissan Automobile Co. is developing 690,000 sq.m. on reclaimed land at Berth No. 6C for manufacturing car engines.
(e) Mitsui Zosen, already located on reclaimed land at No. 7A, is planning to build new factories for expanding their present business.
(f) The Oita Port Authorities have a plan to build new wharves of 13 m. depth and 520 m. length, 10 m. depth and 170 m. length and 7.5 m. depth and 130 m. length, at Ohzai District, thereby revising an original plan.

No. 3	180	5.60	5.70

No. 3 Wharf is exclusively used for domestic carriers only.

Maximum permissible draft at No. 2 Wharf is 5.50 m. for vessels having LOA of between 125 m. and 129 m., and in the event of LOA of vessel below 125 m., deeper draft is acceptable, which depends upon tidal allowance, since the pilot always requires 1.0 m. or 10% draft whichever greater for under-keel clearance.

Starboard side alongside is prefered, but port side alongside is acceptable.

CARGO HANDLING: *Number of Gangs:* Two.

Discharge Rate: Approximately 70 tonnes per gang hour (working period is basically 0800 hrs. – 1830 hrs. = 9 net working hours).

Shore mobile cranes are used for discharging, subject to type of vessel.

Cargo Receiver: Yamaguchi Kyoei Industry Co.Ltd., Onoda. Tel: 08368-3-5485. Person in charge: Mr.Kotake.

Stevedores: Nippon Express Co.Ltd., Ube Branch. Tel: 0836-21-5135. Person in charge: Mr.Kanefuji.

FRESH WATER: Available from hydrant at 15 tonnes/hr. Cost is Yen 400/tonne, minimum supply 20 tonnes.

AGENT: Sub-agents of Aall Barwil Agencies.
Green Shipping Ltd., Moji, 9-7, Minato Machi, Moji-ku, Kitakyushu City, Fukuoka Pref., 801 Japan. Tel: 093-321-4261. Telex: 7153-11 Greenm J. Fax: 093-321-4288. Cables: Greenship Moji.

ONOMICHI-ITOZAKI (incl. Mihara, Matsunaga, Mukaishima): 34.20 N. 133.16 E. (See Plan)

DOCUMENTS:
- Ship's Register.
- Last Port Clearance.
- 3 Crew Lists including Passport Numbers.
- 3 Passenger Lists.
- 1 Stores List.
- 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
- 1 copy Voyage Memo (last 3 months).

Ship's Agent will prepare Inward/Outward Declarations, 1 Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea Ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea pilot stations. Also see 'Shipmaster's Report' before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position Lat: 34° 34.09′ N., Long: 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitting Bungo Channel). Position Lat: 33° 13′ N., Long: 131° 54′ E. Telegraphic address "Anjin Moji". In event bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki pilot station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position Lat: 33° 56′ 24″ N., Long: 131° 03′ 12″ E.

Inland Sea Pilot also berths vessels at anchorage berth (if Matsunaga Bay – logs), or pier in Itozaki district (Mihara section).

Pilot boards for berthing from 30 minutes after sunrise until 30 minutes before sunset.

ANCHORAGES: Draft limitations: Itozaki-Mihara 7.5 m. Matsunaga Bay 8.5 m. Tidal range: Maximum (+) 3.91 m. Minimum (−) 0.09 m. Capacity for 3×20,000 ton vessels.

HEALTH: Radio Pratique not available. Quarantine formalities normally carried out at Mutsure (off Moji) when vessel comes from West through Kanmon Strait, Matsuyama when vessel comes from West through Bungo Channel (Sekisaki Pilot Station) and Fukuyama when vessel comes from East (Wadamisaki Pilot Station).

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Tugs available at Onomichi at any time with 24 hours notice. 7 tugs of 2,000 h.p. – 3,000 h.p. available.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Berth	*Length* (m.)	*Depth* (m.)	*Permissible Draft and Length overall* (m.)	*Capacity* (g.r.t.)
Municipal Nishigosho Pier	404	6.5	5.0×130	2,000
Municipal Shinhama Pier	250	5.5	4.5×100	2,000
Matsunaga Bay (Anchorage)		5.0–10.0		1×10,000 1×6,000 1×3,000
Municipal Itozaki Pier	320	10.0	9.0×200	3,000

Itozaki Pier: Cargo handled from Mitsubishi and Hitachi Works, cement in bags, steel and logs.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: No facilities.

FRESH WATER: Available. Method of delivery (1) Barge. (2) Pier. Additional charge for overtime work and in event of bad weather.

FUEL: Domestic oil is available, Bonded oil will be brought from Kobe, Kanokawa, Hirohata or Moji.

CONSULS: None.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CUSTOMS ALLOWANCES: Only allowed 40 cigarettes to take ashore but no spirits.

REPAIRS: Repairs possible for vessels up to 100,000 g.r.t.

REPATRIATION: Possible.

AIRPORT: Nearest domestic airport at Hiroshima. Nearest international airport for crew joining/repatriation is Osaka International Airport.

TIME: GMT plus nine hours. Permanent.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.

TELEPHONES: No arrangements for placing telephones on board.

SHORE LEAVE: Local Immigration Authority issue shore passes valid for 15 days if vessel calling at more than one port in Japan and 7 days if vessel only calling at a single port. (If only calling Onomichi-Itozaki, Immigration issue 7 day pass).

AUTHORITY: Port and Harbour Dept., Onomichi City, 27-13 Kohama-cho, Onomichi, Hiroshima Prefecture, Japan.

AGENT: Sub-agents of Aall Barwil Agencies.
Hakata Marine Co. Ltd., 11-6, Shinhama 1-chome, Onomichi, Hiroshima, Japan 722. Tel: 0848-23-5600. Telex: 642322 Hakata J. Fax: 0848-22-5141. Cables: Hakatamarine Onomichi.

OSAKA: 34.39 N. 135.26 E. (See Plan)

DOCUMENTS:
- Ship's Register.
- International Tonnage Certificate.
- Last Port Clearance.
- 4 Crew Lists including Passport Numbers.
- 4 Passenger Lists, if any on board.
- Stores List.
- Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Pilotage is compulsory for vessels of 10,000 gross tons or more. 24 hours' notice required. Telegraphic address: "Hanshinpilot Osaka". VHF contact with Osaka Port Radio on Channels 12, 16, 19, 20. Agents operate Channel 26. Three 15 ton Pilot boats with radio equipment to pilot office. Pilot boards anywhere within harbour limits. In event bad weather Pilot boards just inside breakwater when acknowledgement obtainable from Master. If awaiting Pilot, anchor inside harbour limits as near as possible to breakwater.

ANCHORAGES: Section Nos. 7 and 8. Section 7 is Quarantine Anchorage. Section 8 for other vessels. Captain of the Port allocates anchorage position prior vessel's arrival which radioed to Master by Agent. Max. draft about 14.0 m.

RESTRICTIONS: Vessels only permitted to enter from sunrise to 2100 hrs. Full container vessels permitted to enter from sunrise to 2400 hrs. and to depart at any time of the day. However, in order to avoid danger, some wharves (oil wharf, Nakayama Wharf and various shipyards where there is not enough space to conduct berthing operation), accept vessel only until sunset.

MAX. SIZE: Max. permissible length 250 m., draft 11.6 m. Al
"Tankers".

HEALTH: Vessel requiring Free Pratique requested cable dire "Quarantine Station", Osaka informing ETA, date of departure fro port, name of last port, number of crew and health condition. At fir of call in Japan, vessel must obtain Free Pratique. Quarantine Of will attend vessel only from daylight to sunset and Master to sho Vaccination Cards, Derat Exemption Certificate. In case vessel a from cholera-infected area within 10 days Master must advise crew passengers health condition to respective Quarantine Office thr ship's Agent prior to arrival and close all soil pipes before entering

Radio Pratique is available only for a vessel which possesses Sanitary Inspection Certificate issued by the Japanese Governme

RADIO: Osaka Port Radio, 24-hour port operation service on Channels 16, 12, 19 and 20.

RADAR: Osaka Harbour Radar has 24-hour navigation aid and wea information service and supplies information on ship movements. Contact by VHF Channels 16, 14 and 22.

TUGS: 10 Port Authority tugs. Tugs join vessel just before har entrance. Tug's lines used, no extra charge.

BERTHING: No specific requirements. Pilot boarding time will be no by VHF or radio.

CONTAINER FACILITIES: Berths C1, C2, C3, C4, C5, C7, C8, R2, R3 and R4 each equipped with container handling gantry cranes. Berth C1 equipped to handle Ro/Ro. Also see "Developments".

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1630 – 2130 hrs. 60% additional of basic stevedorage; 2130 – 0500 hrs. next morning 130% additional; Sundays/holidays 100% additional.

BRIDGES: 2 bridges under construction. Clearance 46.0 m. – 47.0 m. Completion 1993-94.

MEDICAL: No advance notice required unless urgent. General and Seaman's hospitals available.

TANKERS: No slop discharge facilities. Wharf No. 49, Sakurajima Oil Wharf, max. LOA 250 m., max. safe draft 11.60 m. Product handled, fuel oil, diesel oil, Minas Waxy. Shoreline 12 in. Discharge rate 1,000 t.p.h.

Shipmaster's Report: December 1985.

Tankers are only taken alongside between 0930 hrs. and 1500 hrs. In Summer sometimes between 0900 hrs. and 1600 hrs., but it is not usual.

Sakurajima Wharf 49 has a max. safe draft of 11.60 m., however with such a draft entering only possible during HW. If high water does not fall between 0930 hrs. and 1500 hrs. vessel has to wait a few days.

We discharged 5,000 tons of Ethylene Dichloride at Sakurajima Wharf. Only one connection of 8 in. Discharging rate 700 cu.m.p.h.

DENSITY: Outside anchorage: 1023 – 1025. Near breakwater: 1020 – 1022. Average density inside breakwater 1020. Wharves near estuaries (Aji River, Shirinashi River, Kizu River and etc.): 1016 – 1020.

FRESH WATER: Methods of delivery: by barges or pipeline.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

CONSULS: The following consulates available in Osaka:

Austria
Australia
China, People's Rep. of
France
Korea
New Zealand
Singapore
Switzerland
U.S.A.

REPAIRS: All grades repairs possible.

DRY DOCKS: Hitachi Zosen Co. Ltd., Chikko Ship Yard. No. 1 Dock: 247.5 m.×55.7 m., depth 11 m. No. 2 Dock: 355.0 m.×62.7 m., depth 11 m.

Namura Dock Co. Ltd., No. 1 Dock: 180 m.×27.5 mm., depth 9.3 m. No. 2 Dock: 149 m.×22 m., depth 9.3 m.

Sanoyas Co. Ltd., No. 1 Dock: 155 m.×21.7 m., depth 7.4 m. No. 2 Dock: 112 m.×17 m., depth 7m.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CARGO GEAR: See "Certificates", but no special requirements.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore, but no spirits.

AIRPORT: One hour required from Osaka Port to Osaka International Airport by car (about 25 km. distance). Regular airlines:

Overseas Lines: Japan Airlines, Cathay Pacific Airlines, China Airlines, Thai International Airlines, North West Airlines, United Airlines, British Airways, Korean Airlines, Lufthansa Airlines, Singapore Airlines, Air France.

Domestic Lines: Japan Airlines, All Nippon Airways, Nippon Air System.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: Every Sunday, May 1st, July 20th, December 31st to January 4th.

POLICE/AMBULANCE/FIRE: Police Tel. 110; Ambulance Tel. 119; Fire Tel. 119.

TELEPHONE: Wharf connections available.

SERVICES: All services available.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 7 days, but 3 days' extension possible if ship stays longer.

DEVELOPMENTS: Container Berth No. C-6 completed (300 m. length and 12.0 m. depth). Berth No. C-9 will be completed in 1993/94 (length 350 m. and depth 13.0 m.).

AUTHORITY: Port and Harbour Bureau, City of Osaka, 2-8-24, Chikko Minato-ku, Osaka, 552 Japan. *Tel:* (06) 572-5121. *Telex:* 525-6320 OPPAJ. *Cables:* Omhbureau. *FAX:* (06) 573-5700. *Contact:* Hideo Igarashi, Manager of Promotions Department.

OTARU: 43.12 N. 141.01 E. (See Plan)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

TUGS: Two tugs available. Tugs M/S "Sakura Maru" 194 g/t 2,600 h.p. M/S "Tateiwa Maru" 199 g/t 2,600 h.p. Both belong to the Port Authority.

PILOTAGE: Limit of Otaru Pilotage District is sea area surrounded by line drawn from Kayashiba-misaki to Horaiso-misaki and coast line. Licensed Pilots stationed in office from 0900 to 1700 hrs. Boarding place about 1 mile from North B.W. Lt. H. 70°. Pilot boat painted white and carries International Code flag "H" at forecastle deck.

ANCHORAGES: Depth of water inside breakwater is 3.6 m. to 17.0 m. and nearly everywhere is good anchorage. Sea area outside breakwater also good for anchorage, but be careful not to foul fishing nets. Around quarantine anchorage is best outside breakwater.

RESTRICTIONS: Quarantine and Customs business between 0900 hrs. and 1700 hrs. Pilot assistance not compulsory but in practice necessary.

MAX. SIZE:
Piers and Quays

HEALTH: See "Hakodate".
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.
STEVEDORES: At least 24 hours prior notice required in order to arrange stevedores by Agent, excluding Sundays and holidays. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630 – 2130 hrs. 60% additional of basic stevedorage; Sundays/holidays 100% additional.
MEDICAL: No advance notice required unless urgent.
TANKERS: Available berthing for small vessels only, 1,000 g/t and usual berthing 300 – 500 g/t. Japanese tankers only. Draft: Max. permitted 7.2 m. Discharging: about 500 tonnes p.h.
DENSITY: Average 1025.
FRESH WATER: Good drinking water at all piers and wharves, except Wakatake Dolphin. Cost Y 359/ton. Rate 30-50 t.p.h.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.
FIRE PRECAUTIONS: No smoking at tanker berth, Umaya-machi Wharf.
CONSULS:
American Consulate, Sapporo in Sapporo City only.
Tel: 011-221-5121.
Korean Consulate, Sapporo in Sapporo City only.
Tel: 011-621-0288.
Russian Consulate, Sapporo in Sapporo City only.
Tel: 011-561-3171.
REPAIRS: All type of deck and engine repairs are possible.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 20 cigarettes to take ashore, but no spirits.
REPATRIATION: Possible.
AIRPORT: Distance to Sin-Chitose International Airport 80 km. (70 minutes by railroad or highway). More than 35 flights per day to Tokyo.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
HOLIDAYS: Stevedores do not work on 1st May.
POLICE/AMBULANCE/FIRE: Tel: Police 110; Ambulance and Fire 119.
TELEPHONES: Arrangeable on board.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.

SAGANOSEKI: 33.15 N. 131.52 E. (See Plan)

DOCUMENTS: When a vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:
Customs: (Tel: 0975-75-0350).
1 copy Crew Manifest (full name/rank/Passport No./date of birth).
1 copy List of Ship's Stores (Arms/Ammunition and Narcotics List to be attached).
1 copy Declaration of Crew's Baggage.
1 copy Ports of Call List (last 3 months).
1 copy Inward/Outward Declaration (ship's Agent will prepare).
1 copy Cargo Manifest for Discharging Cargo (ship's Agent will prepare).
1 copy Cargo Manifest for Through Cargo (ship's Agent will prepare).
1 copy Declaration for Payment of Tonnage Dues (ship's Agent will prepare).
The following ship's documents will be checked by Customs:
Ship's Register.
International Tonnage Certificate.
Last Port of Clearance.
Immigration: (Tel: 0975-27-3754) Oita Office.
2 copies Crew Manifest.
1 copy Ports of Call List.
1 copy Inward/Outward Declaration.
At first Japanese port, ship's Agent is to bring Passports and/or Seamen's Books to Immigration Office and obtain the Crew Landing Passes.
Quarantine (Tel: 0975-21-2394) Oita Office:
See "Health".
PILOTAGE: Inland Sea Pilots Association, Moji Office (Tel: 093-332-7191):
(a) Harbour and sea pilotage are not compulsory, but foreign vessels are recommended to employ a pilot, in view many fishing nets/boats in Sekisaki/Saganoseki area.
(b) Request must be made at least 24 hours in advance, and pilot should be kept closely advised of vessel's accurate ETA at certain pilot station.
(c) Sekisaki, 3 miles South of Sekisaki Lighthouse (vessel transiting Bungo Channel). Position Lat. 33° 13.5′ N., Long. 131° 58′ E.
(d) Hesaki at East side of Kanmon (Shimonoseki) Strait, position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.
(e) Communication with pilot: VHF Channel 16 through Oita Port Radio (Tel: 093-332-7191. Telex: 715313 Anjin J. Cables: Anjin Moji).
ANCHORAGE: Waiting anchorage available at following 3 positions only:
Saganoseki "A" Anchorage, Lat. 33° 15′ 39″ N., Long. 131° 51′ 25″ E.
Saganoseki "B" Anchorage, Lat. 33° 15′ 30″ N., Long. 131° 51′ 33″ E.
Saganoseki "C" Anchorage, Lat. 33° 15′ 48″ N., Long. 131° 51′ 16″ E.
(Above Saganoseki Anchorage is assigned as Customs "Closed Port", so cash/mail/stores delivery, etc., whilst anchored not permitted, as per Customs Regulations).
RESTRICTIONS: Berthing/unberthing during daytime only.
MAX. SIZE: See "Berthing".
HEALTH:
(a) Ordinary quarantine inspection should be undertaken at Saganoseki Anchorage (See "Anchorage") by inspectors attending on board.
(b) Quarantine service is rendered between 0830 hrs. and 1700 hrs. in Summer season, and between 0830 hrs. and 1600 hrs. in Winter season.
(c) Radio Pratique is available, provided vessel has valid Derat Exemption and Japanese Sanitary Inspection Certificate.
RADIO: Recommended that Master communicates with Agents through Choshi Radio or Nagasaki Radio, which cover all ports in Japan. Westbound vessels to contact Choshi Radio, and Northbound vessels to contact Nagasaki Radio respectively.
VHF: Oita Port Radio (Tel: 0975-75-1819). Channels 16, 12 and 14. Power 50 W. Operating hours: 24 hours.
TUGS: Tugs available to assist with berthing/unberthing through Oita Port (30 minutes by sea from Saganoseki).

BERTHING:

Berth	*Wharf Length* (m.)	*Max. LOA* (m.)	*Depth alongside* (m.)	*Depth in Approach* (m.)	*Max. Draft* (m.)
A Wharf	100	185	10.0	9.20	9.55
B Wharf	200	185	10.0	9.20	9.55
C Wharf	130	185	10.0	9.20	9.55

Note: Wharf length (A/B/C): 430 m. in total (same extension).
Max. deadweight: 31,406 tonnes (wharf strength), 39,200 tonnes (bitt strength).
Max. draft: 9.55 m., subject to tide allowance 10% of ship's draft as under-keel clearance.
CRANES: Company: Nippon Mining Co.Ltd.
Facilities:
Unloaders: 4.
Cargo handled: Copper concentrate in bulk.
Discharge Rate: About 160 – 170 tonnes/hr. and about 1,900 tonnes per day per unloader.
About 650 tonnes/hr. and about 7,800 tonnes/day by 4 unloaders.
Max. airdraft: 11.00 m.
Max. outreach: 25 m. × 2 unloaders.
27 m. × 2 unloaders.
Berth: To be used at Wharf "A" and "B".
BULK CARGO FACILITIES: See "Cranes".
SPECIALISED CARGO HANDLING FACILITIES: Company: Nippon Mining Co.Ltd.
Facilities:
Loading arms: 2.
Cargo handled: Sulphuric acid in bulk.
Loading rate: 1,000 tonnes/hr. by 2 arms.
Shore connection: 6 in./JIS Chicksan.
Max. pressure: 10 kg. at manifold.
Berth: To be used at Wharf "C".
STEVEDORES: Discharging of all raw materials is on "Free in/out" basis. Therefore, stevedorage is to receiver's account. Discharging is carried out by shore cranes. Ship's gear is not used.
MEDICAL: No advance notice required, except on Sundays, holidays and in an emergency.
TANKERS: See "Berthing" and "Specialised Cargo Handling Facilities".
DENSITY: Average: 1023 in Summer, 1024 in Winter.
FRESH WATER: Available from shore. Rate about 15 tonnes/hr.
FUEL: Bonded oil will be brought from Oita, Kanmon or Tokuyama.
CONSULS: There are not consuls in Saganoseki. Notary Public office is available for Marine Note of Protest (Nakano Notary Public office at Oita. Tel: 0975-35-0888).
REPAIRS: Minor deck and engine repairs can be undertaken by Oita workshop and/or Moji.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Not specially required, unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: For discharging raw materials, opening/closing hatches must be carried out by ship's crew before berthing.
CERTIFICATES: Ship's Register and International Tonnage Certificate, to show Customs Inspector ship's registered gross and nett tonnages.
CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore, but no spirits.
REPATRIATION: Possible.
AIRPORT: Oita Airport, 2 hours by taxi, 1.5 hours by hovercraft (Distance from centre of Oita town to Saganoseki is 25 km.).
A regular domestic airline service to most airports in Japan is available. A regular international airline service only to Seoul, South Korea (every Monday, Wednesday and Saturday).
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police 110, Ambulance/Fire 119.
TELEPHONES: Possible to place wireless telephone on board ex-Saiki. 3-4 days prior notice required.
SHORE LEAVE: Local Immigration Office (Oita Office) issues shore passes valid for 7 days only, if vessel only calling at one port in Japan, and 15 days, if vessel calling at more than one port in Japan. Extension possible if ship stays longer.
SERVICES: All services available.

AGENT: Sub-agents of Aall Barwil Agencies.
Green Shipping Ltd., Oita Branch, 934 Aza-Jihama Kaiwara, Oita City, 870-01 Japan. Tel: 0975-21-3015. Telex: 7722-84 Greeno J. Fax: 0975-22-2136. Cables: Greenship Oita.

SAIKI: 32.59 N. 131.55 E. (See Plan)

DOCUMENTS: When vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:
Ship's Register.
International Tonnage Certificate.
Voyage Memo (Ports of Call).
3 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port in Japan).
Ship's Agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore, ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Pilotage in and out of harbour not compulsory, but recommended to be taken at Quarantine Anchorage (Lat. 32° 59′ N., Long. 131° 56′ 50″ E.). Inland Sea Pilot carries out harbour pilotage. Inland sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio, giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all inland sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations, depending upon vessel's last port of departure, and at Master's discretion. Pilotage available throughout 24 hours, and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as harbour pilots up to berth or anchorage at destination.

Note: VHF communication available with inland sea pilot station.

1. Wadamisaki, at entrance to Kobe (vessel transiting Kii Straits). Position Lat. 34° 34′ 09″ N., Long. 135° 11′ E. Cable address "Anjin Kobe".
2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessel transiting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Cable address "Anjin Moji". In event of bad weather, recommended vessels proceed for shelter, as near as possible having due regard to safety, to Sekisaki Pilot Station.
3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGES: Same as Quarantine Anchorage (See "Pilotage").

RESTRICTIONS: Vessel can enter port and depart after sunset.

Depth of water in the passage is 11.0 m.

Tidal Range: Max. +1.7 m. Min. −1.3 m.

MAX. SIZE: See "Berthing".

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel from 0830 hrs. to 1630 hrs. at anchorage. Master to show all Vaccination Cards and Derat Exemption Certificate. In case vessel arrives from cholera infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent, prior to arrival, and close all soil pipes before entering port. Radio Pratique available.

RADIO: Recommended that Master communicates with Agent through Choshi Radio or Nagasaki Radio, which cover all ports in Japan. Westbound vessels to contact Choshi Radio, and Northbound vessels to contact Nagasaki Radio respectively.

VHF: No VHF service.

TUGS: 1×1,000 h.p. and 1×800 h.p.

BERTHING:

Name of Berth	*Length (m.)*	*Depth (m.)*	*Max. Draft (m.)*	*Capacity (g.r.t.)*

There are many additional berths with depth of 2 m. – 4 m.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agents to arrange stevedores. Vessel must constantly keep her Agents advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agents, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: *Berthing Procedure at General Wharf:* Vessels may enter the Hamadera Passage during daylight hours only, from 0700 hrs. until about 2 hours before sunset. In addition, for mooring larger vessels a anemometer is provided on bridge. No entry is made if wind speed is 15 m./sec. or over (for VLCC's 10 m./sec.), or if a typhoon is forecast.

Normally 4 tugs attend to a vessel of 160,000 d.w.t. and 6 tugs to larger vessels. The local rule is that total tug power is from 8% to 10% of the vessel's deadweight, depending on weather conditions.

The berthing manoeuvre is carried out by the attending tugs with very little assistance from the ship's engines. The vessel approaches the berth at a 5° angle until about 2 ship lengths away. Then, the vessel is brought parallel to the berth, about 200 ft. to 300 ft. off, and eased alongside by the tugs and mooring lines. The approach speed is approximately 0.5 knots until 1 ship length away. Currents in the basin are very weak.

Mooring: The 2 mooring launches have insufficient power to handle wires and consequently are slow. However, an additional large launch is made available to handle wires. The normal mooring sequence is forward back spring, aft back spring, bow line, stern line, and breast lines. In view of the underpowered mooring launches, it is advisable to use synthetic lines for the bow and stern lines. The normal mooring configuration is 4 bow lines, 2 forward breast lines, 2 forward back springs, 2 aft back springs, 2 aft breast lines and 4 stern lines. In view of the limited space available in front of the bow, care should be exercised not to overshoot the berth.

Osaka Gas (LNG) No.2	LNG	12 in.×3	12,500 cu.m.

FRESH WATER: Minami Hakuchi anchorage by barges. All other wharves by shore line.

DENSITY: Osaka Gas Wharf and Nippon Steel Corporation Wharves 1020 to 1025.

All other wharves, 1010 to 1025.

FUEL: Most domestic and bonded fuels available.

CONSULS: None.

REPAIRS: See "Osaka".

DRY DOCK: Hitachi Shipbuilding & Engineering Co. Ltd., Sakai Shipyard, Dock No. 2, length 455 m., width 63 m., depth 11 m., capacity 400,000 d.w.t.

GANGWAY/DECK WATCHMEN: Recommended and compulsory for tankers working cargo.

OPENING/CLOSING HATCHES: Stevedores open and close hatches with terms subject to charter party.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Each man allowed 200 cigarettes to take ashore but no spirits.

CARGO GEAR: See "Certificates" but no special requirements.

REPATRIATION: Possible.

AIRPORT: International Airport Osaka, 45 km. distant.

TIME: GMT plus 9 hours No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: See "Osaka".

TELEPHONES: Available except Nippon Steel Wharf and Public Wharf.

SHORE LEAVE: Local Immigration Officers issue shore leave pass valid for 3 days, but a 9 day pass is obtainable in case where a vessel stays in port for longer period.

DEVELOPMENTS: 29 berths under construction at Sakai-Senboku. Max. depth 12 m. 53 berths under construction at Hannan, depths from 4 m. – 12 m.

SHIPMASTER'S REPORT: February 1980. (L.P.G. Carrier).

Osaka Bay: Also see "Kobe" – "Shipmaster's Report".

Entry: No transit of Tomogashima Strait at night from Sunset to Sunrise. This is not a regulation but a Japanese Government request which for all intents and purposes is a requirement.

Pilotage: Bay Pilot is a recommendation for LPG carriers which again means a requirement. About 97% of overseas shipping and 60% of Japanese foreign going shipping use this service.

Lights: Flashing red over green to be permanently on day and night in Japanese waters if vessel over 200 m. length. Red is for dangerous cargo and flashes at 120 to 140 flashes per minute and green for vessels over 200 m. flashes at 180 to 200 flashes per minute.

Two black cylinders by day for over 200 m. length plus 1st substitute over 'B' for dangerous cargo.

Fire Wires/Mooring Line: To be rigged starboard side fore and aft, plus 1 mooring line at each end. In actual fact we kept the fire wires in during transit of Osaka Bay in case of slippage and getting caught in propeller. The Pilot approved.

Navigation: Sumoto – Oki Light Buoy: Lat. 34° 21.1′ N., Long. 135° 00′ E. must be left to port (North or South bound). This is not indicated on BA.3614 as a traffic separation buoy. The Pilot advised me that some foreign ships without Pilot leave this buoy on the wrong side, if JMSA catch any vessel doing this they are liable to prosecution. No navigation in visibility less than 1 mile and no berthing when wind speed exceeds 12 m./sec.

Pilot: Boards about 7 miles South of Tomogashima. Cable: 'Bay Pilot Kobe' 12 hours ETA, if any alteration cable 'Urgent Bay Pilot Kobe'.

Then by VHF through Kobe Port Radio – range 80 miles. Pilot nearly always starboard side. Boards from 3 fairly fast purpose built red hulled cutters based at Sumoto on Awaji Shima Island.

Pilot disembarks about 1 mile South of Tomogashima Strait.

Entry: For LPG carriers and certain other dangerous classification ships there is no night passage of Tomogashima Straits or Osaka Bay which means from about 1600 hrs. to 0600 hrs. there is no transit. Further complications are:

(1) At the berths themselves at Sakai and Kobe, LPG movements and berthing during darkness prohibited.

(2) If vessel has no Sanitary Certificate Free Pratique cannot be given which means anchoring at Osaka Quarantine anchorage for Pratique.

(3) The cost of an escort tug whilst vessel is at anchor is fairly costly about £100 per hour.

Therefore if Pratique is required (No Sanitary Certificate) and berthing that day is undertaken, arrival at Tomogashima pilot station can only be between 0600 to 0930 hrs. as the Quarantine service finishes for lunch time and if Pratique is not granted before lunch, entry is unlikely to take place that day.

If Sanitary Certificate is held, Pilot boarding at Tomogashima can be between 0600 to 1200 hrs.

Pratique: Free Pratique can only be given on proper notification by Radio 24 hours before arrival to Quarantine Service, prefixed by RPM through Agent. Current Sanitary Certificate must be held.

Pratique is granted whether or not Sanitary Certificate held but as above delay will be entailed. Granted at Osaka Anchorage between 0830 to 1200 hrs. and 1300 to 1700 hrs. Sanitary Certificate costs about £100 and is valid for 1 year. Application is made through Agent who arranges prior inspection by 'Rentokil' agency (£100) for any debugging and water testing and then followed by Government inspection which takes about 1.5 hours. Storerooms, fridges, galley, toilets, garbage bins, drinking water, etc., checked. This certificate entitles vessel to Free Pratique.

If the ship is not calling at Japan again within the 12 month period it is of little value, otherwise if likely to call, for an LPG ship with restricted entry the £200 could be well spent.

For Pratique, vessel anchors in Osaka Quarantine anchorage position Lat: 34° 37′ N., Long: 135° 21.5′ E. (approx.).

Escort Boat: A fire-fighting escort tug is required for Loaded LPG ships in port limits. An escort boat of smaller capabilities is required for LPG ships in Vapour taking on bunkers or Lub oil in port limits.

Approximate cost of firefighting tug is £100 per hour.

Therefore to anchor overnight to await berthing in loaded condition will require escort tug costing in region of £1,500. During cargo operations instant communication must be maintained with escort tug by VHF or Walkie Talkie.

Sakai:

Notice of Readiness: On anchoring at Quarantine anchorage or when Harbour Pilot boarding, whichever first.

Agent suggests tendering Tomogashima Pilot and seeing if receiver accepts.

Pilot: Harbour Pilot boards at Quarantine anchorage or at No. 1 and 2 Buoys Hamadera Passage channel as indicated on BA.3614.

Depth: Minimum depth in channel found to be 18 m.

V.H.F.: Kobe Port Radio, very powerful station – 80 miles range. Osaka Radio used for public correspondence.

Tugs: Two tugs join about half way down buoyed channel. Usual powerful Japanese type, tug's lines.

Berth: Mitsui Toatsu – Fertiliser berth: Position Lat 34° 32.45′ N., Long 135° 25.6′ E.

Port Side to.

Depth: 14.5 m.

Stern overhangs end of quay.

Gangway can be easily landed.

No stores on quay.

If wind speed exceeds 15 m./sec. no berthing and instant disconnection.

Vessel must be connected and have commenced pumping by sunset.

Solid concrete pile quay wall with ample fenders.

Lines: 3, 2, 2, each end. Line boat available, about 1.5 hours to tie up.

Connections: Rubber hoses for liquid and Vapour Return.

Propane line 12 in., Butane line 12 in. connection ASA 150.

Vapour 8 in. for both.

Shore labour with shore reducers.

Takes about 1.5 hours to connect.

Rate: Maximum able to accept: Propane: 800 m.t.p.h.

Butane: 1,300 m.t.p.h.

We were pumping at very close to this figure all the time with 3 pumps on each grade – shore restriction.

Cargo General: Little back pressure.

We had no surveyor, all tonnages on shore figures.

Plant capacity: Propane: 1 tank of 20,000 metric tons.

Butane: 3 tanks 12,000 metric tons.

1 tank 24,000 metric tons.

Approximately 15 m. of hose is used from shore manifold.

Fire axe required for moorings each end.

Watchman: English speaking watchman with telephone on board throughout 24 hours.

Departure/Arrival: Latest 1700 hrs.

Arrival: Hoses must be connected and discharge commenced before sunset.

Facilities: No stores alongside.

Water available, about Yen 700 per tonne.

Doctor will board vessel at minimum charge of Yen 20,000.

STD telephone to U.K. very expensive.

Crew changes: Via Osaka International Airport – no difficulties.

Repairs – Diawa (Company accredited Japan repair company).

Kobe H. Kajita (Konishi now in general office). Tel: 078–681–6001. Telex: 5622–849 Daiwindus.

Documents: 1st Port:

1 Health Declaration
1 Vaccination List.
1 Application for Shore Pass.
3 Crew Manifests (Crew Declaration) – Japanese Form.
7 Crew List – Ship.
1 Declaration (Ship Information) – Japanese Form.
3 Ship's Stores.

If any crew changes new personnel must be added onto original crew list (Manifest).

Seal Bond only, leave Beer Room open.

Usual procedure with shore passes – all handed in on departure, bottom torn off if calling at 2nd port and re-application made.

For 2nd Port:
7 Crew Lists.
1 List Ship's Stores.
1 Application Shore Passes.

AUTHORITY: Sakai Port Administration Office, 1, Shiohama-cho, Sakai City, Osaka. *Tel:* (0722) 38-5241.

SAKAIDE: 34.19 N. 133.51 E. (See Plan)

DOCUMENTS:

1 Voyage Memorandum (List of Ports of Call).
Ship's Register.
International Tonnage Certificate.
Last Port Clearance.
5 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage is compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat. 34° 34′ 35″ N., Long. 135° 08′ 24″ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 55′ 38″ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible, due regard to safety, to Sekisaki pilot station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. P Lat. 33° 57′ N., Long. 131° 03′ E.

4. Tomogashima Pilot Station. Position Lat. 34° 1 Long. 135° 00′ E.

ANCHORAGES: Port located on North coast at East part of Sh Island in Inland Sea.

Boundaries and Areas. Area bounded by line joined with three p East corner of Sosha river mouth, Mamako-Hana of Semi Jim Tako-Saki of Shotsuji-Yama.

Depth of water inside harbour limit: 9 m. Outside harbour limit: 1

RESTRICTIONS: Vessels entering and/or leaving during daytime at wharves; but no restrictions day and night at sea anchorage pro favourable weather conditions prevail.

MAX. SIZE:

DENSITY: Inside harbour limit 1025. Outside harbour limit 1025

RESH WATER: Sea anchorage. No water barge available but usually rought from Onomichi (about 4 hours run to Sakaide). Rate of delivery 0 to 200 t.p.h. dependent on barge.

Centre Pier: Can be supplied by shore line with capacity 25 t.p.h.

Mitsubishi Kasei Wharf: Can be supplied by shore line with capacity 50 t.p.h.

UEL: All grades of bonded bunkers are stocked in Tokyo, Ise Bay, saka and Kanmon Port. At all other ports bunkers will be lightered om the nearest bunker stock ports at maximum 7 days prior notice.

RE PRECAUTIONS: No specific precautions.

ONSULS: None. See "Kobe".

EPAIRS: Only minor repairs.

RY DOCKS: Kawasaki Heavy Industries Ltd., Sakaide, which is able to dry dock. Dock No. 2 for 500,000 d.w.t. vessel. 450 m.×72 m.×12.3 m. Not yet in action for ship repairs. Only used at esent for ship building and after services.

loating dock with capacity 80,000 d.w.t. under construction.

ANGWAY/DECK WATCHMEN: Not specially required unless assengers or valuable cargo on board.

PENING/CLOSING HATCHES: Stevedores carry out opening and osing hatches. If any time lost by ship's crew doing this work, evedores charge ship for waiting. Recommend request stevedores for is work unless crew can complete it before berthing.

ERTIFICATES: Ship's Register and International Tonnage Certificate o show Customs Inspector ship's registered gross and nett tonnages. alid Cargo Gear Certificate sometimes required by stevedores when rgo gear maintenance appears to be poor.

USTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore, d no spirits.

ARGO GEAR: See "Certificates", but no special requirements.

URVEYORS:

1. Nippon Kaiji Kentei Kyokai is stationed at Sakaide.
2. Nippon Kaiji Kyokai (NK Class) and Lloyd's Register are stationed t Sakaide.

EPATRIATION: Possible.

IRPORT: No airport. Nearest Takamatsu, All Nippon Airways 4 flights o Osaka and 3 to Tokyo and TOA domestic airlines to Tokyo/Fukuoka.

IME: GMT plus 9 hours. No alterations made to clocks during year.

OLIDAYS: National Holidays – See "Niihama". Local Holidays: New ear's Day (Lunar Calendar).

No ship's movement can be effected on January 1st, 2nd and 3rd, ugust 8th and October 15th.

OLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119. akaide Maritime Safety Base, 6-2858.

ELEPHONES: No facilities for placing telephones on board.

ANKS: No American/European banks. But it is possible to collect oreign currency, especially U.S. Dollars, at The 114th Bank, Ltd., akamatsu.

TORING: See "Prelims".

1. Available by both, however, for Asia Kyoseki by barge.
2. Available during cargo operations.
3. Available, however at Mitsubishi "A" or "B" berth – by barge for eavyweight goods.
4. No, however, at Centre Pier East/West they are available.
5. No special regulations.
6. Yes.

HORE LEAVE: Local Immigration Offices issue shore pass valid for nly 7 days, but extension for next 7 days possible if ship stays longer.

ENERAL: Mitsubishi Chemical Industries Co. Ltd., Sakaide Works. As harf of above works located outer harbour limit of Sakaide port, the ndermentioned procedures required: In conformity with regulations, essel required to get special permission for entering into closed port, hich will be given from Shikoku Maritime Bureau.

Customs request vessel calls Mitsubishi Chemicals Wharf to obtain pecial permission for entering. If tonnage dues paid prior arrival, this rocedure will be attended to by Agent.

Waiting anchorage: Avoid Bisan Seto Boundary according to special ater zone navigation order. Imperative to exclude water surfaces with stablished Fishery Privilege.

Vessels waiting to berth at centre pier are lightened at anchor.

UTHORITY: Sakaide Port Administration Office, 1-5-32 Irifune-cho, akaide, Pref. of Kagawa, Japan. *Tel:* 0877-46-2518. *Contact:* Port aptain.

GENT: Sub-agents of Aall Barwil Agencies.

Morizane Transportation Co. Ltd., 7-45, Chikko-cho, 1-chome, akaide City, Kagawa Pref. 762, Japan. Tel: (0877) 45-7717. Telex: 844711. Fax: (0877) 44-1293, 0897-32-3322. Cables: Morizane Sakaide.

SAKAIMINATO: 35.32 N. 133.14 E. (See Plan)

OCUMENTS:

Ship's Register (and International Tonnage Certificate, if ship's Register does not show gross and nett tonnages).
Last Port Clearance.
6 Crew Lists, including Passport numbers.
4 Passenger Lists.
2 Stores Lists.
2 Declarations of Crew's Baggage.

ILOTAGE: Not compulsory. Pilot available at position Lat. 35° 32′ N., ong. 133° 17′ E.

NCHORAGE: Centre of anchorage about 1,000 m. off breakwater See "Plan").

RESTRICTIONS: Berthing and unberthing only allowed in daytime.

Draft limitation in Passage No. 1 – 9.0 m., and in Passage No. 2 – 13.0 m.

HEALTH: Radio Pratique is available and ordinary quarantine inspection takes place at Quarantine Anchorage (See "Pilotage").

TUGS: 1×300 h.p., 1×800 h.p. and 1×2,400 h.p.

BERTHING:

Name of Berth	*Length* (m.)	*Depth* (m.)	*Permissible Draft* (m.)	*Capacity* (g.r.t.)

* Height restriction (top of mast to sea level) of 38 m. for vessels proceeding to Chuo Berths and Eshima Berths.

STEVEDORES: Log gangs available.

FRESH WATER: Available at berths. Only available by barge at Eshima Dolphin.

FUEL: Domestic oil is available. Bonded oil to be brought from Moji with sufficient advance notice. For bunkering, oil boom has to be arranged.

GENERAL: *Immigration:* Authorities stationed at the port.

Lightering: Not possible.

Provisions: Available.

AGENT: Sub-agents of Aall Barwil Agencies.

Sakaiminato Kairiku Unso Co.Ltd., 43, Taisho-machi, Sakaiminato City, Tottori Pref., 684 Japan. Tel: (0859) 42-2123. Telex: 5759-583 Kairik J. Fax: (0859) 42-3744. Cables: Kairiku Tottorisakaiminato.

SAKATA: 38.55 N. 139.48 E. (See Plan)

Located at mouth of Mogami River. Strong wind blows from Japan Sea November to March.

In Winter season, wave height between 3 m. to 5 m., length 70 m. to 80 m. and period 7 to 10 seconds. Current South to North along coastline.

TIDAL RANGE:

Higher high water	+61 cm.
Spring tide high water	+45 cm.
Neap tide high water	+41 cm.
Mean sea level	+39 cm.
Neap tide low water	+35 cm.
Spring tide low water	+31 cm.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc., (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Order Pilot through Agent. In bad weather, wait instructions from Agent.

ANCHORAGES: 1. All sea areas (except waterway) available for anchorage. No prohibited anchorage areas. Pilot station and quarantine anchorage position is the area in the 500 m. radius circle centre of which is 260° – 3,100 m. from Sakata Light Station.

2. In Winter season (1st Novmeber – 31st March), keep watch on VHF Channel 16 for notice about dragging anchor, issued by Akita Hoan.

RESTRICTIONS: Ship movements in daytime only.

MAX. SIZE: 70,000 tonnes d.w.t., LOA 230 m. and draft 11.8 m.

HEALTH: At first port of call Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended that Master communicates with Agent through Choshi Radio, which covers all ports in Japan.

TUGS: 1×1,600 h.p., 1×2,600 h.p. and 1×2,900 h.p.

STEVEDORES: In order to arrange stevedores, advance notice required by Agent at least 24 hours before, except Sundays and National Holidays,

Logs, 1,400 cu.m. per day are handled by ship's winches.

MEDICAL: No advance notice required unless urgent. Medical facilities available at Sakata City Hospital.

TANKERS: 2 berths. Depths 7.0 m. and 7.5 m.

FRESH WATER: Wharf feedwater only. No water boat.

FUEL: All kinds of bonded oil available at Bay of Tokyo, Bay of Ise and Port of Kanmon. Bunkers lightered from Hakodate provided at least 7 days' notice given.

BERTHING: No particular requirements.

Agent communicates by means of ship's radio with respect to the exact time when the Pilot has to be taken on board.

AIRPORT: Itazuke Airport, Fukuoka, about 120 km. (about 120 minutes by taxi).

27 flights daily between Fukuoka/Tokyo (Haneda) (All Nippon Airways/Japan Airlines/Japan Air System).

1 flight daily between Fukuoka/Tokyo (Narita) (Japan Airlines).

7 flights daily between Fukuoka/Osaka (All Nippon Airways/Japan Airlines).

7 flights daily between Nagasaki/Tokyo (Haneda) (All Nippon Airways/Japan Airlines/Japan Air System).

7 flights daily between Nagasaki/Osaka (All Nippon Airways).

TIME: GMT plus 9 hours. No alterations to clocks throughout year.

POLICE/AMBULANCE/FIRE: Police Station: Sasebo 23-7161 (if emergency: 110). Ambulance Sasebo 23-5121 (Sasebo Fire Station). Fire Sasebo 119 (Sasebo Fire Station).

TELEPHONES: No facilities exist for placing telephones on board.

SERVICES: Hold cleaning. Compass adjusting. Fumigation.

IDENTIFICATION CARDS: See "General – Immigration".

WEATHER: Southwesterly winds prevail in Summer, while Northerly blows frequently in other seasons. Max. wind velocity recorded 25.1 m./sec. In early Spring dense fog prevails, but renders navigation impossible only for 7 days or so.

Tidal range 2.6 m. Current rate max. 1.5 knots in vicinity of harbour entrance at rising tide. At ebb tide, it flows in opposite direction and is faster than during flood, but not so strong as to hinder navigation.

GENERAL: *Customs:* When vessel arrives direct from foreign port, Customs Officials board for search. Following documents to be submitted. Crew List, Passenger List, Store List, Manifest of Crew Personal Effects (must be signed by individual crew member). Arms and Ammunition List, Narcotics List, List of Port of Call on current voyage, Discharging Cargo Manifest, Through Cargo Manifest, Declaration inward/outward (Form No. C2000). Following will be checked on board. Ship's Registry, Last Port Clearance.

When vessel comes from Japanese port, Customs Officals will not attend on board, except special case. Master or Agents to attend at Customs House for entry formalities with following documents. Discharging Cargo Manifest, Through Cargo Manifest, Declaration inward/outward, Ship's Registry, Last Port Clearance, documents entrusted with the Master by Customs at previous port.

On vessel's departure, clearance issued by Customs after confirming payment of tonnage dues.

Immigration: Immigration Officials board vessel on arrival to examine passports, discharge books and/or other equivalent travel documents and provide a 7 days landing pass for crew members and passengers. Two copies each of Crew List and Passenger List are required by them. Providing vessel's Agent with these documents beforehand will help in expediting Immigration business on arrival. When vessel in port more than 7 days, landing passes will be extended every 7 days on application.

In event that crew members, without entry visas, to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring prompt departure from Japan within 72 hours) of these men has been booked, or unless vessels to which they are to be transferred, arrive in Japan within 5 days. Services are rendered from 0900 hrs. to 1700 hrs.

AUTHORITY: Port & Harbour Bureau, Sasebo City, 3-5, Yorozu-cho, Sasebo City, Nagasaki Pref. *Tel:* (0956) 22-6128.

Nishi Kyushu Warehouse Co. Ltd., P.O.Box 48, Tategami-cho, Sasebo City, Nagasaki Pref. 857, Japan. Tel: (0956) 24-6161. Telex: 7482-27 Soko J. Fax: (0956) 24-6168. Cables: Soko Sasebo.

SENDAI: 38.13 N. 141.06 E. (See Plan)

DOCUMENTS:

Ship's Register.
International Tonnage Certificate (1969).
Last Port Clearance.
3 Crew Lists, including Passport numbers and date of birth.
3 Passenger Lists.
1 Declaration of Crew's Personal Effects (Baggage List).
1 Stores List.
2 Lists of Port Calls (last 3 months).
1 Maritime Declaration of Health (if calling at first port in Japan).

Agents should be provided with necessary information to prepare Inward/Outward Declarations and Cargo Manifests.

PILOTAGE: Not compulsory, but Oil Terminal request vessels to take pilot. Pilot will be arranged through Agent, and approximately 1 hour before pilot arranged he can be contacted direct by VHF Channel 16 via tug. Pilot not available after dark. Pilot boards at Sendai Entrance Fairway Buoy (Position Lat. 38° 13′ 15″ N., Long. 141° 08′ 15″ E.).

ANCHORAGE: Depth 28 m. Bottom: Rock and sand. Anchorage not suitable in rough weather, and as no sheltered anchorage nearby, it is advisable for vessels to proceed offshore.

Anchorage positions:
(1) Quarantine Anchorage: 38° 13′ 03″ N., 141° 06′ 42″ E.
(2) Tanker Anchorage (Pilot Station) can also be used as Quarantine Anchorage. Quarter Circle Area covering 3 miles East and 3 miles South from position 38° 13′ 15″ N., 141° 08′ 15″ E.

RESTRICTIONS: Entry into and sailing from Sendai: Priority of entry and sailing from the port is given to ferries. Entry and sailing of other vessels is restricted to times outside ferry schedules. Entry of tankers controlled by Tohoku Oil Co.Ltd., under supervision of Harbour Master.

MAX. SIZE: See "Berthing" and "Tankers".

HEALTH: Radio Pratique available. Vessel to have valid Japanese Sanitary Inspection Certificate and valid Derat Exemption Certificate, in order to apply for Radio Pratique. Master should send Radio Pratique message (R.P.M.) by cable or telex to Quarantine Office through Agents, within 36 hours prior to vessel's arrival time (excluding Saturdays, Sundays and holidays). At first port in Japan, Master should obtain Free Pratique by radio or from attending Quarantine Officer at anchorage.

If vessel not applicable for Radio Pratique, Master should send crew's health condition to Quarantine Office at least one day (office day) prior to vessel's arrival, through Agents, by cable or by telex. Formalities will be carried out at the Quarantine Anchorage (38° 13′ 03″ N., 141° 06′ 42″ E.), or Tanker Anchorage (38° 13′ 15″ N., 141° 08′ 15″ E.).

RADIO: Recommended that Master communicates with Agents through Choshi Radio or Nagasaki Radio by cable. Sellcall through Singapore Radio or Hong Kong Radio. Telex through satellites, if vessel equipped with Inmarsat.

Tankers are to advise receivers of arrival draft, cargo to be loaded/discharged and quantity/tank and vessel's mooring equipment.

VHF: Tugs on Channel 16.

RADAR: Not available.

TUGS: 4 tugs available (3,200 h.p., 3,000 h.p., 2,600 h.p. and 2,400 h.p. each). Also 3 tugs available (3,200 h.p., 3,000 h.p. and 2,600 h.p. each) from Ishinomaki and Shiogama.

SHIMONOSEKI (including Mutsure): 33.57 N. 130.58 E. (See Plan)

(See "Kanmon-Ko")

DOCUMENTS: When vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:

Ship's Register.
International Tonnage Certificate.
Voyage Memo (Ports of Call).
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: *Nissin Tanker Pier – Mutsure:* Pilotage is not compulsory but all vessels should take a Pilot. The Pilots reportedly are experienced, qualified and well organised.

If the vessel is coming from Westwards, the Pilot will board at the anchorage position N.N.E. of Mutsure-Sima.

If the vessel is coming from Eastwards, the same Pilot who navigated the vessel through the Kanmon Passage will bring the vessel to the berth if the tidal conditions are favourable and the berth is not occupied. Otherwise, the vessel should anchor off the terminal in an author anchorage.

Pilots meet vessels arriving from Eastward near the entra approaches of Kanmon Passage off the Hesaki Lighthouse. Howe this is not applicable when the vessel is coming from Seto Naikai.

Pilots have available heavy launches or tugs which generally h black and white superstructure.

The Port of Kanmon Ko is divided into several Districts, the m important of which are Shimomoseki, Moji and Wakamatsu. anchorage is quite congested and the traffic is heavy. Also, a l fishing boats, barges on tow, and other craft may be encountered extreme caution should be exercised.

Also see "Moji".

ANCHORAGES: Mutsure Anchorage: Undermentioned area is o port. The sea area surrounded by:

(a) Line connecting Daibahana on Takenoko Island and to Wagora Island.
(b) Line connecting top of Wagora Island and Udonohama Mutsure Island.
(c) Coastline between Udonohama and Unoishibana on Mu Island.
(d) Line connecting Unoishibana and Anse-no-Shiri in Shimono
(e) Line connecting Anse-no-Shiri and point at 370 m. f Daibahana on the line connecting Daibahana and top of Wag Island.
(f) Line Long. 130° 54′ E.

Anchorage includes a part of Quarantine Anchorage and Mutsur Berth; depth 10 m. – 25 m.

RESTRICTIONS: See "Moji".

	25			15,000×1

Note: If both Nos. 12 and 13 piers are used, LOA up to 160 m.
Both Nos. 15 and 16 piers are used, LOA up to 160 m.
Both Nos. 20 and 21 wharves are used, LOA up to 230 m.

Fukuura Berth (for lumber discharge only)	120	7.2	5,500 d.w.t
Nishiyama Berth No. 3	240	12.0	30,000×1
Nishiyama Berth No. 4		5.0	

Also see "Tankers".

HEALTH: See "Moji".

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively.

VHF: Shimonoseki Port Radio Station on Channels 16, 12, 14, 20 and 22 Pilots on Channel 13.

TUGS: See "Moji".

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Mitsui Kinzoku Dolphin Pier: Max. d.w.t. 60,000. Max. LOA 230 m. Max. draft 11.90 m. 1 shore crane. Bauxite, zinc concentrate and phosphate handled.

Hananocho Container Terminal: Length 370 m.; depth 10.0 m.; 1×35.6 ton gantry crane; 52×220 volt reefer plugs; container depot capacity 1,000 TEU.

BRIDGES: Kanmon Suspension Bridge was built in 1973 across Hayatomo Channel (narrowest place in Kanmon Strait, width of fairway 530 m.) between Shimonoseki and Moji. The height of the bridge from sea level is 61 m. Vessels over 59 m. height must seek clearance from Pilot Office.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agents to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required, unless urgent.

TANKERS: Nissin Tanker Pier No. 1 located about 610 m. South of Mutsure Lighthouse. At this berth, West-going current stronger than East-going and ship taken to berth only on Westerly current, with stern towards South. Most suitable berthing time is 2 – 3 hours after commencement of West-going current. Max. dimension of vessel which can be accommodated at this berth is 95,000 d.w.t., LOA 245 m., draft 14 m. Product handled, fuel oil. Shoreline 3×12 in. Discharge rate 2,000 t.p.h. Berth Nos. 2 and 3 handle coastal tankers only.

DENSITY: 1025.

FRESH WATER: Good fresh water supplied either from water barge or from hydrants alongside wharves. Rate of delivery from water barge 50 t.p.h. and from hydrants 40-50 tons.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

CONSULS: Korean Consul, Tel. 0832-66-5341.

REPAIRS: All types of repairs possible.

DRY DOCKS: Mitsubishi Heavy Industries Ltd. 4 dockyards (Nos. 3 & 4 for smaller vessels).

Mitsubishi Heavy Industries Ltd.

Dimensions of Docks:

	Length (m.)	*Breadth* (m.)	*Draft* (m.)
No. 1 Dock	164.13	25.0	7.04
No. 2 Dock	150.10	20.0	6.88

Max. Size of Vessel for Docking:

	Length (m.)	*Breadth* (m.)	*Draft* (m.)
No. 1 Dock	160.00	22.50	5.50
No. 2 Dock	143.00	19.30	5.00

Towa Shipbuilding K.K. - 1 dockyard (Max. 1,000 g.t.).

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore, but no spirits.

CARGO GEAR: See "Certificates", but no special requirements.

REPATRIATION: Possible.

AIRPORT: Nearest is Fukuoka Airport (international), about 30 minutes by express train and 2 hours by taxi.

Ube Airport (domestic), about 1 hour by taxi or bus.

Kitakyushu Airport, about 40 minutes by taxi.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.

Public telephone booth available near by the berth.

TELEPHONE: Possible to place telephone on board.

SERVICES: All services available.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 15 days, when Shimonoseki is first port of call in Japan. Extension possible if ship stays longer.

AUTHORITY: Shimonoseki Port Authority, 1-1 Nabe-cho, Shimonoseki City, Japan 750. *Tel:* (0832) 31-1111, ext.545. *FAX:* (0832) 23-1300. *Contact:* Takahide Kouchi, General Manager.

AGENT: Sub-agents of Aall Barwil Agencies.

Green Shipping Ltd., Moji, 9-7, Minato-machi, Moji-ku, Kitakyushu City, Fukuoka Pref. 801, Japan. Tel: 093-321-4261. Telex: 7153-11 Greenm J. Fax: 093-321-4288. Cables: Greenship Moji.

SHIMOTSU (including Kainan): 34.06 N. 135.08 E. (See Plan)

DOCUMENTS:

Ship's Register.
International Tonnage Certificate.
Voyage Memo (Ports of Call).
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Pilot request to be given to pilot station through Agent. Advance notice of ETA: 72 hours and 24 hours before arrival. No VHF available. Pilot usually attends by tug boat. No special pilot boat. Pilot boards at Quarantine Anchorage in vicinity of Lat. 34° 07′ 10.5″ N., Long. 135° 06′ 42″ E., or at another anchorage which will be designated by Harbour Master. No alternative area in event of bad weather. Location of anchorage for awaiting pilot – Lat. 34° 07′ 10.5″ N., Long. 135° 06′ 42″ E., as pilot station.

ANCHORAGES: Quarantine Anchorage, 20 m. depth.

RESTRICTIONS: Anytime for entry to anchorage, but daytime only for berthing and unberthing.

Yura Bay: Vessels no longer than 110 m. berth. Daytime entrance only regardless of tide and current.

MAX. SIZE:	*Max. d.w.t.* tonnes	*Length* (m.)	*Draft* (m.)
Tonen O-1	260,000	349 m.	18.80 m.
Tonen E-1	70,000	234 m.	12.20 m.
Wakayama Sekiyu-Jetty 9 (Kainan)	78,000	250 m.	11.50 m.
Wakayama Sekiyu-Ohsaki Sea Berth	245,000	340	21.00 m.

Also see "Tankers".

HEALTH: Radio Pratique available.

Formalities will be carried out at the undermentioned positions which will be specified by Harbour Master.

1. Lat. 34° 09′ 00″ N., Long. 135° 06′ 29″ E.
2. Lat. 34° 08′ 33″ N., Long. 135° 06′ 49″ E.
3. Lat. 34° 08′ 05″ N., Long. 135° 07′ 09″ E.
4. Lat. 34° 08′ 25″ N., Long. 135° 05′ 47″ E.
5. Lat. 34° 08′ 09″ N., Long. 135° 05′ 47″ E.
6. Lat. 34° 07′ 54″ N., Long. 135° 06′ 54″ E.

RADIO: Recommended Masters communicate with Agents through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound, to contact Choshi, and Northbound, to contact Nagasaki Radio respectively.

TUGS: Tugs normally join at anchorage designated by Harbour Master, tug lines used.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio or telex.

MEDICAL: No advance notice required unless urgent.

TANKERS: There are no slop facilities.

Berth	*Product*	*Shorelines*	*Discharge Rate* (t.p.h.)
Tonen O-1 Jetty	Crude Oil	2×12 in. 3×16 in.	4,500 12,000
Tonen E-1 Jetty	Crude Oil Fuel Oil	2×12 in. 1×10 in.	2,500 2,000
Wakayama Sekiyu Jetty 9 (Kainan)	Crude Oil	2×12 in.	5,000
Wakayama Sekiyu Ohsaki Sea Berth	Crude Oil	3×16 in.	12,000

Tonen O-1 Jetty: This berth consists of an unfendered central platform with access way and pipe trestle to the shore, having on each side 1 flexible and 2 rigid spring and main dolphins with catwalk connected to the central platform. There are 2 more rigid mooring dolphins for breasting lines located in a backward position relative to the breasting frontage and accessible by catwalk.

The spring lines are secured to either one of the rigid spring dolphins at each side of the central platform.

The original mooring buoys have been replaced with mooring dolphins standing off the central platform 251 m. and 241 m. thus extending the total mooring frontage to 492 m. All mooring and breasting dolphins are fitted with capstans and remotely operated quick release hooks.

Currents run parallel to the berthing face, maximum 2 knots each way.

The berth has been approved for accommodating tankers of about 260,000 d.w.t. Depth alongside the berth is about 20 m. below C.D.

Berthing Procedures and Mooring: The vessel is turned about 1 mile North of the berth and then backed down to the berth. The reason for this procedure is twofold. First, there is insufficient room at the berth for turning. Second, in the port of Shimotsu vessels are normally berthed heading out so that in case of an emergency they can depart with the least possible delay. Furthermore the passage South of Zi-no-Shima inland is very often obstructed with fishing nets.

The vessel is brought parallel to the berth, about 150 ft. – 300 ft. off, and then pushed alongside by the attending tugs. Mooring lines are only led when the vessel is very close in or resting against breasting dolphins. The normal sequence for handling ship's ropes is: spring lines, breasting lines, then bow and stern lines, and then the forward and aft breasting lines.

The mooring configuration for vessels less than 100,000 d.w.t. is: 3 bow lines, 3 stern lines, 2 forward breasting lines, 2 aft breasting lines, 2 forward back springs, 2 aft back springs. For vessels up to 200,000 d.w.t., an additional bow line and stern line is required. For vessels over 200,000 d.w.t., an additional breast line fore and aft is necessary. 2 mooring launches are used. The berth is equipped with a sonar docking system.

When very strong Southerly winds are experienced, the vessel will go port side to. This rarely happens.

DENSITY: Average density 1019.

FRESH WATER: Available at every berth except Fuji Kosan Sea Berth, by shore lines, rate about 25 tonnes per hour. Also available by barge.

FUEL: Most grades of domestic and bonded oil are available. If bunkering is carried out at anchorage, guard boat and oil fence will be required by harbour regulations.

CONSULS: None.

REPAIRS: Only minor deck and engine repairs.

DRY DOCKS:

Yura Dockyard: Mitsui Shipping & Engineering Co. Ltd. have constructed a 350,000 d.w.t. new dockyard in Yura, 50 nautical miles South of Kobe Lat. 33° 57′ 30″ N., Long. 135° 07′ 00″ E. Vessels calling at Yura port are requested to note the following information:

Tonnage dues should be paid at Wakayama since Yura is closed port.

Dock Master boards at position 280° – 2,000 m. from Arijima Lighthouse for entering Yura and Pilot is not required.

Vessel is requested to wait at Wakayama Anchorage if dry dock or wet basin is not available.

Vessel is requested to call at Shimotsu for Free Pratique if necessary.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore, but no spirits.

REPATRIATION: Possible.

AIRPORT: Osaka International Airport.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110 and Ambulance/Fire 119 (in case of emergency).

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 7 days, but 7 days' extension possible if ship stays longer.

IDENTIFICATION CARDS: Not required.

AUTHORITY: Wakayama Shimotsu Port Administration Office, 22, Chikko 6-chome, Wakayama City. *Tel:* (0734) 31-7266.

AGENT: Sub-agents of Aall Barwil Agencies.

Hayashi Kaiun Co.Ltd., 3062 Shimotsu-cho, Kaiso-gun, Wakayama Pref. 649-01, Japan. Tel: (0734) 92-1333. Telex: 5542-739 Hksimt J. Fax: (0734) 92-0911. Cables: Hayashikaiun Shimotsu.

SHINGU: 33.41 N. 135.59 E. (See Plan)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Stores List.
1 Voyage Memo (last 3 months).
1 Declaration of Crew's Baggage List (only at first port of call).

Ship's Agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore, ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory. Pilots are available at the anchorage from sunrise to one hour before sunset.

APPROACHES: Main approach channel (leading to discharging berth) depth 10.0 m.

ANCHORAGE: 3 locations:

1. Lat. 33° 39′ 54″ N., Long. 136° 00′ 32″ E.
2. Lat. 33° 40′ 00″ N., Long. 136° 01′ 00″ E.
3. Lat. 33° 40′ 26″ N., Long. 136° 01′ 00″ E.

MAX. SIZE: Wharf No. 4: Max. LOA 185 m., max. draft 9.6 m.

HEALTH: Free Pratique formalities will be carried out at nearest port (Owase, Shimotsu, etc.). Radio Pratique and Sanitary Inspection available from Quarantine Officer from Owase port.

RADIO: Recommended that Master communicates with Agent through Choshi Radio or Nagasaki Radio.

VHF: Not available at port or on tugs.

RADAR: Not available.

TUGS: 1 tug (2,200 h.p.) available in the Shingu. Additiona available from Wakayama port.

SUSAKI: 33.24 N. 133.18 E. (See Plan)

PORT LIMITS: *Arrival Position:* Within 800 m. radius of position Lat. 33° 19′ N., Long. 133° 18′ E.
DOCUMENTS:
Ship's Register.
Last Port Clearance.
Quarantine Certificate.
Crew List.
Voyage Memo (last 3 months).
Stores List.
Narcotics List.
Declaration of Crew's Baggage.

The ship's Agents will prepare Inward/Outward Declaration and Cargo Manifest. Therefore ship's Agents should be provided with necessary information from the vessel, such as ship's nationality, port of registry, gross and nett tonnages, deadweight, owner's name, number of crew, nature and quantity of cargo.
PILOTAGE: The port does not have VHF, telegraphic or telephone communications, so ETA advice should be sent to the ship's Agent, who will contact the pilot station. The vessel will be advised of berthing and entry information by Agent by cable or telex.
Whilst awaiting pilot, vessel anchors in anchorage (See "Anchorage"). In the event of bad weather, there is no alternative anchorage, and pilot will not board. The Master should decide whether to proceed to sea or not.
ANCHORAGE: Lat. 33° 19′ N., Long. 133° 18′ E. Depth 40 m. – 50 m.
RESTRICTIONS: Vessels cannot enter Port Limits until Free Pratique has been granted (See "Health").
Berthing/unberthing throughout 24 hours.
MAX. SIZE: See "Berthing".
HEALTH: Free Pratique not available at Susaki. Nearest convenient quarantine port is Kochi (Lat. 33° 29′ N., Long. 133° 35.5′ E.), which is about 18 miles from Susaki.
RADIO: It is recommended that vessels use Choshi Radio or Nagasaki Radio, which cover all ports in Japan.
VHF: No port VHF station. In an emergency, vessel can contact J.M.S.A. on Channel 16.
TUGS: 1×2,200 h.p. and 1×2,500 h.p.
BERTHING:
Diabo 10,000 ton Wharf: Public wharf for cement in bulk and clinker. Max. LOA 165 m. Max. beam 28.0 m. Max. draft 8.9 m. Clear height less than 13.0 m. Loading by shore conveyor belt. Rate: 650 tonnes/hr. for cement in bulk and 1,000 tonnes/hr. for clinker.
Diabo "A" Pier: Private pier for discharging coal in bulk. Max. LOA 125 m. Max. beam 15.0 m. Max. draft 7.5 m. Discharging rate by shore equipment 350 tonnes/hr.
Diabo "K" Pier: Private pier for cement in bulk and clinker. Max. LOA 125 m. Max. beam 15.0 m. Max. draft 6.20 m. Loading by shore conveyor belt at 650 tonnes/hr.
15,000 ton Wharf: Public wharf for logs and lumber. Max. LOA 185 m. Max. beam 32.0 m. Max. draft 8.70 m. Ship's gear used for discharging, rate 850 cu.m./day with 3 gangs working 0800 hrs. – 1700 hrs.
5,000 ton Wharf: Public wharf for domestic vessels.
3,000 ton Wharf: Public wharf for domestic vessels.
Ninato Machi Wharf: Public wharf for domestic vessels.
Nittetsu Dolphin Pier: Private pier for limestone in bulk. Max. LOA 240 m. Max. beam 32.5 m. Max. draft 12.5 m. (even keel). Clear height less than 13.5 m. Limestone loading by shore conveyor belt and 2 loaders, rate 1,300 tonnes/hr.
BULK HANDLING FACILITIES: See "Berthing".
STEVEDORES: To be arranged by shipper/consignee against the shipping plan. Workable 24 hours for cement/limestone loading, including Sundays and holidays.
Discharging of logs, 0800 hrs. – 1700 hrs., except Sundays and holidays. No overtime possible.
MEDICAL: No advance notice required, except for Sundays and holidays and in an emergency.
DENSITY: 1018 – 1023, average throughout the year.
FRESH WATER: Available at berth. Rate 10 t.p.h.
FUEL: Supply prohibited under local port regulations, except in drums.
CONSULS: None.
REPAIRS: Only minor repairs.
DRY DOCKS: None.
REPATRIATION: Possible.
AIRPORT: Kochi Airport, about 70 km. 19 flights to Osaka, 2 flights to Nagoya and 5 flights to Tokyo daily.
TELEPHONES: Not available.
POLICE/AMBULANCE/FIRE: Contact Agent.
CUSTOMS ALLOWANCES: Only allowed to take 60 cigarettes ashore, but no spirits.
SERVICES: None.
SHORE LEAVE: Crew issued with shore passes valid for 15 days.
DELAYS: Sometimes there are delays in berthing and unberthing, due to fishing boats towing nets in the vicinity of harbour entrance, anchorage and channel.
GENERAL: Susaki is a complex port as the Fishing Union has strong powers, and demands that the following conditions are met:

1. Ships must use recognised anchorage.
2. Ships must berth within one day of anchoring.
3. Ships must not show too many lights at night.
4. Ships must not dispose of any waste into the sea (dust, scraps of food, any waste material or oily water) at anchorage or in inner harbour.

AGENT: Sub-agents of Aall Barwil Agencies.
Irimajiri Kaiun Co.Ltd., 2-9 Minato Machi, Susaki City, Kochi Pref., 785 Japan. Tel: (0889) 42-6141. Telex: 5886-712 Irisub J. Fax: 0889-43-2055. Cables: Irimajirikaiun Susaki.

TAGONOURA: 35.08 N. 138.42 E. (See Plan)

PORT LIMITS: Commences 5 cables from the harbour entrance. A vessel is considered an "arrived ship" at this point.
DOCUMENTS: Same as "Shimizu".
PILOTAGE: Ordered 24 hours in advance through Agents. If possible vessels should obtain Japanese Chart 1075 for the approaches and Japanese Harbour Plan No. (P) 98. Two fixed green leading lights visible 16 miles lead the ship through the entrance on a bearing of 323.5° True. Vessels should approach on this transit until 1 mile off the breakwater entrance which is marked by an Occ. G. 6 sec. 14.4 mile light on the West Breakwater and a Occ. R. 6 sec. 15 mile light on the East Breakwater. The Pilot will board from a tug (190° × 2 miles from West Breakwater Lighthouse). 2 tugs will attend for the entrance transit.
ANCHORAGES: Due to the steep nature of the coast no roadstead anchorages are available. In the event of having to wait for Pilot or weather to moderate it is necessary to steam outside the entrance or anchor and wait near Shimizu Quarantine Station.
RESTRICTIONS: The allowable draft should be verified with the Agents before arrival as this does vary, the average being 6.5 m. alongside the berth. The entrance channel has a minimum depth of 9 m. at high tide.
MAX. SIZE: LOA 600 ft., beam 100 ft. These extremës are likely to be increased as the port develops.
HEALTH: Radio Pratique is available if vessel holds a valid Japanese Sanitary Inspection Certificate; if not, then quarantine will be cleared at Shimizu.
RADIO: Chosi Radio. When nearing Shimizu a call can be made via Shimizu Radio VHF requesting them to telephone ETA to Tagonoura Pilot.
TUGS: 2 tugs normally required. These are ordered from Shimizu in advance by Tagonoura Agents. The same applies on departure.
BERTHING:

Berth	Length (m.)	Depth (m.)	Permissible Draft (m.)	Capacity (d.w.t)
Yoshiwara Wharf No. 1	167	9.0	9.0	1×10,000

TAKAMATSU: 34.21 N. 134.02 E. (See Plan)

DOCUMENTS:
Ship's Register.
Last Port Clearance.
Ship's International Tonnage Certificate.
3 Voyage Memo (List of Ports of Call).
5 Crew Lists, including Passport numbers.
3 Passenger Lists, in any.
1 Stores List.
1 Declaration of Crew's Baggage (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Inland Sea and Bay Pilotage should preferably be arranged through Agents with 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all inland sea ports. Pilotage is compulsory for vessels over 10,000 g.r.t. when passing Osaka Bay, Akashi Route and Bisan Route.

Pilots obtained from undermentioned pilot stations, depending upon vessel's last port of departure, and at Master's discretion. Pilotage available throughout 24 hours, and 72 hours advance notice preferred, thereafter advising any alterations. Most inland sea pilots also act as harbour pilots up to berth or anchorage at destination.

1. Tomogashima Pilot Station (entrance to Osaka Bay): Position Lat. 34° 10′ N, Long. 135° 00′ E. Cable address "Baypilot Kobe". Telex: 5622617.
2. Wadamisaki Pilot Station: Position Lat. 34° 35′ N., Long. 135° 08′ 24″ E. Cable address "Anjin Kobe". Telex: 5623011.
3. Sekisaki Pilot Station: Position Lat. 33° 13′ N., Long. 131° 55′ 38″ E. Cable address "Anjin Moji". Telex: 715303.
4. Hesaki Pilot Station: Position Lat. 33° 57′ 00″ N., Long. 131° 03′ 00″ E. Cable address "Anjin Moji". Telex: 715303.

ANCHORAGE: Master must obtain permission to anchor from Harbour Master before arrival. Depth 9.0 m. – 10.5 m.
RESTRICTIONS: Vessels may enter and leave during daytime only.
MAX. SIZE: See "Berthing".
HEALTH: Radio Pratique available.
RADIO: Recommended that Master communicates with Agents through Choshi Radio or Nagasaki Radio, which cover all ports in Japan. Westbound vessels to contact Choshi Radio, and Northbound vessels to contact Nagasaki Radio respectively.
VHF: No service available.

TANABE: 33.44 N. 135.21 E. (See Plan)

DOCUMENTS:
Harbour Master: Report of arrival and departure.
Shimotsu Customs Office (Tanabe Branch): 1 copy each of the following.
Ship's Register
Last Port Clearance
3 copies Crew List
3 copies Passenger List
1 copy Stores List
1 copy Declaration of Crew's Baggage (First port only)
1 copy Cargo Manifest (Discharge & through cargo)
1 copy Declaration Inward of vessel
1 copy Parcel List
Osaka Immigration Office (Shimotsu Branch):
1. Before ship's arrival: "Notice of Ship's Arrival" is to be submitted 24 hours before ship's arrival with Crew List (Name, Nationality, Date of Birth, Number of Passport or Seaman's Book, Rank).
2. On ship's arrival: "Report of Ship's Arrival" is to be submitted with Crew and Passenger Lists (if already submitted before ship's arrival, not required).
3. On Ship's Departure: "Report of Ship's Departure" to be submitted with Crew List if any changes.
Note: It is required that ship's Agent is able to guarantee the identification of crew.
PILOTAGE: Not compulsory, but if required Agent to be advised 72 hours prior arrival. No pilotage sunset to sunrise. Anchorage waiting for Pilot Lat. 33° 42′ N., Long. 135° 19′ E. Pilot station 2,200 m. 315° from Banshono-hana Lighthouse. Depth 38 m.
ANCHORAGES: (a) Lat. 33° 42′ 05″ N., Long. 135° 20′ 34″ E. (b) Lat. 33° 42′ 08″ N., Long. 135° 21′ 01″ E.
Depth 19 m. Bottom, sand and mud.
In Tanabe Port, there are many rocks, and therefore it is required to investigate the port passage sufficiently, according to the Chart of Tanabe Port which is issued by Maritime Agencies (Chart No. 74).
RESTRICTIONS: Max. draft 10.5 m.
When a vessel loaded with explosives or dangerous cargo is entering the port, she must obey the instructions issued by Port Master when outside the port.
There is no restriction for night arrival.
HEALTH: Vessels usually anchor in the port of Owase or Shimotsu, where the authorities board and grant Free Pratique.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.
Tanabe Maritime Safety Office, call sign: JNH.
The contents of communications must be concerned with ship's arrival and departure, and maritime safety.
VHF: Call: "Tanabe Hoan".
Communication to be concerned with ship's arrival and departure arrangements and port safety affairs.
Telephone number of Maritime Agencies: 0739-22-2000.
TUGS: Tugs can be arranged from Wakayama Port.
BERTHING: Buoy A: Depth 10.7 m., max. draft 10.5 m. Capacity 30,000 g.r.t. (logs only).
STEVEDORES: Available through Kinan Port Transport Union.
MEDICAL: No advance notice required unless urgent. In an emergency contact Maritime Agencies.
TANKERS: Proceed to Shimotsu.
DENSITY: About 1030.
TIDE: Tidal range: Maximum plus 2.13 m. Minimum minus 0.21 m.
FRESH WATER: Available by water barge, capacity 30 tons. Daytime delivery only to buoy berths. 48 hours' notice required.
FUEL: Bonded oil will be brought from Shimotsu or Kobe, when required.
CONSULS: None.
REPAIRS: No facilities available.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: By ship's crew.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.
AIRPORT: Nanki Shirahama Airport about 25 km. distant. 2 Domestic flights daily to Tokyo.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Tanabe police office, tel. 0739-22-1226; Ambulance, tel. 0739-22-0931; Fire department, tel. 0739-22-0931.
SERVICES: None available locally but obtainable from Osaka.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.
AUTHORITY: Tanabe Doboku (Public Works) Office, 23-1, Asahigaoka, Tanabe City, Wakayama Pref. *Tel:* (0739) 22-1200.

TOBATA: 33.55 N. 130.51 E. (See Plan)
(See "Kanmon-Ko")

DOCUMENTS: When vessel arrives direct from a foreign port, Customs officials will board to search and the following documents are to be submitted.
Ship's Register.
International Tonnage Certificate.
Voyage Memo (Ports of call).
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Compulsory. Harbour Pilots and Inland Sea Pilots are available at the pilot station or quarantine anchorage. Mutsure pilot station. Lat. 33° 59′ 30″ N., Long. 130° 53′ 00″ E.
Inland Sea Pilot Association covers all Inland Sea Ports. Pilotage compulsory for vessels over 10,000 g.r.t.
Pilots obtained from one of three pilot stations, dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours, and 72 hours' advance notice preferred, thereafter any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.
Note: VHF communication available with Inland Sea Pilot Stations.
1. Wadamisaki, at entrance to Kobe (Vessel transiting Kii Straits) Position Lat. 34° 34′ 09″ N., Long. 135° 11′ E. Cable address: "Anjin Kobe".
2. Sekisaki, 3 miles South of Sekisaki Lighthouse (Vessel transiting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Cable address: "Anjin Moji".
In the event of bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki Pilot Station.
3. Hesaki at East side of Kanmon (Shimonoseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.
ANCHORAGES: No. 5 Section, Wakamatsu. Depth: 9 m. – 11 m. Capacity 15,000 g.r.t. × 2. Quarantine Anchorages also used when necessary.
RESTRICTIONS:
(*a*) Vessels exceeding 20,000 tons gross may berth only within 1 hour before and/or after slack tide. Vessels under 20,000 tons gross may berth regardless of current, if it does not exceed 5 knots.
(*b*) Night entry: Vessels under 10,000 gross tons may berth at Nos. 1, 2, 3 and 8 wharves until 2200 hrs. in Summer season and 2100 hrs. in Winter season, subject to Harbour Master's permission and Pilot's agreement.
(*c*) Night departure: Vessels under 20,000 gross tons allowed to sail from Nos. 1, 2, 3, 8 wharves until 2200 hrs., regardless of current, provided they are moored with bow outward.
(*d*) Least depth in channel, 17.0 m.
MAX. SIZE: No. 4 Ore Pier: 160,000 d.w.t. or 250,000 d.w.t. with part load.
HEALTH: Formalities will be carried out at the anchorage. Quarantine station 105° – 2,800 m., (800 m. square) from Mutsure Lighthouse. Radio Pratique available.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.
VHF: Shimonoseki Port Radio Station on Channels 16, 12, 14, 20 and 22. Pilots on Channel 13.
TUGS: Two tugs join vessel at entrance of harbour (in front of harbour signal station). Vessels exceeding 20,000 tons gross require 3 tugs. One of them will join vessel at Mutsure leading into main harbour and 2 join vessel at entrance of port (in front of harbour signal station).

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

BRIDGES: Kanmon Suspension Bridge was built in 1973 across Hayatomo Channel (narrowest place in Kanmon Strait, width of fairway 530 m.) between Shimonoseki and Moji. The height of the bridge from sea level is 61 m. Vessels of 59 m. height must advise Pilot Office.
STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700 – 1900 hrs. (50% additional of basic stevedorage), 2100 – 0500 hrs. next morning (130% additional), Sundays/holidays (60% additional).
MEDICAL: No advance notice required, unless urgent.
TANKERS: *Kita-Kyushu LNG. Co.:* Max. size 125,000 d.w.t. Max. LOA 286 m. Max. draft 12.0 m. 3×16 in. (LNG). Discharge rate 12,000 kl./hr. 1×16 in. (boil off oil) discharge rate 12,000 kl./Hr.
DENSITY: Average density in the port is about 1019 – 1021 in Summer season, 1025 – 1026 in Winter season.
FRESH WATER: Available in connecting lines from shore side at Wharf Nos. 1, 2, 3, 4, 8 and 9. At buoys: from barges, arranged from Wakamatsu. Rate of delivery: 55 – 70 t.p.h., ex-hydrant, 60 t.p.h., barge.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports, bunkers will be lightered from the nearest bunker stock ports, at maximum 7 days prior notice.
FIRE PRECAUTIONS: No tanker berth. Each tugboat equipped with fire extinguishing system for attending emergencies on request.
CONSULS: See "Yawata".
REPAIRS: All types of repairs possible.
DRY DOCK: See "Shimonoseki".
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo aboard.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.
REPATRIATION: Possible.
AIRPORT: Nearest is Fukuoka Airport, about 2 hours by train and taxi. Kitakyushu Airport about 40 minutes by taxi.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police 110 (just dial). Ambulance and Fire 119 (just dial).
TELEPHONES: Possible to place telephone on board.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 15 days when Tobata is first port of call in Japan, extension possible if ship stays longer.
WIND/TIDE: South-easterly winds prevail in the warm seasons and North-westerly winds in the Winter season. The maximum velocity recorded in the past being 18 m./sec. The tidal range is 2.145 m. The current at the channel leading to new port runs Southward at the flood and Northward at the ebb. The maximum speed of the current is about 3 knots. There is no current in the dock.

TOKUSHIMA-KOMATSUSHIMA: 34.00 N. 134.36 E. (See Plan)

DOCUMENTS:
Ship's Register.
International Tonnage Certificate.
Last Port Clearance.
8 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 5 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details cargoes in advance.

PILOTAGE: Not compulsory. 3 authorised licensed Pilots available.

ANCHORAGES: Situated at Western corner of Komatsushima Bay and protected by three breakwaters, North, East and South covering 98,700 sq. m. Depths of water at anchorages as follows:
(a) Inside Breakwater 8 m. – 10 m.,
(b) Outside Breakwater 8 m. – 13 m.,
(c) Wharf 8.50 m.

RESTRICTIONS: Vessels must get permission and instructions where to anchor from Port Captain before arrival. Wharf and Inner Harbour: Entering and sailing usually only during day-time regardless tide and current. Outer Harbour: Entry and sailing anytime.

MAX. SIZE: Anchorage inside breakwater: Length 175 m., breadth no limit, draft 8.50 m.

Anchorage outside breakwater: Length 200., breadth no limit, draft 10.0 m.

Shinko Wharf: (Suitable 10,000 d.w.t.) Length 175 m. Draft 8.5 m.
Kanaiso Wharf. (Suitable 10,000 d.w.t.) Length 170 m. Draft 8.5 m.
Kanaiso Wharf. (Suitable 15,000 d.w.t.) Length 200 m. Draft 10 m.

HEALTH: Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Wharf and Inner Harbour: Join vessel at Sea Anchorage, always using tug's line without charge. Outer Harbour: No tug required in normal conditions. 1 × 3,000 h.p. and 1 × 2,400 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent generally by telegram.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630 – 2130 hrs. 60% additional of basic stevedorage; 2130 – 0500 hrs. next morning special additional; Sundays/holidays 100% additional.

MEDICAL: No advance notice required unless urgent.

DENSITY: 1015.

FRESH WATER: Alongside berth: Can be supplied by shore line with capacity of 25 t.p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock at maximum 7 days' prior notice.

CONSULS: None. Nearest consulates in Osaka.

REPAIRS: Only minor repairs up to 3,000 d.w.t.

DRY DOCKS: No dry dock. Nearest at Hitachi Shipbuilding & Engineering Co. Ltd., Chikko Works, Osaka; Kawasaki Heavy Industries Ltd., Kobe and Mitsubishi Heavy-Industries Reorganised Ltd., Kobe Shipyard & Engine Works.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

AIRPORT: Nearest airport Tokushima (10 miles North) where Japan Air System, have 10 flights to Osaka, and 5 to Tokyo.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police Tel: 110; Ambulance 119; Fire 119.

TELEPHONES: No facilities for placing telephones on board.

SERVICES: None.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 7 days, but 7 days' extension possible if ship stays longer.

AUTHORITY: Komatsujima Port and Harbour Office, 37, Shinko, Komatsujima-cho, Komatsujima City, Tokushima Pref. *Tel:* (08853) 2-3422.

AGENT: Sub-agents of Aall Barwil Agencies.
Morizane Transportation Co. Ltd., 2-13, Sobiraki-cho, Niihama City, Ehime Pref. 792, Japan. Tel: (0897) 32-6119. Telex: 5844-711 Mrzn J. Fax: (0897) 32-3322. Cables: Morizane Niihama.

TOKUYAMA: 34.02 N. 131.48 E. (See Plan)

LOCATION: Port situated in Yamaguchi Prefecture on Western part of mainland, facing Seto Inland Sea. Surrounded by Oshima Peninsula on the East, by Otsu-Shima and Uma-Shima (islands) on the S.W. and by the land on the North forms a large bay with deep water suitable for shelter. Sen-Shima and Kurokami-Shima (islands) lying in harbour, divide it into Tokuyama Section and Tonda Section.

DOCUMENTS: When vessel arrives direct from a foreign port, Customs officials will board to search and the following documents are to be submitted.
Ship's Register.
International Tonnage Certificate.
Voyage Memo (Ports of Call).
3 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit using specific forms. Therefore ship's agents should be provided with necessary information about details of cargoes in advance.

Immigration. Immigration Officials attend from Tokuyama. They board vessel on arrival to examine passports, Discharge Books and/or other equivalent travel documents, and provide 7 day landing passes for crew members and passengers. One copy each of Crew List and Passenger List are required by them. Providing ship's Agent with a Crew List beforehand will be a great help in expediting Immigration business on vessel's arrival. When vessel stays in port more than 7 days, the landing passes will be extended every 7 days on application. In event that crew members, without entry visas, are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men has been booked, or unless vessels to which they are to be transferred, arrive in Japan within 5 days. Also see "Shipmaster's Report".

PILOTAGE:
Inland Sea Pilot (Sekisaki/Tokuyama): Not compulsory. Agent gives 24 hours' notice to Pilot Association Moji, and advise if ETA changed. (Master to cable "Anjin Moji" in case ETA changed and believes that his advice, if relayed by Agent, will not reach in good time; for example, at night before date of arrival at Sekisaki). Location: 3 miles South of Sekisaki Lighthouse (Lat. 34° 00′ N., Long. 131° 54′ E.). Pilot boards on vessel's arrival at pilot station day and night. No alternative area in event of bad weather. No VHF.
Harbour Pilot (Tokuyama Harbour or Tokuyama-wan): Not compulsory. Pilot boards in Tokuyama-wan at Quarantine Anchorage, or other anchorage to pilot to berth. Master who has not taken Pilot at Sekisaki should enter harbour without Pilot (no pilot station at entrance). Master to inquire position for anchoring from Agent prior arrival. Agent will advise Master in consideration of vessel's size, draft or number of other vessels, especially supertankers in port.

ANCHORAGES: Quarantine Anchorage, 34° 01′ N., 131° 46′ E., depth water 36 ft. Deeper water of more than 60 ft. about 2 miles S.W. of Quarantine Anchorage where Quarantine board supertankers. If harbour congested by vessels, especially supertankers, anchor Outer Harbour. In this case Quarantine go to Outer Harbour if advised by Master or Agent. In emergency or unable contact Agent, vessel can talk with Harbour Master by VHF, Channel 16, calling "Tokuyama Hoan". No restriction for entry into and/or departure from the anchorages after nightfall.

RESTRICTIONS: Strictly no entry or departure after sunset.

MAX. SIZE: Largest recorded vessel to enter 275,000 d.w.t.,19.5 m. draft.

Tankers: *Berth*	*Max.* *d.w.t.*	*Max.* *LOA* (m.)	*Max.* *Safe Draft* (m.)
Idemitsu Sea Berth	275,000	340	19.50
Idemitsu Ohura No. 3	50,000	250	12.00
Idemitsu Ohura No. 5	150,000	300	12.00
Idemitsu Ohura No. 7 (L.P.G. Terminal)	56,188	250	13.00
Idemitsu Center	50,000	220	11.10
Nippon Seiro Jetty	40,000	200	10.00

HEALTH: Radio Agent for Free Pratique not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When Free Pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.
Derat Certificate (copy).
Declaration Inward.
Voyage Memo (Ports of Call).

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case of infectious disease, within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Join inside harbour. For supertankers outer harbour if requested. Tugs' lines used. 8 tugs available, up to 4,000 h.p.

BERTHING: Also see "Tankers". No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Wharf	*Length* (m.)	*Depth* (m.)	*Capacity* (g/t)	*Cargo*
Tokuyama Soda Salt Pier	117	12.0	45,000×1	Salt/Cement Clinker

Idemitsu Sea Berth: Located in Tokuyama Bay at the position 33° 59.5′ N., Long. 131° 46.1′ E., consisting of 7 mooring 275,000 d.w.t. tanker can be accommodated at this berth, being m to buoys fore and aft. 4 powerful tug boats and 2 line boats are eng in berthing/unberthing. Depth of water 20 m. Also see "Report"

Nippon Seiro Refinery: The mooring berth consists of 1 oil pi 2 mooring buoys, to which vessel is moored fore and aft, po alongside pier, there are also dolphins fore and aft.

Nippon Zeon Wharf (25 ft.) for LPG only.

Operator's Report: 1983.

Idemitsu Kosan Tokuyama Sea Berth (Discharging terminal):

Multiple buoy mooring system berth with 1 or 2 anchors.

Berth operates 24 hours per day, 7 days a week. Ships moore unmoored at daytime, weather or other circumstances permitting will not be closed due to any holidays.

Location: Lat. 33° 59′ 12″ N., Long. 131° 46′ 00″ E.

Pilotage: Not compulsory.

Approaches: In order to make use of slack water berthing ope should be commenced 2 hours before slack water.

Berth is to be approached on a course of 075° after passing N Iwa Island, anchorage position visible from ship's bridge jus passing Sukumo Island abeam to starboard.

After letting go anchor (port), turn anti-clockwise with tug's assis and let out 3 shackles and approach berthing position and take in anchor chain.

In Winter (from November-March) monsoons prevail, let go sta anchor when heading about 320° and port anchor is out to 5 sha then let out both chains, and move astern into berth.

1st line out should be taken to either No. 1 or No. 2 mooring whichever is the nearest.

Berthing:

(a) Vessel must not proceed to starboard of yellow buoy, be North of transit line No. 2 and 3 buoys area becomes shallo depths 17 m. – 19 m.

(b) If port anchor let out too fast or too much, ship cannot ret manifold position, as anchor position designed for 8 – 9 sha on port anchor when ship made fast.

(c) When Berthing Master comes on board, please advise h number of shackles on each anchor and length from b manifold.

(d) Wire mooring lines are better than hawsers especially in ca No. 1, 2, 3, 4, 5, 7 buoys where wire should be used (each 2 wires) as these wires are used to adjust the manifold po

(e) Mooring arrangement:
Port anchor 8 – 9 shackles
Starboard anchor 2 – 3 shackles
No. 1 – 7 buoys 2 lines to each

FUEL: Major oil companies are represented and all grades of m oil can be delivered, usually by barge. Notice of 7 days required.

CONSULS: None.

REPAIRS: Minor repairs only.

DRY DOCKS: Kasado Dockyard in Kudamatsu-wan, entrance 3 East of Tokuyama-wan entrance. Largest dry dock for 90,000 to and two other dry docks/building docks.

GANGWAY/DECK WATCHMEN: Not specially required u passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out openin closing hatches. If any time lost by ship's crew doing this stevedores charge ship for waiting. Recommend request stevedor this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector registered gross and nett tonnages. Valid Cargo Gear Certi sometimes required by stevedores when cargo gear mainten appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take but no spirits.

AIRPORT: Hiroshima (about 40 minutes by Shinkansen), Ube 40 minutes by Shinkansen and taxi).

TIME: GMT plus 9 hours. No alterations made to clocks during

POLICE/AMBULANCE/FIRE: Police, tel. 110; Ambulance and tel. 119.

TELEPHONES: No facilities for placing on board.

TOKYO: 35.43 N. 139.46 E. **(See Plan)**

DOCUMENTS:
4 copies Inward/Outward Declaration – (Form C.2000 prepared by Agent).
1 copy Berth Application (normally prepared by Agent).
3 Cargo Manifest (Form C.2030 prepared by Agent).
1 List Ship's Stores (Form C.2040).
2 Parcel List.
5 Passenger Manifest (Form C.2070).
5 Crew Manifest (Form C.2060).
1 Statement by Master (Form C.2020).
1 Declaration for Payment Tonnage Dues (prepared by Agent).
1 Maritime Declaration of Health.
1 Application for Shore Passes (prepared by Agent).
1 Baggage Lists (Form 5370).

PILOTAGE: 12 hours advance notice of ETA required. Pilot boats named Musashi, Tsukuba and Atago. No light or sound signals, use ship's radio in case necessity arises. Address: Tokyo Pilot Association, 5-82 Kaigan, Minato-ku, Tokyo 108 (at the Southern tip of the Shibaura Terminal). Tel: 03-3453-1691.

Pilot boards vessel outside harbour. Vessel awaits Pilot around "Quarantine Anchorage".

Vessels requiring a Pilot for the Uraga Channel should radio request to Anjin Yokosuka advising ship's details and arriving time at No. 1 Uraga Channel Light Buoy. It is compulsory for vessels of 10,000 g.r.t. or more passing through the Uraga Channel, the entrance to Tokyo Bay, to have a pilot on board. Uraga Channel Pilot embarks 5 miles S.S.E. of Kannonsaki Lighthouse, and will disembark on arrival at destination port limits. Applications for Uraga Channel Pilot should reach pilot office 24 hours before vessels arrival at No. 1 Uraga Channel Light Buoy.

Vessels of 10,000 gross tons or more should give "Notification of Traffic" to ensure safety of their navigation in or near Uraga Suido and Nakanose traffic routes (normally by Agent).

ADVANCE APPLICATIONS: Passenger ships and large vessels using mooring facilities must submit applications for use of facilities to port managers (the Port and Harbour Bureau of Tokyo Metropolitan Government) through shipping firms or Agents 3 days before entry into port so that they may have berths designated.

When they want to use anchorage facilities, they must submit applications for use of anchorage areas to Tokyo-Yokohama Port Director (the Port and Harbour Section of the Tokyo Maritime Safety Agency) to have anchorage sites designated. Small vessels of less than 500 gross tons do not need to submit anchorage application.

When ships of over 500 gross tons want to enter port at night (from sunset to sunrise), must submit applications in advance to Port Director and receive permission. Copy of written permission given to captain of ship when ship has entered port.

A ship carrying explosives or any other dangerous cargo must submit 2 copies of application in advance for permission to use port to Port Director. Such ships required to stay outside port in No. 3 Area. However, they will be allowed to enter port when Port Director considers it allowable.

ANCHORAGES: See "Advance Applications".

Quarantine Anchorage on starboard hand of No. 1 Fairway.

Sector "A" is a triangular sea area formed by line passing through point 180° and 400 m. from Light Buoy No. 16 and point 105° and 240 m. from same light buoy. Accommodates one 1,000 ton class ship or 2 ships of 500 ton class or smaller.

Sector "C" (263,330 sq.m.) is a space between Harumi Wharf and Toyosu Wharf. Accommodates five 2,000 ton class vessels.

Sector "D" (141,350 sq.m.) sea area enclosed by line drawn from point 217° and 400 m. from Northwestern tip of Tsukishima Fishery Base through No. 8 Mooring Buoy. No. 15 Buoy and Southern tip of Tsukishima Fishery Base. Accommodates 5 vessels smaller than 1,000 tons, but 2 if vessels larger than 700 tons.

RESTRICTIONS: Tokyo West Passage (No. 1 Passage) is long and narrow (4,200 m. × 300 m.) and carries considerable traffic. Vessels under 500 tons not permitted use Fairway when vessel over 5,000 tons in transit. Depth 12 m.

Container vessels to/from Ohi, Aomi and Shinagawa Container Wharves may enter and depart at any time. Entry at night-time is subject to and must conform to the standard for night entry permission as set forth by the Tokyo Maritime Safety Office.

For other vessels, in principle, entry/departure time is restricted from sunset to sunrise. Entering vessels shall start from outside the port not later than 30 minutes before sunset (the time the vessel takes to moor or berth before sunset).

The 3rd Regional Maritime Safety Headquarters requests vessels to take the following safety measures:
(1) Taking pilots on board: Foreign flag vessels and non-experienced Japanese vessels should take pilots.
(2) Restriction on overtaking: Vessels of 10,000 gross tons or more and other particular vessels in the traffic route should not overtake a vessel of 500 gross tons or more.
(3) Restriction on speed: Vessels should not navigate at a high speed within the Bay.
(4) Restriction on entry into traffic route in poor visibility.
(5) Restriction on use of auto-pilot.
(6) Maintenance of communication with the Tokyo Wan Traffic Advisory Service Center: VHF Call: Tokyo Martis, VHF Channel 16 or 156.8 MHz. Working frequency: VHF Channel 14 or 156.7 MHz. and Channel 22 or 161.7 MHz.

MAX. SIZE: Draft: Passenger ships: 9.54 m. for Harumi. General cargo ship: 8.63 m. for Harumi and 9.09 m. for Shinagawa and Aomi, and 11.81 m. for Ohi.

Tankers for Tokyo Gas Wharf (Toyosu), max. deadweight 35,000 tons, bulkers for Toyosu 36,000 tons.

Timber carriers for Timber Wharf (Land-lot No.15), max. size is limited by length overall 170 m. and draft 11.0 m. with high water.

Tide: These drafts are applied for low water. The difference between high and low water level is about 2.0 m.

The tidal height will be considered to decide maximum draft to be accepted, subject to Agreement with Marine Safety Office.

HEALTH: Radio Agent for Free Pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health condition on board. When Free Pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:
Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or suspected case, of infectious disease within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

Medical inspection of plants: When a report is received in advance from a ship by telegraph or other means of communication, Tokyo Office of the Yokohama Plant Disease Prevention Station must be notified by telephone or verbally in request for an on-the-spot inspection of plant in question.

Medical inspection of animals: When a report is received from a ship in advance by telegraph or other means of communication, the Tokyo Branch or the Haneda Branch of Animal Disease Prevention Station must be notified by telephone or verbally in request for an on-the-spot inspection of the animals.

RADIO: Vessels entering into Tokyo Bay are watched at all times at Torigasaki, the entrance gate to Tokyo Bay, and record of passing the point is taken. As each ship passes point, this is immediately communicated by VHF radio telephone to head office of Tokyo Signal Communications Company. From here news communicated on normal telephone or on exclusive direct call telephone to interested parties (Also see "VHF").

Vessels over 200 m. in length or 25,000 gross tons or more carrying liquified gas and 10,000 gross tons or more are requested to send following notifications directly to the Chief of Tokyo Wan Traffic Advisory Service Center.
(1) Notification of traffic routes.
(2) Report of position.
(3) Notification of change.
(4) Maintenance of communications with the Center. Notification should be given to the Chief of the Center by noon of the day before the estimated date of entering a traffic route of Tokyo Bay.

Notification should be made by one of the following methods:
(a) Radio communication: Call sign and call name "JGC Yokohama Hoan", calling frequency 500 kHz., 2,182 kHz, Channel 16 and working frequency 444 kHz., 2,150 kHz., and Channel 12.
(b) Telegram: Notification can be sent by a telegram directly to the Center. The address is "TWTASC".
(c) Telephone: Center accepts calls directly, Tel: 0468-43-8622/4.
(d) Telex: Telex should be sent to the Center in the form of radio communcations. Telex: 3852-463 TWTASC.
(e) Method of Notification of change: Notification of change should be made by VHF radio telephone, calling frequency Channel 16, working frequency Channel 12, and in the case of telephone, Tel: 0468-43-8622/4.

Recommended Master communicates with Agents through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

VHF:
A. Transmitting antenna: Located 39° 26′ N. 139° 39′ E.
B. Type: Single communication – Yagi type.
Plural communication – Corner reflector type.
C. Direction: Southern part of entrance to Tokyo Bay and Port of Tokyo.
D. Frequency class: F3E.
E. Frequency: Simplex communication –
156.55 MHz, Channel 11
156.6 MHz, Channel 12
156.65 MHz, Channel 13
156.7 MHz, Channel 14
156.8 MHz, Channel 16
(for calling, answering and safety)
Duplex communications –
161.5 MHz, Channel 18
161.6 MHz, Channel 20
161.7 MHz, Channel 22
F. Antenna power: 50 W.
G. Call sign: Tokyo Port Radio.
H. Range: Approx. 100 km. (straight range)
S.E. side – About 20 nautical miles South of Nojimazaki.
S.W. side – About 5 nautical miles North of Oshima Island.
North side – Tokyo Port and Chiba Port.
I. Operating time: All hours.

Ship Telephone: Uses VHF and is a service between navigating or anchored ships and subscriber telephones on land, and between ships connected via base station on land. Communicating sphere approximately 50 km. to 100 km. from base station. Base stations located so as to allow communication with any ship sailing along Japanese coasts.

CARGO HANDLING FACILITIES:

Wharf/Terminal	*Equipment*	*Capacity tons*	*Cargo Handled*	*Remarks*
Oh-i Terminal	18 container gantries	30.5-40.6	Containers	Straddle carriers and trans available.
Shinagawa Container Terminal	1 container gantry 2 container gantries	37.5 49.0	Containers	Ro-Ro facilities, Straddle ca available.
Shinagawa (Foreign Trade)	2 unloaders 1 belt conveyor	250 t.p.h. 600 t.p.h.	Machinery, sugar, fruit.	3 transit sheds (18,118 sq.m Open storage 14,451 sq.m.
Shibaura (Foreign Trade)			Paper, cement, fertiliser, feed grain	2 transit sheds (4,665 sq.m Open storage 2,104 sq.m.
Hinode Terminal			Salt, paper, soda ash.	9 transit sheds (19,583 sq.m Open storage 6,806 sq.m.
Tsukishima Terminal			Marine products	
Harumi Terminal	4 portal jib cranes	5	Sugar, wheat, fruit, marine products.	Passenger ship terminal at Berth "HL"
Toyosu Energy Terminal			Gas, steel, coal, general cargo.	
Ariake Terminal			Gravel, sand, lumber, construction materials.	Open storage 92,163 sq.m.
Odaiba Terminal	2 gantry cranes at Berth 2	10	General cargo, steel, timber, fruit.	9 warehouses (64,766 sq.m
Terminal 15			Timber.	Storage capacity 400,000 to Open storage yard 257,004 sq
Aomi Container Terminal	2 gantry cranes	30.5	Containers	2 straddle carriers

TUGS: Tokyo Tug Center, Shibaura Uwaya, 26-101, Kaigan 3-chome, Minato-ku, Tokyo. Tel: (3) 3451-1761. Upon notification, tugs will be waiting in neighbourhood of the scheduled berth.

Tugs available: 4×2,600 h.p., 4×3,000 h.p., 4×3,200 h.p., 1×3,500 h.p. 8 tugs are equipped with fire fighting facilities. Tug's lines used.

BRIDGES: Tokyo Harbour Bridge, connecting Shibaura Wharf and Ariake Terminal, completed in 1993. Maximum clearance to waterline is 52.4 m.

STEVEDORES: Advance advices should be made 24 hours at latest before vessel's arrival order arrange necessary gangs.

Discharge rates (approx.):

(a) Iron, steel and scrap, using crane or magnet, about 1,000 tons/day.

(b) Coal, crane and bucket, 1,500/2,000 tons/day.

(c) Ores, grabs and bulldozers, 1,000 tons/day.

(d) Timber, 1,000 tons/day.

(e) Grain, crane with bucket or suction, 1,000 tons/day.

BERTHING: Any vessel entering port required to:

(1) Submit 1 each of "Declarations Inward/Outward of Vessels" to TMG and TMSA. See "Documents".

(2) Submit "Application for Berth" to TMG. See "Documents".

(3) Submit "Application for Designation of Anchoring Site" to TMSA (Form No. 13) regarding anchoring area.

Berthing will be in order of arrival, passenger and special cargo vessels excepted.

Name of Berth	*Length (m.)*	*Depth (m.)*	*Max. d.w.t.*	*No. of Berths*
Shinagawa (Foreign)	586	10.0	15,000	3
Shinagawa (Domestic)	520	3.0-8.0	6,000	3
Shinagawa Container Terminal	574	10.0	15,000	3
Shibaura	740	7.4	5,000	5
Shibaura	90	5.5		1
Hinode	564	6.7	3,000	6
Takeshiba	465	7.5	5,000	3
Tsukishima	266	7.5	5,000	2
Harumi	1,444	9 – 10.0	20,000	11
Toyosu	800	7 – 10.0	15,000	4
Ariake Terminal	1,500	7.5	5,000	11
Oh-i Marine Products Wharf	450	12.0	30,000	2
Oh-i Foodstuff Terminal	229	12.0	30,000	1
No. 15 Lumber Wharf	720	10.0–12.0	25,000	3
Oh-i Container Terminal	2,300	12.0–13.0	40,000	8
Odaiba Terminal	1,800	10.0	15,000	9
Aomi Container Terminal (Berth C-1)	300	12.0	35,000	1

There are many private and domestic wharves and other smaller public wharves in use and under construction.

TANKERS: No slop discharge facilities (See "Services"). One tanker berth only. Products handled, Naphtha and crude oil. Shorelines, one 12 in. for each product. Discharge rates 1,000 t.p.h. (Naphtha) 900 – 1,000 t.p.h. (Crude).

FRESH WATER: Water supply from hydrant by Tokyo Metropolis, and waterboat by private management.

(a) Water supply on wharves		
Application	Bureau of Port and Harbour Offices in charge of each wharf.	
Work of water supply	Tokyo Port Service Association.	
(b) Water supply by water boat		
Extra charge	Overtime from 0600 to 0800	50%
	from 1700 to 2200	50%
	from 2200 to 0600	100%
	Special district	50%
	Festival day	50%

In the case of less than 20 tons per time, it will be considered 20 tons supply.

(c) Price (basic rate)	Yen 650 per ton ex-wharf.
	Yen 900 per ton ex-water barge.

FUEL: All grades available. 24 hours' notice required.

MEDICAL: Hospitals, clinics and all specified facilities. Advance not necessary.

FIRE PRECAUTIONS: (Tankers).

1. Must enter port at dead slow speed preceded by patrol b TMSA, 1 tug boat each side of vessel and followed by fire patrol
2. Engine to be kept ready for immediate use in case of emerg
3. Tow lines to be placed over bow and stern with eyes close to surface.

Note: No vessels allowed alongside a tanker during load discharging of inflammable liquids.

DEPARTURE PROCEDURE: Ship over 300 tons departing mus signal in daytime and 2 white lamps at night and make 2 prol blasts of whistles or siren 30 minutes before starts to move and act according to signals given by signal station on Shibaura (Departure notice must be submitted to Maritime Safety Agency an managers (operations Section of Port and Harbour Bureau). F ships must submit required documents in addition to above not Tokyo Custom House, Immigration Control Office.

CONSULS: Most countries have embassies and consuls in Toky

REPAIRS: *Ship Repairer:* Ishikawajima-Harima-Juko Co. Ltd. Te 3244-5111. Telex: J22232 (Ichico), has 2 dry docks for vesse 16,750 g.r.t. and 7,000 g.r.t.

DRY DOCKS: Largest dry dock: length 180 m.; width 24 m.; 7.27 m. Capable of accommodating vessel of 16,750 gross tons.

Also 1 other dry dock for ocean-going vessels of 7,000 tons.

SURVEYORS:

Report:

Idemitsu Hokkaido Sea Berth (Discharging Terminal):

Location: Lat. 42° 36′ 10″ N., Long. 141° 38′ 50″ E.

Operator: Idemitsu Kosan Co. Ltd.

Terminal operates 24 hours per day, 7 days a week. Ships moored and unmoored daytime weather or other circumstances permitting. Terminal will not be closed on any holidays.

Approaches: Clear and unimpeded from South. White and red striped high chimney (approx. position: Lat. 42° 38.1′ N., Long. 141° 35.6′ E.) makes a most conspicuous landfall. In poor visibility, in heavy fog or rain, radar reflector fitted at centre of Sea Berth can be located first by ship's radar and after that Sea Berth will be seen in direction from N.W. to S.E.

Westward of Sea Berth, there are many cargo vessels anchored.

Ships berthing starboard side alongside at the Sea Berth, proceed on course 314°, observing transit of chimney and East Breakwater Lighthouse.

Anchorage: No strict boundary areas for anchorage but Master recommended to anchor 1 mile to 2 miles S.E. from Sea Berth.

Holding ground is good and depth about 27 m. – 30 m.

Pilotage: Sea Berth requires Pilot for berthing, no strict location of anchorage for ships awaiting Pilot in Tomakomai area, but should be as close as possible to port in accordance with harbour draft and communications.

2 Pilots will board ships over 30,000 g.r.t. Pilot uses tug boat for boarding.

Important Features: Ships arriving in Winter season (November-March) should pay special attention to the cold, as average temperature in that season ranges from −3°C to 5°C.

MEDICAL: Hospitals, doctors, oculist, ear, nose and throat clinic and dentists available.

DENSITY: 1025.

FUEL: Domestic oil is available. Bonded oil will be brought from Idemitsu Refinery at Tomakomai, otherwise to be brought from Muroran or Hakodate port with sufficient advance notice, when required.

FRESH WATER: Clean drinking water available at public berths.

REPAIRS: Minor repairs possible.

AIRPORT: Sapporo International Airport is situated 25 km. from the port. International direct flights are available to Hong Kong, Seoul, Honolulu and Guam. Domestic flights, every 30 minutes to Tokyo and other places are available every day.

SHIP SUPPLY SERVICE: Ship chandler, stores supplier, laundry services, diver's inspector, cargo and hull surveyor are arrangeable.

GENERAL: *Signal Control:* Harbour Master controls ship's traffic by flashing white and red lights.

DEVELOPMENTS: The following wharves are projected for 1 2000.

Wharf Name	*Depth (m.)*	*Length (m.)*	*No.*	*Cargo*
Foreign Container Berth	14.0	330	1	Containers
Domestic Container Berth	9.0	320	2	Containers

TONDA: 34.02 N. 131.44 E. (See

DOCUMENTS: When vessel arrives direct from a foreign port, Cu Officials will board to search, and the following documents are submitted:

Ship's Register and International Tonnage Certificate.
Voyage Memo (Ports of Call).
3 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, ca wrist-watch, radio, firearms/swords, etc. (only at first port of Japan).

Ship's Agents will prepare Inward/Outward Declaration, Manifest and Cargo Manifest in Transit, using specific forms. Ther ship's Agents should be provided with necessary information details of cargoes in advance.

PILOTAGE: Harbour pilotage inward and outward not compulso recommend vessel takes pilot at pilot station (Lat. 33° 5 Long. 131° 56′ E.). Inland Sea Pilot carries out harbour pilotage.

Inland sea pilotage should preferably be arranged through Age cable via Nagasaki Radio, giving 72 hours notice. Urgent correct ETA outside business hours should be cabled direct to pilot st Inland Sea Pilot Association covers all inland sea ports. Pil compulsory for vessels over 10,000 g.r.t. Pilots obtained from o three pilot stations, depending upon vessel's last port of departure at Master's discretion. Pilotage available throughout 24 hours. 72 hours advance notice preferred, thereafter advising any altera Most Inland Sea Pilots also act as harbour pilots up to berth or anchor at destination.

Note: VHF communication available with Inland Sea Pilot Stations

1. Wadamisaki, at entrance to Kobe (vessel transiting Kii St Position Lat. 34° 34′ 09″ N., Long. 135° 11′ E. Cable address " Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessel tran Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. address "Anjin Moji".

In event of bad weather, recommended vessel proceed for sh as near as possible, having due regard to safety, to Sekisaki Station.

3. Hesaki at East side of Kanmon (Shimonoseki) Straits. Po Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGE: Berthing Pilot Station at Tokuyama Quara Anchorage (Lat. 33° 13′ N., Long. 131° 40′ E.).

RESTRICTIONS: Vessels enter port and depart during daytime Depth of water in the passage 9.00 m.

MAX. SIZE: See "Berthing".

HEALTH: At first port call in Japan, vessel must obtain Free Pra Quarantine Officers will attend vessel from 0830 hrs. to 1630 hr anchorage of Tokuyama. Due to no quarantine office at Tonda, M to show all Vaccination Cards and Derat Exemption Certificates. In vessel arrives from cholera infected area within 10 days, Master advise crew and passengers' health condition to respective Quara Office through ship's Agent prior to arrival, and close all soil pipes entering port. Radio Pratique available.

RADIO: Recommended that Master communicates with Agent thr Choshi Radio or Nagasaki Radio, which cover all ports in Ja Westbound vessels to contact Choshi Radio, and Northbound ve to contact Nagasaki Radio respectively.

VHF: No VHF service.

TUGS: 4 tugs are stationed at Tokuyama. 2×3,200 h.p., 1×2,60 and 1×2,300 h.p.

BERTHING:

Name of Berth	Length (m.)	Depth (m.)	Permissible Draft (m.)	Permissible LOA (m.)	Capacity (d.w.t.)
Toyo Soda Cement Wharf No. 1	120	9.0	8.50	160	10,000
Toyo Soda G.C.Wharf No. 1	170	9.0		170	15,000
Toyo Soda G.C.Wharf No. 2	65	7.5		100	5,000
Toyo Soda Salt Wharf	190	10.5	9.0	180	

Max. draft at Salt Wharf: Subject to tide allowance but require under-keel clearance of about 1.0 m. and/or 10% of ship's draft, whichever greater.

Also see "Shipmaster's Report".

Loading Facility: One shore gantry crane (lifting capacity 15 tons). Outreach: 22 m. from front leg of the crane. Height: 17 m. from the quay. Span: 28 m. forward and aft. Airdraft: 20.10 m. at MLW.

Loading Rate: Approximately 1,500 – 2,000 tons through night by 2 gangs (gantry and ship's gear).

BRIDGES: None.

STEVEDORES: At least 24 hours prior notice, excluding Sundays and holidays, required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost.

TANKERS: No tanker berths.

MEDICAL: No advance notice required, unless urgent.

DENSITY: Average 1025.

FRESH WATER: Good fresh water supplied from hydrants. Delivery rate 50 t.p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports, bunkers will be lightered from the nearest bunker stock ports, at maximum 7 days prior notice.

CONSULS: No consuls. Marine Note of Protest possible at local Notary Public.

REPAIRS: Only minor repairs possible. Others from Moji, Tokuyama or Kobe.

DRY DOCKS: Shin Kasado Dockyard in Kudamatsu-Wan, entrance 3 miles East of Tokuyama-Wan entrance. Largest dry dock for 30,000 d.w.t. and two other dry docks/building docks.

GANGWAY/DECK WATCHMEN: Not specially required, unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work, unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores, when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore, but no spirits.

CARGO GEAR: See "Certificates", but no special requirements.

REPATRIATION: Possible.

AIRPORT: Hiroshima Airport, about 40 minutes by Shinkansen. Ube about 40 minutes by Shinkansen and taxi.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.

EMERGENCY CO-ORDINATION CENTRE: M.S.A. Tokuyama Office in Tokuyama City. Tel: 0834-31-0110.

TELEPHONE: Not possible to place telephones on board.

SHORE LEAVE: Local Immigration Offices issue shore passes valid for only 15 days, when Hikari is first port of call in Japan. Extension possible if ship stays longer.

SERVICES: All services available from Moji and Tokuyama.

SHIPMASTER'S REPORT: June 1983.

Toyo Soda Salt Pier:

Documents/Immigration: Landing passes are now valid for 1 week, but restricted to the immediate port area (Tokuyama) only. This restriction is enforced, and the Agent must make individually written application for any crew member required or desiring to leave the Tokuyama area. There are severe penalties (Yen 100,000 for being found ashore by the Authorities without a landing pass).

Pilotage: The Inland Sea Pilot who boarded at Sekisaki also acted as harbour pilot, boarding from a fast launch with the vessel making about 4 knots. Oita Port Radio, in the first Western bay of the inland sea, after passing through the Hayasui Seto Entrance, called on VHF Channel 16 to confirm the vessel's nationality and ETA.

For a vessel of our size (see "Berthing"), pilotage is at daylight H.W. only, using 3 tugs, and the Eastern dredged channel into Tonda port. Departure is during daylight hours only (pilot available apparently 0630 hrs. – 1830 hrs. during June, although ours was not ordered by the Charterer's Agents until 0800 hrs.). Vessel was swung off the berth by 2 tugs and proceeded to sea, again by the Eastern Channel, there being a substantial 'corner' to negotiate in the dredged channel on the Tokuyama Section of the port.

Health: We could not get Radio Pratique as the Authorities required the number of the vessel's Sanitary Certificate. However, after berthing, we were unable to ascertain just what this certificate was. The number of our Derat Exemption and type and make of the sewage system did not satisfy this question either.

Berthing: We were probably one of the larger vessels to berth at the Toyo Soda Salt Pier, discharging 31,536 metric tons of coal on dimensions – length 177 m., beam 27.8 m., draft 10.5 m. and of 20,096 gross tons.

With large engines-aft bulk carriers, there are problems with landing the gangway on the end of the jetty. A shore gangway cannot be used because of the travel of the portainer-type discharging crane. Stevedores use a vertical steel ladder clipped over the sheer strake for access.

Access ashore through the Toyo Soda Cement Factory is prohibited to ship's crew, and a launch service (Sampan) must be engaged, with the requisite timetable, for transport to Tokuyama, 15 minutes distant, the launch berthing at Customs Pier.

This launch is also used for the Agent, watchmen, etc., and it may well be preferable to lower the off-side gangway to near the water as a means of access. The only permitted access, to and from the launch via the vessel's gangway onto the wharf, is by a badly bent vertical steel ladder at the end of the jetty.

Fresh Water: Not available from Toyo Soda Salt Pier. Delivery can only be made by lighter.

Storing: Mobile cranes are not allowed onto the wharf to work ship's stores. E/R spares, etc., and if these cannot be coped with by the vessel's own gear or stores crane, floating plant would have to be hired.

AUTHORITY: Shunan Port Administration Office, 111, Chikko-cho, Tokuyama City, Yamaguchi Pref., Japan. *Tel:* 0834-21-1787.

AGENT: Sub-agents of Aall Barwil Agencies.

Green Shipping Ltd., Moji, c/o Toyo Koun Co.Ltd., 23-15 Nomura 1-chome, Shin Nanyo City, Yamaguchi Pref., 743 Japan. Tel: 0834-63-0080. Telex: 6766-14 Tykoun J. Fax: 0834-63-0079. Cables: Toko Shinnanyo.

TOYAMA: 36.46 N. 137.13 E. (See Plan)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
6 Crew Lists, including Passport Numbers.
6 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory. No telegraphic address for pilot station, but Pilot arranged through Agent whom keep advised ETA which may be sent through Choshi Radio. Pilot boards about 1 mile off East Breakwater from small tug. In event bad weather recommend remain outside port until weather clears. Pilot available daytime only from sunrise to sunset.

ANCHORAGES: The harbour at the Jintsu river mouth is always calm. Covers about 125 acres, with depths of from 16.5 ft. to 33 ft. over mud and sand. Room at anchorage for at least 4 vessels over 5,000 gross tons. Anchoring position for ocean tankers is Lat. 36° 46.6′ N., Long. 137° 14.4′ E.

MAX. SIZE: Max. LOA 175 m., but may be extended by 2.0 m. – 3.0 m. if Pilot agrees.

Also see "Tankers".

HEALTH: Radio Pratique available. Formalities carried out at Quarantine Anchorage.

RADIO: (Also see "Pilotage"): Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Usually join vessel at port entrance but can join outside harbour for large vessels. Used only when Pilot aboard.

"Narita Maru" – 3,000 h.p. uses own lines free of charge.
"Nihonkai Maru" – 1,800 h.p. uses own lines free of charge.
"Raicho" – 2,600 h.p. uses own lines free of charge.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

TOYAMA SHINKO: 36.47 N. 137.10 E. (See Plan)

DOCUMENTS:
Ship's Register.
Last Port Clearance.
6 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 2 Cargo Manifests and 1 Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Pilot available any time during daylight. Not compulsory. No telegraphic address of pilot station, therefore, direct advice to local Agent always required. Pilot meets vessels 209° 2 miles off leading light of Fushiki Port, thence takes vessel to Fushiki Quarantine Anchorage ground, due to many fishing-nets on both sides of fairway. No Quarantine Anchorage ground established presently at Toyama-Shinko, therefore, every vessel obtains free pratique at Fushiki. If requiring to come into Quarantine Anchorage without taking Pilot, necessary to advise Agent in advance. In case of bad weather and need to await outside port, recommend cruising in Toyama Bay until sea abates. Bay area too deep to anchor and also danger of fishing-nets. When approaching position for Pilot, give exact ETA to Agent by using Niigata Radio and/or VHF to Fushiki Harbour Master. Small wooden pilot-boat painted yellow. No particular light or sound signals required. Even if the vessel already obtained Free Pratique in other port, need to approach the aforesaid position for Pilot, because of no Pilot position located in Toyama-Shinko.
ANCHORAGES: No anchorage at Toyama-Shinko, therefore, if vessel required to await for berth or some other reason, use Fushiki Outer Anchorage ground where safe at all seasons with depth from 8 m. to 11 m. Sand and clay bottom. Room at anchorage for at least 6 vessels over 5,000 gross tons.
RESTRICTIONS: Pilot not available during darkness. No restrictions on tide, because small tide in all seasons. If draft over port limitation, vessel enters port after making adjustment by lightening in Outer Harbour in Fushiki.
MAX. SIZE: Length 200 m., draft 34 ft. Tidal range is max. 0.45 m.
HEALTH: Formalities will be carried out at Fushiki quarantine anchorage.
RADIO: (Also see "Pilotage"). Recommend Master communica Agent through Choshi Radio or Nagasaki Radio which cover al Japan. If specifically Westbound vessel, to contact Chos Northbound to contact Nagasaki Radio respectively.
TUGS: Tugs normally join vessel at port entrance, but somet Fushiki Outer Harbour for larger vessels. Maritia-Maru (2,060 h Nihonkai-Maru (1,800 h.p.) provide lines, free of charge and R Maru (760 h.p.) uses ship's line. In case public tug, i.e. Nihonka and Raicho-Maru used, always require Pilot on board.
BERTHING: No specific requirements. Pilot boarding time will be n by ship's Agent mainly by radio.

AUTHORITY: Toyama Prefecture, 1-7 Shinsogawa, Toyama Toyama Pref., Japan. *Tel:* (0764) 31-4111.

AGENT: Sub-agents of Aall Barwil Agencies.
Fushiki Kairiku Unso Co. Ltd., 4-2, Nagonoe, Shinminato City, To Pref. 934, Japan. Tel: (0766) 82-1118. Telex: 5155-571 Kai Fax: (0766) 84-3335. Cables: Kairiku Fushiki.

TOYOHASHI: 34.43 N. 137.20 E. (See Pl

LOCATION: The Port of Toyohashi is located in Mikawa Wan Nagoya. It was opened in May 1972 as the 102nd international tra port in Japan.

Since then, the port has been rapidly growing in exporting, as w been steadily improved in its facilities and access roads.

The Port of Toyohashi can be largely classified into three areas is Jinno Public Area, another Osaki Industrial Area, the other T Industrial Area.

PILOTAGE: Compulsory for vessels exceeding 10,000 g.r.t. in Ise Wan, including Mikawa Wan. Pilot boards near Ise Buoy No. 1 (Lat. 34° 40.8′ N., Long. 137° 03.8′ E.).

Harbour pilots are also available at the anchorage.

(1) Application for Irago-Mikawa Wan Pilot: Please inform undermentioned items through your Agents.

(A) Time for application:
Inward vessels – 24 hours and 6 hours prior to ETA.
Outward vessels – 12 hours and 6 hours prior to ETD.

(B) Item:
(a) Name of vessel.
(b) Gross tonnage.
(c) Deepest draft.
(d) Length overall.
(e) ETA or ETD.
(f) Last port of call and destination.
(g) Berthing schedule.
(h) Kind of cargo (dangerous cargo).
(i) Others (quarantine, any malfunction of engine, radar, compass, VHF, etc.).

(2) Office hours of Irago-Mikawa Wan Pilots: Service provided 24 hours a day (including Sundays, holidays and night-time).

(3) Channel, Bay and Harbour through Pilotage: Irago Suido-Mikawa Wan-Toyohashi.

(4) Communications:

(a) Telex: 4563668 Iragop (directly or via Choshi Radio, or via Nagasaki Radio).
(i) The message is sent by Master directly to the Pilot Office.
(ii) The message is passed from the Radio Station to the Pilot Office in a few minutes.

(b) Cable address: Iragopilot Handa.
The message is passed from the Radio Station to the Pilot Office in about 30 minutes.

(c) VHF: Irago Pilot (Channels 16 and 13).
Masters of vessels who are required to take pilot are requested to contact "Iragopilot" by VHF, 4 hours and also 1.5 hours prior to arrival at Pilot Station.

(d) On Sundays, holidays and during the night-time:
Masters are requested to advise the Pilot Office directly of ETA or any amendment thereof by Telex or Cable, to avoid any delay in case of absence of the person-in-charge at the Agent's Office.

(5) Irago-Mikawa Wan Pilots are generally stationed at Handa (Kinuura) Office. It takes about 3 hours to board vessels, and therefore, if ETA or ETD is amended, please advise the Pilot Office of it as soon as possible by all means.

ANCHORAGE: See "Health".

RESTRICTIONS: Vessels may enter in daylight only. Unberthing is possible after sunset for pure car carriers, subject to pilot's approval.

Draft limitation in channel is 9.8 m. at H.W.

MAX. SIZE:

* Grain unloader available.

Remark: Entry or sailing may be restricted during strong seasonal winds in Winter.

FRESH WATER: Available.

REPAIRS: Minor repair services available from Yokkaichi or Nagoya.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.

Masters are able to call "Nagoya Hoan" by VHF Channel 16 if an emergency matter has occurred.

Note: "Nagoya Hoan" means Nagoya Maritime Safety Agency.

FUEL: Bonded fuel available from Yokkaichi or Nagoya.

GENERAL: Provisions can be obtained.

AUTHORITY: Toyohashi Port Authority, 3-9 Jinno Futo-Cho, Toyohashi, Aichi Pref., Japan. *Tel:* (0532) 31-4155. *FAX:* (0532) 31-4400.

AGENT: Sub-agents of Aall Barwil Agencies, Tokyo.

Sogo Port Service Co.Ltd., 5-1, Akemi-cho, Toyohashi City, Aichi Pref., 441 Japan. Tel: (0532) 23-0281. Telex: 4322-107 Sogopt J. Fax: (0532) 23-3124. Cables: Sogoport Toyohashi.

TSU: 34.40 N. 136.33 E. (See Plan)

DOCUMENTS: (1) When a vessel calls directly from abroad, it must firstly call at Yokkaichi Quarantine Anchorage for Pratique (Quarantine Anchorage: 34° 56.15′ N., 136° 40.40′ E.).

Quarantine Officers board to issue Pratique, and/or Agent boards to undertake Quarantine Pratique and Customs arrival/sailing formalities. Thereafter, the vessel is able to proceed to Tsu with Yokkaichi Customs Clearance.

(2) When a vessel calls from a Japanese port, it can proceed to Tsu direct.

Documents for Yokkaichi Quarantine: (See (1) above).
Health Declaration – 1 copy (Japanese form).
Vaccination List – 1 copy.
Crew List – 1 copy.
Ports of Call List – 1 copy.
Ship's Register – 1 original.

Documents for Yokkaichi Customs: (See (1) above).
Inward/Outward Declaration – 1 copy/2 copies (Agent prepares).
Last Port Clearance – 1 original.
Ports of Call List – 1 copy.
Cargo Manifest – 1 each for discharge and through cargo.
Crew List – 1 copy.
Crew's Baggage List – 1 copy.
Pratique Certificate – 1 original.
Application for Exemption Tonnage Dues Payment – 3 copies (Agent prepares).
Ship's Register – 1 original.
Yokkaichi Customs issue Yokkaichi Sailing Clearance.

For above formalities, Agent must attend vessel on arrival/sailing by a taxi boat.

Documents for Tsu Customs formalities: (Stationed at Tsu).

Formalities for documents are same as Yokkaichi Customs, and payment of tonnage dues is required.

Documents for Immigration formalities: (Stationed in Yokkaichi, not at Tsu).

(1) Yokkaichi Immigration Officers attend onboard at Tsu to issue shore passes, and following documents are required:
Inward/Outward Declaration – (Agent prepares).
Crew List – 2 copies.
Ports of Call List – 1 copy.
Application for Crew Landing Permit – (Agent prepares).
Passports or Seamen's Books for all crew members.

(2) Agent must attend Yokkaichi Immigration for arrival formalities, and documents required are as follows:
Inward/Outward Declaration – (Agent prepares).
Crew List – 2 copies.
Ports of Call List – 1 copy.
Shore Pass Envelope – 1 envelope.
Extension of Movement Area – 2 copies (Agent prepares).

PILOTAGE: Compulsory. Berthing Pilot available from Yokkaichi or Nagoya (see "Nagoya").

ANCHORAGE: No designated anchorage. Vessels usually anchor 1.5 miles S.W. of Igurazu Lighthouse, in depth of 20.0 m. with sand/mud bottom.

HEALTH: No quarantine station at Tsu. If Tsu first port in Japan, vessel has to call at Yokkaichi, then proceed to Tsu after Free Pratique granted (See "Documents").

Yokkaichi Quarantine Anchorage: Lat. 34° 56.16′ N., Long. 136° 40.40′ E.

RADIO: No local radio station.

VHF: Nagoya Port Radio (24 hours), Channels 16, 12 and 20. Range 110 km. of Kamishima Island.

TUGS: Available from Yokkaichi and Nagoya, at special charge. Line handling available from Yokkaichi.

BERTHING: Two public berths for handling cargo, mainly gravel.
1. Length 90 m. Depth 5.5 m.
2. Length 60 m. Depth 4.5 m.

STEVEDORES: Available from Yokkaichi, distance 45 km. (1.5 hours by car).

FRESH WATER: Available at shipyards. Also available by barge from Yokkaichi, at special charge.

FUEL: Only available to new building at shipyards.

CONSULS: None locally, see "Nagoya".

SURVEYORS: Available from Nagoya.

REPATRIATION: Possible. Formalities completed at Yokkaichi during office hours.

AIRPORT: Nearest airport at Nagoya, 2.5 hours by train and car.

TIME: GMT plus 9 hours.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance and Fire 119.

REPAIRS/DRY DOCKS: *Tsu Dockyard – NKK Tsu Works:*
Docks:

Dock Master: Joins vessel in front of NKK Drydock Gate.
Time of Docking/Undocking: All times arranged with Dock Master.
Tug Assistance and Line Handling: Arranged by NKK, Tsu Works.
Accommodation: NKK, Tsu Works, has available:

A. Chitose Club for Superintendents, Surveyors, Masters and Chief Engineers, at their expense. 25 minutes by car to NKK.
B. Kumozu Club for other officers and engineers, at their expense. 10 minutes by car to NKK.
C. Family House Total of 6 houses are available for Superintendents, Surveyors, Masters and Chief Engineers, who wish to stay with families. These are located near Chitose Club.

EMERGENCY CO-ORDINATION CENTRE: In case of emergency (fire, pirates, robbery, etc.), contact the 4th Regional Maritime Safety Headquarters by the following means:

1. VHF Channel 16: "Nagoya Hoan".
2. Cable: Code J.N.T.
3. Telex No.: 4934961 JMSANA.
4. Distress Call: 2182 kHz.
5. Telephone: 052-661-1611 (0900 hrs. – 1700 hrs. Monday/Friday, 0900 hrs. – 1200 hrs. Saturday).
   052-661-1616 (outside office hours).

GENERAL: *Immigration:* Located at Yokkaichi. Tel: 0593-52-5695.
Customs: Tsu: Tel. 0592-34-4161. Yokkaichi: Tel. 0593-52-3829.
Railway Station: Hisai Station of Kintetsu Railway is 20 minutes by taxi from port.
Floating Cranes: 120 ton crane available from Nagoya and 150 ton crane available from Yokkaichi.
Services: Most services available from Nagoya and Yokkaichi.
AUTHORITY: Tsu Port Administration. *Tel:* 0598-51-3482.

AGENT: Aall Barwil Agencies, Nagoya Branch, Kaiun Building 4th Floor, 2-46, Irifune 2-chome, Minato-ku, Nagoya City, Aichi Pref. 455, Japan. Tel: (052) 652-2266. Telex: 446-3751 Aallng J. Fax: (052) 652-2269. Cables: Aallbarwil Nagoya.

TSUKUMI: 33.05 N. 131.54 E. (See Plan)

DOCUMENTS: When vessel arrives direct from a foreign port, Customs officials will board to search and the following documents are to be submitted.

Ship's Register.
International Tonnage Certificate.
Voyage Memo (Ports of Call).
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory, but recommended unless Master well acquainted with locality. Pilot embarks vessel at anchorage, position Lat. 33° 05′ 30″ N., Long. 131° 54′ 00″ E. Request for Pilot made through Agent; Master to report ETA 24 hours prior arrival.

ANCHORAGES: Good holding anchorage available; depth of water about 25 m. Loading and/or unloading of cargo usually effected alongside wharves and in event of loading/unloading at anchorage, when rough weather prevails, difficulty sometimes experienced on account of swell from open sea. Therefore suggested that vessel anchor as close to shore as possible consistent with safety.

RESTRICTIONS: Berthing and unberthing at Onoda Cement Ber B and D:
Over 40,000 d.w.t. daytime only.
Over 15,000 d.w.t. until 2200 hrs.
Under 15,000 d.w.t. all day.
Other berths: Berthing and unberthing at any time, weather perm and subject to Pilot's agreement.
MAX. SIZE: See "Berthing".
HEALTH: At first port of call in Japan, vessel must obtain Free Pra No Quarantine office located here so vessels usually anchor in the of Saganoseki, Saiki, Oita or Mutsure Quarantine Anchora Kitakyushu for authorities to board and grant Free Pratique.
RADIO: Recommended Master communicates with Agents thro Choshi Radio or Nagasaki Radio which cover all ports in Ja If specifically Westbound vessel, to contact Choshi, and Northbou contact Nagasaki Radio respectively.
TUGS: 1 × 1,800 h.p. and 2 × 3,000 h.p. Tugs usually used for bert and unberthing.
BERTHING: No specific requirements. Pilot boarding time will be no by ship's Agents mainly by radio.

UBE: 33.56 N. 131.15 E. (See Plan)

(A) UBE PORT
(B) SEIBU SEKIYU SEA BERTH

(A) UBE PORT

DOCUMENTS: When vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:
Ship's Register.
International Tonnage Certificate.
Voyage Memo (Ports of Call).
3 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Harbour pilotage not compulsory but recommended unless Master well acquainted with area. No Harbour Pilot stationed at Ube but Inland Sea Pilot will attend.

Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to Pilot station. Inland Sea Pilot Association covers all inland sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three Pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea Pilot Stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Cable address "Anjin Kobe".
2. Sekisaki, 3 miles South of Sekisaki Lighthouse. (Vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Cable address "Anjin Moji". In the event of bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki Pilot Station.
3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGE: Off Ube (Lat. 33° 51.2′ N., Long. 131° 23.5′ E.). Sea bottom is mud.

Depth	4 m. – 7.5 m.	7.5 m. – 10 m.
Sheltered	73,000 sq.m.	233,100 sq.m.
Unsheltered	12,175,500 sq.m.	680,000 sq.m.

RESTRICTIONS: Fairway: Dredged to 11.0 m. depth. Length 2.25 miles.
(a) Outer harbour: No restriction.
(b) Inner harbour: Berthing/unberthing is practicable only during daytime.
(c) Deep draft vessels may berth at high water only.

MAX. SIZE: See "Berthing" and "Tankers".

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera infected area within 10 days, Master must advise crew and passengers health condition to respective Quarantine Office through ship's Agents prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agents through Choshi Radio or Nagasaki Radio, which cover all ports in Japan. Westbound vessels to contact Choshi Radio, and Northbound vessels to contact Nagasaki Radio respectively.

VHF: No facilities.

TUGS: 4 tugs (2,400 h.p. – 3,200 h.p.) stationed at Ube. Other tugs available from Moji or Tokuyama. Tug's lines used at no extra charge.

RADAR: No port radar service.

BERTHING:

Name of Berth	*Length* (m.)	*Depth* (m.)	*Max. Draft* (m.)	*Remarks*
Public Okinoyama Wharf	370	10.0	10.0	
Public Shinkawa Wharf	185	10.0	10.0

Ube Kosan No. 6 Pier	260	13.0	13.0	Discharge coal in bulk. 2 unloaders ×1,000 t.p.h.
Central Glass Wharf	260	7.5	7.5	
Public Shinmachi Wharf	260	7.5	7.5	

CRANES: Mobile cranes up to 45 tons capacity available.
STEVEDORES: At least 24 hours' prior notice, excluding Sundays and holidays, required in order for Agent to arrange stevedores. Vessel must constantly keep her Agents advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agents, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 hrs. – 1900 hrs. (50% additional of basic stevedorage), 2100 hrs. – 0500 hrs. next morning (130% additional), Sundays/holidays (60% additional).
MEDICAL: No advance notice required, unless urgent.
DENSITY: 1025.
TANKERS: See Part "B".
FRESH WATER: Good fresh water supplied either from water barge or from hydrants. From hydrants at wharves delivery rate about 30 t.p.h. Cost Yen 670/ton.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.
CONSULS: None. Marine Note of Protest possible at local Notary Public.
REPAIRS: All types of repairs possible.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Not specially required, unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work, unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore, but no spirits.
CARGO GEAR: See "Certificates", but no special requirements.
REPATRIATION: Possible.
AIRPORT: Ube Domestic Airport about 20 minutes by taxi. Only 5 flights daily to Tokyo.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
HOLIDAYS: Public Wharves: Sundays and national holidays, no work.
Ube Kosan No. 5 and 6: No holidays.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.
Public telephone booth available near the berth.
TELEPHONES: Not possible to place telephone on board.
SHORE LEAVE: Local Immigration Offices issue shore passes valid for only 15 days, when Ube is first port of call in Japan. Extension possible if ship stays longer.
SERVICES: All services available.
AUTHORITY: Ube Port Administration Office, 5-7, Minato-machi 1-chome, Ube City, Yamaguchi Pref., Japan. *Tel:* (0836) 31-3311.

AGENT: Sub-agents of Aall Barwil Agencies K.K.
Green Shipping Ltd., Moji, 9-7, Minato-machi, Moji-Ku, Kitakyushu City, Fukuoka Pref., 801 Japan. Tel: (093) 321-4261. Telex: 7153-11 Greenm J. Fax: (093) 321-4288. Cables: Greenship Moji.

(B) SEIBU SEKIYU SEA BERTH

LOCATION: Lat. 33° 49′ 48″ N., Long. 131° 12′ 58.8″ E.
OPERATOR: Seibu Sekiyu Co. Ltd., Yamaguchi Refinery, 5 Nishioki, Onoda City, Yamaguchi Prefecture. Tel: 0836-88-1111.
PORT LIMITS: Seibu Sekiyu's SBM is located to the South of the recommended route, at the central part of the Suo-Nada, and is connected with Seibu Oil Refinery by 11,400 m. of submarine pipes.
DOCUMENTS:
Ship's Register.
Last Port Clearance.
5 copies Crew List.
3 copies Passenger List.
1 copy Stores List.
3 copies List of Ports of Call (last 3 months).
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, Cargo Manifest for both discharge cargo and through cargo, using specific forms. Therefore, ship's Agent should be provided with necessary information about details of cargo in advance.
PILOTAGE: Not compulsory, but M.S.A. recommend that Master takes a pilot, unless Master well acquainted with area. Inland Sea Pilot and Harbour Pilot can be arranged through Agent by telex. Inland Sea Pilot boards at Lat. 33° 13′ N., Long. 131° 58′ E., about 4 miles S.E. of Sekisaki Lighthouse. In final stage (ETA Sekisaki Pilot Station), vessel must radio Pilot Office at Moji, Telex: 715303 (Tel: 093-332-7191). VHF communication available with pilot station. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Harbour Pilot boards at anchorage.
ANCHORAGE: All vessels are requested to anchor about 1.0 miles – 1.5 miles off and 110° from SBM, and wait there until commencement of shifting for mooring. The anchorage of Seibu Sekiyu's SBM is in "The Open Port" area. Under Customs Law, the centre of isolated "Open Port", the circular range of which is radius of only 500 m. around SBM. Out of this "Open Port" is "The Closed Port", where vessel must comply with special Customs Law. While vessel is anchored, Ube Customs allows no traffic between shore and vessel before Customs formalities have been processed by Agent. Also the anchored vessel is not permitted to take on spare parts, food, bunkers, etc., until the vessel has entered "The Open Port".
MAX. SIZE: 259,999 tonnes s.d.w.t.

RESTRICTIONS: Traffic control and pre-notice are not required
Berthing is practicable only during daytime and with Easterly and unberthing is practicable during daytime.

Simultaneous ballasting and discharging of cargoes is perm However, a ballast pump with double segregation from cargo is req Dirty ballasting into cargo tanks is in principle daytime only. Disch of dirty ballast to shore tanks is not available.
HEALTH: At first port of call in Japan, vessel must obtain Free Pra Quarantine Officer will board vessel only during daytime, and vessel's Master is required to show Derat Exemption Certificate, S Register, Maritime Declaration of Health and Crew List.

Radio Pratique is available. In order to obtain Radio Pra qualification, vessel's Master must have a Japanese Sanitary Insp Certificate as well as Derat Exemption Certificate. In cases whe vessel arrives from cholera infected area within 10 days, Master m advise respective Quarantine Office of the crew and passengers h conditions through ship's Agent prior to arrival, and close all soil p before entering port.
RADIO: Telex communication is available. In the case of teleg Master communicates with Agent through Nagasaki Radio or Ch Radio, which cover all ports in Japan. It is advisable for Northb vessels to contact Choshi Radio, and for Westbound vessels to co Nagasaki Radio.
TUGS: Two tugs of 3,000 h.p. for berthing and one tug for unber are used, in case of vessels less than 249,999 d.w.t. Three tug 3,000 h.p. for berthing and one tug unberthing are used, in cas vessels over 250,000 d.w.t.

In case of SBT tanker of 230,000 d.w.t. class, one tug will atte her stern until sailing.
BERTHING: Berth is an SBM and vessel requires a Panama L 450 mm. × 600 mm. (standard), 350 mm. × 450 mm. (minimum) of mooring rope is 130 mm. diameter × 55 m. × 2 lines, and st chain is 76 mm. diameter × 7.4 m. × 2 chains.
Derricks: All vessels are requested to have port main derrick read arrival (Derrick capacity: More than 20 tonnes).
Floating Hoses: Connected by shore hands and arranged by refin
Discharging: Crude oil be discharged by 2×16 in. floating hoses a ship's port side manifold. It's capacity is 5,000 kl./hr. and max. ra 10,000 kl./hr. (9.0 kg./sq.cm.). Flange is ANSI 16 in. 150 PSI connecting method is a Camlock.

Distance from bow to centre manifold is 130 m. to 170 m. (accepta 145 m. to 165 m. (standard). Distance from ship's side to manifold fa is 4.0 m. to 4.6 m. (acceptable), 4.5 m. (standard). Height of man centre from working platform is 0.9 m. Flange spacing is 2.5 m.

Vessel requires gas ejection of cargo lines by cargo oil circulation pumps. The vessel is required to hold 15,000 kl. of fresh crude oi final stage of cargo discharge, with which submerged line sha flushed up to shore tank. Depth at berth is 20.2 m. Max. draft at is 19.6 m., and further safety requirements shall be maintained forward draft must be maintained deeper than 6.0 m. for 130,000 d vessels, 7.0 m. for 200,000 d.w.t. vessels, 8.0 m. for 250,000 d vessels, 8.5 m. for 230,000 d.w.t. to 259,999 d.w.t. with SBT, also m draft of 10.5 m., and proper trim must be maintained.
MEDICAL: No advance notice required, except on Sundays, hol and in an emergency.
DENSITY: 1025.
FRESH WATER: Arrangeable by barge at SBM.
FUEL: Bunkering prohibited by refinery.
REPAIRS: Some steel works and engineering companies can arr minor repairs, but usually only parts are delivered at this port.
DRY DOCKS: None.
SURVEYORS: *Cargo Inspectors:* Nippon Kaiji Kentei Kyokai (Ja Marine Surveyors and Sworn Measurers Association), No Minatomachi 1-chome, Ube City, Yamaguchi Pref. Tel: 0836-32-62

Shin Nihon Kentei Kyokai (New Japan Surveyors and Sw Measurers Association), No. 5-5, Minatomachi 1-chome, Ube C Yamaguchi Pref. Tel: 0836-33-1036.
Class Surveyors: None at Ube.
GANGWAY WATCHMEN: Not necessary.
CUSTOMS ALLOWANCES: Each person may take 60 cigar ashore, but spirits may not be brought ashore.
REPATRIATION: Possible.
AIRPORT: 20 minutes to Ube Airport by taxi. 5 flights per day to To Domestic flights only from Ube to Tokyo. International flights leave Fukuoka International Airport.
TIME: GMT plus 9 hours. No alterations made to clocks during ye
HOLIDAYS: Public offices (Customs, Immigration, etc.) have holida every Saturday, Sunday and usual Japanese national holidays.
POLICE/AMBULANCE/FIRE: Police 110, Ambulance and Fire 11
EMERGENCY CO-ORDINATION CENTRE: Maritime S Association, Ube Branch. Tel: 0836-22-4999.
TELEPHONES: Temporary marine telephone can be installed at S
SERVICES: Charts, designated governmental forms and docum notary public, etc.
BANKS: Yamaguchi Bank, Onoda Branch, Nishi-Koendori, Onoda Yamaguchi Pref., Japan 756. Tel: 0836-83-2007.
SHIP SUPPLY SERVICE: Not available.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Shore passes can be arranged by the I Immigration Office through the vessel's Agent. Shore passes are v for 15 days.
REGULATIONS: Special port regulations for tankers may be appl SBM.

AGENT: Sub-agents of Aall Barwil Agencies.

UNO: 34.29 N. 133.57 E. (See Plan)

DOCUMENTS:
Ship's Register.
1 copy Voyage Memo (last 3 months).
Last Port Clearance.
3 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore Ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Harbour pilotage is not compulsory, but recommended in view of rapid current. Pilotage compulsory in Osaka Bay, Inland Sea and Kanmon Straits for vessels over 10,000 g.r.t.

Pilots obtained from one of three pilot stations, dependent upon vessel's last port of departure, and at Master's discretion.

Most Inland Sea Pilots act as harbour pilots up to berth or anchorage destination. Harbour pilots available from sunrise to sunset.

1. Tomogashima, entrance to Osaka Bay. Position Lat. 34° 10′ N., Long. 135° 00′ E. Osaka Bay Pilot boarding up to Wadamisaki. Telegraphic address: "Baypilot Kobe". Tel: (078) 321-2200. Telex: 5622-617. Advance ETA notice: 12 hours. VHF: Channel 16.

Wadamisaki, entrance to Kobe. Position Lat. 34° 35′ 0″ N., Long. 135° 08′ 24″ E. Inland Sea Pilot boarding up to destination. Telegraphic address: "Anjin Kobe". Tel: (078) 391-7191. Telex: 5623-011. Advance ETA notice: 24 hours. VHF: Channel 16.

2. Sekisaki, entrance from Bungo Channel. Position Lat. 33° 13′ 0″ N., Long. 131° 55′ 38″ E. Inland Sea Pilot boarding up to destination. Telegraphic address: "Anjin Moji". Tel: (093) 332-7191. Telex: 7153-03. Advance ETA notice: 24 hours. VHF: Channel 16.

3. Mutsure, entrance to Kanmon Straits. Position Lat. 33° 58′ 30″ N., Long. 130° 52′ 12″ E. Kanmon Pilot boarding up to Hesaki. Telegraphic address: "Kanmonpilot Moji". Tel: (093) 332-2384. Telex: 7153-13. Advance ETA notice: 24 hours. VHF: Channel 16.

Hesaki, East side of Kanmon Straits. Position Lat. 33° 57′ N., Long. 131° 03′ E. Inland Sea Pilot boarding up to destination. Telegraphic address: "Anjin Moji". Tel: (093) 332-7191. Telex: 7153-03. Advance ETA notice: 24 hours. VHF: Channel 16.

ANCHORAGE: Bottom: Sand or shell.

Harbour Anchorage	*Depth*	*Position from Tobisu Beacon*	*Max.LOA*
No. 1 Anchorage (off shipyard)	20.0 m.	323° – 700 m.	150 m.
No. 4 (Closed Port)	22.0 m.	165° – 1,000 m.	180 m.
No. 5 Anchorage	29.0 m	023° – 850 m.	180 m.

RESTRICTIONS: No restrictions on entry and berthing by Port Authorities, but with pilot, entry is restricted to daytime only, and berthing only at slack tide.
Draft restrictions are as follows:
Vessel's draft: Over 12.0 m. Bottom clearance at berth: 10%.
9.0 m. – 12.0 m. Bottom clearance at berth: 8%.
Under 9.0 m. Bottom clearance at berth: 5%.

MAX. SIZE: See "Berthing".

HEALTH: Vessels usually anchor at Wadamisaki (off Kobe), where the Authorities board and grant Free Pratique.

Quarantine Officials not stationed in the port, therefore, vessel has to pass a quarantine inspection at Kobe (Quarantine) Anchorage (Lat. 34° 38′ 20″ N., Long. 135° 10′ 45″ E.) when vessel coming through the Kii Channel, Matsuyama, Mizushima, Sakaide or any other "Q" port when coming through the Bungo Channel, or Mutsure "Q" Anchorage (Lat. 33° 59′ 31″ N., Long. 130° 53′ E.) when vessel coming through the Japan Sea.

Vaccination is available at local hospital. If vessel requires sanitary inspection, Officials come from Mizushima.

RADIO: Recommended Master communicates with Agent through Choshi Radio (Call Sign JCS. Telex: 3782-600) or Nagasaki Radio (Call Sign JOS), which cover all ports in Japan. Westbound vessels to contact Choshi Radio, and Northbound vessels to contact Nagasaki Radio respectively.

VHF: Nearby facilities are "Mizushima Port Radio" on Channel 16, and "Sakaide Port Radio" on Channel 16.

RADAR: Bisan Seto Traffic Advisory Service Centre, located at Lat. 34° 17′ 59.8″ N., Long. 133° 49′ 26.1″ E., provides mariners with navigational information on movement of vessels, weather conditions, marine notices, etc., and controls traffic flow in restricted waterways.

TUGS: Tugs join vessel at Outer Harbour area. Tug's lines used.

BERTHING:

Berth	*Length* (m.)	*Depth* (m.)	*Draft (Salt)* (m.)	*Cargoes handled*
Tai-A	240	12.0	10.9	Logs
Tai-B	240	12.0	10.9	Not specified
Tai-C	240	12.0	10.9	Not specified
Tai-D	185	10.0	9.2	Not specified
Uno No.3 Pier	185	10.0	09.2	Not specified

CRANES: No shore cranes installed, ship's gear used.

SPECIALISED CARGO HANDLING FACILITIES: None.

BRIDGES: None.

STEVEDORES: Orders for gangs must be given to stevedores by 1500 hrs. on day prior to working, excluding Sundays and holidays.

Normal working hours: 0830 – 1630. Overtime work depends on availability of gangs.

MEDICAL: Advance notice preferable. Hospital and dentist are available from 0900 hrs. – 1200 hrs., and 1500 hrs. – 1800 hrs. on weekdays, and in an emergency.

TANKERS: No facilities.

DENSITY: Summer – 1023, Winter – 1025.

FRESH WATER: Available from shore hose. Cost Yen 270/ton.

FUEL: Bonded fuel is available from main ports or oil station by barge.

FIRE PRECAUTIONS: No particular precautions.

CONSULS: No consuls. Marine Note of Protest can be attested by local notary public in Okayama.

REPAIRS: All types of deck and engine repairs are possible.

DRY DOCKS: Mitsui Tamano No. 3 Dock: Length 209 m. Beam 31.5 m. Depth 9.75 m. Max. size 46,000 d.w.t. (27,000 g.r.t.).

SURVEYORS: (1) General cargo inspectors in Japan: INTECO, S.G.S., NKKK and SK.
(2) Hull surveyors available from Kobe.

GANGWAY/DECK WATCHMEN: Not specially required.

HATCHES: Opening/closing is normally carried out by stevedores.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore, but no spirits.

CARGO GEAR: Load/discharge effected by ship's gear.

REPATRIATION: Possible.

AIRPORT: 42 km. to Okayama Airport. Regular airline service to Korea only, 4 flights per week.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: National holidays: January 1st and 15th; February 11th; March 20th; April 29th; May 3rd and 5th; September 23rd; October 10th; November 3rd and 23rd.

Local holidays: Year End, New Year (about 5 days), around August 15th (about 3 days). Cargo work cannot be arranged on those days.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance and Fire 119.

TELEPHONES: Telephones can be placed on board at 3 days notice. Cost of installation plus daily rental plus charges for calls.

SERVICES: Most services available from Kobe area.

BANKS: Chugoku Bank, Uno Branch, 1-10-10, Chikko, Tamano City, Okayama Pref.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Shore passes issued.

DELAYS: See "Restrictions".

DEVELOPMENTS: Passenger ship berths will be constructed in about 10 years: 30,000 gross ton class (10 m. depth, 280 m. length) and 3,000 gross ton class (5 m. depth, 120 m. length).

AUTHORITY: Uno Port Administration Office, 1-8-9, Uno, Tamano City, Okayama Pref., Japan. *Tel:* (0863) 31-3211.

AGENT: Sub-agents of Aall Barwil Agencies, Tokyo.
Naigai Unyu Co. Ltd., Tamano Shoko Kaikan,1-2-2, Chikko, Tamano City, Okayama Pref., 706 Japan. Tel: (0863) 31-2211. Telex: 594-6869 Naigai J (Domestic). Fax: (0863) 31-2214. Cables: Naigai Tamano.

WAKAMATSU: 33.54 N. 130.48 E. (See "Kanmon-Ko"). (See Plan)

DOCUMENTS: When vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:

Ship's Register.
International Tonnage Certificate.
Voyage Memo (Port of Call).
Last Port Clearance.
3 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Stores List.
Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Compulsory. Harbour Pilots and Inland Sea Pilots are available at the pilot station or quarantine anchorage. Mutsure Pilots Station: Lat. 33° 59′ 30″ N., Long. 130° 53′ 00″ E. Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from 1 of 3 pilot stations dependent upon vessels last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transiting Kii Straits). Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse. (Vessels transiting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Moji". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGES: No. 5 Section, Wakamatsu. Depth 9 m. – 11 m. Capacity (g/t), 15,000×2. Also quarantine anchorage.

RESTRICTIONS: Pilots not available after sunset. Entry and Sailing are controlled by the one-way signals as follows:

Entry: 0800 to 1100 hrs.; 1300 to 1500 hrs. 1 hour before sunset to sunset.

Sailing: Sunrise to 0800 hrs.; 1100 to 1300 hrs.; 1500 hrs. to 1 hour before sunset. Sunset to 0800 hrs. Easterly winds prevail in warm season, dense fog prevails sometimes in Spring and Winter, but generally clears in a few hours in the morning. Tidal range about 1.5 m. and current in leading channel about 1.5 – 2.5 knots, but no current in port. Due to narrow channel leading to main harbour and shallow water at entrance of channel, length and draft of vessels are generally limited (See "Berthing").

Fairway leading into main harbour about 200 m. wide and 2 miles long, running parallel to a breakwater and reclaimed land. In this channel, as in main harbour and fairway, vessels observe only one-way traffic and on an outgoing signal from the shore, wait outside for outgoing vessel until channel is cleared. Vessels with draft of more than 8.5 m. can enter/depart only at high tide. Entry permitted only from sunrise and vessel to be berthed before sunset. Night departure prohibited, but at HD1-5 Wharf, vessel can depart at night up to 2200 hrs. This vessel must be less than 5,000 g.r.t., and moored port side alongside.

MAX. SIZE: See "Berthing".

HEALTH: At first port call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel from 0830 hrs. to 1630 hrs., only at anchorage. Master to show all Vaccination Cards and Derat Exemption Certificate. In case vessel arrives from cholera infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival, and close all soil pipes before entering port.

Others see "Moji".

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio, which cover all ports in Japan. Westbound vessels to contact Choshi Radio, and Northbound vessels to contact Nagasaki Radio respectively.

VHF: Shimonoseki Port Radio Station on Channels 16, 12, 14, 20 and 22. Pilots on Channel 13.

TUGS: See "Moji".

WAKAYAMA: 34.13 N. 135.08 E. (See Pl

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Numbers
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, cam wrist-watch, radio, firearms/swords, etc. (only at first port of ca Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Ca Manifest and Cargo Manifest in transit using specific forms. There ship's Agent should be provided with necessary information about de of cargoes in advance.

PILOTAGE: Wakayama-Shimotsu licensed Pilots. ETA advise Agent. Pilot boards 1,500 m. – 2,500 m. off Wakayama Breakw Chart Nos. 1150 and 1143 (Japanese Maritime Safety Board). No boat. Pilot boards from tug.

ANCHORAGES: For waiting Pilot and/or berth (nature of bottom, sand mixed with mud.) Four anchorage points for large vessels (ore carriers for Sumitomo Metal) over 30,000 tons gross are provided by the Port Authority. Agents must apply for one when required. The position of each from the lighthouse (flashing white) in the Southern sector of the port is as follows:

"A" – 3,000 m. – 255°
"B" – 3,500 m. – 272°
"C" – 4,100 m. – 283°
"D" – 4,800 m. – 292°

Other vessels are required to anchor in position (approx.) Lat. 34° 13′ 30″ N., Long. 135° 06′ 30″ E. or nearer the shore if possible. (Wakayama Log Carrier): 2,000 m. 245° and 230° from Red lighthouse; depth about 22 m.

RESTRICTIONS: Pilot available daytime only. Channel depth, (Southern Section) 9.0 m; (Northern Section) 14.0 m.

MAX. SIZE: (Wakayama Log Carrier): South Section, LOA 160 m., 20,000 d.w.t. draft 9.0 m.; LOA 200 m., 35,000 d.w.t., draft 9.0 m. (Sumitomo Metal Pier, South Section): LOA 300 m., 100,000 d.w.t. or 150,000 d.w.t. with part load, draft 14.0 m.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio or Kobe Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio or Kobe Radio respectively.

HEALTH: Radio Agent for Free Pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health condition on board. When Free Pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.
Vaccination List.

The following vessels will not be able to get Radio Pratique:

A vessel that does not have a Japanese Sanitary Certificate on board.

A vessel that has been in contact with an infected area, or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or suspected cases, of infectious disease within 15 days of arrival.

TUGS: Tug assistance normally commences from outer harbour. Tug lines used and charge included in towage. 8 tugs available, up to 2,000 h.p. **BERTHING:** No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Voyage Memo (Ports of Call).
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration Inward/Outward (Form No. C-2000).

The following will be checked on board:

Ship's Register.
Last Port Clearance.
International Tonnage Certificate.

When ship comes from Japanese port, Customs Officials wil attend on board, except in special cases. Master or Agent to at Customs House for entry formalities with following documents:

Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration Inward/Outward.
Ship's Register.
Last Port Clearance.
Documents entrusted with the Master by Customs at previous p

On ship's departure, clearance issued by Customs, after confirm payment of Tonnage Dues.

PILOTAGE: (1) *Harbour Pilotage:* Compulsory for entry, departure when passing through Straits if vessel exceeds 10,000 g.r.t.

Pilots embark Eastbound vessels at Mutsure Quarantine Anchor position 0.5 miles East Mutsure Lighthouse, Lat. 33° 58′ 15 Long. 131° 53′ 18″ E., and Westbound vessels at Hesaki Quarar Anchorage (position 125° × 1,500 m. from Hesaki Lighthou Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.). Two pilots embark ves exceeding 30,000 g.r.t. for entry and departure, charging double pilo × 85%.

(2) *Sea Pilotage:* Vessel approaching from East obtain Pilot by r request made at least 24 hours in advance. Pilot embarks 3 miles S from Sekisaki Lighthouse; Lat. 33° 13′ N., Long. 131° 56′ E.

(3) Pilots should be kept closely advised of vessel's accurate ET pilot station. If any change in vessel's movements, Master requeste immediately communicate by VHF to pilot office direct or through Ag reporting revised ETA. Cable address of pilot offices are: Harbour P – "Kanmonpilot Moji". Inland Sea Pilot – "Anjin Moji".

(4) *VHF:* Vessels keep in direct contact with Port Authorities w regard to arrival, berthing instructions and pilot's requirements thro VHF as follows:

(a) Call Sign: Kitakyushu Port Radio (or Shimonoseki Port Radio
(b) Location of Radio facilities: Transmitting and receiving sta located at the top of Mt. Hinoyama, Shimonoseki.
(c) Type of Wave: Channel: Simplex 16 (calling, respondi Simplex 12 (communicating), Simplex 14 (communicati Simplex 20 and 22 (communicating). Output 50 W.
(d) Operating hours: 0000 hrs. – 2400 hrs.
(e) Communicating Range: Within a radius of 50 miles from t Hinoyama Station.
(f) Communicating Language: Japanese/English.

ANCHORAGES: No anchorage at Yawata, but quarantine anchora used in essential cases. See "Health".

RESTRICTIONS:

(a) Because of narrow channel leading to Yawata and shallow w at entrance of channel, length and draft of vessel limited, exc for berthing at Nishi-Yawata Wharf, where 20,000 gross tonn with 200 m. length overall and 8.3 m. draft may accommodated.

Limits:	*Wharf*
Length (overall)	166 m.
Draft	8.5 m.
Gross tonnage	10,000 tons

Vessel slightly exceeding above may be berthed at tha P discretion, subject weather conditions and efficiency of eng steering, etc.

(b) Fairway leading into main harbour about 200 m. wide and 2 m long, running parallel to breakwater and reclaimed land. In t channel, as in main harbour and fairway to Yawata, vess observe one-way traffic and, on a "not-clear" signal from sh wait outside for outgoing vessels to clear channel. Vessels draft of more than 7.0 m. can enter/depart only at high tide.

(c) Entry permitted only from sunrise and vessels to be bert before sunset. Night departure prohibited.

(d) Wakato Suspension Bridge crosses channel between Tobata a Wakamatsu. Height of bridge from water line at fairway 42.675 at spring high tide; height of mast of vessels passing under bri limited to 38 m.

(e) Easterly winds prevail in warm season. N.W. winds in Win Dense fog sometimes in Spring and Winter, but generally c in morning. Tidal range about 1.2 m. Tidal current in chan about 1.5 to 2.5 knots, but no current in port.

(f) Port privately owned and controlled by Nippon Steel Corp.

MAX. SIZE: See "Berthing".

RADIO: Recommended that Master communicates with Agent thro Choshi Radio or Nagasaki Radio, which cover all ports in Jap Westbound vessels to contact Choshi Radio, and Northbound vess to contact Nagasaki Radio respectively.

HEALTH: Radio Agent for Free Pratique not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When Free Pratique is granted by radio, vessel will be required to submit following documents to Quarantine Officer on arrival:

Declaration Inward.
Voyage Memo (Ports of Call).
Maritime Declaration of Health.
Crew List.
Passenger List.
Derat Certificate (copy).

The following vessels will not be able to obtain Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.
If a vessel has on board any case, or any suspected case, of infectious disease, within 15 days of arrival.
If a vessel does not possess a valid Derat or Derat Exemption Certificate.
If a vessel does not possess a valid Japanese Sanitary Inspection Certificate.

Quarantine *Regulations:*

(a) Quarantine station at Western entrance: 0.5 mile East of Mutsure Lighthouse Lat. 33° 58′ 15″ N., Long. 130° 53′ 43″ E.
(b) Quarantine station at Eastern entrance: 125°, 1,500 m. from Hesaki Lighthouse Lat. 33° 56′ 24″ N., Long. 131° 30′ 12″ E.
(c) Quarantine inspection not allowed inside port except when weather or other special reasons prevent quarantine boat from approaching ship at anchorage.
(d) "Q" flag should be hoisted until ship in Free Pratique.
(e) Vessels exceeding 20,000 gross tonnage may undergo quarantine on application when they berth inside port.
(f) Quarantine service is rendered from 0830 hrs. to 1630 hrs.
(g) When ship arrives from plague infected or suspected area within 10 days after she left such place, 24 hours special quarantine required. All sanitary scuppers must be closed and garbage must not be thrown overboard within 60 miles of Japanese coast.
(h) Radio Pratique is obtainable according to the Radio Pratique Regulations.

VHF: See "Pilotage".

TUGS: 2 tugs join vessel at corner of fairway leading into main harbour. Ship's lines used when vessel berths.

BERTHING: No specific requirements. Pilot boarding time will be notified to ship's Agent, mainly by radio.

Berth	Length (m.)	Depth (m.)	Permissible Draft (m.)	Permissible Length (m.)	Shore Cranes (tons)
Steel Export					
Wharf No. 14	150	9.0	8.0	180	—
15	150	9.0	8.5	180	—
16	150	9.0	8.5	180	2×12
17	150	9.0	8.5	180	—
18	179	9.0	8.5	180	2×12
Nishiyawata					
Wharf No. 2	120	9.0	8.5	100	2×40
No. O.B.2	220	9.0	8.5	200	—

Note: Capacity for the above, no limit subject to draft and length.

BRIDGE: See "Restrictions".

STEVEDORES: At least 24 hours prior notice, excluding Sundays and holidays, required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew, at additional cost. Overtime surcharges 1700 hrs. – 1900 hrs. (50% additional of basic stevedorage), 2100 hrs. – 0500 hrs. next morning (130% additional), Sundays/holidays (60% additional).

MEDICAL: No advance notice required unless urgent.

TANKERS: No tanker berth.

DENSITY: Average density in port about 1020 – 1022 in Summer season, 1024 – 1025 in Winter season.

FRESH WATER: Water barges available from Wakamatsu, rate of delivery about 50 t.p.h. At wharves: (No. 16, 17, 18, 19, 20 and Nishiyawata Wharf.) From hydrants: 25 t.p.h. – 40 t.p.h. For supply at Nishiyawata Wharf, 1 day prior notice required.

FUEL: Domestic oil is available. Bonded oil will be brought from Moji, Ube or Oita with sufficient advance notice, when required.

FIRE PRECAUTIONS: No tanker berth. Each tugboat is equipped with fire extinguisher system for attending emergency cases.

CONSULS: British Consul, who is also acting Swedish Consul, is stationed with Holme Ringer, Moji (tel. 093-331-1311). American Consul stationed at Fukuoka (tel. 092-751-9331). Korean Consul stationed at Fukuoka (tel. 092-771-0461).

REPAIRS: All types of repairs possible.

DRY DOCKS: No dry dock available.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo aboard.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.

REPATRIATION: Possible.

AIRPORT: Fukuoka Airport, about 2 hours by train and taxi. Kitakyushu Airport, about 40 minutes by taxi.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110, Ambulance and Fire 119.

SERVICES: All types of services available.

TELEPHONES: Possible to place telephone on board.

Nippon Senpaku Tsushin K.K. available at Moji (tel. 093-331-1089). In case of Mutsure anchorage, extra boat charge and personnel expenses will be incurred. Due to insufficient number of telephones require adequate advance notice for installation. Suitable ship's electrical voltage; DC – 22/28 v. AC – 100 v. 110 v. 120 v. (to keep at least within 10 v.).

SHORE LEAVE: Local Immigration Offices issue shore passes valid for only 15 days, when Yawata is first port of call in Japan. Extension possible if ship stays longer.

GENERAL: Whenever vessel takes bunkers in port, advisable to close deck scuppers' holes before pumping in order to avoid overflow oil into sea.

AUTHORITY: Kitakyushu Port and Harbor Bureau, 2-7 Nishi-kaigan, 1-chome, Moji-ku, Kitakyushu City, Fukuoka Pref., 801 Japan. *Tel:* (093) 321-5941, (093) 321-5941. *Fax:* (093) 321-5915.

AGENT: Sub-agents of Aall Barwil Agencies.

Green Shipping Ltd., Moji, 9-7, Minato Machi, Moji-ku, Kitakyushu City, Fukuoka Pref., 801 Japan. Tel: (093) 321-4261. Telex: 7153-11 Greenm J. Fax: (093) 321-4288. Cables: Greenship Moji.

YOKKAICHI: 34.57 N. 136.38 E. (See Plan)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
International Tonnage Certificate.
1 Maritime Declaration of Health (only at first port of call in Japan).
1 Declaration of Crew's Baggage (only at first port of call in Japan).
5 Crew Lists.
1 Stores List.
2 Lists of Ports of Call.

PILOTAGE: Compulsory for vessels exceeding 10,000 g.r.t. in Isewan (including Mikawawan). Pilots are available at Isewan No. 1 Buoy, position 34° 31′ N., 137° 04′ E., for vessels less than 14.0 m. draft, and position 34° 25′ N., 137° 00′ E., for vessels over 14.0 m. draft.

Vessels requiring Pilot, cable Agent at least a day ahead, advising exact ETA pilot station.

Wireless station for communicating with entering ships and for other port business, call signal JCZ. Radio wave in use is A1.A2 500 kHz and A1.A2 486 kHz, output A1 50 W. and A2 110 W. Zone of communication about 100 km.

Yokkaichi Signal Station also equipped for assigning berths to entering ships and for other port business. VHF communication available, call signal Yokkaichi Port Radio, Channel 16. Working Channel 14, 0600 hrs. to 2000 hrs. any day.

Also see "Nagoya" – "Pilotage: Shipmaster's Report".

ANCHORAGES: Vessels anchor in position Lat. 34° 56′ 15″ N., Long. 136° 40′ 40″ E. where Authorities board and grant Free Pratique; Max. depth 13 m.

RESTRICTIONS: Entry restricted by vessel's draft and Pratique. Max. draft inside port 12 m. Quarantine Authority attend vessel usually from dawn to sundown on any day. Berthing daytime only. Unberthing any time except tankers daytime only.

MAX. SIZE: Max. permissible draft inside port 12 m.

Tankers:

Berth	*Max. d.w.t.*	*Max. LOA* (m.)	*Max. Safe Draft* (m.)
Showa Outer SBM	275,000	335	18.00
Showa Inner SBM	170,000	300	15.00
Showa Wharf "E"	45,000	183	10.50
Cosmo SBM	230,000	330	18.90
Cosmo Umaokoshi Pier	60,000	240	10.00

HEALTH: Request for Radio Pratique to be addressed to Agents not less than 12 hours before arrival.

TUGS: Normally stand-by to assist vessel inside breakwater of entrance to fairway; tug's lines used.

BERTHING:

Berth No.	*Depth* (m.)	*Length* (m.)
1	8.1	161.0
2-3	8.5	245.0
4-5	9.0	215.0
7	7.5	125.0
8	9.8	190.0
9	10.0	200.0
10	5.5	200.0
11	10.0	200.0
12	5.0	140.0
13	12.0	245.0
14	10.0	220.0
15	10.0	220.0
16	7.5	114.0
17-18	5.5	163.0
19-21	5.0	210.0
22	14.0	280.0
24	12.0	240.0
25	12.0	240.0

SPECIALISED CARGO HANDLING FACILITIES:
Bulk Cargoes: No. 2 Wharf has a cereal silo which can store 56,840 tons of imported grain. 2 pneumatic unloaders with unloading capacity of 300 t.p.h. per machine at the Northern berth of the pier to connect the silo with conveyors.

Containers: One deep-sea container berth of 280 m., quay length and minimum water depth of 12 m., incorporating a Ro-Ro ramp. Two 37.5 ton and 44.5 ton Hitachi container cranes. Container yard and marshalling yard area of 58,750 sq.m. Five TCM straddle carriers, 4 forklift trucks (20 tons – 40 tons), 15 tractors, 35 trailers. Container freight stations at Asake 5,940 sq.m. Wool centre 46,768 sq.m.

Facilities of Container Terminal:
1. Total area 58,750 m.
2. Container berth: Length 280 m., depth 12 m., mooring capacity 25,000 d.w.t.×1 berth.
3. Cargo handling equipment: Ramp-way 1 unit, container cranes 2 sets, 1×44.5 tons, 1×37.5 tons.
4. Transport machine: Straddle carrier, 5×40 ft. units,; fork lift 4, 2×40 tons, 1×20 tons, 1×20/40 tons.
5. Container yard: Container yard 6 yards, 29,730 m. refrigerated container yard, one yard 1,275 m.
6. Other relevant facilities: Chassis yard 5,740 m.; wool centre 46,768 m.; cold store 4,664 m.; meat centre 3,335 m.

Liquid Chemicals/LPG Carriers:
Operator: Yokkaichi LPG Terminal Co. Ltd.
Location: Lat. 34° 58′ 10″ N., Long. 136° 39′ 55″ E.
Max. Mooring Capacity: 67,000 d.w.t.
Depth of Water: Passage: 13 m.
Berth: 13 m.
Max. Acceptable Length: 360 m.
Max. Acceptable Draft: 11.00 m.
Tidal Range: Zero to plus 2.36 m.
Side Berthing: Starboard
Type of Unloader: Chicksan Arms.
No. of Receiving Lines: 2 liquid and 2 vapour.
Size of Manifold Flange: Liquid 12 in., vapour 8 in. ASA-150.
Manifold Configuration: From forward to aft – PV-PL-BL-BV and changeable to BV-BL-PL-PV if sufficient notice given to terminal.
Max. Airdraft Manifold: 19.00 m.
Remarks: Safety Pledge letter has to be filed with Port Authority.

TIDE: Tidal current of Ise Bay runs Northward along East side of Mie Prefecture and turns round at mouth of Kiso River and runs Southward for Chita Peninsula.

		Tidal level (average)
Tidal level:	High tide	+7.74 ft.
	Mean tide	+4.30 ft.
	Low tide	+0.00 ft.

TANKERS:

Berth	*Product*	*Shoreline*	*Discharge Rate (t.p.h.)*
Showa Outer SBM	Crude Oil	16 in.×2	8,350
Showa Inner SBM	Crude Oil	12 in.×2	5,000
Showa Wharf "E"	Naphtha	12 in.×1	1,400
	Fuel Oil	12 in.×1	1,000
	Kerosene (Load)	10 in.×1	300/500
	Lub Oil (Load)	3 in.×1	200/300
Cosmo SBM	Crude Oil	16 in.×2	5,000
Cosmo Umaokoshi Pier 1	Crude Oil	12 in.×2 (Chicksan)	3,000
	Fuel Oil	12 in.×1	3,000
	Naphtha	6 in.×2	350/400
	Kerosene (Load)	6 in.×2	380/400
Cosmo Umaokoshi Pier 9	Crude Oil	12 in.×1 (Chicksan arms)	3,000
	Fuel Oil	12 in.×1 (Chicksan arms)	3,000
	Naphtha	6 in.×2	350/450

Attention is drawn to the manual "Safety Standards on Discharge Operations for Crude Oil Tankers", which will be handed to the Master on arrival by the Berthing Master and which are to be strictly adhered to. Apart from request for the normal international safety precautions for tankers, it contains several regulations which could cause considerable delays to vessels if not taken into account when planning discharge/ballasting operations.

Such regulations are:
1. Ballasting operations shall commence between sunrise and 90 minutes before sunset.
2. Berthing operations shall be performed so that discharge operations can be commenced between sunrise and 90 minutes before sunset.
3. Unberthing shall be conducted only between sunrise and sunset.
4. Discharge operations shall be suspended when malfunctions occur to the vessel or discharge facilities or at other times when in the judgement of the Master and the Berthing Master, it is necessary to suspend operations.

It is therefore of utmost importance that the planning/timing of port operations are carefully drawn up and fully discussed with the Berthing Master prior to commencement in order to reduce delays to a minimum. The good operational conditions of ship's equipment (pumps, etc.) and awareness of personnel are of equal importance.

DENSITY: Average 1022.
FRESH WATER: Available, rate of delivery 50 t.p.h. from shore pipes at Government wharves; 100 tons from barge; before 2200 hrs. additional cost 50%; after 2200 hrs. additional cost 100%.
FUEL: Most domestic and bonded oil available, ex-barge.
Minimum 5 days' notice required.
CONSULS: None.
REPAIRS: Minor repairs only.
AIRPORT: No airport.
POLICE/AMBULANCE/FIRE: Police, Tel: 110; Ambulanc Tel: 119.
TELEPHONES: Telephone can be arranged from shore connec Government wharves. No connections at tanker berths.
SERVICES: Technicians for vessel's instruments can be arrange other ports at 2/3 days notice.
REGULATIONS: Under adverse weather conditions:
1. If a typhoon is reported approaching, and upon advice from re representative, loading or unloading operation will be suspende vessel will leave berth to a designated area for refuge.
2. During a violent thunderstorm, cargo work will be stopped receiving order from refinery, and vent-line valves securely close
3. During stormy weather, with gusty winds condition, Master follow weather reports closely and shall endeavour to prevent accidents by taking all possible precautions, such as reinforcing mo ropes and arranging adequate emergency personnel to stand-by fo emergency.

Liability for Accidents: If accident is judged by Maritime Safety O and Port Captain to be ship's fault, either through negligence of th Safety Regulations or otherwise, Master shall immediately ce operations, if necessary, and simultaneously follow in good fait instructions of refinery and Port Captain, and take all necessary ac Master shall inspect and verify cause of accident in the presen refinery representative and ship's Agent, and shall be held respon for reporting the accident, in writing, to the parties concerned. Un is completed and full agreement reached with refinery representa the vessel shall not leave the jetty, unless otherwise requeste actual confirmation of the accident, and damage liability, Public Sur (Messrs. Japan Marine Inspections Co. Ltd.) is fully entitled to in the accident.

GENERAL: Lightening: Not allowed, except a cargo of oil or chemi
DEVELOPMENTS: New LNG berth will be ready in 1997.

SHIPMASTER'S REPORT: May 1994.
Charts: B.A. Charts No. 2957, 2960 and 3650.
Approaches: Yokkaichi is situated just West of Nagoya in Ise W South Honshu and is approached through Irago Suido, for which sp restrictions apply. The high promontory to the East and islands t West of the strait are easily discernible. Kami Shima Light and R shows up well.

Anchorage: Gas carriers awaiting daylight transit through Irago S normally drift well offshore, but within VHF range of the pilot statio

An anchorage centred in position Lat. 34° 32′ N., Long. 137° 0 was evident (6 miles E.S.E. of Irago Suido). The anchorage is expo and depth is 20.0 m. Pilots advised that gas tankers would have to ob special permission to anchor.

Ise Wan Inner Anchorage is about 2 miles S.S.W. of Ise Wan S Berth. LPG ships require guard boat if anchoring in this location.

Irago Suido: The buoyage is well defined, buoys being large, more mini lightfloats and conspicuous.

Maximum speed of transit is 12 knots.

Gas carriers can only transit in and out during daylight, which me they must commence departing Yokkaichi Berth at least 3 hours be sunset and proceed inwards 5 hours before sunset. This impo special constraints in Winter.

A guard tug meets vessel at Buoy No. 1 (gas carriers) and leaves vessel at Buoy No. 1 as the Pilot departs.

Numerous fishing vessels are encountered.

Signals for gas carriers transitting Irago Suido:
Day: Two black cylinders vertically.
International code flag 'B' under '1st Substitute'.
Night: All round green flashing light.
All round red flashing light.

Pilots: Irago Suido Pilot boards about 1.5 miles South of Buoy No coming from the South or, 1.5 miles East of Buoy No. 1 if coming f the East.

Pilot boards from fast red hulled cutter which is based at Irago just inside the Eastern Headland.

VHF as per "Radio Signals".

Call 3 hours, 1 hour and 30 minutes before arrival. Prior arrangem through the Agent. Transit time from Irago Pilot area to Ise Wan S Berth Pilot Change Area is about 2.5 hours.

One Pilot takes vessel to 1 mile S.S.W. of Ise Wan Sea Berth, wh 2 Dock Pilots board (over 30,000 g.r.t.). For berthing at Yokkaichi L Terminal, the latest time Docking Pilot will board is 3 hours be sunset.

Tugs: Two tugs meet vessel off Ise Wan Sea Berth. Tugs lines u and they usually secure Japanese style.

Yokkaichi LPG Berth: B.A. Chart No. 2960 – Yokkaichi, marked "O Berth", in position Lat. 34° 58.2′ N., Long. 136° 39.9′ E. 'T' type ta jetty of concrete construction built in 1983, with mooring dolphins e side connected by catwalks.
Depth alongside, minimum 13.0 m.
Berth is well fendered.
Maximum size of ship taken: 67,000 d.w.t.
Maximum length: 260 m.
Draft restriction: 11.00 m. (giving 2.0 m. U.K.C.).
Vessels always berth starboard side alongside.
No berthing if wind velocity over 10 m./sec.

Mooring: 3.3.2. forward and aft. Mooring boat each end. One Pil manifold to align vessel.

Actual mooring operation is quick.

Gangway: Terminal gangway lands just forward of manifold.

Ship's offside (port) gangway required to be turned out and low to water's edge for emergencies, plus pilot ladder.

Cargo: Propane and butane imported at maximum 2,500 cu.m./h maximum back pressure of 9.00 kg. Normal back pressure is a 2.00 kg.

Chicksans – Japanese convention.

Arm arrangement – Propane Vapour-Propane Liquid-Butane Liquid-Butane Vapour. Can be changed with prior notice to BV-BL-PL-PV.

To agree with OCIMF standards, terminal will change to Butane Liquid-Propane Liquid with negative vapour connections as long as vessel can guarantee maximum pumping rate without vapour return.

Liquid connections, 12 in. ASA 150.

Vapour connections, 8 in. ASA 150.

Pumping is started at 200 cu.m./hr., rising to 500 cu.m./hr. then maximum rate after 35 minutes.

Survey before commencement normally takes 45 minutes with samples being analysed during discharged.

Liquid discharge arms have fine mesh "In Line" filters which can get easily clogged with impurities. Rising back pressure is good indication of clogging up.

Loading Master stays onboard and requires cabin.

On arrival, ship's tank pressure must be below 0.7 kg.

If vapour return is connected, return vapour is at about 1,000 cu.m./hr. at maximum 2.5 kg.

Hoist "M" flag at centre of cargo manifold prior to berthing.

There are 4 propane tanks of 68,000 cu.m. each, served by an 18 in. line, situated about 400 m. from the jetty and 2 butane tanks of 68,000 cu.m. and 75,000 cu.m., again served by 18 in. lines, about 400 m. from the jetty.

Fresh *Water:* Only available by barge before connection or after disconnection.

Barge crew do connection. Pumping rate is fast.

Cost is about U.S.$ 8.5 per tonne.

Arrange through Agent before arrival.

Stores: Very expensive, so only obtain essentials. Supplied by launch at U.S.$ 400.00 per launch trip. Taken before connection and after disconnection.

Bunkers/Oil: Can only be taken at anchorage (not alongside).

Shore Leave: Usual Japanese yellow landing permits required, and must be handed back on departure. Shore leave is by launch from jetty on discharging platform.

Fixed times available – from shore 0800, 0900, 1100, 1300, 1500, 1700, 1900, 2200, and from ship about 15 minutes later. No shore leave allowed after 2200 hrs. Rates about U.S.$ 100.00 per trip during day, U.S.$ 140.00 evening, and U.S.$ 190.00 after 2200 hrs. Rates rise by 50% at weekends, on holidays and during poor weather.

It takes about 10 – 15 minutes to pier, then 10 minutes in taxi to city centre at about U.S.$ 15.00 per taxi.

Telephones: None on cargo jetty. International telephones at boat station.

General: Entry papers required: (Japanese forms).

1 copy Maritime Declaration of Health.
1 copy Crew Effects Declaration (First port in Japan only).
4 copies Crew List.
1 copy Ship's Stores List.
2 copies Ports of Call List.

Agent handles all papers. Customs and Immigration do not normally board.

Agent requires Crew List to be faxed or telexed before arrival.

Radio Pratique: If holding Japan Sanitary Certificate, report 36 hours before arrival to Agent. If no Sanitary Certificate, vessel will be required to anchor to obtain one before berthing.

Pollution: Authorities very strict. Be careful of hydraulic oil from winches washing into sea during heavy rain. Guard boat in attendance at all times.

Position Reporting: Vessel must comply with JASREP as per ALRS 1. As we found out with JASREP, JMSA rang vessel on Satcom to find out why no report had been sent. We were complying with AMVER with entry JASREP.

Also report to "Nagoya Hoan" 3 hours, 1 hour and 30 minutes before Irago Suido entry time.

Agent sends exact time of Pilot boarding and Irago Suido entry time.

Airport: Nearest airport is Nagoya, which the Agent advised us to use, either direct flight or change in Tokyo, otherwise train from Tokyo. Handling courier does all transfer arrangements.

AUTHORITY: Yokkaichi Port Authority, 9-1, Chitose-cho, Yokkaichi City, Mie Pref., Japan 510. *Tel:* (0593) 54-6670. *FAX:* (0593) 54-6675.

AGENT: Sub-agents of Aall Barwil Agencies, Tokyo.

Dry Cargo: Chubu Kaiun Kaisha Ltd., 8, Chitose-cho, Yokkaichi City, Mie Pref. 510, Japan. Tel: (0593) 52-6171. Telex: 494-8267 Chukai J. Fax: (0593) 52-6178. Cables: Chubukaiun Yokkaichi.

Tankers: Cosmo Kaiun Co. Ltd., (Cosmo Terminal), 2F Futo Building, 37, Chitose-cho, Yokkaichi City, Mie Pref. 510, Japan. Tel: (0593) 51-1333/5. Telex: 4948-252 Csmkai J. Cables: Cosmokaiun Yokkaichi.

YOKOHAMA (incl. Negishi and Tsurumi): 35.27 N. 139.38 E. **(See Plan)**

DOCUMENTS:

1 Maritime Declaration of Health.
Ship's Certificate of Registry.
1 Ship's International Tonnage Certificate.
1 List of Crew Personal Effects (to be signed by each crew member).
1 Ship's Stores List.
3 Lists of Ports of Call (last 4-6 months).
7 Crew Lists, including Passport numbers.
7 Passenger Lists.

PILOTAGE:

Bay Pilotage: Bay Pilot is compulsory for vessels over 10,000 g.r.t.

Bay Pilot boards vessel at entrance to Tokyo Bay (35° 10.24′ N., 139° 45.54′ E.), located 5 miles 161° from Kannon Saki Lighthouse. Bay Pilot boards vessel from a tug.

Request for Bay Pilot can be made by ship's Agents to Bay Pilot 2 days in advance.

24 hours and 6 hours notice of ETA to be made to Bay Pilot by Master of the vessel.

Communication with Bay Pilot can be made by the following:

Cables: Anjin Yokosuka.
Telex: 3852451.
VHF: Call Sign "Uraga Channel Pilot".

Amendment of ETA should be made to Bay Pilot whenever ETA changes.

Final confirmation or amendment of ETA should be made to Bay Pilot by VHF Channel 16, 3 hours before arrival, failing which Bay Pilot cannot board on time.

Restriction on Overtaking: Large vessels and other particular vessels, as prescribed by the Maritime Traffic Safety Law, and vessels over 10,000 g.r.t. should, if the circumstances of the case admit, avoid overtaking a vessel of over 500 g.r.t. in the traffic routes.

Restriction on poor Visibility: Vessels over 10,000 g.r.t. should not enter the traffic route when the visibility in the traffic routes and its vicinity is less than 1,000 m.

Preparation of Emergency Fire Wires: A vessel, carrying dangerous cargo, prescribed by the Maritime Traffic Law, should prepare emergency fire wires at the bow and the stern for immediate use, in case of emergency.

Communications with Tokyo Wan Traffic Advisory Service Centre: Vessels over 10,000 g.r.t. should keep watch on VHF Channel 16 while navigating within the radar service area, since information might be sent by Tokyo Wan Traffic Advisory Service Centre.

Contact with Tokyo Wan Traffic Advisory Service Centre can be made by the following:

Call Sign: "Tokyo Martis".
Calling Frequency: VHF Channel 16.
Working Frequencies: Channels 14 and 22.

Restriction on Navigation Period: LPG/LNG vessels of over 25,000 g.r.t. and tankers over 50,000 g.r.t. are prohibited from navigating in Uraga Channel between sunset and 1 hour before sunrise.

Harbour Pilotage: Yokohama Harbour Pilot is compulsory for vessels over 300 g.r.t. for berthing and unberthing.

Request for Harbour Pilot can be made by ship's Agents to Yokohama Harbour Bureau in advance.

Harbour Pilot boards vessel by launch at Yokohama Anchorage for berthing operations. If weather is rough, Harbour Pilot boards vessel by tug. Pilot's boat is painted grey with the word "PILOT" in white letters on each side, with "H" flag by day and lights by night, in accordance with international rules.

ANCHORAGES: 12 m. – 26 m. in Quarantine Anchorage, and 26 m. – 34 m. in other areas. For details refer to chart published by Hydrographic Division of Japan MSA.

RESTRICTIONS: (A) Conventional vessels can be berthed up to 2200 hrs. at public berths.
(B) Container vessels can be berthed at anytime at container berths.
(C) At most of the private berths, berthing and unberthing is from sunrise (or after 0630 hrs.) till sunset.

MAX. SIZE:

Main Dry Cargo Berths:

Berth	*Max. d.w.t.*	*Max. LOA* (m.)	*Max. Draft* (m.)	*Max. Air draft* (m.)
Kokusai Futo	150,000	350	17.5	16.0
Nissin Seiyu	55,000	160	12.5	N/A

Tankers:

Berth	*Max. d.w.t.*	*Max. LOA* (m.)	*Max. Draft* (m.)
Keihin Yokohama (Sea berth)	200,000	No limit	21.00
Showa Shell Sea Berth	90,000	343	12.00
NPRC (Negishi) A	264,173	362	17.00
NPRC (Negishi) B	81,280	112	14.00
Tokyo Gas	75,000	173	14.00

HEALTH: 1. Radio Pratique is available to vessels who possess valid Sanitary Inspection Certificate issued by Japanese Quarantine Authority.

Radio Pratique message can be sent by Master to ship's Agents between 6 hours – 36 hours prior arrival as per specific format.

2. Following vessels are not applicable for Radio Pratique:
   (A) Vessels who are less than 7 days from Japan after departing a port which is designated an infected area.
   (B) Where ship's crew have suffered from an infectious disease within 15 days before arriving in Japan.

Quarantine Inspector boards vessel at Yokohama Quarantine Anchorage for Pratique. Location of Yokohama Quarantine Anchorage: 35° 26.9′ N., 139° 42.7′ E.

Pratique is only required at first port of call in Japan.

RADIO: Recommended that Master communicates with Agent through Choshi Radio or Nagasaki Radio, which cover all ports in Japan. Westbound vessels to contact Choshi Radio, and Northbound vessels to contact Nagasaki Radio respectively.
VHF: Call sign Yokohama Port Radio. (See details under "Kawasaki/ VHF").

Berthing information for next day can be obtained from Yokohama Port Radio at 1500 hrs. by VHF Channel 16 (Range of Station approximately 50 miles).
RADAR: Traffic Control Centre (Tokyo Wan Traffic Advisory Service Centre) keeps watch round-the-clock for the vessels within the radar service area. Vessels can make contact with the Traffic Control Centre by VHF Channel 16.
TUGS: Tugs join vessel at Yokohama Anchorage. Number of tugs required is at discretion of the Harbour Pilot. Normally 2 tugs are used for berthing and unberthing. However, 4/5 tugs are used for large vessels or LPG/LNG/VLCC.

The following tugs are registered in the Yokohama/Kawasaki area for berthing/unberthing operations: 2×2,900 h.p., 19×2,600 h.p., 2×1,600 h.p., 2×1,800 h.p.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

BRIDGES: Yokohama Bay Bridge spanning Honmoku and Daikoku was completed in 1989 with highest clearance above water of 55 m.

STEVEDORES: There are 21 stevedoring companies in Yokohama. Orders for stevedore gangs are to be confirmed by 1200 hrs. day before, excluding Saturdays, Sundays and holidays.

Working Hours:

0830 hrs. – 1630 hrs.	Basic rate.
1630 hrs. – 2130 hrs.	60% additional charge.
2130 hrs. – 0400 hrs.	130% additional charge.
Holidays	100% additional charge.
Saturdays	60% additional charge.

MEDICAL: Hospital and clinic available. No advance notice required, unless urgent.

TANKERS: Masters of tankers seldom requested to fit reducing pieces before arrival for connection of shore lines since oil installation have own appliances. Two slop disposal facilities, one in District No. 5 in Yokohama which is private enterprise and can dispose of dense residues, and one in District No. 1 in Kawasaki which is run by Kawasaki city and can dispose of diluted slop or oily ballast. (Also see "Max. Size").

Facilities: Western style restaurant, bar, gift shop, games room, money exchange (US$/DM/A$/£), overseas telephone, pool tables, darts, TV, library, book exchange, barber shop, money orders, postal services (stamps etc.), transportation to and from ships in port free of charge, information on sightseeing and shopping and doctors.

The Missions to Seamen, 194 Yamashita-cho, Naka-ku, Yokohama, Japan. Tel: 045-662-1871. Facilities: Souvenir shops, international telephone, chapel, postal services, bar, darts, games (chess and draughts), books/magazines, sightseeing information, TV & lounge, welfare, medical information.

Seamen's Service Centre, 1-1 Kaigan-dori, Naka-ku, Yokohama, Japan. Tel: 045-201-2177. Facilities: Waiting room, information on ship movements, hotel, hospital, etc.

CURRENCY: Japanese Yen (Y).

DEVELOPMENTS: *Minato Mirai 21 Project:* This project is designed to create an attractive city centre for Yokohama, one which will have the international and cultural qualities appropriate for a self-reliant, major city within the capital region of Japan, and also have the qualities appropriate for an international port city. This new urban centre is to be built in the inner port area (a total area of 186 hectares, about 110 hectares, inclusive of the already closed Takashima Pier and the Shinko Pier, and some partially reclaimed area of about 76 hectares).

The project began in 1983 and will be completed in 2000. In anticipation of its role in the 21st century, the plan calls for the building of facilities for international exchange: conference halls, green belts and facilities for the purpose of creating spaces with ample amenities for new port activities, daily life and places for people to interact and exchange goods and information.

Honmoku Pier Project: To keep up with this age of containerisation, D-4 Container Terminal started service in November 1984. This was followed by D-5 Container Terminal operating in December 1986 with a berth 300 m. long and a water depth of 13 m.

At C Jetty, the number of gantry cranes was increased to boost the capacity for handling containers with conventional, Ro-Ro and semi-container ships. At present 5 such cranes are in operation. There is also a plan to expand the container yard by reclaiming the space between B and C Jetties.

The newly reclaimed area at D Jetty completed in 1985 (about 70 hectares) has secured space for piers and port facilities to alleviate their shortage. It will also be developed as a green belt of about 20 hectares with various amenities and the Port of Yokohama Symbol Tower to serve as the centre of the area. The citizens began using this tower in July 1986.

Minami Honmoku Pier Project: The waters off the industrial zone of Honmoku Pier have a high development potential as an area for the distribution of goods because of the great water depth, its proximity to the Tokyo Bay Shore Expressway and other factors. The plan is to build deep-water, larger container terminals in order to respond to the expanding demand for container freight and the trend towards larger vessels.

We also intend to build a new comprehensive base at the Port of Yokohama for distribution of goods in the next century. We hope to establish facilities to meet both the diversified demands of and increasing complexities for goods distribution.

Daikoku Pier Project: This project envisages the construction of a modern pier by a 321 hectare reclamation project, which will be completed in two phases: Phase I includes 221 hectares, and Phase II is intended for 110 hectares near Daikoku Pier, Tsurumi Ward. The Phase I area was reclaimed in 1984. Some of the berths for ocean-going trampers were converted into multi-purpose berths to accommodate Ro-Ro ships and semi-container ships.

The reclamation work was finished in 1990 in the Phase II area where the construction of two large container berths is now in progress to cope with the expanding demand for container cargoes. We plan to improve a complex distribution terminal to be able to handle diverse cargoes in a unified, efficient manner, responding to the trend toward diversified distribution of goods. We also plan to secure areas for citizen recreation activities, as part of our program to improve the environment, by establishing large scale green and water areas (about 20 hectares), at the gateway to the Port of Yokohama.

Tokyo Bay Shore Expressway Project: This project calls for improving the160 km. long expressway along Tokyo Bay, stretching from Yokosuka to Futtsu through Yokohama, Tokyo, Chiba and Kisarazu. There is a plan to build a road within the Port of Yokohama linking Ogishima, Daikoku Pier and Honmoku Pier, stretching to Kanazawa and Yokosuka. When completed, this road will serve as a central network of highways, to markedly improve the port functions and alleviate traffic congestion within the city.

AUTHORITY: Port and Harbour Bureau, City of Yokohama, 2 Yamashita-cho, Naka-ku, Yokohama, 231 Japan. *Tel:* 045-671-2874/2888. *Telex:* 3822844 Green J. *FAX:* 045-671-7158. *Contact:* K. Mithuda, Manager of Port Promotion Division.

YOKOSUKA: 35.17 N. 139.39 E. (See Plan)

DOCUMENTS:

Customs:

- Ports of Call List (Voyage Memo).
- Cargo Manifest for Discharging and Through Cargo.
- Declaration of Crew's Baggage.
- Passenger List.
- Crew List.
- List of Ship's Stores.
- Ship's Register.
- Last Port Clearance.
- Declaraton of Payment of Tonnage Dues and Special Tonnage Dues.
- Application for permission of:
    - Traffic through place other than designated.
    - Traffic through place designated.
    - Traffic between vessel or aircraft coming and/or going between Japan and any foreign country and coasting vessel, etc.
- Application for Approval on Loading and/or Unloading of goods before Cargo Manifest is submitted.
- Declaration Inward/Outward of Vessel.

Immigration:

- Crew List.
- Passenger List.
- Application for Crew member's Landing Permit for Issuance of Crew Landing Pass, Crew Replacement and Repatriation.
- Application for Emergency Landing Permit in case of hospitalisation of crew members.
- Passport or Seaman's Identity Book.
- Declaration Inward/Outward of Vessel.

Quarantine:

- Notification for prior Quarantine Procedures.
- Radio Pratique Message from the Vessel.
- Delivery papers for Radio Pratique Message.
- Maritime Declaration of Health.
- Crew List.
- Passenger List.
- Ports of Call List (Voyage Memo).
- Notification for after Quarantine Acceptance.

Plant Protection Station:

- Application for Plant Importation Inspection.

Animal Quarantine:

- Importation Inspection not available.

Maritime Safety Agency:

- Declaration Inward/Outward of Vessel.
- Application for Permission of Movement in the Port.
- Application for Loading, Transfering and Unloading of Explosives and Combustibles.
- Application for Transportation of Explosives and Combustibles.

Port Authority:

- Application for use of Facility.
- Declaration Inward/Outward of Vessel.

PILOTAGE: In applying for pilot at time of entry and departure, pilot station should be contacted 24 hours in advance of beginning of pilotage through Agent. 96 pilots available.
Uraga Channel Pilots: Tel: 0468-35-6211. Telex: 3852-451.
VHF Call sign: "Uraga Channel Pilot", on Channel 16.

ANCHORAGES: At 4th District of Yokosuka Port. Depths 10 m. – 30 m.

RESTRICTIONS: The 1st, 2nd and 3rd District of Yokosuka Port under compulsory pilotage districts.

Possibilities of Entry or Sailing after Sunset:

Nagaura Pier:

Entry:	If berthing alongside "Head In", the vessel may pass Yokosuka Ko North-East Breakwater (E) Lighthouse from sunrise to sunset. If berthing alongside "Head Out", from sunrise until 30 minutes before sunset.
Sailing:	If berthed alongside "Head Out", the vessel may leave quay from sunrise to 2200 hrs. If berthing alongside "Head In", from sunrise until 30 minutes before sunset.

Shinko Wharf:

Entry:	The vessel may pass Yokosuka Ko (S) Light Buoy No. 1 from sunrise to sunset.
Sailing:	The vessel may leave quay from sunrise to sunset.

Shinko Pier:

Entry:	The vessel may pass Yokosuka Ko (S) Light Buoy No. 1 from sunrise until 30 minutes before sunset.
Sailing:	The vessel may leave quay from sunrise until 30 minutes before sunset.

During the evening rush hours in Uraga Suido Traffic Route (1600 hrs. – 2000 hrs. JST), a vessel of some 10,000 gross tons or more should normally avoid crossing the West Traffic Lane of the traffic route from or to the West, but if obliged to do so, should pursue safety in crossing by:

(a) Understanding the prevailing circumstances and conditions in and around the traffic route by keeping in close contact with the Tokyo Wan Traffic Advisory Service Centre.
(b) Faithfully obeying maritime traffic rules (particularly the rules on conduct of vessels and indications of their own routes under the Maritime Traffic Safety Law).
(c) At all times maintaining a proper lock-out (by sight and hearing) as well as all available means.
(d) At all times proceeding at a safe speed.
(e) Effectively using escort boats, tugs, etc.
(f) As far as practicable, maintaining a listening watch by VHF radio telephone on Channel 16.

MAX. SIZE: See "Berthing".

HEALTH: Radio Pratique available. Authorities board at ancho Quarantine Station to be informed in advance of name of last port, name, tonnage, number of crew, number of passengers, nationality, etc. In event any suspected disease, Agent shou advised. When isolation of ship needed, it will be transferr Quarantine Station Yokohama.

RADIO: Local radio station.

TUGS: Can be arranged through Agent. Tugs normally join ves 3rd District, when vessel enters Nagaura and Shinko, and in 7th Di when it enters Kurihama. Tug's lines to be used. Charge for tug's included in charge for tug.

BERTHING: Agent submits application for berth to Port Auth (Nagaura and Kurihama Port Offices and Yokosuka Shinko W Company).

Jordan

AQABA: 29.31 N. 35.01 E. **(See Plan)**

LOCATION: The commercial sea port of Aqaba is the only outlet to the Hashemite Kingdom of Jordan, and is situated at the top of the Gulf of Aqaba at Lat. 29° 31′ N., Long. 35° 01′ E.

The Passenger and Container Terminals lie approximately 3 miles to the South of the main port.

The New Oil Exporting Jetty lies approximately 8 miles to the South the main port.

The Fertiliser Industry Terminal lies approximately 9 miles to the South the main port.

RT LIMITS: The Southern limit of the port is an imaginary line 270° Al Derrah Point (Saudi Border); about 10 miles from the main port.

DOCUMENTS: *Documents required by the authorities for cargoes:*
1 copy of all dangerous goods on board showing IMO & UN numbers.
6 copies unfreighted Manifest, showing IMO & UN numbers for dangerous goods.
2 copies of unfreighted Manifest for Free Zone if vessel has Free Zone cargo.
1 set of non-negotiable Bills of Lading.
All Manifests should bear the following clause: "This is to certify that the above vessel has not called and is also not scheduled to call at any Israeli ports nor is owned by any Israeli Company, also it is not included the Black List".
All the above documents are to be airmailed to the Agent's Head Office in Amman and not Aqaba.

Documents Required by the Authorities for Free Pratique:
7 copies Crew List.
7 copies Passenger List.
1 copy Stores List.
1 copy Crew Declaration List.
1 copy Vaccination List.

The Following Forms to be Filled:
2 copies of Maritime Declaration of Health.
1 Customs Declaration Form.
2 copies Vessel's Specification Form.
1 copy Pilotage Form.

The Following Documents to be Produced for Checking:
a) Log Book.
b) Ship's Registry Certificate. (Kept by the Port Authorities until departure).
c) Derat Certificate.

Shipmaster's Report: November 1988.
Customs: 3 copies Crew List.
1 copy Bonded Stores List.
1 copy Crew Declaration.
Agent: 3 copies Crew List.
Quarantine: 3 copies Crew List.
1 copy Maritime Declaration of Health.
2 copies Vaccination List.
Immigration: Photograph for shore passes (compulsory).

PILOTAGE: Pilotage is compulsory for all vessels above 150 n.r.t. for berthing, unberthing and entering the anchorage area. Pilotage is obtained from the Harbour Master through Port Control. Ships in harbour requiring a Pilot should call the Pilot via Aqaba Port Control Radio (VHF Channel 16, working Channel 12) 1 hour before ship is ready to move. Advance notice of the ship's requirement of pilot service should be given to the Agent who should advise the Harbour Master or his representative. It should be noted that vessels may proceed to sea from the anchorage without taking a Pilot, but for ships leaving the berths alongside, pilotage is compulsory. Sound signals are prohibited.

Ships intending to go to anchorage, cargo berths or phosphate export berths should wait for Pilot 1 mile S.W. of these berths.

Ships intending to berth alongside the Floating Berths (Yarmouk) or Container Terminal should wait for Pilot 1 mile to the S.W. of these berths.

Ships intending to berth alongside the Fertiliser Berth or the Oil Jetty should wait for Pilot 1 mile to the S.W. of these berths.

The vessel has to supply the following information to the pilot station when requesting a Pilot:
a) Name of vessel;
b) Nationality;
c) Agent's name;
d) Overall length;
e) Maximum draft;
f) Gross and net tonnages;
g) Cargo for Aqaba;
h) Any special characteristics of vessel.

ANCHORAGES: About 0.6 miles from shore in depths of 15 – 30 fathoms. Ships awaiting discharge can easily anchor in deep water anchorage which can accommodate 8 vessels.

Anchorages 1-4 are called inner anchorage and are used for ships discharging cargo into barges. Anchorages 5-7 are used for ships waiting and Anchorage 8 is used for small vessels. All anchorages lie in the compulsory pilotage areas.

When anchored, all ships must keep 6 cables distance from the Royal Jetty.

RESTRICTIONS: The entry of ships to anchorage after sunset is not allowed. Berthing is prohibited during darkness at the oil terminal.

Ships' Masters are warned that contravention of above rules renders them liable to penalties of up to JD. 10,000 per ship.

MAX. SIZE: Up to 20,000 d.w.t. Max. draft 32 ft. for the cargo berths and 100,000 d.w.t. and 50 ft. draft for the phosphate loading berth. Also see "Berthing" and "Notice".

HEALTH: Health Officials board after vessel drops anchor or after vessel is secure alongside.

The Port Medical Officer is in charge of granting Free Pratique to all vessels on arrival, and of all medical matters concerning ships and seamen.

RADIO: Aqaba Radio Station, call sign JYO.

Watchkeeping hours are currently from 0500 hrs. to 1700 hrs. GMT. The station received all MF frequencies on: 500 kHz and 477 kHz and receives HF frequencies from 0700 hrs. to 0900 hrs. GMT only on 8728 kHz. The radio station listens on VHF Channel 16.

Weather forecasts: Twice daily, at 0730 hrs. and 1530 hrs. GMT.

The new radio station will work for 24 hours and will be able to receive all types of communications (Telegraphic, Telephonic, Telex, etc.)

Note: To all ships bound for Aqaba Port = In order to facilitate berthing and cargo handling at Aqaba Port, Masters of ships are kindly requested to cable Harbour Master in Aqaba via Aqaba Radio 72 hours and confirm 24 hours before arrival providing the following information:– Ship's name, Flag, Last Port, Next Port, Cargo for Aqaba, Tonnage and Type, Length, Breadth, GRT/NRT, Draft Forward/Aft, ETA, Aqaba Agent's Name, Liner or Charterer, Year built, and if Ro-Ro ship, the Ramp Location. Station Telex No. 62325 Aq Radio Jo. Station Tel. No. 315544 and 314321.

VHF: Aqaba Port Control at Harbour Master's Office listens 24 hours on VHF Channel 16, working Channels 10 and 12 for service messages. Pilots listen VHF Channels 9 and 12.

RADAR: There is no Port Control Radar, but tugs are equipped with radar and sounding apparatus.

TUGS: Compulsory. 7 tugs, 840 h.p. – 3,200 h.p., 9 mooring and 5 towing boats 80 h.p. – 380 h.p.

BERTHING: The Main – Port Berths: Includes 12 berths with a total length of 2,050 m. for handling general cargo, grain, phosphate and discharging lighters.

Berth No.		*Length of Berths* (m.)
1	receives ships up to 40,000 d.w.t.	160
2,5,6		180
3,4		180
7		150
8,9		150
Lighter Discharging Berth		150
Phosphate Berth A (With conveyor belts and shiploader of 1,000 t.p.h.)		210
Phosphate Berth B (With conveyor belts and two shiploaders of 2,200 t.p.h. each).		180 (Receives ships up to 100,000 d.w.t.)

Also see "Notices".

Container Berth: Total length of 540 m. and a depth of 15 m. which can receive 3 vessels at a time up to 100,000 d.w.t. each. It is equipped with 2×40 ton gantry cranes. Attached to this berth and with a depth of 10 m. is the Ro-Ro Berth with 40 m. length.

The Container Terminal has a container freight service, Container Freight Station (CFS) and a container and Ro/Ro storage area of 309,000 sq. m.

The capacity of the container storage area is 7,000 full containers and 5,000 empty containers (in TEUs).

The Terminal also has 24 power points for the supply of power to refrigerated containers.

Passenger Terminal and Yarmouk Floating Berth: Length 150 m. and depth 10 m. It specialises in passenger traffic and their vehicles, it also receives Ro-Ro and container ships.

Mo'ta Floating Berth: Recently fixed to the North of container berths with a length of 150 m. and a depth of 15 m. It is used for bagged cement, export purposes and Ro-Ro vessels. Max. size 35,000 d.w.t.

Moshterak Berth: Length 120 m. and depth of 11 m. Dolphin berth used as a pontoon, with a shiploader and conveyor belt fixed between dolphins for handling cement products. Also used for oil product exports. Max. size 120,000 d.w.t.

New Oil Export Jetty: Length of jetty 150 m. Depth alongside 25.0 m. There are 4 breasting dolphins and 4 mooring dolphins. Max. size 300,000 d.w.t. Max. monthly oil exporting capacity 300,000 tons.

Industrial Port: Jordan Fertiliser Industry Co. Ltd.

(A)	Timber berth (J.F.I) 1	*Sea Side*
	Max. draft permissible	6.8 m.
	Length of berth	80 m.
	Max. vessel width	—
	Max. vessel d.w.t.	5,000 tons
(B)	(J.F.I.) 2	*Shore Side*
	Max. draft permissible	1.75 m.
	Length	45 m.

There is possibility to use Berth No.1 and No.2 for Ro/Ro vessels of different sizes, with stern (straight) ramp of not less than 35 m. in length. The vessel will be moored 25 m. from the jetty.

(C)	Fertiliser berth	*Sea Side*	*Shore Side*
	Max. draft permissible	15 m.	11 m.
	Length	230 m.	190 m.
	Max. vessel width	27 m.	27 m.
	Max. vessel d.w.t.	50,000	40,000

2×2,000 t.p.h. shiploaders and 1×500 t.p.h. ship evacuator.
2 Potash stores, each 75,000 tons capacity.

CARGO EQUIPMENT: *Grain Silos:* Erected by Ministry of Supply on Berth No.1 with evacuators & conveyor belts with a capacity of 500 t.p.h., and storage capacity of 150,000 tons.

Storage Facilities:

Total Shedded Area	41,500 sq.m.
Closed Hangers Area	34,500 sq.m.
Paved Open Storage Area	450,000 sq.m.
Closed Cold Store	500 Tons
Container Terminal Area	309,000 sq.m.

Cargo Handling Equipment:
46 Cranes with a capacity of 2 tons – 5 tons.
13 Cranes with a capacity of 10 tons – 40 tons.
2 Cranes with a capacity of 45 tons.
2 Cranes with a capacity of 90 tons – 120 tons.
108 Forklifts with a capacity of 1.5 tons – 22 tons.
49 Tractors.
9 Straddle carriers for handling containers.
19 Tug Masters.
12 Top lifts of 5.0 tons – 30.5 tons.
2 Gantry cranes with a capacity of 40 tons each.
120 Trailers.
33 Barges with a capacity of 250 tons - 500 tons each, including 1 Water Barge, 1 Waste Collection Barge and 1 Oil Pollution combatting Barge.

STEVEDORES: Stevedoring is carried out by The Ports Corporation and their working hours are from 0700 – 1400, work must start at 0700 and end at 1400, therefore there is 1 hour overtime in the morning from 0700 – 0800. The second shift's working hours are 1700 – 0100 next morning and are counted as overtime hours.

Ships with homogenous cargoes of bags or steel may work four shifts per day – first shift 0700 to 1100, second 1100 to 1600, third 1600 to 2200 and fourth 2200 to 0500 next morning.

During the month of Ramadan the timing is 0700 – 1300 for the first shift and 2100 – 0300 next morning for the second shift, the four shift system is suspended during this month.

Cargo work is continuous throughout the year with the exception of 1 day at Eid-El-Fitr (the first day of the holiday) and 1 day at Eid-El-Adha (the first day of the holiday).

Friday is the official weekly holiday therefore the working hours during this day are treated as overtime hours at an extra cost of JD 37.5 per gang per day.

Ships' Working Hours: Ships can work around the clock depending on the Master's option and the number of ships in port. Opening of ships' hatches is allowed up to 2100 hrs. if Agent arranges for gangs beforehand.

The port meeting is held daily at 1000 hrs.

MEDICAL: The Health Department of Aqaba Port provides all medical services required and responds to any urgent calls by radio before arrival. A government hospital and 2 private hospitals are available and well-staffed.

TANKERS: Tankers loading fuel oil can be handled at the following berths:

Mushterak Berth: Consisting of 2 dolphins 120 m. apart from each other with a depth of 11.0 m.

New Oil Berth: The berth is currently used by a permanent local 100,000 ton tanker "Alazrak" as a storage vessel.

Port Restrictions:
1. No night berthing/unberthing.
2. Dirty ballast facilities are not available.
3. Pilot boarding area adjacent to the terminal.
4. Slops not accepted.
5. No limitation on freeboard.

Port Circulars:
Ref. No. 2/10/2/499
Date: 10/1/86
To Ocean Going Oil Tankers Arriving at Aqaba Oil Terminal:

Standard information from ocean going oil tankers arriving at Aqaba Oil Terminal must be sent by cable or letter to Ports Corporation at least 15 days before arrival.
1. Date/time of arrival to be confirmed 5, 4, 3, 2, 1 days before arrival.
2. Ships particulars – name/kind, date of building, d.w.t., draft, LOA, breadth.
3. Ballast condition, quantity of ballast, condition of ballast – segregated or clean ballast.
4. Slop quantity on board on arrival.
5. Condition of cargo tanks, crude oil washed, gas-free, etc.
6. All overboard ballasting, deballasting, lines condition flushed, cleaned.
7. Equipped with inert gas system, then percentage of oxygen in the cargo tanks on arrival and throughout cargo operations.

All information sent to Ports Corporation must be correct.

Ref. 2/10/2/521
Date: 29/1/86
Port Instructions and Regulations to receive and serve Oil Tankers:

All oil tankers arriving at Aqaba Oil Terminal should comply and perform with the international convention 1973 and 1978 (MARPOL) marine pollution protocol and with OCIMF/ICS for ship to ship transfer guide (petroleum) for the safety and preventing pollution at Aqaba Gulf, hereby:
1. Oil tankers are requested to have segregated ballast, only such capacity which will allow them to operate safely on ballast conditions and on manoeuvring purposes are accepted. No other ballast except the segregated will be, for any reason, discharged at sea - while there are no reception facilities available at Aqaba Oil Terminal.
2. Oil tankers will be allowed to come alongside the storage vessel only if fully inerted. They will be rejected if oxygen percentage is more than 8% and the inerted condition will be maintained throughout mooring and loading/discharging operations.
3. Oil tankers must have the cargo tanks dry, clean and suitable to receive cargo on arrival avoiding any kind of contamination.
4. The crude oil must be loaded by tankers of approximately 200,000 d.w.t. as per contract with Ports Corporation.
5. Tankers age should not be more than 10 years.
6. Oil tankers will be inspected by Ports Authority on arrival coming alongside the storage vessel and they will be rejected if not complying with the requirements mentioned here above.

Note: The storage vessel has left Aqaba Port and M/V "Al-Azraq" is currently berthed in its place.

Also see "Berthing".

DENSITY: Average density in the port is 1031.

FRESH WATER: Fresh water may be supplied to ships and wa be supplied alongside any of the berths.

FUEL: Bunker fuel is available in Aqaba.

CONSULS: All Consulates are in Amman, the capital, except fo Danish Consulate, (Vice-Consul), at Kawar Building, Egyptian Co (Western Housing Area) and the German Consulate.

REPAIRS: Only minor repairs may be carried out above the wa Divers may be obtained and a private firm carries out repa Navigational Aids including radar, gyro compass, echo sounder, wi equipment, etc.

DRY DOCKS: Slipway for maintaining port equipment.

SURVEYORS: Germanischer Lloyd, NKK, Bureau Veritas and Ll Register are available in addition to other classification societies

GANGWAY/DECK WATCHMEN: Customs provide a guard who be given full board and lodging. Ships are also supplied with watchmen through Agents.

OPENING/CLOSING HATCHES: Normally handled by stevedores alongside or by ships' crew before arrival.

CUSTOMS ALLOWANCES: 20 packets of cigarettes and 1 bot liquor for each crew member. Ships' store is locked and seale Customs while in port.

AIRPORT: Aqaba Airport links Aqaba with Amman International Ai 355 km. away. One flight daily.

TIME: GMT plus 2 hours.

HOLIDAYS: May Day (May 1st); Independence and Army Day 25th); Arab Reconaissance Day (July 4th); Crowning of King Hu (August 11th); King Hussein's Birthday (November 14th).

The following dates change from year to year as they are reck in accordance with the lunar calendar consisting of 354 days. *1994:* Eid El Maraj (January 10th); Eid El Fitr (March 11th-15th); E Adha (May 21st-24th); New Year Hijriya (June 11th); Prophet's Bir (August 20th).

NOTICE:
The Hashemite Kingdom of Jordan Port Corporation - Aqaba
No. 7/3/8787
Date: 1/11/1989

Circular No. 46 for the year 1989
to all Shipping Agents

Further to my Circular No. 26 for the year 1986, please note that sweeping of all berths has been made, and it was established vessels with specifications listed hereunder can be received. Pl take note and inform all your Principals, the Owners, Charterers Managers of vessels calling to Aqaba under your agency in ord comply with.

Berth	*Draft* (m.)	*LOA* (m.)	*D.W.T.* (tonnes)	*Displac* (tonn

( ): Possibility to exceed LOA, depending on occupancy of adja berths.
X: There is a rock at (7.60 m.) deep. It is (70 m.) to the Nor the berth and (60 m.) West of East angle.
XX: Depth being (60 m.) wide East of the berth and (100 m.)
XXX: From the vessel loader to North end of the berth (100 m.) (118 m.) to the South end.
XXXX: Barges and tugs could berth on the wharf. Also Ro-Ro ves with (9.00 m.) draft could anchor at a distance not less (25.00 m.) from the quay, provided the ramp is (25.00 m.) and both bow anchors are used to keep vessel bow stead 406,000 tonnes d.w.t. alongside plus 300,000 tonnes d double banked alongside.

Signed:
Director General
The Ports Corporation/Aqaba.

GENERAL: *Weather:* Masters are warned that during the Winter mo strong Southerly gales can develop within 2 hours followed by swel such a case it may be necessary for small vessels to unberth proceed to sea, and also for vessels in the anchorage to weigh an and proceed to sea and remain at sea until the weather moderates

Range of Tide: The range of tide is 1.2 m. at Spring tides.

Firefighting: The port has its own fire brigade, which includes 5 w and foam engines; 1 dry powder engine; 1 ladder engine; 3 water rescue engine and 2 manual high capacity pumps, plus a variety equipment such as breathing apparatus, etc.

The town of Aqaba has a highly efficient and well equipped fire brig and it is 4 km. away from the port.

Aqaba Airport 11 km. away also has a fire brigade and assis may be called for from any of these whenever needed.

Waste Matter and Pollution: No rubbish may be thrown overboard at the anchorage or alongside the quays. A barge calls regularly nchorages to collect garbage. No vessel which has carried livestock may clean its holds while in port. No vessel may pump overboard any age, fuel or water ballast liable to contaminate the port. This regulation ers particularly to substances mixed with oil.

Ships' Masters are warned that contravention of the above rule nders them liable to penalties of up to JD. 10,000 per ship.

EVELOPMENTS: *Development Projects:*

1. Erection of a new Ro/Ro passenger terminal (completed).
2. Erection of a berth to serve the Ro/Ro passenger terminal (completed).
3. Developing Port's communication system and the coastal station (completed).
4. Project of prevention of pollution and firefighting (under consideration).
5. Computerisation is underway.

PMASTER'S REPORT: July 1992.

Pilot is available throughout 24 hours to take vessel to anchorage or erth.

There are 8 designated anchorage spots. Any other vessels have to rt, if not berthing.

Health officials and Agent board whilst vessel is drifting.

Vessel's cargo was 13,000 tons of bagged sugar.

UTHORITY: The Ports Corporation – Aqaba, P.O.Box 115, Aqaba, rdan. *Tel:* 314024/8. *Telex:* 62262, 62352 Port Jo, 62235 Radio Jo. x: 316204. *Cables:* Port, Aqaba. *Contact:* Dr. Duraid Mahasneh, ector General.

NOTES

Please also advise Shipping Guides Ltd.

Kenya

MOMBASA: 04.04 S. 39.40 E. (See Plan)

DOCUMENTS:
Health Certificates: Forms obtainable from Pilot.
6 Crew Lists.
10 Passenger Lists.
Dangerous Cargo Lists.
Ship's Register.

Shipmaster's Report: 1981.
Declaration of Health (Form Med-284).
Port Health Clearance of Ships (Form GPK-160).
Set Vaccination Lists.
4 Crew Lists.
4 In-transit Passenger Lists.
4 Landing Passenger Lists.
Arrival Declaration for Passengers (Landing Only) (Form F1).
Stores List (Form C7).
Crew Declarations (Form C8).
Parcel Lists (Form C3).
Ship's Register (Copy).
Ship's Record & Master's Report (Form KPA/Rev. 92) (to Pilot).
Shore Passes (Company Forms).
Arrival & Sailing Reports (Agency Forms).

Shipmaster's Report: April 1984.

Please note that the "East African Countries" (Kenya, Tanzania, etc.) Customs Union does not exist any more and separate Customs Declarations are needed for each country. Consequently Bonded Stores seal can be broken after Mombasa or Dar Es Salaam.

PILOTAGE: ETA through ships' Agents, 48 hours' notice. VHF Channel 12 (Mombasa Radio VHF Channel 16). Pilot boat 72 ft. launch, international orange hull, white superstructure. No signals for Pilot – call on VHF Channel 12 (Mombasa Pilots) or by signal lamp to lighthouse. Pilot boat position 1 mile outside "Turning Buoy" on Ras Serani leads (301°). No special bad weather regulations. Pilot ladder 6 ft. from water – must have manropes – lit at night.

Tankers: For deep laden tankers, Pilot boards 1 hour before HW. Because of strong currents, deeply laden tankers must not attempt to "close" in before sighting pilot launch. Good lee and some headway recommended.

Special attention is drawn to the fact that ships bound for Kipevu must be in the agreed pilot embarkation position at the agreed time. The time agreed is chosen, such that, ships may transit the dredged channel with maximum advantage of the rising tide and arrive off the berth just before the ebb sets in. At that moment only little time is left to position the vessel and tie up sufficient moorings to hold vessel on to the jetty face, before the force of the ebb, diverted to an abeam direction by the jetty causeway, comes to bear on the ship's side.

Distance to Shimanzi Jetty, about 6 miles.
Distance to Kipevu Jetty, about 7 miles.

ANCHORAGES: No safe outer anchorage.

RESTRICTIONS:
Tankers:
1. By day: Max. length 850 ft.
   By night: Max. length 680 ft.
   Trim to be between 4 ft. to 6 ft.
2. Restrictions for night movements for Crude Oil or Black Oil ballasted vessels up to 850 ft. LOA provided: (Rigid requirements.)
   (a) movement takes place on last 3 hours of flood tide;
   (b) all anchorages between berth and sea are vacant;
   (c) the Duty Pilot holds a Master's Certificate;
   (d) ballast draft to be 18 ft. forward, 22 ft. aft.

No night movements are permitted for Low Flash White Oil product vessels. Masters of vessels ready to sail at night are strongly advised to notify the Authorities of the time of sailing; the vessel is to be ready to sail before 1600 hrs. and preferably before 1500 hrs. of the day in question.

This should be done by Radio direct to the Chief Pilot and through Agent. The Agent must also make the request in writing to the Harbour Authorities so that proof of requirements exists.

This is a standing regulation.

MAX. SIZE: Length 850 ft. Draft 43 ft. 06 in. Also see "Restrictions", "Berthing" and "Tankers".

HEALTH: Radio Port Health Officer, Mombasa, giving last port of departure, ETA Mombasa, condition of crew, any sickness on board, passengers. Must have "Q" Flag until doctor visits vessel.

RADIO/VHF: Mombasa Radio Coast Station M/F, H/F, W/T & R/T and VHF R/T Services:

Station 5ZF (W/T) 500 – 524 kHz; traffic list 0100, 0500, 0900, 1300, 1700, 2100; Continuous watch; listening freq. 500 kHz.

Station 5ZF2 (W/T) 8710.4 kHz; traffic list 2018; schedules 2018 –2030, OBS only 0080 – 0030, 0600 – 0630, 1200 – 1230, 1800 – 1830; listening freq. 8354 – 8374 kHz.

Station 5ZF3 (W/T) 13065 kHz; traffic list 0448, 0830, 1518; schedules 0448 – 0530, 0830 – 0900, 1518 – 1545; listening freq. 12531 – 12561 kHz.

Station 5ZF4 (W/T) 17175.2 kHz; traffic list 1248; 1248 – 1315; listening freq. 16708 – 16748 kHz.

Station (R/T) 2595, 2181 kHz; traffic list 0603, 1203; schedules 0600 – 0630, 1200 – 1230; continuous listening watch outside schedules 2182 kHz; listening freq. 2182 kHz.

Station (R/T) 4409.4 kHz; traffic list 0533, 1303; schedules 0530 –0600, 1300 – 1330; listening freq. 4104.4 kHz.

Station (R/T) 8805.6 kHz; traffic list 0633, 1233; schedules 0630 –0700, 1230 – 1300; listening watch on 8255.6 kHz; 0330 – 1530 listening freq. 8255.6 kHz.

Mombasa Radio also provides continuous R/T service on VHF benefit of ships in and around Mombasa within radius of 30 Channel 16 for calling and Channels 26 and 27 for working. Al in GMT.

TUGS: 3×4,000 h.p. Tugs join vessel inside harbour between Fe Kilindini Reef. Tug lines no additional charge.

BERTHING: All berths fendered. Nos. 8, 9 and 10 and Shiman Terminal berths, no berthing on ebb tide, with range of 6 ft. or Kipevu Oil Terminal berthing on first of ebb with tankers over 65

Draft alongside	Nos.	1 to 5	32 ft. at datum
"	"	7	32 " " "
"	"	8	31 " " "
"	"	9	34 " " "
"	"	10	31 " " "
"	"	SOT	32 " " "
"	"	11 to 14	30 " " "
"	"	16 to 18	36 " " "
"	"	Mbaraki	36 " " "
"	"	KOT	44 " " "

Draft in Buoys varies from 24 ft. to over 60 ft. at datum

Channel depth 40 ft. at datum, plus tide. Therefore, max. draft as 44 ft. as this is the controlling factor for KOT.

CARGO HANDLING: Berth No. 9 has been arranged for bulk exp soda ash. Berth for Roll-on/Roll-off traffic operates at Berth No Container berths at No. 16, 17 and 18. One 40 tonne container at No. 16. 3 ship-to-shore gantry cranes, 11 rubber mounted yard cranes and 2 rail mounted gantry cranes available. Also "Developments".

Mbaraki cement berth for bulk export of cement clinker and autom loading of cement in bags, also used for bulk import of coal.

Shimanzi oil terminal now handles all imports of bulk vegetable well as all other oil products except crude oil.

Bulk Molasses exports handled at Berth No. 9 and Mbaraki.

Bulk cargoes are at present handled by grabs, railway wagons lorries.

STEVEDORES: ETA preferably 48 hours in advance in order to ar gangs. Advisable notify Harbour Master ETA and also give quant cargo to be loaded and/or discharged and other matters of import

Working Hours: Weekdays: 3 shifts, 0700 – 1500, 1500 – 2300 2300 – 0600. Saturday and Sundays: One shift, 0700 – 1500.

Stevedoring carried out by Kenya Ports Authority.

MEDICAL: In emergencies necessary to receive advance no Hospital facilities available. Inoculations required – yellow (endemic zones in Africa and South America), cholera (all ships Asia).

TANKERS: Discharge and load white oils at Shimanzi. Discharge load Heavy oils at Kipevu.

Shimanzi Oil Terminal: T-head jetty with 200 ft. long berthing h Depth alongside 32 ft. LWOST. Bunkers and fresh water available

Kipevu Oil Terminal: T-head jetty with 225 ft. long berthing h Tankers up to 65,000 d.w.t. berth at dolphins alongside jetty head; alongside 44 ft. LWOST. Max. length 820 ft. Max. draft 44 ft. (over by arrangement). Slop reception facilities for 3,000 tons.

At Kipevu, tankers normally berth starboard side to at slack tide the beginning of the ebb. Masters should assist Pilots to moor as qu as possible, in view of the abeam current in a direction off the which is created by the jetty causeway configuration. This current increase with the ebb tide and ships with all wire moorings are adv to use their first-ropes-ashore with priority. Mooring launches are powered and can only handle 1 wire at a time, and mooring dolp are not fitted with winches and require manual handling of wires. In of the above, and in view of the accurate positioning required to com to chiksan arms, it is vital that the ship be brought against the brea dolphins as soon as possible.

In cases where vessel's mooring is delayed by whatever reas Pilots may require extra tugs to assist in keeping the ship alongsi

Report:

Approaches: The approaches to Mombasa either from North or S must be conducted with extreme caution as Andromache Reef on S.W. side and Levin Reef on the N.E. side and a great number of sha waters, all of them not detectable at HW, pose a threat to navigat

Consideration should also be given to the very strong East Af current, setting North, which reaches 4.5 knots during the months April to November then declining to about 1.5 knots in February.

It is strongly suggested that no attempt should be made to neg the approach to the turning buoy without the Pilot on board, and the positioning of the ship on the leading line to approach the tu buoy be taken at least 1.5 miles from the turning buoy, to pro evaluate the drift.

The suggested waiting area is in Lat. 04° 04′ 12″ S. Long. 39° 42′ 12″ E. in about 20 fathoms of water.

Anchorages: (Outside). A suggested anchorage postion is in 04° 06′ 12″ S. and Long. 39° 42′ 12″ E. (same as suggested wa area). The anchorage is not sheltered, rather exposed to currents, and sea, and bottom holding capacity is doubtful.

Anchoring is not suggested unless the ship has to wait for a period of time. In this case, Pilots should be consulted on VHF Cha 12 for the most suitable position.

Anchorages: (Inside). There are 6 approved anchorages in the port 3 of which are located between Ras Mzimba and Kilindini Reef. remaining are situated respectively 2 in Port Kilindini and 1 in Port

The suggested anchoring point for all of them is along the lea line.

Tankers are usually not allowed to anchor inside the port, excep short waiting periods. VLCCs are sometimes moored on buoys to berth.

Pilotage: Pilots hold Master's Certificate of Competency. Only Senior Pilots with Master's Certificates and at least 1 year's experience as Pilots at Mombasa Roads are authorised to Pilot large ships. There are currently 12 Pilots employed in Mombasa.

Some delays in obtaining the Pilot can be expected due to shortage of Pilots.

Pilots board the ship approximately in Lat. 04° 06′ 12″ S. and Long. 9° 42′ 12″ E. (waiting area) or up to 1.5 miles from the turning buoy, from an orange hull cutter with white superstructure on which 'Pilot' is painted in black.

When leaving the port, during the S.W. monsoon period with heavy swell affecting the port entrance, the Pilot disembarks just after the Ras Serani turn, before the turning buoy, but may be retained past turning buoy.

Both pilot hoist and pilot ladder are acceptable for boarding and leaving the ship although the ladder is preferred. Manropes obligatory.

Mombasa is a natural port and very well protected where navigation must be conducted with the utmost care and precision.

The port has recently been dredged to permit entrance by vessels with 1,100 ft. LOA.

Chart B.A. 666 is very well detailed and meets all necessary requirements for a safe in-port passage. A very recent Hydrographic Survey following major dredging activities will be added on a New Edition due 1985.

When the ship is set on the approaching leading line, up to the turning buoy the navigation should be checked with utmost care as this leading line's sensitivity is rather poor, since the 2 Mackenzie Pt. beacons are too close to each other.

After having rounded the turning buoy navigation proceeds on the leading line 301° and in the area South of Ras Serani, the ship has to make a sharp turn to West to proceed on course 238°. In this turning area tidal currents set North and a good berth must be given to shallow waters, marked by a buoy which is well inside the 6 fathom line.

When on course 238° the ship approaches the narrowest passage in the port, about 600 ft. wide. This passage is marked by a buoy on the South side of the channel and a beacon on the North side.

After Ras Mzimba, when on course 309° another narrow passage must be negotiated before entering Port Kilindini. This passage, about 00 ft. wide, is usually well marked.

After this passage, navigation up to the oil jetty does not present any particular difficulty.

After Ras Serani up to Port Reitz the tidal currents run in the same direction as the channel.

The port navigation is controlled by VHF from the Harbour Master's office.

Shoals in the port area are marked by beacons. It may occur that some of them are missing without any warning. Caution should be exercised as in some areas leading line beacons could be obscured by growing vegetation or by anchored ships.

Also see "Shipmaster's Report" dated August 1993.

DENSITY: 1025.

FRESH WATER: Available at all berths; in stream ex-tug at Harbour Master's discretion or barge of 300 tons capacity. 30 t.p.h. on quay.

FUEL: *Main Quay Berths:* Marine fuel oil, viscosity 1500 secs. Marine diesel fuel. Gas oil cannot be delivered by pipeline at these berths but delivery can be made by bulk lorries up to only 10 tons at extra delivery cost. Minimum 48 hours' notice required. Quantities of 10 to 30 tons can be made by rail tank wagon if 48 hours' advance notice given. Thin fuel oil viscosity below 1500 secs. can be delivered at all berths through Fisher blender. Only 1 Fisher blender available and can deliver fuel to only 1 vessel at a time.

Shimanzi Oil Terminal: All grades, i.e. fuel oil, marine diesel, gas oil and thin fuel oil (through Fisher blender).

Cased Oil Jetty: Only marine diesel and gas oil can be delivered at this jetty.

Kipevu Oil Terminal: Only fuel oil of viscosity between 1500 secs. and 3500 secs. available. Fuel oil viscosity below 1500 secs. not available. At least three days' clear notice required by EA Oil Refineries for arranging bunker delivery. Not possible to deliver any marine diesel or gas oil either ex pipeline or rail tank-wagons/bulk lorries at this berth.

CONSULS: The following countries are represented in Mombasa: Belgium, Denmark, France, Germany, Greece, India, Italy, Netherlands, Norway, Sweden, USA.

REPAIRS:

1. See "African Marine" below.
2. Helmaco Engineering Company Ltd., P.O. Box 99111, Mombasa. Tel: 316776/7 or 316051/2. Telex: 21003, 21045 A/B COMARCO. Almost every aspect of repair work of vessels afloat can be undertaken. Slipway for small vessels.
3. Divecon Limited, P.O. Box 99111. Mombasa. Telephone and telex as for Helmaco. Underwater cleaning and repairs undertaken.
4. Comarco Communications Ltd., P.O. Box 99111, Mombasa. Telephone and telex as for Helmaco. Marine electronic repairs of all kinds carried out.

DRY DOCKS:

African Marine Dry Dock:

Principal Dimensions:

Length	590 ft. 00 in.	180.00 m.
Entrance width	80 ft. 10 in.	24.75 m.
Dock width	86 ft. 00 in.	26.40 m.
Minimum water depth LWS	13 ft. 00 in.	4.00 m.
Maximum water depth HWS	26 ft. 00 in.	7.90 m.

Cranage: 1×30 ton fixed, adjacent to the dock gate.
1×7 ton mobile on rails which can traverse the full length of the West side of the dock.
1×5 ton mobile on rails which can traverse the full length of the East side of the dock.
1×5 ton fixed at the jetty.
1×7 ton mobile.
1×12 ton mobile.

Berths: One piled jetty capable of mooring ships of up to 280 ft. length overall, with certain draft restrictions. A second berth capable of taking ships of up to 300 ft. length overall situated at the dock gate entrance for all but very deep drafted vessels.

Slipways: Two slipways capable of slipping barges, lighters and other small craft.

Tugs and Harbour Craft: For towing and transport. Paint pontoons, barges and catamarans, welding generators and air compressors (either self-propelled or 'dumb') which can be berthed alongside a 'gash' barge and a barge containing workshop facilities.

Electrical Shop: A fully equipped workshop (A/C and D/C).

Carpenter's Shop: Fully equipped to carry out all types of work.

Foundry: All types of castings in cast iron and non-ferrous metal. Maximum single pour in cast iron normally 15 c.w.t. with larger pours by special arrangement.

Paint Shop: All types of ship's paintwork.

Design Office: Chief Draftsman and Design Draftsmen undertake all types of work.

Air Conditioning and Refrigeration Workshop: Specialises in the installation, repair and servicing of General Electric air conditioning units and ship's refrigeration equipment.

General Labour: Gangs of men for cleaning, storing ship available at short notice.

Power Supplies: A/C and D/C power supplies are available at the alongside berths. Two power barges are available which contain: 1×400 KVA, 440 volt, 600/S 3-phase diesel generator; 1×210 KVA, 440 volt, 60 C/S 3-phase diesel generator; 3×60 kW, 220 amp 220 volt D/C diesel generators.

Machine Shops: Comprehensively equipped to handle all types of engineering work.

Plate Yard: For all types of ship repairs, ship construction and steel prefabrication work. A blacksmith's shop for forging and smithying work and a shop for sheet metal work.

Welding Shop: Electric arc welding, both in shop and in the port area. Approved to Lloyd's Register of Shipping standards.

GANGWAY/DECK WATCHMEN: Watchmen available for gangway and deck and recommended.

OPENING/CLOSING HATCHES: Normally done by stevedores except MacGregor type hatches.

CERTIFICATES: Normal port requirements for safety cargo equipment.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes for each crew member for 8 days. Wine and/or Spirit, 8 small bottles of beer for each crew member for 4 days.

CARGO GEAR: All cargo gear supplied by stevedores.

REPATRIATION: Possible. Facilities available.

AIRPORT: About 7 miles from port. Served by regular airlines.

TIME: GMT plus 3 hours.

HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Labour Day (1st May); Madaraka Day (1st June); First Monday in August; Kenyatta Day (20th October); Independence Day (12th December); Christmas Day; Boxing Day (26th December).

Also for persons belonging to Islamic Faith: Idd ul Azha and Idd ul Fitr. Christmas Day is normally only holiday on which port closed except for necessary pilotage of ships in and out and for dealing with mails, passengers and their baggage, livestock and perishables. On other public holidays restricted working at Mombasa may be carried out at overtime rates. Overtime rates also apply on Saturdays after 1500 hrs. and on Sundays, and to third shift between 2300–0600 hrs.

POLICE/AMBULANCE/FIRE: In Port Area – Police 567 444 and 374; Ambulance 33; Fire 333.

TELEPHONES: Telephones supplied on board. Charges include cost of local calls. Telephone essential per port regulations.

SERVICES: All solvents for tank cleaning available. Repairs to Gyro compass, radar and most other electronic aids to navigation. Compass adjusting by arrangement with port.

SHIP SUPPLY SERVICE: Kenya Ports Authority, P.O.Box 95009, Mombasa – Kenya. Tel: 312211. Telex: 21243 Bandari. Cables: Kenports.

Private Organisations:

Comarco Ltd., P.O.Box 99111, Mombasa – Kenya. Tel: 316776/7, 315319. Telex: 21245 Comarco.

Murri International Salvage Company, P.O.Box 82345, Mombasa – Kenya. Tel: 20822/3 – 24 hours. Tel: 24912 – Office hours. Telex: 21215 Kboat.

Allied Oil Services, P.O.Box 99570, Mombasa. Tel: 315627.

SHORE LEAVE: All crew members allowed ashore and to travel except those from Socialist countries who must stay on Mombasa Island.

IDENTIFICATION CARDS: Port passes issued by the Port Authority.

GARBAGE DISPOSAL: Drums provided alongside. Contact Tel: 312211 for details and charges.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: The Missions to Seamen.

CURRENCY: Kenya Shillings (KSH).

PORT REGULATIONS: White tankers and vessels carrying explosives enter port daylight only. No vessels carrying explosives or dangerous cargo allowed to berth at Main Quay.

DELAYS: Usually no waiting days.

NOTICE: *From the General Manager, East African Oil Refineries Ltd. To Ships' Masters.*

Spillage of Oil and Air Pollution:

I would like to draw your attention to the serious consequences which will arise from any spillage or discharge of oil into the waters of Kilindini Harbour. This part of the Kenya shoreline, with its famous coral reef, is an extremely beautiful and popular tourist attraction as well as providing a means of livelihood for many local people.

Any spillage of oil can harm the environment and raises a great deal of criticisms from the residents of the area. The same applies to excessive funnel smoke.

In the event of any spillage or leak from ship or jetty facilities, ship's officers should immediately warn refinery personnel, who will instigate emergency measures. If there is any delay in notifying the refinery, then any oil spillage or pollution into the sea must be reported to:

(1) Ras Serani Lighthouse (Mombasa Port Control) manned 24 hours. Telephone Mombasa 312895 (21211 ext. 357 office hours only). VHF Radio Channel 12.

(2) Manager Marine Operations Kipevu, Office hours telephone Mombasa 24864 or 312211 ext. 259. Other times telephone Mombasa 312895 or through signal station in (1).

I am sure you will agree that both you and your staff as well as ourselves should do all that we can to protect this part of the environment against pollution. Moreover, it is a firm belief that we should try our utmost to avoid adverse publicity for the oil industry of which we are both part.

NOTICE: *Notice from ship's Agent to Masters:*

Stowaways from Mombasa:

We wish to inform you that stowaways from the Port of Mombasa are a very serious problem and we have had a number of vessels leaving Mombasa with half a dozen stowaways on board causing the Owners considerable expense and inconvenience.

Please, therefore, take every precaution to ensure your vessel is not boarded by stowaways whilst in Mombasa. We would suggest you employ shore watchmen to guard the vessel and also perhaps to have members of your crew on duty at all times to protect the ship. Please, just before sailing, carry out a thorough search of the whole ship with your crew and the watchmen. We also suggest that once you have sailed and you are outside the port limits, you steam around the area for a few hours to give any stowaways the impression that the vessel is fully underway, and again during this period have your crew thoroughly search the ship.

If stowaways are found on board of non-Kenyan nationality then the authorities do not permit them to be landed in Mombasa. Most of the stowaways from Mombasa tend to be Tanzanians.

We would stress again that stowaways are a serious problem in Mombasa and it is up to you to ensure your vessel does not sail with stowaways on board. Please inform your crew about stowaways and that they should be on the look out at all times for any suspicious persons on board.

DEVELOPMENTS: New equipment installed includes additional gantry cranes (5×15 tons capacity) for container handling at Mombasa and inland container depot, now open at Embakasi, Nairobi.

Berths No. 16, 17 and 18 (total length 600 m.) have been modified to take the above mentioned cranes.

SHIPMASTER'S REPORT: July 1991.

1. The Approach Buoy is painted red and white (Fl. W. 5 s), and is located in position Lat. 04° 05′ 34″ N., Long. 39° 42′ 46″ E.
2. Strong N.E. currents in the pilot boarding area sometimes reach 5 knots. Pilots are often late to meet the vessels, and they reduce the speed of a pilot launch and order vessel to reduce speed to dead slow. This should not be done, as current will rapidly drive vessel on to the shoal to the East.
3. The rainy season lasts from May to June.
4. All berths are supplied with good fenders. A majority of the berths are provided with shore cranes.
5. In order to avoid filtering of stowaways on board, I recommend taking a local watchman.
   When staying at the roadstead at night time, a vessel should use maximum lights, including lamps for lighting ship's hull, and have 2 seamen on deck (forecastle and stern). The deck itself should be visible to the watch officer.

During our stay in the port, cases of theft took place on several vessels.

SHIPMASTER'S REPORT: August 1993.

Mombasa Approach Recommendations:

1. Arrive about 30 minutes earlier than the pilot boarding time.
2. Make a run along the harbour entrance on a course of approximately 212° from a position of approximately 2 to 3 miles off Ras Iwetine.
   This is extremely useful as you can familiarise yourself with the sightings, e.g. determine the strength of the current, check on the position of the entrance buoys and check on your approach to pipelines when on the leading line.
3. After passing the leading line of Ras Serani, set course for a position at least 3 miles S.E. of Buoy No. 2 and take the Pilot on board there. If you take the Pilot on board closer than that, first proceed to seaward again.
4. Go in at full speed, thus making the angle of compensation for the current as small as possible.
5. Determine a point of 'no return'.

We took the Pilot on board 4 miles S.E. of Buoy No. 2 on a Southerly heading.

I let the Pilot do the line up on the leading line, and after he started compensating for current with only 4°, I took over and took the ship in myself until the effect of the current could no longer be felt. This was about 2 cables to the seaward of Buoy No. 2.

We passed Buoy No. 2 with a speed of approximately 12 knots.

Buoy No. 1 and the turning buoy were not there. All other buoys were in position (this was also reported by the Harbour Control).

We calculated the current at that time to be approximately 2.5 knots.

As for the 10.20 m. depth near the leading line – we passed very close to this spot, but never had less than 2.0 m. of water under the keel.

When asking the in-going Pilot, he stated 'plenty of water'.

The out-going Pilot stated that the whole area between Buoys No.1/2 and 3/4 had been dredged to 13.0 m. Taking into account that we never had less than 2.0 m. under the keel, the vessel's speed and squat, this seems to be a possibility.

Note: I see Mombasa as a very high risk port for vessels of this size (80,000 d.w.t.), due to the very small margins of safety.

BANABA (Ocean Island): 00.52 S. 169.35 E.

PHOSPHATE MINING HAS CEASED. ALL INSTALLATIONS HAVE BEEN DISMANTLED.

TARAWA (Betio): 01.25 N. 172.54 E. (See Plan)

DOCUMENTS:
Customs: Boards vessel at anchor.
Clearance from Last Port.
4 Crew Lists.
3 Passenger Lists.
1 Stores List.
1 Ship's Report Inward.
1 List of Unmanifested Cargo.
1 Crew's Stores List.
1 Marine Form.
Health:
Pratique granted by Health Department who board at anchorage with Customs.
Vaccinations against Cholera (if required can be carried out).
Name of ports visited and date of arrival at respective ports.
Immigration:
2 Crew Lists.
2 Passenger Lists.
Last Port of Call.
Next Port of Call.
Passports.
Final Destination.
Agent:
3 Bills of Lading.
5 Manifests.
Last Port.
Next Port.
1 Crew List.
1 Passenger List.
Agriculture:
Plants Certificates.
Animal Certificates.

PILOTAGE: Pilot available and must be informed of vessel's ETA 24 hours in advance through the Agent. Entering vessels are strongly advised to await Pilot one mile West of Fairway buoy. Pilot can be contacted by VHF on Channel 16. Pilot boards from small tug, painted yellow, which flies "H" flag at stern. Buoys in lagoon are likely to be missing. Also see "Radio".

ANCHORAGES: See Chart BA. 3269. Betio anchorage main anchorage. Inside the lagoon, safe in all weather although in rare strong winds it may not be possible to work vessel in the lagoon.

RESTRICTIONS: Vessels arriving after 1800 hrs. are advised not to enter the passage and should drift 5 miles away from the entry point.

MAX. SIZE: Any vessel drawing up to 26 ft. may enter at LWOST and 30 ft. HW. Length and breadth are not critical, however vessels over 300 ft. to navigate with extreme care.

HEALTH: See "Documents".

RADIO: Tarawa Radio (T3K) on 500 kHz, 2182 kHz and 6215 kHz. Contact Senior Pilot 4 hours before arrival on VHF Channel 16. Pilot will arrange all formalities, Customs, Health, stevedores, etc.

RADAR: No port radar service.

TUGS: 3 tugs (available for towing barges).

BERTHING: None (lighterage port).

CRANES: 1 × 20 ton container crane on wharf (stationary). 2 × 5 ton mobile cranes.

STEVEDORES: Available 24 hours. Discharging rate 12 t.p.h. Labour available weekends and holidays if required.

MEDICAL: Medical attendance could be obtained through the Agent during working hours. Hospital available where suspected disease could be medically examined.

TANKERS: Vessels drawing up to 14 ft. can anchor close to the jetty where lines are connected to shore pipes. Maximum working pressure 50 lb. No tanker berth and vessels must provide lines. Floats can be provided by Mobil Oil Agency with labourers if required.

DENSITY: Sea Water.

FRESH WATER: Available in limited quantities in an emergency only and delivered by water barge. Cost of water A$5.00 per 500 gallons. Delivery charge A$3.90 per 200 gallons. Water may be contaminated.

FUEL: Diesel only (in very short supply), in restricted quantities and delivered by barge in tanks. Refuelling cost A$11.20 per 500 gallons.

FIRE PRECAUTIONS: No special precautions other than normal precautions for tankers.

CONSULS: British and Australian High Commissioners and South Korean Honorary Consul stationed at Bairiki (Also see "General").

REPAIRS: Small but well equipped and capable workshop for light repairs.

DRY DOCK: Small patent slip, capable to slip ships of 150 tons displacement.

SURVEYORS: Marine Superintendent of the Ministry of Transport and Communications will also act as Lloyd's Sub-Agent and cargo surveyor.

WATCHMEN: Not required.

HATCHES: Opened and closed by Stevedores.

CUSTOMS ALLOWANCES: 25 cigarettes per day and 6 cans (310 ml.) beer per day.

REPATRIATION: All facilities available for crew changes.

AIRPORT: 13 miles from anchorage point. Air service to Nauru on Wednesday only, by Air Nauru, arrives from Nauru 0900 hrs. and departs 1000 hrs.; and to Honolulu once a week by Air Tungaru (the national airline) via Maduro, Marshall Islands.

TIME: GMT plus 12 hours.

HOLIDAYS: New Year's Day (January 1st); Good Friday; Easter Saturday; Easter Monday; Public Holiday (July 14th); Youth Day (first Monday in August); Christmas Day (December 25th) and Boxing Day (December 26th). No cargo work can be arranged.

POLICE/AMBULANCE: Police and Ambulance 999.

SERVICES: Ship's laundries.

BANK: Bank of Kiribati, P.O.Box 66, Betio. Tel: 26124.

SHORE LEAVE: All crew are allowed to go ashore after inward clearance is granted.

IDENTIFICATION CARDS: No shore passes issued. Passport or Seamen's Book are not required when on shore leave.

REGULATIONS: No food waste, ballast, engine oil to be discharged in the lagoon.

DELAYS: Expected delays can be caused by heavy rain and port congestion.

GENERAL: Tarawa is the main port of entry for Kiribati. Other entry port is Christmas Island.

Tarawa Atoll is roughly triangular in shape. A number of islets, separated by shallow passages, dry at low water, form the Southern and Eastern sides of the Atoll. The Eastern side is approximately 19 miles North and South and the Southern side is 16 miles in an East-West direction.

Causeways link up the islets along the Southern side and part of the Eastern side. On the Western side there is a barrier reef, most of which is sunken, enclosing a large lagoon navigable by vessels drawing 26 ft. at LWOST and 30 ft. at HW.

The President's and Main Government Offices are at Bairiki Islet which is connected by causeways to the Tungaru Central Hospital, Government Schools at Bikenibeu and the international airport at Bonriki and the Port of Betio.

DEVELOPMENTS: "L" shaped jetty with length 50 m. and width 8.0 m. at head to be constructed at North end of Eastern Mole. Depth alongside 5.5 m.

AUTHORITY: Ministry of Transport and Communications, Marine Division, P.O.Box 506, Betio, Tarawa, Republic of Kiribati. *Tel:* 26468. *Telex:* 77022 Mincomm. *Cables:* Harbour Master, Tarawa. *Contact:* Captain B. Highland, Harbour Master and Marine Superintendent.

AGENT: Shipping Corporation of Kiribati, P.O. Box 495, Betio, Tarawa, Republic of Kiribati. Tel: 26525, 26521. Cable Address: Portco Tarawa. Contact: Captain T. D. Murdoch, General Manager.

GENERAL

ETA PROCEDURE: The Notice of ETA is applicable to the Owners (operators and charterers) and the Master of foreign vessels calling at ports of the D.P.R.K.

1. The Owners who fix vessels every month, provide the monthly fixture of ships to the Ocean Shipping Agency of the D.P.R.K. (Head Office) and Branches (herein after called the Agent) before 25th of the previous month and advise immediately if any change.
(a) Vessel's name, flag and call sign.
(b) ETA and port of call.
(c) Description and quantity of discharging and loading cargo.

2. The Owners send the Agent the following documents before arrival in the port: (1) Bill of Lading 3 copies, (2) Manifest 3 copies, (3) Stowage Plan 3 copies, (4) Charter party or handling terms, (5) Others if any.

3. The Owner or Master advise the Agent of the Notice of ETA at the Pilot Station 10 days and 3 days, 24 hours, 12 hours and 4 hours prior to arrival.
(A) 10 days' Notice:
(a) Vessel's name, flag and call sign.
(b) ETA and port of call.
(c) Vessel's particulars (g.r.t., n.r.t., d.w.t., number and size of hatches, derricks and their capacity, LOA, breadth, draft.)
(d) Numbers of crew, passengers and nationality.
(e) Description and quantities of discharging/loading, details of heavy lift if any.
(f) Copies of charter party or handling terms.
(g) Provisions, ship's stores, repair.
(h) Flag of the D.P.R.K.
(i) Last port and ship's position.
(j) Full address of Owner or Operator, payer of disbursements and banker.
(k) Others if any.
(B) 24 hours', 12 hours' and 4 hours' Notice of ETA at the Pilot Station; Ship's position and speed only.
(C) The Master should advise the Agent of the ship's position and the time when she passes the following line.
(a) Korea East Sea.

Lat. 42° 24′ N.,	Long. 131° 10′ E.
Lat. 41° 43′ N.,	Long. 132° 20′ E.
Lat. 38° 00′ N.,	Long. 130° 00′ E.
Lat. 38° 00′ N.,	Long. 128° 45′ E.

(b) Korea West Sea.

Lat. 39° 50′ N.,	Long. 123° 20′ E.
Lat. 37° 00′ N.,	Long. 123° 20′ E.
Lat. 37° 00′ N.,	Long. 126° 30′ E.

(D) The Master should navigate to the pilot station at least 15 miles from the coast after passing the above lines mentioned in item 3-(3).
(E) On arriving at the pilot station the Master should give the Agent the Notice and enter the port under pilotage.
(F) The Owner should deposit disbursement funds before ship's arrival at the port and inform the Agent of the following;
(a) Name, amount, date, No. and other details of T.T.
(b) Ship's name and port of call.

CHUNGJIN: 41.43 N. 129.42 E. (See Pl

DOCUMENTS:
8 Crew Lists.
2 Vaccination Certificates.
2 Lists showing currency, gold and valuables in possession of c members.

The following information should be radioed to Port Authorities be arrival:
Number and nationality of crew.
Name of last port.
Ports called at during last month.

PILOTAGE: On reaching North Korean waters, vessels required to a position report every 3 hours to KOSA Chungjin. Pilot and Authorities board in position 41° 30′ N., 130° 05′ E. where vess should await Pilot. Water depth too deep to permit anchoring.

ANCHORAGES: No possibility of anchoring outside harbour limits.

CLEARANCE: On arrival in port, the radar, echo sounder, main emergency transmitters and all optical equipment is sealed inspection team board the vessel to verify currency and valua declarations. Seamen's Books required to be stamped with landing p

BERTHING: Berth No. 1, max. draft 24 ft. Berths No. 2 and 3, max. 27 ft. Berths No. 4 and 5, max. draft 28 ft.

CARGO GEAR: Vessels loaded and unloaded by ship's gear. At Be 4 and 5 there is a conveyor belt facility for coal loading.

SHORE LEAVE: Seamen not allowed to visit other vessels, or le the harbour area.

Unauthorised money changing forbidden, and it is prohibited to t Korean currency out of the country.

No bathing in harbour area.

SHIPMASTER'S REPORT: December 1980.
There are 2 harbours in Chungjin, the Western harbour and the Eas harbour which are about 2.5 miles apart. Western harbour is mostl export of coal and iron and Eastern harbour for import of general bulk cargo.

The following port information is for the Eastern harbour:
Documents: Immigration, Customs and Quarantine Officials board vessel at the pilot station. The Korean Authorities bring on board th own forms for ship's stores, currency, valuables, binoculars, came etc., and fill these in by using the information contained in the s forms. However they also take the original of the ship's paper.
Papers required for entry:
5 copies Crew List (IMO Form).
1 copy Vaccination List (Cholera).
1 copy Crew's Effect Declaration (IMO Form).
1 copy List of Currency and Valuables (Free Form).
1 copy Ship's Stores Declaration (IMO Form).
1 copy Ports of Call List.
1 copy Maritime Declaration of Health.

A "General Information" sheet, containing such particulars as vessel's name, call sign, Port of Registry, official number and all the normal data contained in the ship's register, including cargo on board, amount and where loaded etc., was found to be of great help in filling out their forms and speeded-up the entry and clearance process. 5 copies of above should be made for distribution to Agent, Customs, Immigration, Harbour Master and Quarantine.

Master's Advice: It is important that all crew members strictly comply with the Rules and Regulations in Korea, especially concerning cameras and binoculars as photography and the use of binoculars is strictly prohibited in the harbour area as well as in the City and the surrounding area. If the Customs, during their second cabin check, find a camera or binoculars the matter will be treated very seriously.

For landing permit, Immigration will stamp the passports or the Seaman's books. However I managed to persuade the Immigration officer not to stamp the passports because of the trouble in certain countries when they see a D.P.R. Korean stamp but it took 2 days and higher Immigration Authorities to get this permission.

When filling out the Customs and Immigration Forms, the name North in North Korea should not be written on any of above mentioned forms or any other documents as well as on private letters. The Authorities don't accept a divided Korea and will cross out the name North, in any place it is written.

It is not necessary to take cash advance in Korean Won. American Dollars and Yen are most welcome.

Pilotage: Method of contact: VHF or radio contact not possible. Agent will inform the pilot station of vessel's ETA.

Boarding Position: Lat. 41° 42.8′ N., Long. 129° 50.5′ E. (4 miles S.S.E. of breakwater). Pilot is compulsory. Service Time: Daytime only.

Anchorage: From 0.5 miles – 4 miles S.S.W. of Chungjin Harbour in 5 - 30 fathoms. Good anchorage in mud/sand and protected from Northerly wind. However during strong South-westerly wind there is a heavy sea and swell.

Approaches: Simple and straightforward. Practically due North along Korea's East coast until abeam of Cape Kozakof, then straight for the Pilot boarding position or anchorage.

Restrictions: Entry: 30 ft. even keel on entry to the harbour.

Special Regulations: Vessel received orders by cable to navigate 15 miles off the Korean D.P.R. coast and pass through position41° 38.9′ N., 129° 52′ E. en route to the pilot boarding position.

Max. Size: Max. draft alongside at the grain and general pier was 28 ft. and in the harbour 30 ft.

Health: Radio Pratique not available.

Radio: Contact through Congjin Coast Radio Station, call sign "HMC" frequency; Call on 500, work on 428 kHz., ships work 425 kHz. Traffic list every hour plus 20 minutes. After initial call on 500 kHz., usually followed by QRU. MF only.

After arrival, radio station on board is sealed and there is no VHF in the port. However after arrival in the port, Agent will bring on board a small transmitter/receiver for daily communication between Master and Agent's office. The set working on 24 volts. Very few people speak English. I found only the Pilot and Agent had a fair command of English.

Arrival Notice: Five days then 72, 48 and 24 hours to Agent. Also 5 days and 3 days to receivers.

Tugs: Two tugs available, about 500 h.p. maximum. Tugs always take ship's line.

Berthing: Mooring Method: Vessels drawing more than 28 ft. must first lighten her draft at anchor in the inner harbour. Vessel is brought up in a North/South direction in the harbour and moored aft to the bollards on the breakwater with 4 lines and port and starboard anchor forward, 5 shackles in the water (Mediterranean Mooring).

Along the grain pier, which is only 150 m. long, a strong mooring is recommended partly because the after part of the vessel overhangs the end of the pier and partly because of the occasionally heavy swell along the pier.

Grain Wharves: Vessels only allowed alongside with draft of 28 ft., but a sounding with a line showed about 32 ft. It was not possible to get exact information of water depth alongside the general pier. I found the total wharves length to be about 1,500 m. The grain pier is 150 m. long. Certain wharves in the Eastern part of the harbour, which are shown on BA. Chart No. 1271, do not exist anymore as usable wharves.

Facilities for Bulk Carriers: There are a total of 8 cranes in the harbour, each of about 10 tons capacity. Two of the cranes are serving the grain pier and connected with a conveyor belt system. No difficulty with height of vessel.

Cargo Operations: At the harbour anchorage (Mediterranean mooring) the cargo is discharged by ship's gear. Stevedores operating the cranes. Operation is slow and there is often damage to the vessel with grabs due to inexperienced stevedores.

Two cranes serve the vessel alongside the grain pier. They are able to discharge about 3,000 tonnes per day but actual quantity discharged per day (taken over a 7 days period) was only 1,600 tonnes, mostly due to lack of stowage space, transportation problems and crane breakdowns.

Stevedores work 24 hours a day, 7 days a week.

The cranes bring the grain to a conveyor belt system which again brings the cargo to the store house. The store house has a maximum capacity of 12,000 tonnes.

There is a railroad system serving the grain and general pier. Stevedore damage must be reported to the foreman immediately. All damages are repaired before departure by shore repair workers.

Medical: Services available.

Density: 1026.

Fresh Water: Good quality fresh water available at the pier. Charge Won 2.75 per ton (U.S.$1.75). Fresh water can also be delivered by barge to the anchorage.

Fuel: Available but expensive.

Repairs: According to the Agent, all deck and machinery repairs can be carried out. I expect that to be correct as there is a big shipyard in Chungjin.

Surveyors: Local Surveyor only.

Customs: The Bonded Stores are not sealed but all cameras and binoculars are collected before entering the harbour and sealed in a locker. Radio room and echo sounder also sealed.

When the vessel has berthed alongside the pier, Customs will once more come on board and this time check thoroughly for binoculars and cameras throughout the ship. It is possible they will confiscate all cameras and binoculars found during the second check.

Time: GMT plus 9 hours.

Shore Leave: Crew members are not allowed outside the harbour area. Permission is only given for a visit to the Seaman's Club, just outside the gate, but only a walk, straight from the gate to the club. There is an armed guard at the gangway to whom crew members must present their Passport or Seaman's Book and also once more at the harbour gate. Shore leave is from 0800 hrs. to 2300 hrs. There is a new Seaman's Club near Western harbour (about 8 km. from Eastern harbour – by car about 10 minutes). Transportation to and from this club costs U.S.$7.00 per bus.

General: Current: Experienced a slight South-westerly set towards the shore in Kyongusogu Bay when approaching from the South.

Tide: Port not effected.

Charts: BA. 1271, 1316. J.A. 162.

Swell: A heavy swell can cause problems for vessels alongside the wharves, especially in July/August. At times the swell may cause vessels to leave the wharf and shift to the anchorage.

Distress: In case of distress a long blast followed by a short blast with the whistle and repeated 3 times, this will warn the Harbour Master who will take action.

Derat: Derat exemption certificate can be issued.

Laundry: Available and requires about 3 days. Laundry service is satisfactory.

Provisions: Available in limited quantities.

SHIPMASTER'S REPORT: January 1990.

Documentation/Officials: Quarantine and Immigration Officers board with the pilot. Documents necessary as per "Guide". In addition a blank form in English and Korean language is presented by Customs where Master should fill in number of cameras, binoculars, radios, tapes, televisions and sign. They also presented Korean forms for crew and ship's stores which Master only signed and attached IMO forms, which we already had prepared, without objection.

Four crew members are required to accompany the search party to search the deck, engine room, living quarters and provision stores. There is a representative of the Agriculture Ministry who inspects the dry provisions room for insects. They found 2 small cockroaches and ordered fumigation, which ship's crew carried out. All cameras and binoculars were placed under seal. Radio equipment, D/F, echo sounder were sealed but VHF and walkie talkies were not sealed and can be used throughout ship's stay at anchorage or alongside for daily communication with Agent. Bonded stores were sealed after berthing. There was no second search after berthing, only similar search prior to departure, where 2 Immigration Officers will remain onboard up to pilot station and disembark with pilot.

Pilotage: Pilot boards as indicated on the chart from a tug equipped with VHF.

Radio: Cable received from agents Korea Ocean Shipping Agency (KOSA) as follows: Please navigate 15 miles away from our coasts. Pass through 41° 23′ N., 130° 08′ E., thence to pilot station. Chongjin working frequency short wave as follows:

16,995 kHz. from 0900 hrs. – 1800 hrs. (local time).
4,231 kHz. from 0800 hrs. – 1800 hrs. (local time).
8,693 kHz. from 0000 hrs. – 2400 hrs. (local time).

VHF: Chongjin Port Radio and KOSA are both equipped with VHF. Contact can be established on Channel 16.

Berthing: Vessel berthed in Western Harbour.

Cargo Work: Shore cranes were used. Working 24 hours a day, 7 days a week. We loaded steel billets and all cargo arrived by rail. Any damage by stevedores will be repaired by them.

Medical: All crew to have valid health card. Injection for Cholera will be done onboard if required.

Costs: 5 Won for each injection, plus 5 Won for each new card plus 10 Won for Doctor's visit.

Fresh Water: Available alongside by hose provided by water company.

Costs: 2.50 Won per ton, plus supply fee of 1 Won per ton plus Winter charge of 20% (Holiday charge is 125% and night charge is 75%).

Fuel: We received 20 tonnes of diesel oil 7 days after request.

Costs: 980 Won per ton, plus supply charge of 3 Won per ton, plus commission.

Surveyor: D.P.R.K. Register of Shipping surveyor will attend on request.

Repatriation: A vessel in port sent 20 crew to Manila via Pyongyang.

Shore Leave/Shore Pass: An armed guard is on duty at the gangway at all times. I requested Immigration not to stamp Seamen's Books or passports, which they accepted. Ready made shore passes are issued without names, only numbers. There is a U.S.$100.00 fine if shore pass is lost.

Shore leave possible from 0900 hrs. to 2100 hrs., but only within harbour area. Crew can only visit Seaman's Club which is about 2 km. from the gate, by using the bus provided by the Seaman's Club, through shipchandler. Single trip costs 10 Won (U.S.$1 = 2.22 Won).

Excursion tours can be arranged by Agent to museum or hotel. Shopping only possible from Seaman's Club or hotel, although there is a shop in Agent's building. Agent advised me there is an Agent's branch office near East Port.

Provisions: Provisions are very cheap and can be obtained through shipchandler. The supply of fresh provisions is very limited.

HAEJU (Haijuube): 37.59 N. 125.42 E.

SHIPMASTER'S REPORT: August 1978.

DOCUMENTS: Same as Nampo, but Korean Forms must also be filled in on arrival.

PILOT STATION: B.A. Chart 1258. Situated between following points:

37° 40′ 30″ N.	125° 35′ 00″ E.
37° 42′ 00″ N.	125° 35′ 00″ E.
37° 42′ 00″ N.	125° 32′ 24″ E.
37° 40′ 30″ N.	125° 32′ 24″ E.

The ship should anchor and wait. It is imperative to anchor within Pilot Station Area, which is used by North and South Korea, otherwise the Authority will not board the vessel. Approaches to Haeju are not covered by B.A. Charts, Korean (Nos. 15–1354, 1328, 1329) not obtainable. Pilot boards together with Quarantine and Immigration officer. The inspection starts immediately, all crew must have Seaman Book for identification. Food stores and pantries also inspected. Pilotage is carried out depending on tide and ship's draft, daytime only. Berthing at slack tide. After berthing arrival inspection continues (Harbour Master, Customs, Coast Guard).

ANCHORAGE: Ships sometimes complete loading at the Anchorage in position 37° 55.5′ N., 125° 46′ E., depth 11.4 m., but probably swinging space for one ship only. Ships waiting for berth anchor in the vicinity of the wharf. With no chart it makes the situation difficult, as there are no lights or light buoys. Position only obtained by radar. One anchor used due to strong tide which sometimes reaches 4 knots.

ARRIVAL ADVICE: The arrival notice to be sent to KOSA Haeju giving all particulars same as Nampo, first contact via Haeju Coast Radio Station, call sign HMJ, to be made 48 hours before arrival. Earlier contacts via Shanghai Radio.

RADIO: Haeju Radio, call sign HMJ.

BERTH: Old berth described in China Sea Pilot, Vol. III, page 540. Extension works in progress. Shore cranes. Depth at low water about 6.8 m.

EXPORTS: Zinc concentrates, cement from the new factory connected with Port by conveyor belt.

FRESH WATER: From hydrant alongside, at anchor by barge (dredger).

FUEL: In restricted quantities, price unknown.

SERVICES: Provisions and Laundry, available through Seamen's Club.

AUTHORITY: Port Master and Harbour Master.

HEUNGNAM (Hungnam): 39.50 N. 127.45 E. (See Plan)

SHIPMASTER'S REPORT: November 1983.

PILOTAGE: The pilot station is at Lat. 39° 44.8′ N. and Long. 127° 41.0′ E. When arriving at this position and no Pilot is available, vessels are ordered to anchor. Ships are also ordered to navigate at least 12 miles off the coast.

ANCHORAGE: The anchorage is secure and safe with a depth of water of at least 36 ft., however soundings were unobtainable because of the sealing of all equipment.

If vessels arrive with a draft of over 25 ft., cargo is discharged into barges at anchor approximately 1 mile South of the breakwater.

The white light at the end of the breakwater can be seen at a distance of approximately 5 miles.

MAX. SIZE: The minimum depth in the harbour is 28 ft. and ships of up to 25 ft. draft are allowed alongside.

BERTHING: The length and direction of the quays etc. in the harbour are reasonably accurate as they were obtained using radar (See Plan).

The berths are used as explained on the plan. Also the two cranes at the Southern end of the Pier "D" are used for the export of bulk cement.

GARBAGE DISPOSAL: Service is available. One compulsory collection is required for each vessel. Charges vary with n.r.t., from 50 won to 300 won per collection.

WASTE OIL DISPOSAL: Service is available provided oil is in drums.

SEAMAN'S CLUBS: Hungnam Foreign Seamen's Club provides facilities such as shopping, football, other games, cinema and restaurant.

CURRENCY: Local currency is the Won. Exchange rate varies.

NAMPO (Chinnampo): 38.43 N. 125.25 E. (See P

SHIPMASTER'S REPORT No. 1.

ARRIVAL ADVICE: The following information should be radi KNSA Nampo before arrival:

(1) ETA Nampo Station, Lat. 38° 37′ 30″ N., Long. 124° 49′ 30
(2) Nationality.
(3) Gross Registered Tonnage.
(4) Net Registered Tonnage.
(5) Deadweight.
(6) Length overall.
(7) Height of Freeboard.
(8) Speed.
(9) Last Port of Call.
(10) Colour of ship's hull.
(11) Number of crew and passengers.
(12) Hatch Loading/Discharging cargo Plan.
(13) Draft.
(14) Ship's position together with ETA 24 hours before arrival w area connected positions Lat. 37° 00′ N., Long. 124° 30′ E., 38° 08′ N., Long. 123° 35′ E., and Lat. 39° 50′ N., Long. 124° Also vessel should advise position and time passing a connected lines.

DOCUMENTS:

8 Crew Lists.
2 Vaccination Lists.
2 Lists showing currency, gold and valuables in possession of
Bonded stores must be declared but not sealed.

PILOTAGE/ANCHORAGE: Pilot and Port Authorities (Quara Officer and Immigration Officers) board at position Lat. 38° 37′ 30 Long. 124° 49′ 30″ E. where vessels should anchor awaiting Pilot.

Night pilotage prohibited, according to port regulations.

CLEARANCE: After embarkation of Port Authorities at Nampo Sta the Radar, Echo sounder, VHF, DF, Radio Room and all o equipment is sealed. On arrival in Port, Customs Officers boar vessel and together with Immigration Officers search the whole sh

Seamen's Books required to be stamped with landing pass and are taken ashore by Immigration Authorities for formalities.

RADIO: Nampo Radio. Call sign HML.

BERTHING: Coal berth can accommodate vessels up to 20,000 d There are 2 conveyor belts for coal loading but 1 only can work time. Conveyor belts are not movable, the vessel has to shift. Ves loaded and unloaded mostly in the roads by ship's gear. There 3 other berths but have no information.

FRESH WATER: Only available by barge.

TIME: GMT plus 9 hours.

SHORE LEAVE: Seamen allowed to go ashore by boat or bus Seamen are not allowed to leave harbour area. In order to visit o vessels in port, application should be made to Immigration Authori

GENERAL: *Currency:* It is prohibited to take Korean currency out of country.

Bathing: Prohibited.

Fishing: Prohibited.

Provisions: Limited quantities available at the Seamen's Club.

SHIPMASTER'S REPORT No. 2.

Information covering Nampo, Democratic People's Republic of Ko previously known as Chinnampo. See in connection with this B.A. C 1257 and 1656, China Sea Pilot III.

The following general information was produced by the naviga officers of a vessel in 1974.

NAVIGATIONAL INFORMATION: Pilot boarding point Lat. 38° 37′ 5 Long. 124° 49′ 5″ E. Wreck at Lat. 37° 38′ 2″ N., Long. 124° 48′ 2 3 masts above water at all states of tide. Radar echo good at 6 mi Buoy – old position Lat. 37° 37′ 4″ N., Long. 124° 51′ 4″ E., moved Lat. 37° 37′ 2″ N., Long. 124° 50′ 7″ E.

Light Sei To – flash every 23 sec. Visible for 8 miles
Light buoy at Lat. 37° 37′ 4″ N., Long.124° 53′ 6″ E., flashes 18 sec
Light Shimai To flashes 18 sec.
Light San extinguished
Light Chiri extinguished
Light Hi To extinguished
Light at Lat. 38° 41′ 7″ N., Long. 125° 18′ 1″ E., (Bachishin) flas 30 sec.
Light at Nanryoki extinguished
Light at Lat. 38° 43′ 3″ N., Long. 125° 24′ 6″ E., extinguished.

PILOTAGE, ANCHORAGES, INSPECTION AND CLEARANCE: Pilot boarding point is at the same time the outer limit of Nampo Har and the clearing inwards point. To await Pilot and further instruct before proceeding into Nampo, vessels must wait here. Information be obtained via coastal radio Nampo (details in Nautical Wire Service Standing Instructions), VHF is not available.

The anchorage at the pilotage waiting point is good, and the bot is a thin layer of grey mud with clay underneath it. With wind from S.W., there is a slight swell. Depth of water between 25 m. and 2 vessels should anchor with a chain length of at least 100 m. on capstan and calculate adequate room for swinging, since there is a strong tidal flow at all states of the wind and weather, running u 4 knots according to our observations.

The Pilot comes on board with clearance authorities. As pilot c (also no VHF) a normal tug is used, which in Winter is also used a ice-breaker. The tug does not display a Pilot's flag, only the nati flag. The hull of the tug is black, superstructure white with large Ko characters on the front of the bridge. Pilotage only available d daylight hours.

At clearance inwards point (pilotage boarding point) all binocu including bridge binoculars, and photographic equipment is ga together and sealed for the total time in port. It is only released after the Pilot leaves the vessel on departure from the port. Likewise all echo-sounding, radar, direction finding equipment is sealed. The use of such equipment and filming and photography in Democratic People's Republic of Korea is completely forbidden.

From the clearance inwards point the journey to the anchorage in front of the town is usually at full speed for most of the way. The anchorage is selected by the Pilot. The Pilot gives a good impression and from our observations knows his job well. However, one can only expect very rudimentary English from him. The same applies to the clearance authorities who have only a very few words of English. Clearance proceeds slowly but is carried out very correctly.

GENERAL INFORMATION: When at anchor in front of the town, further official authorities come on board. These check the whole ship, and go through the deck and engine room areas accompanied by one chosen member of the crew. Whilst the ship is being examined, all other crew members must remain in their cabins. The crew member accompanying the authorities must have his Seaman's Book with him as identification. When the authorities leave the ship finally they take the log away, and bring it back after a few days. Going ashore is permitted, but normally only in the port area. There is a seaman's hostel there. Travel further inland is possible, but only by giving 24 hours prior notice to Immigration via the ship's Agent. Also from time to time it is possible for crew members to fly out, but this must be arranged via the state shipping Agent. Visits to other ships is also possible, but only by giving 24 hours prior notice to Immigration. Radios and cassette recorders may not be taken on land or even on deck. Their use is only permitted within the ship and cabins. Fresh water and fresh food are available. In the roads, water is delivered by water boats. Removal of rubbish is also possible by due notice through the Agent, and is even possible at the anchorage. Boat manoeuvring can likewise take place, but it must be reported, and may only take place in the vicinity of one's own ship.

For clearance inwards, the following documents are required:

7 Crew Lists.
1 List of Items in Possession of Crew divided into gold, valuables, money, signature.
1 Vaccination List.
1 Maritime Declaration of Health.
1 Passenger List, even if none on board.
1 Narcotics List.
1 List of Tobacco and Personal Goods.

The authorities bring a list of provisions with them and fill it out after declaration on board. Stores, such as alcohol and cigarettes are not sealed.

The Health Authorities place greatest score by cleanliness of toilets, refrigerators, food stores, kitchens, pantries, hospital and first-aid station.

Generally, it may be stated that the ship's broker and Agent speak and understand good English, but from the authorities normally one can expect no knowledge of Western languages.

The port roads offer anchorages for at least 15 sea-going vessels and enough room for swinging. However, in each case at least 170 m. chain should be allowed so that the vessel lies securely. The tidal current, in accordance with our observations, runs at a good 4 knots. The anchorage bottom is good and comprises grey mud. The depths of water shown in the charts are, in accordance with our observations, roughly correct.

To the West of the port on the town shore there is a large shipyard with a mobile gantry crane over a slipway under construction. The slipway is about 150 m. long. Normally, the crane is at night directly on the bank (high water mark) and is illuminated and thus constitutes a good bearing, particularly at night, since otherwise no long-range port lights are available.

Position of the crane is about Lat. 34° 43′ 2″ N., Long. 125° 24′ 1″ E. This area where the shipyard is located is designated as "Iron works" in Chart 1656, map of Chinnampo Ko. The waterside there no longer has an inlet, but has been straightened out, and building work is still in progress. See "Plan Section" of "Guide".

Likewise building works are in progress along the whole shore line between the shipyard and Nampo Ki. The shore line is also straightened here, and to all appearances has been developed as anchorage and repair yard for the Korean Navy. The 2 red/black buoys to the South of the iron works in the chart are no longer there. In this area there is only a small fixed buoy for guard boats and fishing craft.

In the middle of Shienshin Island there is a 9-storey white hotel, which is a good landmark by day.

The tidal pole in front of Nampo Ki is no longer available. On the Southern end Nampo Ki is a bunker with a small house on top. The lower part of the house is pink and the upper part white. The West pier of Hibatsu To has 5 mobile port cranes, with lifting capacity up to 5 tons. At the Southern end of the pier are 2 new large warehouses. A floating crane is available with a capacity of about 160 tons. On the Western pier is likewise a small warehouse and 2 mobile port cranes (up to 5 tons). At the Southern end of the Western pier, are two berths for deep sea freighters with a good 9 m. water depth N.W. alongside. At the Southern part of the Western pier there is a good 8 m. of water along a length of some 210 m. At Berth 1 (West pier, Southern berth), vessels up to 32 ft. draft can go alongside in normal water conditions. The depth of water in the inner part of the port could not be exactly determined, but judging by the vessels there must be about 5 m.

The old coal pier has a berth with at least 10 m. depth of water. East of this pier is also a further coal pier, equipped also with conveyor belts and about 10 m. depth of water alongside.

For berthing and unberthing there are one large and three small tugs available. The large tug acts as pilot craft and for the authorities to visit for clearance. It has been previously described.

From our observations, in the inner roads loading and unloading rarely takes place. There are only a few lighters available. As the port is overloaded, a long waiting time must always be allowed for (at least 14 days).

Medical care for crew members here is somewhat difficult, since one tries with all means to avoid having to have the crew member transferred beyond the confines of the port. In this connection, the doctor comes only once on board and a decision is taken as to whether or not a visit to hospital is necessary. For such a hospital visit one has further to go through the Agent to the authorities to obtain permission to go beyond the port area.

Below are some soundings of the roads. The vessel's draft = 8.35 m. First bearing is Nampo Ki, second bearing is the pier light, fixed red, in front of the East pier:

Weather (Wind)	*Bearing*	*Time* (GMT)	*Measured depth, taking into consideration vessel's draft* (m.)
15° 8 knots	344°, 38°	2330	21.15
100° 8 knots	355°, 42°	0130	19.93
360° 5 knots	355°, 39°	0715	15.97
340° 5 knots	343°, 37°	0900	18.41
070° 9 knots	340.5°, 38.5°	2330	21.15
060° 5 knots	343°, 39.5°	0100	21.46
Circulating 5 knots	324°, 41°	0430	16.88
270° 13 knots	339°, 37°	0000	21.46
300° 20 knots	357°, 40.5°	0300	19.93
290° 10 knots	345°, 40°	0840	18.43
Circulating 5 knots	360°, 45°	0640	16.58

The pier structures have shuttering walls at the bottom, and the upper part is composed of equal-shaped stone blocks. At the mooring points fenders are composed of car tyres strung together on wires. The pier itself is in a satisfactory condition. Rail connection is available, and lorries may run along it. Water connections are also available. As the two cranes on pier Berth No. 1 have very large beams, they are often positioned between two hatches and then work the two hatches alternately.

Loading and unloading is made difficult since it is not possible to obtain precise information as to the number of gangs, the time they will turn up for work, whether they will work with their own equipment or with cranes or with the mobile cranes available. It continually happens that suddenly port workers will appear or disappear, although shortly beforehand the Agent will inform to the contrary.

Telephone connections with Europe are possible. Connections can be obtained at the Seaman's Club in the port after 1600 hrs. On average it takes an hour to get through. It is advisable always to try to get a line to Moscow, and then ask for the required connection oneself in English from the Moscow operator. This noticeably hastens the connection. Comprehension is at times very bad, calculation of charges is dreadful, and one must be prepared to pay three or four times the price as would appertain for a similar call in Europe.

The local currency is the Won. U.S.$ 1.00 = approx. 2.15 Won. In the Seaman's Club all customary Western currencies can be changed into Wons.

Loading rigging can be positioned from the ship. If for example this has to be done at night, it must be discussed in advance with the Agent as to whether this has to be done by the ship or the port personnel. If the rigging is done by the port personnel, it must be checked carefully.

Clearance outwards occurs in the harbour roads and not at the pier. It takes a good 3 to 4 hours. Here also, all crew members must be in their cabins for checking purposes, and if the authorities require it, personnel must be available to guide them around the ship. On leaving the port, yet another list must be presented of currency which each crew member has spent in Korea.

They are only interested in foreign currency which has been exchanged for Wons in the Seaman's Club, since Wons may not be exported.

On the journey out from the port, the Pilot is accompanied by an assistant and member of the coastguard. The latter, shortly after coming on board, removes all seals from apparatus sealed when coming into port. The Pilot leaves the vessel at a position Lat. 38° 35′ 5″ N. and Long. 124° 55′ 5″ E.

Herewith some soundings, taking into consideration draft of vessel. First bearing – pier light East side Hibatsu To – fixed red. Second bearing chimney at Lat. 38° 44′ 1″ N. and Long. 125° 25′ 9″ E. (shown on the chart as Chy.)

GMT	*Weather*	*Bearing*	*Line sounding* (m.)
0030	Calm	338°	21.78
	1022 mb	43°	
0130	Calm	338°	
	1022	42°	24.79
0430	Changeable	335.5°	21.03
	1022	40°	
0530	250° 14 knots	312°	
	1022	38°	24.18

SHIPMASTER'S REPORT: No. 3

VHF: Agent "KOSA" can be contacted on Channel 16. Generally port (Pilot, etc.) do not communicate with the ship directly. All communications (VHF) to be done through "KOSA". General watch keeping time (VHF) – 0900 hrs. to 1030 hrs.; 1200 hrs. to 1300 hrs.; 1400 hrs. to 1630 hrs.; 1900 hrs to 2100 hrs. and 2330 hrs. to 0030 hrs.

FRESH WATER: Also available from shore connections alongside in Berths No. 1 and No. 2.

SURVEYORS: State surveyors of D.P.R.K. (Democratic People's Republic of Korea) available. Survey fees about U.S.$1,900.00 per visit.

REPAIRS: Facilities available.
New Dry Dock: is in operation which can handle ships over 180 m. in length. *Shipyard* builds ships (2 – 3 ships at a time) of moderate size (about 10,000 d.w.t.).

Dry Dock/Shipyard Workshop undertake ships repair. They have boat fully equipped with diving equipment and diver.

Factory Engineer/Technician (Electronic) undertake Radar/Echo-sounder/VHF repairs.

GENERAL:

Marine Note of Protest: No Notary Public or Court of Law. Masters wishing to lodge a "Note of Protest" can write to the Harbour Master who will endorse his (Master's) letter.

People strongly object calling their country "North Korea", it is to be called Democratic People's Republic of Korea.

Fresh Provisions: Fresh provisions also available through the ship chandlers (owned/controlled by the Government). It is advisable to take stores through the seaman's club, where quality can be checked before the provisions supplied on board.

SHIPMASTER'S REPORT: No. 4. May 1986.

Korean Regulations require foreign vessels to stay 15 miles off coast until abreast of port and we were tracked from 37° 00′ N., Northwards to ensure that we did so. As well as ETAs at 5 days, 24 hours, 12 hours and 4 hours before arrival at pilot station, vessel required to report position and speed 24 hours before and on crossing Lat. 37° North.

Approached Sei To Island on course 075° on flood tide with very strong Northerly set and carrying 15° for set to clear shoals to the North. Passed Sei To at 1.1 miles and 7 cables North of Hoko To then course 050° between red can buoy marking Southern end of Chu Shu or Naka Su and black conical buoy marking Northern limit of Kashi or Shimo Su, then 055° to Pilot Station No. 1 and waiting anchorage North of Shimai To. Neither of the above buoys appeared to have lights and were poor radar targets, so approach at night not advisable.

Instructed by cable from Agents (KOSA) to anchor at No. 1 Pilot Station to await Pilot, who arrived unexpectedly after only 2 hours at anchor. We could hear Agents KOSA on VHF Channel 16 but they did not answer.

2 Pilots, 2 Immigration Officials and Port Health boarded from tug which came out from Shimai To. Clearance to enter procedure carried out here which included placing all cameras and binoculars in radio room and sealing the door, took about one hour. The 2 Immigration Officials stayed onboard for passage up river. Echo-sounder sealed but not radars.

Channel to locks at Hito Suido passes close Northwards of Shimai To, 067° through No. 2 pilot station and waiting area to 8 cables N.N.W. of San To, thence straight course to locks.

The damming of the river and the river sealed off from the sea was completed in April 1986. The old main channel (Hito Suido) South of Hi To Island closed with sluices and three locks. Two for large ships in way of the old deep water channel, of which the largest is 270 m.×36 m. and a small lock for fishing vessels close to the Southern shore. The 2 main locks are side by side with a large control tower and large swing bridge on the centre dividing islands, which is extended East and West by 100 m. long leading jetties on piles. Leading jetties have vertical wood fendering against piles and locks have floating wood fenders for full length, both sides. One tug available to assist large ships to enter lock.

East of locks, channel close to South bank to avoid shallow patch in mid-river for first 3 miles, after which appears to be plenty of water for virtually full width, expect changes in the future though, with silt washing down river which cannot pass dam.

We went straight on to berth and the rest of the entry procedure which took 2 hours carried out, normally this is done at anchor before berthing. Papers required were as previous Master's Reports in 'Guide to Port Entry'. All Cholera vaccinations must be valid and all foreign currency must be declared. Before sailing a list is required of all foreign currency changed, which is readily possible at the Seaman's Club, all Hotels and most of the shops in Nampo amd Pyongyang.

Officials searched ship thoroughly on arrival. They require 4 Officers/men to accompany searches, with their passports, and all other personnel have to be in their cabins. Even deck stores and engine room searched. The same procedure takes place before sailing, but this time they are looking for stowaways and Korean currency which it is illegal to take out of the country.

Shore leave for ship's crew is only allowed between 0700 hrs. and 2300 hrs. local time daily and only inside port area, which includes Seaman's Club. Even for this, shore passes and passports must be taken, which are checked by guard at foot of gangway, on and off. Special permission has to be obtained for visits to Nampo City or the capital Pyongyang. This is readily given, though always accompanied by an official guide from either the agency or the Seaman's Club. We were allowed cameras out of seal for a guided tour of Pyongyang, but they were returned under seal, immediately on return to the ship.

Taking of soundings with hand lead, making drawings or sketches of anything in port area, visiting other ships, taking radios or tape recorders on deck and taking anything ashore without declaring to Customs are all strictly forbidden.

Garbage is collected from ship every 3 days, which service has to be paid for (about 300 Won each time). All garbage must be kept in closed bins, and nothing must be thrown overside.

Very keen on rat guards and net under gangway.

Fresh water readily available by barge, in 90 tonne quantities. Seemed to be of good quality though quite expensive (4 Won per tonne).

The Seaman's Club provides chandlery and laundry services. Good fresh vegetables available.

Rate of exchange (May 1986) 2.2 Won to U.S. Dollar and 3.4 Won to Pound Sterling.

Bulk handling berth consisted of three large concrete dolphins on steel pillars and joined by steel girders, on which tracks for bulk handling equipment run. Connected to shore by narrow walkway only. Total length of berth about 150 m. so stern was overhanging.

Berth equipped to discharge grain and to load bulk cement (cement being the largest export from the port).

Cargo of bulk wheat was discharged by three methods:-

(1) By vertical belt lift to conveyor belt, thence to silo.
(2) By ship's grabs via hopper to conveyor belt, thence to sil
(3) By ship's grabs to barges overside.

The majority of cargo being discharged by the latter two metho though the vertical lift belt was the fastest when working, t continually breaking down. Also best work done at night as there frequently a shortage of shore electrical power during the day.

Draft survey carried out to confirm quantity discharged and su signed a statement to the effect that full B/L quantity discharged. W not given clearance to sail until this had been done.

Although nearly everyone from the agency (KOSA) spoke g English, there was nobody from stevedores who did and conseq ship's personnel had very little control over which hatches were wo and when.

Agents: Korea Ocean Shipping Agency (KOSA) very attentive said to have 24 hour Channel 16 VHF watch in their office, though was not put to the test outside normal working hours. Reques everything has to be by written application, i.e. money, fresh water, re firm, etc.

SHIPMASTER'S REPORT: No. 5. August 1986.

ARRIVAL: *Pre-arrival notices:*

The state Agent, Korea Ocean Shipping Agencies, cable add "KOSA" will send by cable, instructions regarding reporting positi sea before arrival. In our case we had to send position 24 ho 12 hours and 4 hours before arrival at pilot station together with co and speed.

The position is also to be sent when crossing a line joining the follo positions:

Lat. 40° 00′ N., Long. 123° 20′ E.
Lat. 37° 00′ N., Long. 123° 20′ E.
Lat. 37° 00′ N., Long. 126° 30′ E.

The coast must be kept at a distance of 15 miles until the appro to the Island of Sei To (Lat. 38° 33′ N., Long. 124° 46′ E.)

Note: North of Lat. 37° 00′ N., the ships are challenged by Korean N vessels either by VHF or Morse Lamp. They request ship's na nationality, cargo on board, destination, port of origin. Sometimes t approach close to vessel (3 – 4 cables) to check the name with pow projector.

PILOTAGE/APPROACHES: *Pilot boarding anchorage:*

After passing Sei To Island the ship proceeds to the pilot wa anchorage bounded by the following positions:

A. Lat. 38° 41′ 24″ N., Long. 124° 59′ 12″ E.
B. Lat. 38° 41′ 54″ N., Long. 124° 58′ 06″ E.
C. Lat. 38° 43′ 06″ N., Long. 125° 00′ 24″ E.
D. Lat. 38° 42′ 06″ N., Long. 125° 01′ 36″ E.

The tide is very strong but the holding ground is good, pay sufficient chain to avoid dragging.

Approaches: The red buoy on the SW end of Naka Su Shoal, to be on the port side when entering, is in position 37° 36′ 51″ 124° 50′ 42″ E. (7 cables S.W. of charted position).

The black buoy, starboard hand, 2 miles N.E., is 3 cables W.S.W the charted position.

The black buoy 1 mile N.E. of Shimai To Lighthouse has been chang to red and is in position (A) of the waiting anchorage (38° 41.4′ 124° 59.2′ E.).

LOCKS: A dam has been erected across the river from a posi (approx) 38° 43.4′ N., 125° 14′ E. in a SW direction to the '5 1/4 wa East of Hi To Island, then in a 263° direction to the Datum R (38° 40.8′ N., 125° 11′ E.) The area between Datum Rock and Hi Island has been reclaimed and a large esplanade built.

Another dam with gates join Hi To Island to the mainland in a SS direction (198°). 3 locks have been built on the SSW part:

Lock No. 1: The SSW most, is used for barges.

Lock No. 2: In the centre, is for large vessels up to 50,000 d.w.t. t dimensions are 275 m.×36 m. A training wall extends on both ends the lock on the Northern part. The walls of the training wall are protec with wooden fenders, the lock has floating wooden fenders.

Lock No. 3: The Northernmost is for medium size ships, t dimensions are length 225 m. and beam 26 m. 2 ships can accommodated at the same time.

Note: The lack of co-ordination between the Lock Master and Author operating the gates of the dam is frightening, when the gates are ope a very strong current sets across the Western part of the lock and i impossible to leave the lock as the ship is pushed toward the shal water still existing just outside the lock. Small craft may try to enter lock when the gate is opened.

A road and railway line on the dam and lock system through a swing bridge.

2 tugs are available to assist large vessels to enter the lock.

We entered the lock in loaded condition with a draft of 10.00 m. with any difficulties. Our vessel is 37,500 d.w.t.

The locks have been operating since April and the Pilots do not ha much experience.

A very tall monument stands on Hi To Island.

PORT: See "Plan". Since the building of the dam there is no tide in t port and the current is negligible.

Salinity is lowering. At the time of our stay it varied from 1009 to 10 it is said that in future it will be completely fresh water.

5 new berths have been built over the last 5/6 years in additio Berth No. 1 and No. 2 in Hibatsu To.

Berth No. 3 extends in a Northeasterly direction for 220 m. from t light in position 38° 43′ N., 125° 24.6′ E. There is about 11 m. de alongside the berth 2 cranes of 5 tons are available.

Berth Nos. 4 and 5 are inside a basin just North of Berth No. 3 a are used by barges.

Berth No. 6 (NE of Berth No. 3) is formed by 3 large platform equipped with 2 discharges and one loader for grain. There are minim pths of 11.5 m. on the inside part of this berth (where we discharged ost of the cargo).

Berth No. 7 (Eastward of Berth No. 6) is about 340 m. long. Berth o. 7 has minimum depth of 6.0 m. at the Eastern part and is used for eneral cargo. It also has a fixed hopper connected by belt to a silo. he berth is equipped with 2 cranes of about 5 tons capacity.

Berth No. 8 is equipped with 3 special loaders for cement in bags. It obably has a minimum depth of 11 m. as we have seen vessels loading p to a draft of 10 m.

Berth No. 9 (further Northeastward) is a loading berth for coal and is out 180 m. in length with depth of more than 12 m.

One loader runs on the pier for loading of coal in bulk.

ote: Cranes and equipment for handling grain are locally built and bject to frequent breakdowns. Safety guidelines are absolutely ignored y the stevedores who use wires and equipment of poor quality.

ectric cable connections are exposed to the weather.

gulations: Port Regulations must be strictly followed and ships are bject to heavy fines for non observance of the regulations. Pollution s strictly prohibited. In future the discharge of sewage into the water ill be prohibited.

eneral: There is another berth further upriver to discharge iron ore at steel factory but details are not known.

The Agent KOSA has a VHF radio operating day and night.

Binoculars, ship's radio station and echo sounder are sealed at waiting nchorage, Radars are left open for operation.

IPMASTER'S REPORT: No. 6. December 1986.

essel called at Nampo with a cargo of bulk wheat from India (about 400 tonnes).

1. The Nampo pilot ground has been established in an area enclosed y the positions:

a)	Lat. 38° 41′ 24″ N.	Long. 124° 59′ 12″ E.
b)	Lat. 38° 41′ 54″ N.	Long. 124° 58′ 06″ E.
c)	Lat. 38° 43′ 06″ N.	Long. 125° 00′ 24″ E.
d)	Lat. 38° 42′ 36″ N.	Long. 125° 01′ 36″ E.

2. The binoculars are put away under seal, also the use of ansmitters and echo sounders beyond the lock gate is forbidden.
3. Vessel berthed at Berth No. 6, and the Pilot informed me that a 10 m. fresh water draft is safe.
4. Berth No. 6 is a mechanised berth serviced by 2 conveyor belts d claims of a discharge rate of 3,000 tonnes per day. There are, wever, breakdowns and we managed about 1,000 tonnes per day th a high of 1,400 tonnes per day. A silo receives the wheat and has a pacity of 20,000 tonnes. Berth No. 6 is also the loading berth for bulk ement, serviced by one loader. Supposedly a load rate of 3,500 tonnes er day can be achieved. The storage facility for the bulk cement is a silo of 60,000 tonnes capacity.
5. Galley garbage is cleared every 3 days. The Harbour Authorities re strict and among other things are very particular about rat guards eing in position and the satisfactory operation of sewerage treatment lants.
6. The Agents are co-operative and helpful, and going by earlier Masters' reports, I think there is vast improvement in telex and telephone acilities.
7. Agent's cable address: Kosa Nampo.

HIPMASTER'S REPORT: No. 7. January 1992.

This information is to be read in conjunction with Guide to Port Entry, B.A.Chart No. 1257, China Sea Pilot Vol. 111 and Radio Signals Vol. 6, Part 2. This report gives the differences with information from above entioned publications only.

OCUMENTS: On arrival:

Declaration of total foreign currency on board, including crew member's currency.

List of radios on board (separate tuners and tape recorders).

If tuner and tape recorder is one set, show as tape recorder.

On departure:

Declaration of total foreign currency spent in the port.

ADIO: Telex No. 24051 (was advised by charterers) operated well, Agent uses telex for receiving information only. Instructions were t by Agent via Nampo Coast Radio (call sign – HML, frequency MW 500, SW – 8736, 24 hours duty). This station replies in case of need o send Agent's instructions to vessel only.

VHF Channels 16 and 11 are used by KOSA. Communications with ther parties via Agent only.

Use of SATCOM telephone is strongly prohibited in the port. In case f need, a 24 hour advance application is required via Agent to mmigration.

PILOTAGE: Pilot and Port Authorities board at Waiting Area No. 1 for oreign vessels, where ships have to drop the anchor as instructed by gent. Sea and port pilots are experienced.

PPROACHES/ANCHORAGES: Vessel was instructed by Agent to avigate 12 miles off the coast of D.P.R.Korea. Waiting Area No. 1 for oreign vessels is indicated on B.A.Chart correctly. All buoys indicated on this chart in approaches and inside the river are missing. Electronic hart for Norcontrol Data Bridge 7 was used in approaches as prepared in good time. In this case, there were no difficulties with approaches. Waiting Area No. 1 for foreign vessels, as an anchorage, is dangerous or ships in light condition, when N.W. wind increases to gale force or ore. In case of a bad forecast, it is recommended to leave this nchorage.

OCKS: Both times (on arrival and departure), vessel used Lock No. 3 (the biggest). Most wooden fenders are missing. There are small rubber enders with wire ropes on the lock's walls. In loaded condition, vessel's reeboard was 4.5 m. All of these fenders were above ship's main deck hen the lock was opened.

One tug with capacity 1,000 h.p. is available to assist the ship to enter he lock.

Locks' regulations: Vessel can pass through the lock if the wind is less than 7 m./sec., and waves less than 0.5 m., especially with swell from the West. Locks operated in daytime only.

TUGS: There are three old tugs in the port with 1,000 h.p. Usually pilots use these tugs for pushing only.

GENERAL:

(1) Radio-room, binoculars, navigation and photo equipment were not sealed.

(2) Discharging of sea water ballast and sewage is strictly prohibited after passing the lock. It is recommended to discuss this matter with Agent in good time, especially for ships which call at Nampo for loading.

(3) It is recommended to avoid mooring between sunset and sunrise, due to the fact that electric lights are missing in the port and very often on the berths.

(4) It is necessary to declare all audio equipment/radio tuners and tape recorders twice: First time, during Clearance inward procedure, which is carried out at Awaiting Area No. 1; and second time, on arrival at the port.
The local form for radio equipment has to be filled in very carefully. It is compulsory to declare all broken audio equipment, including those inside the store rooms, in order to avoid the fines from Immigration. Master signs this form before Officials search ship thoroughly. During this inspection, Immigration Officer counts all audio equipment.

(5) On arrival, the Quarantine Officer demanded the Certificates of Cholera Vaccination for all crew members, but after long "discussions" this demand was cancelled.

(6) The visit to the Seamen's Club is not restricted from 0900 hrs. to 2300 hrs., but is 24 hours a day. Application to Immigration via Agent is required for visit the town. The visit to another vessel in port is possible if vessel is same flag only.

(7) Large amounts of cigarettes were given out by Master as presents to representatives of local Authority.

(8) The permission to enter Government Waters was legalised by Protecting Agent, and number and date of issuance were advised by charterers.

(9) The vessel loaded coal. Average rate of loading is about 4,000 tonnes per day. As usual, cargo was collected in daytime and vessel was loaded in the night. The reason for this is lack of electricity in the port most part of time. The ship was shifted along the berth for loading Holds No. 1 and 2. The stowage factor of coal is around 36 cu.ft./ton. The trimming of cargo inside the holds is carried out by trough only.

SENBONG: 42.20 N. 130.24 E.

SHIPMASTER'S REPORT: March 1987.

DOCUMENTS:

8 copies Crew Lists (One additional copy required for each application for shore leave and an additional 2 copies on vessel's departure).
4 copies Vaccination List.
2 copies International Maritime Declaration of Health.
2 copies Crew Declaration.
2 copies List of Valuables and Currency.
1 copy Bills of Lading.

To be presented on arrival:

Vegetable form indicating quantities and country of origin.
Cameras and binoculars form.
Local health form.

PILOTAGE: Compulsory for foreign ships. There is no VHF response prior to arrival at pilot station. Pilot boards from tug.

ANCHORAGE: Bounded by following points:

(a) 42° 17′ 00″ N. 130° 26′ 30″ E. (c) 42° 17′ 00″ N. 130° 19′ 00″ E.
(b) 42° 15′ 30″ N. 130° 26′ 30″ E. (d) 42° 15′ 30″ N. 130° 29′ 00″ E.

Pilot and Health Officer board in this area.

RESTRICTIONS: VLCC movements only carried out at night and during poor weather conditions with the Harbour Master's permission.

HEALTH: No Radio Pratique. Doctor boards with Pilot and Immigration Officers. All vaccination certificates checked for validity, any expired inoculations given. For hygienic reasons, ship supplied disposable hypodermics. If any crew joined vessel within preceding month, all personnel to have temperature taken by Doctor.

RADIO: Call Radio Station HMR (Ragin) on 500 kHz between 0800 hrs. and 2400 hrs. (local time). When out of range, messages sent via VPS Hong Kong.

Arrival Advice: All communications for Port and Pilots to be sent via Agents (36 hour, 24 hour and 12 hour messages). Initial message to include present position, speed, DWT, GRT, NRT, LOA, Breadth, number of crew and confirm Democratic People's Republic of Korea flag on board. After initial report, send position reports every 4 hours.

VHF: We were informed after arrival that VHF contact is possible, but local operators only respond to Russian and Korean languages. We made very brief contact with Pilot when tug 0.5 miles off.

TUGS: 1 × 1,000 h.p. and 2 × 800 h.p. tugs available. Aft tug makes fast using ship's line, which should be of the floating type. One tug is used to keep buoy mooring lines coiled on deck.

BERTHING: S.P.M. located in approximate position 42° 18.3′ N., 130° 25.5′ E. and shows LF.2R.12s. There is an inner harbour for smaller vessels bunkering, size not known.

MEDICAL: Hospital and dental facilities available at Rajin. 24 hours notice required for Immigration.

TANKERS: S.P.M. has 1 × 16 in. hose string which is connected and disconnected by shore personnel. Maximum back pressure allowed at ship's rail is 9 kg. Loading rate averaged 1,300 t.p.h. Shore tanks of 20,000 tons capacity are located approximately 7 km. from the buoy.
Moorings: Two buoy ropes of 130 mm. diameter are made fast on bitts. Ship lowers 2 mooring ropes with lashings and messengers to small line boat which then passes them to a tug near buoy.
DENSITY: 1025.
FUEL: I believe fuel is available to vessels using the port if advance notice given. There is an inner harbour draft restriction of 7.50 m. Barges not available.
FIRE PRECAUTIONS: Minimal, vessel carried out own checks.
CUSTOMS ALLOWANCE: 200 cigarettes, 1 bottle of spirits, no limit for beer. Bonded store not sealed.
TIME: GMT plus 9 hours.
STORING: Small amounts of fresh produce are available, depending on time of year. Payment in cash (U.S. Dollars) is preferred.
SHORE LEAVE: Application to be made to Immigration 24 hours in advance. Crew only allowed to visit Seamen's Club in Rajin. Bus takes crew from jetty to Club where crew must remain until return journey. Shore pass and Seaman's Book to be carried at all times. These are checked by Immigration on the ship and on jetty outward and on return.
GENERAL: The initial Quarantine and Immigration inspection takes two hours, therefore it is advisable to anchor.

Immigration Officials seal radio, cameras, binoculars and distress rockets. They also require radars and depth recorder to be sealed but were persuaded to leave this until vessel berthed for safety purposes.

Once berthed, Customs, Agent, Harbour Master, Receivers, S.P.M. Operators and Interpreter board, at which time there is a second Immigration and Customs inspection of whole ship.

Accommodation required for 11 persons and meals for 15 persons. Officials come and go daily.

Prior to departure there is a Customs and Immigration inspection. Once completed, Harbour Master issues Clearance Certificate.

Two Immigration Officials remain onboard until vessel drops Pilots in Quarantine Area.

Pilot remains on bridge throughout discharge and controls the tug which is secured at the stern to keep the vessel off the S.P.M.
Chart: BA. Chart No. 2431 (Unggi).
Agents: Korea Shipping Agency, Rajin Branch. Cables: "KOSA RAJIN". Telex: 6204 RJKP. Telex manned during office hours only.

NOTES

Please also advise Shipping Guides Ltd.

Republic of Korea

GENERAL:

FOREIGN FLAGS: Ministry of Transportation issued following instructions regarding entry and exit of foreign flag vessels in Republic of Korea waters.

Item 1: Director, local Marine Bureau shall not grant permission for entry of foreign flag vessels under ownership of North Korea, Vietnam and China.

Item 2: Director, local Marine Bureau shall not grant permission for entry of foreign flag vessel bound for North Korea or falling short of days of departure from ports of North Korea.

Item 3: No restriction shall be applied for entry of foreign flag vessels unless same appertained to above clauses in accordance with internationally accepted practices.

ETA: The following requirements apply to vessels carrying dangerous cargoes, deep draft vessels and vessels and their tows exceeding 200 m. in length. Such vessels should inform the District Maritime and Port Authority, 12 hours in advance, of their name, tonnage and estimated time of entry into the designated area of the following ports: Yosu, Pusan and Ulsan.

HEALTH: Radio Pratique is available at Inchon, Busan, Yosu, Ulsan, Pohang, Masan, Mokpo, Gunsan, Chungmu, Tonghae and Cheju.

Masters are required by the Ministry of Health and Social Affairs to include in a telegram requesting Radio Pratique the following information in the order shown:

1. Notice in accordance with Art. 22 (RPM).
2. Name and nationality of vessel.
3. Number of sanitary certificate.
4. Date and place of departure.
5. All ports of call with dates.
6. Name of entry port and ETA (Korean time).
7. Name of issuing authority, date and validity of fumigation certificate.
8. Number of crew and passengers on board.
9. Any transhipment of crew or cargo within 7 days prior to arrival.
10. Name of any patient on board ill within 7 days of arrival and symptoms.
11. Any death on board within 7 days of arrival.
12. Discovery of infected rats, dead or alive.
13. Infection of cargo by quarantinable disease.
14. Any crew or passengers without valid WHO inoculation certificates.
15. Availability of doctor on board.
16. Name of Master.

TIME: GMT plus 9 hours all year round.

BUSAN (Pusan): 35.07 N. 129.02 E.

DOCUMENTS:

9 Cargo Manifests.
3 Transit Cargo Manifests.
8 Crew Lists.
8 Passenger Lists.
4 Passenger Baggage Lists.
4 Mail Lists (forms supplied by Agent).
5 Parcels Lists (forms supplied by Agent).
2 Arms-Narcotics Lists.
2 Tobacco Lists.
4 Currency Lists.
4 Stores Lists.
4 Crew Personal Effects Lists.

Immigration: All Seamen's Books examined and shore passes made out. These passes to be carried at all times when ashore.

Shipmaster's Report: November 1988.

3 copies Transit Cargo Manifest.
8 copies Crew List (Customs).
10 copies Crew List (Immigration).
8 copies Passenger List, (if any).
2 copies Arms/Narcotic List.
2 copies Currency List.
2 copies Stores List.
2 copies Crew Personal Effects List.
2 copies Ports of Call List.

Quarantine:

1 copy Maritime Declaration of Health.
1 copy Vaccination List.

Immigration: Keep record of times of departure and returning to the ship of all crew members for handing over to Immigration.

PILOTAGE: Professional Pilot service is available at Busan and contact can be made by telephone No. 44-1651. Necessary for arriving vessel to notify Pilots of arrival 24 hours in advance. VHF unavailable. Formal address is: 15 4-Ka, Jung Yang-Dong, Jung-Ku, Busan, Korea. Blast signal from vessel used to call Pilots. Pilot boarding position Lat. 35° 04.25′ N., Long. 129° 07.17′ E.

Pilotage is compulsory and available day and night. Pilot boards off the entrance to the outer harbour. Pilot boat is white launch with pilot signals. Tugs cannot be employed unless Pilot is on board.

ANCHORAGES:

Designation	*Depth*	*Capacity*
S-Anchorage	8-9 m.	4 vessels of 300-2,000 tons
E-Anchorage	11-12 m.	6 vessels of 8,000-12,000 tons

RESTRICTIONS: Vessel having called at Communist ports within 3 months of contemplated entry of Busan needs to obtain permission of authorities.

MAX. SIZE: Max. size 50,000 d.w.t. LOA 330 m. Max. draft 12.5 m.

HEALTH: Pratique granted to vessels anchored in a circular quarantine anchorage located in Outer Harbour. Quarantine Inspection can be arranged by day or night if sufficient advance notice given although regular hours are sunrise to sunset. Valid Cholera Certificates required. Inoculations against typhoid and typhus may be required depending on prevalent conditions.

Quarantine Anchorages:
(a) Lat. 35° 05.14′ N., Long. 129° 07.34′ E.
(b) Lat. 35° 04.78′ N., Long. 129° 07.12′ E.

RADIO: Busan Harbour Radio Station: call sign, "6MF".

Vessels to submit ETA to Busan Port and Maritime Authority 72 hours and 24 hours before vessel's arrival, message also to include name of Owner and Agent. 3 hours before arrival vessel must communicate with Busan Port Control.

Radio-Telegraphy: Calling 500 kHz (operating throughout 24 hours), working 520 kHz, 512 kHz.

Radio-Telephony: Calling 2183.4 (operating throughout 24 hours), working 1881.4 kHz, 2320 kHz.

VHF: Busan Harbour Control, calling on Channel 16, working Channel 12, 14, 20 and 22.

RADAR: A radar station is sited in the Harbour Office to assist vessels approaching the port in poor visibility.

TUGS: Tugs join an arriving vessel immediately inside the breakwater of Busan Harbour. Ship's own lines are used. Tugs can join large vessels outside the breakwater. 11 tugs, 1,000 h.p. – 3,200 h.p.

BERTHING: Normally in daylight only.

CRANES: 80 cranes with capacity 10 tons – 100 tons. 4×20 t.p.h. cranes for scrap iron.

CONTAINER FACILITIES: 6×30.5 ton and 2×40.5 ton capacity gantry cranes at the container terminal (No. 5 and 6). 2×40.5 ton and 7×30.5 ton transtainers available. 354 reefer points available.

BULK HANDLING FACILITIES: Grain terminal located at Pier No. 5. Storage capacity 83,000 tonnes. 2×400 t.p.h. ship unloaders and 1×450 t.p.h. conveyor.

Coal handling facilities at Pier No. 7. 2×300 t.p.h. unloaders and 1×600 t.p.h. conveyor.

STEVEDORES: On basis using full gangs per day, the capacity is : 1,000 L/tons on general cargo.

MEDICAL: Service is available at short notice.

TANKERS: A T-head oil pier extends about 700 ft. on the S.E. side of the North Harbour. Least depth at pier head is 32 ft. Used by tankers servicing Korea Oil Corporation.

FRESH WATER: Available. Rate of water supply, 80 L/t.p.h. Supplied at pier, or by barge.

FUEL: Availability on Bunker "A", Bunker "C", LRFO, LO and diesel oil.

FIRE PRECAUTIONS: Port has separate anchorage for tankers. Port requests for compliance with regulation not to contaminate waters with inflammable substances, e.g. petroleum products. Tankers are prohibited to clean tanks in port.

CONSULS:

Consul, Republic of China	Tel: 23-3617
Consul, Japan	Tel: 43-9221

REPAIRS: All repairs can be effected.

GANGWAY/DECK WATCHMEN: This service is available.
OPENING/CLOSING HATCHES: Usually carried out by stevedores.
CERTIFICATES:
Derat Certificate or Exemption.
Inoculation and Vaccination Certificates for all crew members.
CUSTOMS ALLOWANCES: One carton cigarettes or 1 lb. of tobacco, and 1 bottle wine or spirits allowed, each man.
REPATRIATION: World wide connections are available from Busan via Seoul or Tokyo.
AIRPORT: Airport is at Kim Hey about 28 km. from Busan. Japan-bound plane takes off every 3rd day.
HOLIDAYS: 1st-3rd January; 1st March; 10th March; 5th April; 6th June; 17th July; 15th August; 3rd October; 9th October; 1st October; 24th December; Buddhist Birthday 8th April (by the Lunar Calender). Choo Sug (Thanksgiving Day), 15th August (by Lunar Calender).
POLICE/AMBULANCE/FIRE: Police, 22-0863/2497; Ambulance, Busan Quarantine Station, 44-0119/0619.
TELEPHONES: "Port Telephone Service" operates for purpose of serving communication on board-shore.
SERVICES: Adjustment of compass available.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Crew required to carry valid identification cards at all times.
DELAYS: Port congestion is experienced occasionally.
DEVELOPMENTS: An additional 3 berth container handling facility to be built. 6 container cranes will be available.
AUTHORITY: Pusan District Maritime and Port Authority, 1116-1 Jwadchun-dong, Dong-ku, Pusan, Republic of Korea. *Tel:* (051) 65-0933. *Telex:* K53377 Bdmpa.

CHINHAI (Jinhae): 35.07 N. 128.42 E.

SHIPMASTER'S REPORT: 1977.

LOCATION: Lat. 35° 09′ N., Long. 128° 40′ E. (Town); Lat. 35° 07′ N., Long. 128° 42′ E. (Pier).
DOCUMENTS:
8 Cargo Manifests.
8 Crew Lists.
4 Stores Lists.
3 Lists of Crew's Personal Effects. Tobacco/Spirits.
1 Vaccination List.
1 Health Declaration.
2 Currency Lists.
All documents are Standard Form. Although currency lists are required, there are no restrictions on importing or exporting either Korean or other currencies.
PILOTAGE: Pilotage not compulsory but recommended. Pilots are ordered through Agents and board vessel about 10 cables West of Kadok Do Island. VHF not available. No pilotage during night hours. Pilot boat is a wooden launch exhibiting International pilotage signals.
ANCHORAGE: Recommended 7 cables in Northwesterly direction off Tongdu Mal Lt. Ho. (Kadok Do.). Depth 25 m. Good anchorage in sand and mud. Quarantine anchorage is located about 1 mile N.N.W. from Chori Som Island.
HEALTH: Radio Pratique not available. Pratique granted after inspection.
RADIO: Busan Radio, call-sign "HLP".
TUGS: Required for mooring and unmooring. 2 tugs available of 600 h.p. and 1,000 h.p.
BERTHING: Chinhai is a principal naval base. Vessels drawing up to 17 ft. can be accommodated alongside inner harbour.

A buoyed channel with a depth of 36 ft. MHW leads from East of Madang So, to the only berth available for deep-sea vessels about 1.5 miles N.E. The berth, about 660 ft. in length, belongs to the Chinhai Chemical Co. and can accommodate vessels with a maximum draft of 34 ft.

Depth-sounding alongside showed at least 43 ft. 3 in. at HW. (officially 34 ft.). Distance from HW level to deck of pier 2.10 m. Bottom thick mud, and density 1025.

Vessels not exceeding 34 ft. salt water draft berth 2 hours prior HW., and discharging commences immediately.

The berth is equipped with 1 grab only, and with conveyor-belt to nearby factory. The berth is used for discharging phosphate and potash, and very few general cargoes are handled. Discharge rate for phosphate is a maximum of 8,000 tons per 24 hours, with average of 6,200 tons.

Also see "Masan" – Bulk cargo facilities.
STEVEDORES: Work is continuous throughout 24 hours including Sundays, and without meal breaks.
MEDICAL: Attention available.
FRESH WATER: Available ex-barge from Masan, minimum 200 tons at U.S.$3.00 per ton.
FUEL: Available ex-barge from Masan.
CONSULS: Nearest at Busan.
REPAIRS: Minor repairs only.
GANGWAY/DECK WATCHMEN: Available and recommended.
REPATRIATION: Possible from Busan.
CUSTOMS ALLOWANCES: No restrictions. Stores remain unsea

SHIPMASTER'S REPORT: February 1979.

PILOTAGE: Pilotage for the Port of Chinhae is compulsory, Pilots available during daytime.

Pilots board in position Lat. 35° 02′ N., Long. 128° 47.5′ E. waiting for a Pilot should anchor in the recommended anchorage situ North-east of the recommended track 306°/126° and extending about 1 mile West to about 2 miles S.E. of Yon Do Island.
PROHIBITED ANCHORAGE AREA: A "Prohibited Anchorage Area situated between the existing prohibited area (approx. pos 35° 00′ N., 128° 45′ E.) and the Western shore of the Kadok To Isl

The Northern limit of the "prohibited anchorage" area consists line running from position Lat. 35° 01.4′ N., Long. 128° 47.2′ E. in a direction to the Western shore of Kadok To Island.

The Southern limit consists of a line running from Lat. 34° 58′ N., L 128° 47.3′ E. in a 061° direction to the Southernmost point of Kadok Island.

According to the naval authorities, anchoring within the ab mentioned area is prohibited because of existing submarine cables
BUOYS: The red conical Buoy "No. 14" in position Lat. 35° 04.9 Long. 128° 42.1′ E. is reported non-existent.

The red conical lightbuoy in position bearing 135° and 8.5 cables the above mentioned Buoy No. 14 is also reported non-existent.

The black conical lightbuoy Gp. Fl(2) 6 sec. in position Lat. 35° 04 Long. 128° 42.8′ E. is to be moved 4 cables in a 043° direction.
AUTHORITY: Masan District Marine Bureau.

DEVELOPMENTS: HDO (Hyundai Oil Refinery Co.Ltd.) SPM: Max. capacity has been upgraded from 250,000 d.w.t. to 300,000 d.w.t. since June 1994.

HDO Product Jetty: New jetty under construction (2 berths). One berth for 100,000 d.w.t. and one berth for 30,000 d.w.t. (See "Plan"). Expected date of completion June 1996.

SHIPMASTER'S REPORT: October 1988 (Updated 1994).
Note: First vessel to call at Daesan S.B.M.

Pilot station for VLCCs proceeding to the SBM is located in the outer harbour of Daesan (Lat. 36° 51′ 40″ N., Long. 126° 08′ 24″ E.) in vicinity of 2 nautical miles South of Shin-do, where the Harbour Pilot boards to lead the vessel to Quarantine Station which is in the vicinity of 1 mile South of Kainso Lighthouse. Location of SBM is Lat. 37° 01′ 46″ N., Long. 126° 20′ 50″ E.

The vessel arrived at the pilot boarding area on October 13th and due to strong wind and rough sea the Pilot was unable to board. The anchor was dropped 4 nautical miles S.W. of Entrance Buoy No. 1 in a depth of 37 m., with good holding ground.

The Pilot boarded the next morning and the ship entered the buoyed channel approaching the SBM. The Pilot disembarked from the ship and the anchor was dropped at the same position as on arrival.

The Pilot boarded the ship the next morning and commenced approaching the SBM. When the vessel passed Buoy No. 1 a large number of fishing boats sailed from the shore and headed towards the vessel and within a short time stopped in front of the vessel very close to the bow. The vessel's engine was now on full astern in order to have her dead in the water. One man was on lookout forward as we were not able to see the fishing boats close to the bow from the bridge. The Pilot advised me that an attempt to sail through the protesting fleet of fishing boats would have caused a serious and dangerous situation. Luckily they obstructed the vessel where the buoyed channel was wide and deep enough to turn around by her own power so again the vessel turned around, dropped off the Pilot and anchored 4 nautical miles S.W. of Buoy No. 1

October 16th was a Sunday and the Agent informed me that no berthing was possible on holidays and Sundays (1994: Berthing now possible on Sundays and holidays). He also informed the Agent to make sure the fairway was clear prior to lifting anchor and shifting to the SBM.

The Pilot boarded the vessel again on the morning of 17th October after receiving confirmation from the Agent that the fairway was clear. The vessel commenced shifting to the SBM and, this morning the buoyed fairway was clear.

En route to the SBM the vessel passed in the middle of the channel from Entrance Buoy No. 1 to the SBM. Navigational aids, lighted buoys, are located both sides of the channel.

After passing Kainso Lighthouse on the starboard side, the SBM can be seen 2 nautical miles ahead of the vessel.

Berthing at the SBM will take place from one to two hours before low water and approaching the buoy only from the West in a North Easterly direction. Distance from pilot boarding area to the SBM is 15 nautical miles.

As the SBM at Daesan is new, the Pilots had no experience in berthing in this area and no experience in SBM berthing.

The berthing, assisted by 2 large tugs, took longer than usual for SBM berthing, but without any difficulties.

There is only one mooring hawser from the SBM and the chafing chain was too short to reach the chain bow stopper so bollard strops and bow shackles were used as an alternative to secure the chafing chain. Two additional mooring ropes from the ship were connected to the SBM as one mooring hawser ws not considered to be safe due to a very strong current. I was told that a second mooring hawser and longer chafing chains will be fitted to the SBM in future. During mooring the Pilot was on the bridge and the Loading Master forward, to inform the Pilot and supervise the mooring (1994: SBM buoy has been replaced with a larger one in June 1990 and all mooring equipment fitted according to OCIMF recommendations).

Connecting of 2 × 16 in. floating hoses was carried out by shore workers. The hoses were connected to the ship's manifold by Camlock quick release system.

Whilst moored to the SBM one tug was on stand-by aft with a tug's line connected to the vessel. I believe the tug is necessary so as to keep the vessel clear of the SBM during the change of tide.

Maximum discharge rate was 6,000 tonnes p.h., but will later be increased to 8,000 tonnes p.h. Upon completion of discharge, the shore hoses were flushed with sea water for 30 minutes (1994: No need to flush with sea water, except after discharging waxy crude oil or just before dismantling cargo hoses).

The vessel unberthed without using tugs. The vessel commenced outward passage and the Pilot disembarked between Buoy No. 1 and Buoy No. 3.

At present there is no possibility for supply of food, fresh water, spare parts, etc. at this port (1994: Supply of provisions and spares is possible).

The SBM is operated by Hyundai Oil Co. Ltd., Daesan Refinery.

General information on the crude terminal (SBM).

The diameter of SBM is 12 m.
Maximum size of crude carrier is 300,000 d.w.t.
Minimum size of crude carrier is 30,000 d.w.t.
Depth (MLLW) is 30 m.
Bottom nature: Clay, sand with boulders.
Korean Charts HO No. 306, 307 and 353 cover the area from Buoy No. 1 to the SBM.

Information required by Daesan port prior arrival: ETA message to be sent at least 72 hours prior to arrival via Agent.

Quarantine Doctors boarded the vessel on completion of mooring and after inspection of the vessel, and gave Port Clearance for Customs and Immigration.

From the SBM to shore, to the Refinery, takes about 40 minutes by service boat. There is no housing in this part of the country apart from the Refinery and its related offices.

During normal conditions this new oil terminal is considered to be easy to approach and the weather is usually clear and fine.

As this was the first ship calling at this new port every operation took longer than usual, but I believe this is quite normal. The mooring, discharging and unmooring went on without any difficulties and with excellent co-operation between ship and shore.

SHIPMASTER'S REPORT: April 1989 (Updated 1994).

Location: Daesan is about 20 miles due South of Inchon pilot boarding area.

SBM: Position: Lat. 37° 1.8′ N. Long. 126° 20.8′ E. Light: Fl. (3) Y7 sec. Horn 30 sec.

Vessel: 155,000 d.w.t.

Documents:

2 copies Crew Effects List.
2 copies Bonded Stores List.
2 copies Stores List.
8 copies Crew List.
1 copy Maritime Declaration of Health.
1 copy Vaccination List.
2 copies Narcotics List.
2 copies Arms and Ammunition List.

Pilotage: Pilot boards VLCCs proceeding to the SBM 2 miles South of Sin Do or in position Lat. 36° 51.4′ N., Long. 126° 8.24′ E.

Restrictions: There are no restrictions. Depths not less than 30 m. at chart datum.

VHF: Pilot calls at Channels 16 or 15, working on Channel 12.

Berthing: Pilot boards about 2 hours before slack water at Uno Do in order to be at the SBM just after the tide has turned.

Vessel secures to buoy (SBM) with the aid of 2 tugs, one on each bow, using tugs lines. Vessel picks up mooring and secures to SBM with its chain on vessel's AKD Stopper.

When vessel is fast, one tug using tug's line makes fast aft and remains there until sailing time.

Cargo Operations: Hoses: 2 × 16 in. on port side.

Discharging Rate: Max. rate 50,000 bbls/hr.

Repatriation: No difficulties encountered. Seoul Airport is 4.5 hours by car.

General: Chart: B.A. Chart No. 1270.

Accommodation: Required for Mooring/Loading Master, Agent and Customs. If possible a rest room should be provided for up to 6 mooring personnel.

SHIPMASTER'S REPORT: March 1990 (Updated 1994).
Position: 37° 01.5′ N., 126° 24.5′ E.
Location: 30 miles South of Inchon.
Berth: Product Berth.

The port is under the jurisdiction of the port of Kunsan (Gu some 60 miles further South.

Daesan is a newly developed industrial area, with amongst othe oil refinery. The refinery is operated by Hyundai Oil Company Lt import (crude oil only) to the refinery is served by a SBM, whic accommodate the largest ships. About 30 ships call at the SBM year, and the oil imports total about 40 million barrels per annu exports from the refinery are shipped through the jetty facilities. depths near the buoy and in the approaches are not less than 3

Export of oil products is from a large jetty with 3 berths whic accommodate ships with a maximum length of 200 m. The jett steel construction on steel pylons with concrete dolphins. The jett in a 110° – 290° direction. A large catwalk connects the jetty with a 2 wide causeway. Each of the dolphins is fitted with 2 hydrau operated steel quick release hooks and rope handling capstans. wires are not permitted for mooring, due to the large tidal range w makes their handling almost impossible. All lines are handled by hea lines and messengers. The least depth alongside is said to be 1

During the approach and mooring, the vessel is assisted by 2 pow tugs of the typical Japanese design. Both are identical 4,200 b.h.p. fitted with dual Schottel propulsion. Tugs lines are used from thei with the 10 in. braided nylon ropes stowed onto the fore deck wi

During the time the vessel is alongside, one of the tugs will re alongside to cope with eventualities, caused by the large tidal rang strong tide of up to 4 knots.

The two dolphins on either side of the centre of each berth are with 2 heavy wood lined fender boards, which extend from the do tops to a few metres below water level.

Mooring is done with a fairly regular layout of 2 head/stern 2 breast lines and 2 springs each end.

Vessels will dock heading into the tide, which means starboard to on ebb and portside to on flood tide.

Berthing and unberthing is done during daylight only. Berth No fitted with an approach control system with large digital rea indicating separate values for bow and stern. The system howe this occasion was not used. No explanation was given whether operational or not. The larger ships use Berth No. 4. The maximum handled so far is 35,000 d.w.t.

Each berth is fitted with 2×12 in. Chicksans. One is used for product and ballast, the other for clean products. No confirmation be obtained that shore lines were fitted with non-return valves, w could adversely affect clean product ships discharging ballast.

Products available are: Fuel Oils A, B and C, Gasoil, Keros Unleaded, Premium and Regular Motor Gasolines, Naphtha, So (TN), DF 1, JP4 and Jet A1. Loading rates are said to be 1,200 cu maximum.

Heavy Fuel Oils and fresh water are also available from the jett information is available as to the grades of Heavy Fuel Oil and the quality or price of fresh water.

Dirty ballast reception facility of 60,000 cu.m. All cargo ballast be discharged to shore facility. Maximum back pressure allow 1.5 bar. Rates should be around 400 cu.m./hr., but only 225 cu. was achieved. Segregated ballast may be discharged to sea permission is granted by Loading Master. A document prepared by is to be signed, stating the amount of ballast water or slops that actually pumped ashore.

There is no easy means of access to the shore. Use of ship's gang is not recommended, due to the large tidal range and a shore gang is not available. In way of the centre manifold, however, there is a stairway leading to the water level, which is used by all shore off and personnel. We did not object to this situation, also becaus permission is granted for shore leave. Even jetty access is denie the police (1994: No restrictions on shore leave or jetty access).

The port lies in the Southern part of the delta where also the p Inchon is situated.

The port as such is not indicated on the chart, but crude indicati the existence of a jetty is given on B.A. Chart No. 1270, Approach Inchon.

Initial approach is made using B.A. Chart No. 1258, Kyongnyolbi to Taechong Gundo.

Both B.A. Charts, although not part of the standard chart index absolutely required for a safe access to the port, and had to be sup from the Japanese Admiralty Agent.

The approach channel is fairly wide and well marked with red green light buoys of medium size. The paint is of the fluorescent which makes the buoys stand out even in the slight haze which encountered. The lights on the buoys are not very strong and only s on very late after sunset (1994: Lights on buoys are usually maintained). Especially the channel entrance when lining up for the on a course of 039° must be given ample attention, as the tide se and out in a direction roughly parallel to the track, with maximum of about 5 knots.

Anchorage was obtained about 1 mile West of Kain So in a dep 35 m. Vessel was brought up while heading into tidal stream of a 3 knots using 6 lengths of cable. Generally it can be said that ship swing on their chains in a counter-clockwise direction with the tu of the tide. We experienced sudden quick veers halfway throug tides, but there was never any stress on the cable. The pilots clai the tidal streams in this part of the channel never exceed 4 knots, is confirmed by the information on B.A. Chart No. 1270.

Tides and currents all refer to Inchon (Standard Port). General and LW differences are +00.10 from Inchon. Off the jetty the tidal st follows the direction of the channel with rates up to 3.5 knots, but seem to be unpredictable sudden sets across.

Directions: B.A. Chart No. 1258, Kyongnyolbi Yolto to Tae Gundo; and Korean Chart No. 306, An Do to Inchon Hang.

When approaching from the South, shape course to pass about 3 miles West of Ong Do Lt. (Racon Z), and about 3 miles East of Kadae An Lt. (Racon X). Thence proceed to pass between the red and green buoys, marking the entrance of the channel just South of Sin Do, and about 5 miles South of An Do Lt. Once past the buoys steer 039° through the centre of the channel until passing Buoys No. 5 and No. 6, when course should be altered to 053°, proceeding up to a position between Buoy No. 7 and Kain So Lt., where the recommended anchorage is located.

As the tidal stream runs roughly parallel to the channel, only minor adjustments to ship's heading are necessary to allow for set.

From the anchorage steer 058° to pass between the SBM and Buoy No. 10. Thence continue on 070° and steer for the green Buoy No. 13. Speed should be reduced to about 3 knots. By this time tugs should have been engaged and ready for assisting. Thence alter course to inboard and steer around Buoy No. 12 until vessel is on a S.E.'ly course, and proceed slowly through the channel until off the jetty.

This channel has a least depth of 10.4 m., and is also used for anchorage by smaller vessels awaiting berth.

The two tugs will then assist in easing the vessel gently alongside.

The pilot vessel, which is a regular work boat, is fitted with VHF but the range is very small. Pilot communicates with tugs and pilot boat with handheld VHF radio. All communications were by telex via agents. The terminal is also equipped with VHF. Call local Agent on Channel 15.

Documents required:
5 Crew Lists.
3 Stores Lists.
3 Crew Personal Effects Lists.
1 Narcotics List.
1 Ports of Call List for last 90 days.
1 Arms and Ammunition List.
1 Vaccination List.
1 Passenger List.
1 Maritime Declaration of Health (Korean Form).

Vessel will be attended by Agents, Customs, Police and Quarantine Officers. All documents may be prepared on plain ships stationery.

Agents will try to help translate queries by other officers, who did not speak or understand English. All Seamen's Books will be checked against Crew List, and even minor differences in spelling are noticed and to be corrected, although differences between Seamen's Book and Passport entries are accepted. There is a minor sanitary inspection carried out by the Quarantine Officer, who specifically wants to inspect vegetable rooms. He will then make out a Korean version of the familiar Japanese Sanitary Certificate, where all quantities of the entries must be recorded. They are however not checked. Customs Officer will seal the bonded store, and will check the ship's narcotics. A Korean Health Form was presented and made out without any problem, and subsequently Free Pratique was granted as per special form.

Agents claim that Daesan is an "open port", and consequently no shore leave can be granted (1994: Shore leave granted). The nearest village seems to be 40 minutes drive away and the larger cities of Gunsan and Seoul, 2.5 hours and 4.5 hours drive respectively.

Only very limited quantities of vegetables and fruits are available from the local or nearby markets. Only cash payment is accepted, either Korean Won or U.S. Dollars (U.S.$ 1.0 = 810 Won (1994)). Quality of provisions was found to be excellent but prices rather high, because local market caters mainly for seasonal crops.

Problems: One of the major problems is that communication is very difficult. Only the agents had a minor working knowledge of English. Refinery and jetty personnel do not speak one single word of English, which proves particularly dangerous while handling cargo or in an emergency (1994: Some personnel can speak English). For reasons of safety, we kept a seaman on standby at the shore manifold to assist in conveying messages, and if need be to close the Chicksan valve during topping up. Suppliers personnel were very reluctant to sign letters of protest, mainly because nobody wants to accept any responsibility, and agents had to try to translate most of the wording before all were signed for receipt.

REPORT: October 1991.
Terminal: Samsung Terminal.
Position: Lat. 37° 00′ 15″ N., Long. 126° 20′ 40″ E.
Pilot Stations: Shindo Pilot Staton (not compulsory):
Lat. 36° 51′ 40″ N., Long. 126° 08′ 24″ E.
ainseo Pilot Station (same as Quarantine Station):
Lat. 37° 00′ N., Long. 126° 18′ E.

Details of *Samsung Jetty:*

Jetty	*Length* (m.)	*LOA* (m.)	*Depth* (m.)	*Deadweight* tonnes
A	120	350	18.0	10,000 – 200,000
B	83	180	12.0	1,000 – 10,000
C	83	180	12.0	500 – 10,000

Products:

*Product**	*Jetty*	*Loading Arm* (in.)	*Rate* (t.p.h.)	*Remarks*
Naphtha/gas oil unloading arm	A	2 ×16	3,000	
LP Ethylene	C	1 × 6	450	Piggy back vapour return arm

SM/KB	A/B/C	3 × 8	500	

* Unloading arm unless otherwise stated.

SHIPMASTER'S REPORT: April 1992.

Documents:
Clearance from last port of call.
6 copies Crew List.
3 copies Personal Effects List.
3 copies Stores List.
1 copy Narcotics List.
1 copy Passenger List.
1 copy No Arms and Ammunition List.

Note: Agent requires a new Crew List and Personal Effects List before departure, if new crew members have joined the vessel, stating names and personal effects of new crew members.

Pilotage: Pilot does not board for anchoring. Pilot boards for berthing and unberthing only. Pilot boards at the anchorage, after Free Pratique is granted. Pilot arrives with tug. Pilot launch also available.

Approaches: The approach channel to Daesan is narrow, however it is well marked by buoys and lights. We navigated in the approach channel during darkness only. Good radar identification from buoys, small islands (rocks) and adjacent coastline. Racons are present (refer to charts). There is plenty water in the buoyed channel (over 30 m.).

Anchorage: Agent advised vessel by telex to anchor in position Lat. 37° 01′ N., Long. 126° 20′ E. (approx. 1 mile West of SBM and1 mile of Samsung Terminal), in good holding ground.

Health: Radio Free Pratique is not granted, if vessel not in possession of Korean Sanitary Certificate.

Quarantine Officer and Agent board at the anchorage. No difficulties with documentation. No checks or inspections were made.

Berthing: Samsung Terminal (Alpha): Depth 18.0 m.

Two powerful tugs assisted (tug's lines). Approach control system, indicating separate values for bow and stern, operative.

Moorings: First 2 lines are springs by heaving lines.

Only one mooring boat available. It starts forward and afterwards moves aft to complete mooring.

Total lines: 3 lines, 3 breast lines and 2 springs at each end. Attention to be paid to position of ship's gangway due to change in height of tide.

Discharging (Naphtha): Chicksan arms, 16 in. connections (hydraulic clamps). Permitted back-pressure 9 bar. Max. rate 6,000 cu.m./hr. Length and diameter shoreline: 1.5 km. × 30 in. Labour available on jetty. Communication by means of ship's handy-talky.

Disconnecting and Unberthing: Disconnecting after discharge is possible on the falling tide, due to ship's freeboard.

Unberthing after sunset is possible, and took place approximately 1.5 hours before low water at Inchon, with assistance of 2 tugs.

Pilot disembarks off the jetty, when tugs are dismissed.

Shore Leave: Only if arranged via Agent. There is no transport organised by the Terminal and walking is prohibited.

General: Customs and Immigration: Board after vessel is alongside. Clearing is simple. Certificates were not checked. Bonded store was sealed by Customs.

Charts: B.A. Charts No. 1270, 913 and 1258.

Garbage Disposal: Not available.

Waste Oil Disposal: Cargo tank slops can be discharged by mixing with cargo. No other facilities available.

Seaman's Clubs: None.

Currency: Korean Won. U.S.$ 1.00 = 810 Won (August 1994).

AUTHORITY: Hyundai Oil Refinery Co.Ltd., 640-6, Daejook-ri, Daesan-eub, Seosan-gun, Chungchongnam-do, Korea. Postal address: Seosan-Kun Sanjeon, P.O.Box 10, Chungchongnam-do, Korea. *Tel:* (0455) 60-5114. *FAX:* (0455) 60-5118. *Contact:* Captain B.W. Won, Manager – Marine Affairs.

DAIPORI (Daepo): 38.10 N. 128.36 E.

Vessels bound for Daipori to load iron ore must first call at Mukho for quarantine and customs clearance.

Pilotage from Mukho to Daipori, distance of 50 miles, is not compulsory, but recommended.

INCHON: 37.28 N. 126.37 E. (See Plan)

DOCUMENTS:

Arrival:
8 Crew Lists.
4 Cargo Manifests.
4 Stores Lists (Bond and shop).
4 Crew Customs Declaration.
4 Narcotics List.
4 Arms and Ammunitions List.
4 Ports of Call Lists (last 90 days).
1 Vaccination List.
2 Money Lists.
4 Passenger Lists (Marked "Nil").
Derat Certificate or exemption.

All the above lists are typed on ship's plain paper.

Coasting on Korean Coast: At each port after the first, one requires the same papers but only 2 copies of each, with the exception of the Crew List, of which 5 copies are required.

Vessels with hazardous cargo must complete application to carry hazardous cargo and an application for anchorage of hazardous cargo vessel.

PILOTAGE: There are 2 Pilot stations for entering Inchon (Tel: 883 8111/4): *Ando:* At the Ando Light 38 miles off Inchon, position Lat. 37° 03.9′ N., Long. 126° 16.5′ E. (good weather) and Lat. 37° 06.95′ N., Long. 126° 19.6′ E. (bad weather) located in entrance to channel approaching Inchon from the Yellow Sea. 48 hours advance notice to Agent required for vessels requesting to meet Pilot at Ando, customary boarding point for deep-draft vessels.

Palmido: Pilotage from Palmido to Inchon or Inchon to Palmido is compulsory. This pilot station is at Palmido Island and Light, 8 miles off Inchon, position Lat. 37° 21′ N., Long. 126° 31′ E.

ANCHORAGE: Anchorage is divided into 5 large areas according to cargoes of the vessels.

A 1 – 5 (Logs, pulp)
B 1 – 6 (Ships waiting for entry to the inner harbour)
B 7 – 10 (Oil tankers and ships unloading scrap. Coal)
C – 8 (Small tankers, LPG ships)
D – 3 (Logs)
E 1 – 5 (Ships waiting for entry to the inner harbour)

RESTRICTIONS: A peculiarity of Inchon Port is the wide tidal range, i.e. max. 30 ft. difference between the low and high tides. Because of the extreme tidal range in Inchon Harbour and the strong tidal currents which result, the importance of maintaining strict surveillance of the vessel's mooring lines is emphasised. In this regard, the ship's officers and crew must be diligent in the performance of their duties. All vessels to discharge or load commercial cargoes should invariably obtain prior permission for berthing/anchoring from the Inchon District Maritime and Port Authority at least 24 hours before arrival, then proceed to a nominated anchorage in the stream under direction of a compulsory Pilot.

Lock Particulars:

	For 50,000 d.w.t. Vessels	*For 10,000 d.w.t. Vessels*
Lock Chamber	1 base	1 base
Total length	381.0 m.	288.25 m.
Usable length to		
Inner gate	280.0 m.	183.00 m.
Outer gate	310.0 m.	208.00 m.
Width	36.0 m.	22.50 m.
Height	18.5 m. from sill	18.50 m. from sill
Height	19.0 m. from bottom	19.00 m. from bottom
Number of gates	3 sets	3 sets
Length of gates	38.0 m.	24.50 m.
Width of gates	8.3 m.	6.40 m.
Height of gate	18.5 m.	18.50 m.
Weight per gate	1,050 tons	590 tons
Time required for opening-closing	5 minutes	3 minutes

MAX. SIZE: Max. size 50,000 d.w.t. Max. LOA 302 m. Max. draft 13.0 m. Also see "Berthing" and "Tankers".

HEALTH: The Quarantine Anchorage is located outside the harbour in position Lat. 37° 22′ 37″ N., Long. 126° 32′ 06″ E. A vessel which sailed from an "Affected Zone" and not passed 10 days thereafter is compelled to receive 24 hours quarantine before entering the discharging anchorage. Quarantine is available only for the period from sunrise to sunset.

RADIO: Inchon Radio.

Call Sign	*Frequency*	
	Calling	*Working*
6 MF3	MF 500 kHz	MF 512 kHz 520 kHz
or		
Inchon Harbour Control	VHF Channel 16	VHF Channel 12 Channel 14 Channel 20 Channel 22

TUGS: There are 17 tugs (1,000 h.p. – 3,200 h.p.). 2 – 3 tugs are required for each vessel.

All tugs are operated by private companies.

CRANES: 4 gantry cranes (35 ton class), 4 transtainers (30 ton class), 3 floating cranes (20 ton – 100 ton class), 101 land-based cranes (10 ton – 100 ton class).

BULK CARGO FACILITIES: No. 7 Pier is exclusively used for grain (Rate 800 t.p.h.) by 2 silo operators. Handling capacity is 4 million tons per year and storage capacity is 326,000 tons.

Taihan Bulk Terminal: Accommodates 2×50,000 d.w.t. vessels at dolphins. 2×700 t.p.h. pneumatic suction elevators at each berth. Storage capacity 138,000 tonnes.

BERTHING:

Pier No.	*Berth* No.	*Total Length* (m.)	*Depth* (m.)	*Capacity* (d.w.t.)	*Remarks*
1	11-13	964	8.0	4,500	Dry Cargo
	14-17		7.5	2,000	Dry Cargo
2	21-22	1,442	12.0	20,000	Dry/
	23		12.0	30,000	Bulk Cargo
3	24-28	1,250	9.5	8,000	Bulk Cargo
	31-34		9.5	8,000	Steel and
	35-36		11.0	10,000	Heavy Cargo

4	41	1,160	12.0	10,000	Container
	42		14.0	30,000	Terminal
	43		14.5	50,000	and Bulk
	44		14.5	30,000	
	45		14.5	50,000	
5	51-52	604	14.0	50,000	Dry/Bulk Cargo
6	Under Development				
7	71-72	604	14.5	50,000	Grain
	73-74		14.5	50,000	Terminal
8	81-83		13.0	50,000	Scrap/Bulk

SPECIALISED CARGO HANDLING FACILITIES: No. 4 Pier Nos. 41-43 – (3 berths) – 625 m.; Berth No. 44 – 225 m Berth No. 45 – 310 m.) is used exclusively for containers. It container yards which are capable of storing 15,457 TEU. Ro-Ro available.

STEVEDORES: There are 16 stevedoring companies with 105 fo and 17 cranes. Annual cargo handling capacity is 11,625,000 ton

MEDICAL: Launch is provided in emergency call to evacuate sick Modernised hospital is available.

TANKERS: There are six private companies handling oil, LPG liquids. Maximum quantity of LPG loaded in a single operat 1,500 tons.

Kyung In Energy Co. Terminal:

Designed for 50,000 d.w.t. over 50 ft. depth at LW. The marine term is situated at Lat. 37° 30′ 12″ N., Long. 126° 36′ 19″ E. The face of dolphin fendering system is on a bearing of approximately 347° tru

The vessel will be berthed alongside the main and secondary berth dolphins with the vessel's hull against the fenders, which are an inte part of the dolphins. All the dolphins are equipped with electric caps and quick-release mooring hooks. A navigation light and fog ho located on the Southern Exterior Mooring Dolphin (Exterior Mo Dolphin No. 1). A navigation light is also located on Exterior Mo Dolphin No. 2 on the N. side of the terminal facilities. When a vess the 50,000 d.w.t. class is moored to the terminal, the bow and lines will perform the function of the breast lines. Therefore, the sp lines must be led out through the chocks on board which will pro sufficient leads ahead and astern to restrict the movement of the ve along the face of the dolphins. In this regard, due consideration m be given to the rise and fall of the tide.

Loading Arms: There are 3 "Continental-Emsco" loading arms situ on the loading platform. The one to the extreme North and the m one of the three are for the discharge of crude oil. Both are fitted 16 in. swivel connections having 150 pound flanges. The loading to the extreme South is for the loading of naphtha and is fitted w 12 in. 150 pound flange. The loading arms are designed for a wo pressure of 100 p.s.i.

During the connecting and disconnecting of the loading arms t vessel, the loading arms will be manipulated and positioned by s personnel. During the period of time when the loading arms connected to the vessel's manifold, they will be in the "float" po and will be self-adjusting.

General Information:

Under no circumstances should any member of the ship's activate or operate the controls for the loading arms. Authorised s personnel will perform this function.

The "Continental-Emsco" loading arms will tolerate only a mini amount of transverse movement by the vessel in either directio other words, the movement of the vessel along the face of the dolp is restricted. For this reason, it is mandatory that the vessel be ke position, and that the mooring lines be properly tended. It is responsibility of the vessel to maintain sufficient deck crew on du properly tend the mooring lines, and to ensure that the vessel maint proper position relative to the loading arms.

Discharging Crude Oil:

The distance from the loading platform to the tanks is approxima 2.2 km. (1.4 miles). A 30 in. block valve is situated near the loca where the trestle joins the island causeway. Block valves are installed in the pipeline system near the inlet to each of the crud storage tanks.

There are three crude oil storage tanks on Yul Do Island. Each a capacity of 200,000 barrels. The tanks are 48 ft. in height wi overflow at 46 ft. There are no check valves in the crude oil pip system. Thus, the vessel must take precautions against back-filling to head pressure on the system.

It may be necessary to discontinue the discharge of crude oil w changing from one tank to another ashore. The vessel will be g adequate notice for the stoppage of the ship's cargo pumps.

Ballast:

It is unlawful to discharge dirty or oily ballast water into the wat Inchon Harbour. Severe penalties may be invoked against the ve by the Republic of Korea in the event of pollution of harbour wate

The centre loading arm provides a dual function. It is used discharging ballast from the vessel as well as for the discharge of cr The ballast flows through a 12 in. pipeline to the ballast storage tan Yul Do Island. This tank has a capacity of 30,000 barrels, and is situ about 1.1 km. (0.68 miles) from the loading platform.

Loading Naphtha:

Naphtha is stored in two mainland storage tanks each of which a capacity of 125,000 barrels. Three pumps provide the flow for ship naphtha. Each pump has a capacity of 1,600 g.p.m. The pumps ar independent circuits. Thus, the loading rate of the naphtha ca governed by the number of pumps used.

The pipeline from the pumps to the loading platform is 18 in. an reduced to 12 in. on the loading platform. A block valve is located in 18 in. pipeline near the point where the island causeway joins the tr Another block valve is provided in the 12 in. pipeline on the loa platform.

The pumps which are used for shipping naphtha can be stopped f the Marine Terminal Loading Platform, but they must be started f the mainland. Under normal conditions the vessel's deck officer on w should give the terminal personnel 10 minutes notice prior to reque that the loading rate be reduced, and the same notification prior to completion of loading. As previously stated, the pumps can be sto from the loading platform in case of an emergency.

The approximate distance from the mainland naphtha storage t to the loading platform is 5.4 km. (3.35 miles).

Regulations:

1. A properly licensed deck officer is to be on duty at all times while a vessel is moored to the terminal. A sufficient number of crew members are to be on duty at all times to properly tend the mooring lines and ensure that the position of the vessel is maintained alongside of the dolphins.
2. Except in the case of an emergency, the deck officer on duty shall give the terminal personnel at least 10 minutes notice prior to changing the loading/discharge rate, and at least 10 minutes notice prior to the completion of loading or discharging.
3. Under no circumstances is the vessel's main propulsion engine to be disabled, or are any repairs to be undertaken while the vessel is moored to the marine terminal.
4. The vessel's fire-fighting equipment is to be kept ready for immediate use. A sufficient number of hoses shall be led out forward and aft to provide full deck coverage.
5. Lights must be provided by the vessel to illuminate the water area in the vicinity of the bow, stern and off-shore side.
6. Smoking will be permitted in such *Interior spaces* as may be designated by the vessel's Master. However, smoking will not be permitted on any open deck areas.
7. The loading of ship's stores and water will not be permitted during the time the vessel is moored to the marine terminal.
8. Tank cleaning and "Butterworthing" will not be permitted while the vessel is moored to the terminal.
9. Ullage hole screens are to be used at all times while ballasting and deballasting are in progress.
10. Galley ranges, unless electric, are not to be used while the vessel is loading naphtha.
11. Except for the period of time actually required for passengers to embark or disembark from a launch, no boats, launches, barges or vessels will be permitted to moor alongside a vessel which is berthed at the marine terminal.
12. Safety practices which are common to marine terminals on a world-wide basis will apply.

Honam Buoys: Lat. 37° 29′ 00″ N., Long. 126° 36′ 03″ E., draft acceptable 30 ft., at East side of A–3 Anchorage. This berth is the private facility of the Honam Oil Refinery Co. (joint company with Caltex) for discharge of their own petroleum products. Consisting of 4 mooring Buoys and sub-marine pipelines.

Union Oil Terminal: 42 ft. depth alongside. Berthing/unberthing in daytime slack water only.

Also see "Daesan" and "Shipmaster's Report" dated August 1992.

DENSITY: Varies between 1022 and 1024.

FRESH WATER: Can be supplied by lighter, max. quantity 500 tons.

FUEL: Available by barge only.

CONSULS: None locally. Many Consuls and Embassies in Seoul, 50 minutes by train from Inchon.

REPAIRS: Deck and engine repairs possible by Inchon Shipbuilding Company.

GANGWAY/DECK WATCHMEN: Ship security guard service is supplied by 2 companies.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CUSTOMS ALLOWANCES: One carton cigarettes or 1 lb. of tobacco, and 1 bottle wine allowed, each man.

REPATRIATION: Facilities for crew changes or repatriation.

AIRPORT: Regular flights worldwide from new international airport.

HOLIDAYS: January 1st (New Year's Day); February 20th (Folklore Day, first day of first lunar month); March 1st (Independence Movement Day); April 5th (Arbor Day); May 5th (Children's Day); Buddha's Birthday (8th day of fourth lunar month); June 6th (Memorial Day); July 17th (Constitution Day); August 15th (Liberation Day); September Thanksgiving Day, 15th day of eighth lunar month); October 1st (Armed Forces Day); October 3rd (National Foundation Day); October 9th (Korean Alphabet Day); December 25th (Christmas Day).

POLICE/FIRE/AMBULANCE: Police (883) 0011, Fire (882) 4069, Ambulance (73) 9000 (Inchon City Hospital).

TELEPHONES: Portable communication facility is available.

SHORE LEAVE: Launch service provided by 3 private companies.

IDENTIFICATION CARDS: Crew required to carry valid identification cards at all times.

ACCOMMODATION LADDER: Essential for Port Officials on entry. Also tanker berth no access allowed through plant. Rig on port side.

DELAYS: Can be caused by bad weather.

GENERAL: Tide condition is critical, swift currents (high tide: 9 m. to 10 m.) special attention is required.

DEVELOPMENTS: Coal Terminal to be built in the outer harbour to accommodate vessels up to 100,000 d.w.t. Length of berth 240 m., depth 16 m.

NOTICES: Issued by The Inchon Maritime Police Station, Republic of Korea.

THE GUIDANCE FOR MARINE POLLUTION PREVENTION.

Welcome to Inchon Port.

Today, as an improvement has been remarkably made in the field of industries and marine transport traffic, there has been sudden increase in marine traffic, creating additional exposure to accidental spills.

Thereby, oil and other harmful waste from ships and off-shore facilities are being discharged into the ocean. Their effects are cumulative, the damage adds up year by year until it has reached a serious source of pollution.

As you see, oceans are a cradle of life and weather, a global store house of water and energy and wealth of nutritive and mineral resources.

Our nation, being conscious of the need to preserve the human environment in general and the marine environment in particular, desiring to achieve the complete elimination of the pollutants from the ocean for the protection of human health and property, has enacted the national marine pollution control law, stringently controlling the discharge of oil and waste from a ship or an off-shore facility.

I urge that you take to heart the following note of this guide that most of harmful pollution of shipboard origin is controllable.

This is your challenge; your success will be a victory for all of us.

Marine Pollution Prevention: Most spills from shipboard occur in port and at oil terminals during routine operations, such as cargo operations, bunkering, tank cleaning, bilge pumping and other operational functions, due to deliberate, negligent or accidental release of oil and harmful substances.

Prevention of Bilge Discharge: Prevent the mis-operation of valve by colour coding the related pipeline and post the bilge pipe arrangement in an easily seen place.

Make sure that all the unnecessary bilge pipeline valves are closed.

Use shore waste oil reception facilities when disposing of bilge water.

Prevention of Waste Pollution: Dumping of waste in the vicinity of the harbour area is prohibited.

Dispose of all waste material (trash, sewerage, impure water, etc.) to the stipulated area, according to the marine pollution control law.

Prevention Oil Spill Accidents during the Bunkering Operation: While bunkering, you must keep constant communication between the vessel and the oil barge, by means of radio or hand signals as appropriate, and also keep constant communication between the engine room and oil manifold, by means of ship's telephones.

Close all scuppers completely before starting bunker supply operations, to prevent oil spilling when the oil overflows at deck.

Put containers near air ventilators and pipe coupling flanges to receive leaking oil.

Take soundings at regular intervals.

Communicate to the supply side when the tank is close to a full condition in order not to let in air excessively.

Obligation of Report and Clean-up Response: In case of oil and waste material discharge or spill into the sea, immediately take emergency measures to prevent spreading of the discharged oil, to stop oil discharge and to remove the effluent. Report details of the incident without delay to the nearest Maritime Police as follows:

The date and place of oil spill accident.

The name of ship and off-shore facility.

The quantity and type of oil.

The situation of oil dispersion.

Penal Provisions: Any person who falls under any of the following categories shall be liable to Penal Servitude not exceeding 5 years or a fine not exceeding 50 million Won:

Spilling or discharging oil or waste from ship.

Not taking clean-up action when large amount of oil and waste spill does occur.

Refusing, impeding or evading orders and corrective measures, such as stopping the operation of, searching or detaining ships prescribed by the concerned authorities.

Fail to install the marine pollution prevention equipment or to operate in the normal condition.

Issued by Director General of Inchon Maritime and Port Authority.

PORT INFORMATION.

To: M/V ......

Dear Captain,

Very glad to see and welcome you and your crew members to the port of Inchon, Republic of Korea.

1. Please keep in your mind always attached "Port Regulation" which should be observed by National Law for preventing water pollution and protecting port facilities while your vessel is docked or/and at anchorage at Inchon port.
2. You might sometimes have sudden strong gusts without notice to weather condition at this port. Please have enough manning for duty watches while you stay here for preventing accidents on the ship.
3. While you stay dockside, please call 885-0313 Port Operations Division, if you have any requisitions and inconvenience.
4. When you wish to call outside, please pick up the ship's port telephone and dial telephone number (dial code 9 first and then telephone number).
5. If you want to call the ship from the city, please dial 400-7114 (port telephone) and ask operator for your ship. Please dial code 032 first when you are outside of Inchon.
6. When you need assistance and in case of emergency, please call your Agent or 885-0313 (Port Operations Division).

Issued by Director General of Inchon District Maritime and Port Authority.

IMPORTANT NOTICES.

We welcome your ship and your crew to our port.

The Republic of Korea is a participant of the International Convention for the Prevention of Pollution from Ships, 1973, as modified by the Protocol of 1978 relating thereto MARPOL '73/78 and your ship, while in this port, requires inspection by officials duly authorised by the Government of Korea, who are called Port State Control.

Port of Inchon within lock gate is a special area entirely closed by a lock gate due to the high tidal difference of sea and water within lock gate and has no self-clarifying capacity.

So your ship and your crew are strongly requested to observe the following in our port, to protect our port environment from pollution caused by large number of ships using our port and to provide you with a pleasant place.

1. Oil, oil-mixed liquid substances, sewage and garbage from ships should be cleared by the authorised agency. Please do not discharge these substances within the harbour limits.
2. When oil, oily mixture or noxious liquid substances are discharged, please take required emergency procedures immediately and inform Port Authority of the incident without hesitation.
3. Do not refuse, interrupt or evade the directions and/or orders relating to pollution control by the Port Authority.

Any violation of the above requirements is prohibited and stern sanctions will be given to the violators under the provisions of the Korean laws concerned.

Penalties can be an imprisonment of a maximum 5 years or a fine of 20,000,000 Won, as per ship/person.

SHIPMASTER'S REPORT: October 1986.

Pilot is quoted as being at Ando, as in Charterer's telexes, the actual pilot station is Chang-An-So, approximately 2.5 hours steaming to Inchon Anchorage. Pilot not compulsory, but unless vessel is a local trader, strongly recommend use of Pilot. Outside there is no draft problem, shallow patches to be avoided are well marked on charts.

Vessel anchored off Inchon Main Lock at 1930 hrs. on 10th October. Shortly after which 2 Berthing Pilots boarded. 4 tugs made fast, each bow and each quarter. There are strong currents. Lining-up for lock entrance not easy. Due to language it was not possible for Master to communicate with tugs. Max. draft for Inchon Lock, 12.5 m. at high tides and 12.2 m. at neap tides. Cleared lock and moved into container berth. Vessel berthed safely with no damage to or against vessel. All fast 2318 hrs. on 10th October.

Charterer's Agent attended vessel on arrival with Port Health for Pratique. At approximately 0900 hrs. next morning Customs, Immigration and other officials boarded and vessel was properly cleared. Inspection of ship followed. Accommodation spaces all found clear. Insects were found in holds in corn cargo so at 1100 hrs. was informed all but essential crew would be taken off for a day at 1400 hrs. for vessel to be fumigated. I remained on board with 2nd Officer, 3rd Engineer and 3 seamen. I requested to know what gas was being used and that some safety equipment be left on board. As only cargo space involved Charterers informed me, but not in writing, that they would bear all expenses.

Crew returned on board at 1400 hrs. on 12th October. Vessel still under fumigation. Crew then opened hatches. The actual fumigation was carried out in an efficient manner, but if something had gone wrong company would be responsible.

Discharge commenced 1905 hrs. on 12th October. Work is around the clock. But if a container ship comes in, the gantries are moved to her. Discharging also stops when it rains. There are 4 container gantries. All have grab facility, I noticed 40 tonne SWL on grabs.

The berth is well fendered, with adequate mooring bollards. Fresh water is supplied by barge. Medical facility appears to be good. Shore passes are issued and must be taken ashore. The guards at the dock gates are very strict. The dock system is large. No taxi or private car allowed in. This assists vessel to keep unauthorised people off ship.

Container berth also seems to discharge timber carriers and grain. The stevedore permanently on board, co-operated well with Chief Officer. Port Health came on board to renew Derat, no difficulties encountered.

SHIPMASTER'S REPORT: November 1989.

Vessel:

LOA	159 m.
Beam	22.85 m.
Type	Santa Fe 77.
G.R.T.	12,376 tons.
N.R.T.	8,369 tons.
D.W.T.	20,949 tonnes.
Cargo	15,730 tonnes of tapioca pellets in bulk.
Max. arrival draft	31 ft. 00 in.

Approaches: Pilot boarded about 1 mile off Changnanso Lighthouse in fair weather. No difficulties found when approaching, but much attention must be given to fishing boats and their fishing nets.

Both channels (inbound) East and (outbound) West, are well marked as on BA. Charts No. 1258 and 1270.

Inbound: Steaming about 3 hours from Changnanso Lighthouse (Pilot position) to Inchon anchorage with one Pilot only. Another Pilot used from the anchorage to lock and berthing.

Outbound: Only one Pilot used for unberthing, lockage and steaming in channel. Pilots are very good, co-operative and experienced.

Anchorage: The holding ground of Inchon anchorage is very good, even with strong currents. Waiting time at anchorage depends on berth congestion and fumigation. Port Authorities boarded at anchorage (Quarantine) for clearing the vessel. Accommodation and cargo inspection by quarantine officers. Cargo found without insects so no fumigation carried out. Very strict inspection of provisions, store rooms and galley. They are looking for cockroaches and rat excrement.

Boat service from anchorage to port is available but rates are very high.

Port: Outer Harbour: For tankers and dry cargo vessels with up-to-date loading/unloading facilities.

Inner Tidal Basin: For dry cargo vessels up to 50,000 d.w.t. and approximately 11 m. – 12 m. draft. All berths are well fendered.

Special attention must be given to standard port regulations in the tidal basin area as authorities are very strict on violators.

No chipping or painting permitted to the vessel's outer hull.

Tugs: 2 – 4 tugs used for berthing, unberthing and locking, depending on wind/weather, d.w.t. and draft of the vessel.

Lock: Special attention shall be given to the Safe Lockage Regulation and Inchon District Maritime and Port Authority Law No. 14, which is presented on arrival by the local Agents.

Actual tests to vessel's engines, steering gear, telegraphs, whistle, etc. must be carried out by the vessel prior to entering the lock.

All movable projections over vessel's side must be moved inboard and movable fenders are to be ready for use if necessary. Lock is well fendered.

For entering the lock, 3 tugs are used.

For safe lockage, trim and list (port/starboard) must be adjusted to proper conditions or as required by the authorities.

East side of the lock (tidal basin entrance) is under construction and large works are being carried out.

When entering the lock for mooring, use only polypropylene ropes (no wires) as they are easier for handling. Vessels are moored at the centre of the lock chamber.

Stevedores: Work round the clock and mostly use ship's gear. Bulk cargoes are discharged very quickly, rates from 2,000 tons – 3,000 tons per day, depending on number of gangs.

Fresh Water: Available by barge only, due to general repairs and of piping system at the port. Cost is about U.S.$5.00 per ton.

Shore Passes: Crew members shall always carry their Pas Seaman's Book and landing pass when going on shore leave.

Port Authorities are very strict, and in cases where landing are lost, heavy fines are imposed and have to be paid.

Density: Inner harbour tidal basin 1023.

Repatriation: Repatriation possible without difficulty. Intern connections are via Seoul which is 1.5 hours by car from Inchon

SHIPMASTER'S REPORT: August 1992.

Kyung In Energy Co. Terminal:

Restrictions: Berth designed for 50,000 d.w.t. vessels, but now regularly by 100,000 d.w.t. vessels, which makes mooring lead for vessels of our size. Breast lines were extremely short.

Vessels berth in daylight only on the first of the ebb, but can time, usually planned for last of flood.

Present draft restriction in river is 12.0 m.

Pilotage: Vessels pick-up pilot at Chang So, enter using Ea Channel, and depart using Western Channel.

AUTHORITY: Inchon District Maritime and Port Authority, 1-17 dang 7-ga, Jung-gu, Inchon, Republic of Korea. *Tel:* (032) 88 *Telex:* K23380 Idmapa. *Contact:* Kyu Jin Whang, Director Gene

KUNSAN (including Changhang): 35.55 N. 126.45

The Port of Kunsan is situated on the Southern mouth of the Kun which flows into the Yellow Sea, and North Changhang.

DOCUMENTS:

6 copies Report (Entry/Departure).
6 copies Crew List.
6 copies Passenger List.
2 copies Crew Personal Effects List.
3 copies Passenger Luggage List.
2 copies Store List.
9 copies Manifest (Dis./Loading) only.

NOTICES: All vessels bound for Korean ports should give an E the local Agents 27 hours prior arrival. This is essential to enab Agents to notify the Port Authorities and arrange Pilot if necessa

RESTRICTIONS: Vessels should enter during daylight hours only. small Korean fishing and cargo boats in this area display dim navig lights or none at all at night. Pilot is not compulsory but all vessels at this port recommended employ a Pilot in view of the haza channel and tidal difficulties. Controlling depth 8 ft. at Bar clearance of 2 ft. required.

PILOTAGE: The pilot station is situated at the Southern side of Do (Hiyo To) Island the correct position of which is at Lat. 35° Long. 126° 27′ E.

The boarding point near Piun Do is about 14 miles from Kunsan to be ordered at least 24 hours in advance. Pilots cannot board in weather. Due to constantly changing bottom conditions, vessel s not attempt to enter without Pilot.

ANCHORAGE: Outer anchorage about 5.5 miles West of Kuns vessels drawing up to 28 ft.

Inner anchorage off Kunsan suitable for vessels of 21 ft. draft.

MAX. SIZE: Draft 18 ft. to 27 ft. dependent on height of tide.

RADIO: Kunsan Radio, call sign HLN operating on 500 and 484

TUGS: 5 tugs with respective capacity of 300 h.p. (1) 150 h.p. (80 h.p. (2) are available. 1 floating crane with capacity of 30 tons and managed by the Korea Dredging Corp. is available.

BERTHING: The port is controlled by Kunsan District Marine B and all vessels come under jurisdiction of Kunsan Custom House anchorages in stream inner harbour can accommodate 1 or 2 ve less than 1,000 gross tons, and outer anchorage (Yubudo Ancho accommodates 1 ocean-going vessel drawing about 28 ft. There pontoon piers (3 for Kunsan and 2 for Changhang) each of whic accommodate an ocean-going vessel with maximum draft of 27 f

STEVEDORES: There is 1 stevedoring company with 14 wo barges, 3 steel barges and 3 tug boats. Discharging capacities: av records per day of 24 hours: coal 1,500 tons; grain and wheat tons; fertilizer 1,300 – 1,400 tons; cement 1,000 – 1,100 tons; lau 500,000 B/F. Daytime only.

MEDICAL: Crew members should be in possession of health cer showing vaccinations for typhoid. In case health certificate has ex the person(s) will be vaccinated/inoculated by a quarantine doct

CURFEW: In Korea the curfew is still effective from midnight to 040 every day.

HOLIDAYS: Public Holidays – New Year (January 1-3); Indepen Movement Day (March 1); Labour Day (March 10); Arbor Day (A Memorial Day (June 6); Constitution Day (July 17); Liberatio (August 15); Nation's Foundation Day (October 3); National A Day (October 9); United Nations Day (October 24); Christma (December 25). (Can be worked if requested.)

Local Holidays. Work cannot be carried out on Lunar New Yea and the Moon Festival, about 15th August.

SHORE LEAVE: Crew shore passes will be issued by Port Immig Office.

DEVELOPMENTS: Major developments underway.

AUTHORITY: Kunsan District Maritime and Port Authority. *Tel* 3 4131/4. *Telex:* K66666 Gsdmpa.

MASAN: 35.11 N. 128.35 E.

PORT LIMITS: *Port Boundary:* 35° 09′ North.

Arrived ship: A vessel is considered as "arrived" when in the Quarantine Anchorage.

Laytime: (Subject to Charter Party). Generally commences at 0800 hrs. If Notice of Readiness tendered p.m. day before and 1300 hrs. if tendered a.m. day of arrival.

DOCUMENTS:

11 copies of Crew Lists (inward and outward).
3 copies of Personal Effects.
3 copies of Stores List.
3 copies of Bonded Stores Lists.
11 copies of Passenger Lists.
3 copies of Narcotics Lists.
3 copies of Arms and Ammunition Lists.
4 copies of Manifests (entry clearance only, excluding manifest for consignee, stevedore, checker's firm and other related firms)
2 copies of Bill of Lading.
5 copies of Entry Report (only entry clearance).
Ship's Certificates and Seaman's Books or Passports.

PILOTAGE: Kaduk Pilot Station: Lat. 35° 02′ N., Long. 128° 47′ E. ETA required 24 hours prior to arrival. (Tel: 2-9225).

Two pilot boats "An Se" and "Be Yun". VHF to be installed in pilot boats. At the present time contact with Pilot made through Agent or Masan Harbour Control on VHF. Vessels to display usual pilot signals.

In case of bad weather vessels wait for Pilot at the pilot station.

ANCHORAGE: Mooring capacity at anchorages: A-1, A-2, A-3 Depth 31 ft.; A-4, A-5, A-6 Depth 24 ft.; A-7, A-8 Depth 23 ft. Quarantine Station Depth 36 ft.

RESTRICTIONS: Should take Pilot's guidance as a Korean Navy base is located very close to Masan port.

MAX. SIZE: 20,000 d.w.t. LOA 210 m. Max. draft 11.0 m.

HEALTH: Crew members should be in possession of health certificate showing vaccination for typhoid. If the health certificate has expired, the person(s) will be vaccinated/inoculated by a Masan National Quarantine Doctor.

RADIO: Seoul Radio.

VHF: VHF at Masan District Maritime and Port Authority (Call "Masan Harbour Control").

RADAR: None.

TUGS: Two tugs, "Chung Ryong" (Government owned) 1,000 h.p. and ing Ma" (Private) 2,000 h.p. Generally, ship's lines used and tugs on vessel at Quarantine Anchorage.

BERTHING:

	Depth (m.)	Length (m.)	Max. Size	No. of Berths
Pier No. 1	8.0	445	8,000	2
Pier No. 2	5.0	385	500	2
Pier No. 3	11.0	210	20,000	1
	11.0	210	20,000	1
Pier No. 4	11.0	1,050	20,000	5
Dolphin	7.0	88	5,000	1
HIK	11.0	240	20,000	1
Yukong	7.0	100	3,000	1

CRANES: Cranes with capacity 40 – 60 tons expected to be installed at Chang Won Pier. Cargo operation is generally by ship's own gear.

BULK CARGO FACILITIES: There are two bulk cargo piers (Nos. 1 and 3), average discharge rate is 1,500 – 1,800 tons (0800 hrs. – 2100 hrs.) a day, and sulphur is generally discharged at port of Chinhae, where there is a chemical firm.

Length of pier: 210 m. Depth (low tide) 11 m. and one gantry crane (capacity 6 tons bucket) discharging rate is approximately 5,000 tonnes a day (24 hours).

SPECIAL CARGO HANDLING FACILITIES: None.

BRIDGES: None.

STEVEDORES: Advise stevedores number of hatches, number of derricks and capacity, and supply stowage plan on arrival.

Average *Discharging Rate by Commodities:* (0800 – 2100 hrs.).

Coal	1,500 tonnes
Grain	1,500 tonnes
Wire Rods	700 tonnes
General Cargo	700 tonnes
Others	600 tonnes

MEDICAL: Masan National Quarantine Office is responsible for any matters relating to vaccinations. Master should prepare a medical report form for patients visiting Masan hospital.

TANKERS: No facilities (Transhipment if any, carried out by lighters).

FRESH WATER: Available at Masan.

FUEL: Available by grades.

FIRE PRECAUTIONS: One fire boat stands by 24 hours a day at Central Pier.

CONSULS: None.

REPAIRS: Available anytime (two companies).

DRY DOCKS: 3 minor dry docks.

SURVEYORS: Various survey firms located at Masan, but not Lloyd's or ABS.

HATCHES: Generally, first opening and last closing is by ship's crew and others by stevedores.

GANGWAY/DECK WATCHMAN: Available at Masan.

CUSTOMS ALLOWANCES: Daily consumption quantity only.

CARGO GEAR: Using of cargo gear (utilisation) depends on negotiation.

REPATRIATION: Possible. Application for transferring and reason required. Agent's guarantee letter (for Crew) also required.

AIRPORT: Kimhae Airport: 70 km. from Masan. Kimpo Airport: 436 km. from Masan. Regular services.

POLICE/AMBULANCE/FIRE: Telephone Numbers:

Police (Foreign Section) 2-1206; Fire 2-1334; Ambulance 2-1151.

HOLIDAYS: New Year's Day (January 1st); New Year's Day (by Lunar calendar) (January 1st), Independence Movement Day (March 1st); Labour Day (March 10th); Arbor Day (April 5th); Buddha's Birthday (Lunar calendar) (April 8th); Children's Day (May 5th); Memorial Day (June 6th); Constitution Day (July 17th); Independence Day (August 15th); Armed Forces Day (October 1st); National Foundation Day (October 3rd); National Alphabet Day (October 9th); Christmas Day (December 25th).

Cargo operations on the above days depend on negotiations.

TELEPHONE: Not available on board vessels.

SERVICES: Security guard, garbage disposal, line handling, shoring, launch, laundry and provision supply available at Masan.

SHORE LEAVE: Crew shore pass issued by Immigration and has to be extended every 120 hours.

IDENTIFICATION CARDS: Shore pass available from Immigration.

DELAYS: There are no delays for berthing or bunkering.

GENERAL: ETA to authorities concerned no later than 24 hours before arrival.

DEVELOPMENTS: A large container yard to be built.

AUTHORITY: Masan District Maritime & Port Authority. *Tel:* (0551) 31176. *Telex:* K53676 Msdmapa.

MOKPO (Mogpo): 34.46 N. 126.24 E. (See Plan)

PORT LIMITS: A vessel is an "arrived ship" when within the harbour.

DOCUMENTS:

6 copies Report (Entry/Departure).
10 copies Crew List.
6 copies Passenger List.
3 copies Crew Personal Effects List.
3 copies Passenger Luggage List.
3 copies Stores List.
3 copies Arms, Ammunition and Explosives List.
3 copies Narcotics List.
9 copies Manifest (Dis./Loading only).

PILOTAGE: Pilots stationed at Kasado Island, 34° 27′ N. 126° 04′ E. 30 miles from Mokpo (Tel: 631-78-8473). 24 hours notice to Agent required to arrange Pilot. Although not compulsory, vessels strongly recommended not to enter without Pilot as there is a 9 m. shoal patch at Talipakji (Tallibakchi). Pilot boat is painted white with "Pilot" on both sides.

Pilot also available at Pulmugido (Bull Muu Key Do) Station, 34° 44′ 24″ N., 126° 14′ 24″ E., Daenorogdo (De No Lock Do) Station, 35° 07′ 30″ N., 126° 00′ 00″ E., and Oryongdo (O Long Do) Station, 34° 18′ 18″ N., 126° 27′ 12″ E.

One pilot available day and night.

All vessels bound for Korean ports should give an ETA to the local Agents 24 hours prior to arrival. This is essential to enable the Agents to notify the Port Authorities and arrange a Pilot if necessary.

APPROACHES: Vessels should keep clear of 1.3 m. depth (rock) in vicinity of Shihado Lighthouse which is marked by a buoy in position Lat. 34° 41′ 30″ N., Long. 126° 13′ 35″ E.

The "Wooden Wreck 1950" in position Lat. 34° 41′ 58″ N., Long. 126° 14′ E. has rotted away and is no longer a danger to navigation.

The Entrance Channel is 570 m. wide and has a depth of 25.0 m. Strong currents can be expected, especially during spring and ebb tide, and can reach max. 8 knots. Turning point to Tallipakchi (Quarantine Anchorage) is 200 m. wide and 9.5 m. depth at L.W.

Also see "Pilotage".

ANCHORAGES: *Quarantine Anchorage:* In the position Lat. 34° 45′ 10″ N., Long. 126° 20′ 17″ E. in the Outer Harbour, outside harbour limits.

Anchorages: No. 1, 2 and 3 are for waiting (No. 1 and 2 for 10,000 d.w.t., and No. 3 for 30,000 d.w.t.). No. 4 and 5 for discharging whilst at anchor (for 30,000 d.w.t), and No. 6 for discharging and waiting for 10,000 d.w.t. Note: There are 6 anchorages in the Inner Harbour for sheltering in bad weather. No. 1 to No. 6 are for ocean-going vessels, 10.0 m. – 24.0 m. and for 10,000 g.r.t. – 40,000 g.r.t. Pay special attention at Anchorages No. 1 to No. 5 to under water cables and at No. 1 to strong currents. Pilot will assist in this matter.

RESTRICTIONS: *Overhead Cable:* There is an overhead cable at Mokpo-Gu in position Lat. 34° 45′ 18′ N., Long. 126° 18′ 40″ E., clearance is 59 m.

MAX. SIZE: Vessels of 45,000 d.w.t., LOA 230 m. and max. draft 12.0 m. can be accommodated in the Inner anchorage. Max. size at berth 38,000 d.w.t.

TUGS: 1 × 2,000 h.p. tug stationed at Mokpo.

Vessels of 12,000 d.w.t. – 30,000 d.w.t. are required to use tug of 3,000 h.p. or more for berthing and unberthing, so an additional tug of 2,000 h.p. has to be hired from Kunsan (122 miles from Mokpo) at a cost of U.S.$ 6,500 for the round trip.

BERTHING:

Berth No.	*Length* (m.)	*Depth (L.W.)* (m.)	*Depth (Neaps)* (m.)	*Remarks*
11	168	8.4	9.5	Max. size 30,000 d.w.t. Ship's gear used.
12	250	10.5	11.5	Max. size 30,000 d.w.t. 1 level luffing crane for coal and logs.
13	240	10.5	11.5	Max. size 10,000 d.w.t. Ship's gear used.
14	180	–		Max. size 5,000 d.w.t. Ship's gear used.

Remarks: Usable length at Berth No. 12 is 230 m. and at Berth No. 13 200 m., as the pneumatic suction conveyor is sited at the berth. The discharging rate of level luffing crane is 450 t.p.h. (working hours 0800 hrs. – 2200 hrs.).

RADIO: Mokpo Radio – Call Sign "HLM".
M/F: 500, working 512 and 520 kHz.
SSB: 2183.4, working 1881.4 kHz.
VHF: Channel 16, work on Channels 12, 14, 20 and 22.

VHF: Pilots on Channels 12 and 16. Port Control on Channels 16 and 14.

STEVEDORES: There are 3 general stevedores and one exclusive stevedore (Han Kook Flour Mills Industries Co. Ltd.).

1. Korea Express Co. Ltd.: 2 payloaders and 12 trucks (10 tons – 15 tons).
2. Dong-A Transport Co.: 2 mobile cranes (30 tons – 80 tons) and 2 payloaders.
3. Daijin Corp.: 10 mobile cranes (25 tons – 60 tons), 1 payloader, 2 forklifts, 3 trailers and 10 trucks (15 tons).
4. Han Kook Flour Mills Industries Co. Ltd.: Handle their own wheat in bulk only. 6 steel barges (total capacity 1,500 tons), 1×370 h.p. tug and 1 silo of 24,800 tons capacity. They also operate a pneumatic suction conveyor at Pier No. 13. Ships are unloaded into barges by ship's gear at Anchorage No. 5 which is 400 m. from the quay.

Cargo Handling Rates:

Cargo	*Daily Discharge Rate*	*Working Hours*	*Location (Pier)*	*Receiver*
Coal (anthracite)	6,000 tons	0800 – 2200	12	Dai Han Corp.
Coal (steam)	6,000 tons	0800 – 2200	12	Koryo Cement
American Logs	850,000 board ft.	0800 – 1800	12 13	Various companies.
New Zealand Logs	2,200 cu.m.	0800 – 1800	12 13	Various companies.
Chilean Logs	2,500 cu.m.	0800 – 1800	12 13	Sammi/Hyosung
Yellow Maize	1,300 tons	0800 – 1800	11	Samyangsa
U.S. Wheat	2,100 tons	0800 – 1800	Anchorage No. 5	Han Kook
Butanol/DOP	300 tons	0800 – 2200	11 13	Lucky Goldstar (Export)

Note: Night shift labour not available due to labour shortage.

Delays can be expected when wheat vessels and yellow maize vessel in port at the same time.

Discharge Rate: Grain and coal 4,000 tons/day, logs 2,000 tons(cu.m.)/day.

Working Hours (Gang Hour): 0800 hrs. – 1200 hrs., 1300 hrs. – 1800 hrs. No work on holidays and at night.

Cranes: Max. SWL 90 tons crane and various smaller cranes are available (owned by stevedoring companies). Level luffing crane is sited at the Wharf No. 12 (max. SWL 12.5 tonnes), for discharging coal 400 t.p.h.

MEDICAL: Hospital and Dentist available. Crew members should be in possession of Health Certificate showing vaccinations for typhoid. In case the Health Certificate has expired, the person(s) will be vaccinated/inoculated by a quarantine doctor.

TANKERS: Facilities for domestic vessels only.

FRESH WATER: A 50 ton barge can supply 100 tons a day. No pipelines on quay. 24 hours notice required. Cost U.S.$ 4.50 per ton.

FUEL: Duty free bunkers not available in Mokpo. Bunkers are supplied from Yosu, with 5 days notice to main Agent in Seoul.

DRY DOCKS/REPAIRS: Shipyard: Il Heung Shipbuilding Co.Ltd. (Tel: (631) 442411, 449531. Fax: (631) 449532) has a 1,000 d.w.t. class slipway, and Kwang Yang Shipbuilding Co.Ltd. (Tel: (631) 776111-4. Fax: (631) 770615) can build 5,000 g.r.t. ships, and has 4,000 g.r.t. class slipway, and can repair and build all kinds of ships.

SURVEYORS: Komsa and Kimsco.

AIRPORT: Domestic airline service (connected to Kimpo International Airport) is available at Mokpo Airport and Kwang-Ju Airport.

TIME: GMT plus 9 hours (no changes).

HOLIDAYS: Public Holidays; New Year (January 1st-3rd); Independence Movement Day (March 1st); Arbor Day (April 5th); Korea Veteran's Day (June 6th); Constitution Day (July 17th); Liberation Day (August 15th); Nation's Foundation Day (October 3rd); Korea Thanksgiving Day (varies – 3 days); Christmas Day (December 25th). Work can be arranged on all above holidays. Local Holidays; No work can be done on Lunar New Year or on the Moon Festival about August 15th.

SHORE LEAVE: Crew shore passes will be issued by Port Immigration Office. Shore Passes should be made for 5 days and can be extended.

GARBAGE DISPOSAL: Collection service is available. Skips are provided to the ship by disposal company. Tel: (0631) 42-6742. Fax: (0631) 42-4405. Collection time: Every 2 or 3 days if skips are full.

WASTE OIL DISPOSAL: Collection service is not available as there are no shore tanks, barges or tanker trucks.

SEAMAN'S CLUBS: No Seaman's Club available. Facilities available in the port: Shops, international telephone service, church services, minibus, postage facilities, games, indoor swimming pool, etc.

SERVICES: Seawoon Shipping Services Inc. (See "Agent") can arrange for crew repatriation, urgent fresh water supply, cranes, crew medicals/ambulance, ship's supply services, renewing Derat Certificate, Banks, crew shore leave, Maritime Rescue boat, etc., including urgent Agency assistance.

BANKS: Korea Exchange Bank. Tel: (0631) 72-8301. Fax: (0631) 74-3581.
Seoul Trust Bank. Tel: (0631) 42-4461. Fax: (0631) 42-4464.
Kwangju Bank. Tel: (0631) 42-5102. Fax: (0631) 43-6564.

AUTHORITY: Mokpo District Maritime and Port Authority, 80-7 Samhak-Do, Sanjong-Dong, Mokpo City, Chonnam, Korea. (530-350). *Tel:* (0631) 42-1301. *Telex:* K 66767 MPOSMPA. *FAX:* (0631) 43-1307. *Cables:* MPOSMPA Mokpo. *Contact:* Joo Jae Hwan, Port Director. Won-Myung Kim, Harbour Master. Kyu-Sang Choi, Port Manager. Captain I.C. Jung, Pilot.

MUKHO: 37.33 N. 129.07 E. (See

PORT LIMITS: The port limit is established by lines joining the fo points:
A. Lat. 37° 33′ 12″ N., Long. 129° 07′ 25″ E.
B. Lat. 37° 33′ 12″ N., Long. 129° 08′ 12″ E.
C. Lat. 37° 32′ 00″ N., Long. 129° 08′ 23″ E.
D. Lat. 37° 32′ 00″ N., Long. 129° 07′ 02″ E.

DOCUMENTS:
6 Crew Lists.
6 Passenger Lists (In case of any passenger aboard).
3 Stores Lists.
3 Personal Effect Lists.
3 Cargo Manifests (In case of any cargo on board).
2 Port Itinerary Reports (For the last 6 months).

PILOTAGE: Compulsory and 3 licensed Pilots are availab 0500 – 2200 hrs., and usually join ship in position Lat. 37° 32′ Long. 129° 08′ 25″ E.

VHF Radio is available for contacting pilot station (Tel: 2-2324

ANCHORAGE: Outer Harbour offers anchorages for the vessel aw docking order with a rocky and sandy bottom.

Vessels lying anchored in this anchorage which is open road recommended to pay attention to weather conditions. The depth from 9 m. to 26 m.

RESTRICTIONS: Pilot for entering inner harbour is availab 0500 hrs. to 2200 hrs. due to close of port.

The max. available depth of inner harbour is 8.5 m. The ma range is 0.4 m.

MAX. SIZE: The max. permissible length, breadth and draft for en inner harbour is as follows:
Length – 180 m. Breadth – 25 m. Draft – 8.5 m.

HEALTH: Pratique is automatic. For Pratique it is necessary to p the following documents: Yellow cards. Derat Certificate and/or Exemption Certificate. In the event of any suspected disease o on board it should be reported without delay to Quarantine Statio or Agent in Mukho.

RADIO: Shore Radio Stations: Seoul Radio, Kangreung Radio, Radio and Mokpo Radio.
Mukho harbour Network 6MF2.

VHF: Call sign "Mukho Radio" Channel 16 for calling station. C 26 for communication.

RADAR: None.

TUGS: 2 tugs of 1,000 h.p. each equipped with their own towin available.

BERTHING: *No. 1 Pier.* (Exclusively for loading Coal/Graphite in

Berth A: Exclusively for loading Coal/Graphite in bulk. Length 1 Available draft at LW 7.5 m. 2 lines of belt conveyor and 2 loa height above HWL. 7 m. Loading rate per hour per loader 300 to

Berth B: Exclusively for loading Coal/Graphite in bulk. Length 1 Permissible draft at LW 8 m. 2 lines of belt conveyor and 2 loa height above HWL. 7 m. Loading rate per hour per loader 400 to

No. 2 Pier: Exclusively utilised for Naval and Coast Guard ships. L 140 m. Depth available 4 m.

No. 3 Pier: For loading bulk cement, bagged cement and cement c in bulk, and loading/unloading general cargoes. Length 330 m. Ava draft at LW 8.5 m. or 28 ft. 1 line of conveyor and 1 loader (air s for loading bulk cement. 2 lines of belt conveyor and 2 loaders for lo bagged cement. 1 line of belt conveyor and 1 loader for loading ce clinker in bulk. Available height above HWL 8 m. Loading Rate cement 400 tonnes/p.h. Bagged cement 1,500 tonnes per da loader. Cement clinker 350 tonnes/p.h.

Loading rate for General Cargo as follows:

Average discharging rate per hour/gang:

Steel material	Various	30 tonnes
Machinery	Case	30 tons
Grain	Bulk	25 tonnes
Gypsum	Bulk	25 tonnes
Coke	Bulk	15 tonnes
Fertiliser	Bag	20 tonnes

Average Loading Rate per hour/gang:

Iron Ore	Bulk	20 tonnes

No. 4 Pier: For loading bulk cement and loading/unloading ge cargoes. Length 150 m. Permissible draft at LW 7.5 m. 1 line o conveyor and 1 loader (air sliding chute) for loading bulk cement. H above HWL 8 m. Loading Rate: Bulk Cement 400 tonnes/p.h. Lo rate of general cargoes same as at No. 3 Pier. Discharging ra general cargoes same as at No. 3 Pier.

Central Pier: For loading/unloading general cargoes. Length 1 Permissible depth at LW 6.5 m. No shore facilities. Loading/unlo general cargoes same as at No. 3 Pier.

CRANES: Mobile Cranes 1×20 ton and 1×30 ton.

STEVEDORES: Vessels bound for this port are to radio Agent Sh Consignee and Harbour Master, at least 24 hours prior to arrival on arrival, description/quantity of cargo.

Average Discharge Rate per gang/hour:

Steel materials	Various Types	30 tons
Machinery	Case	30 tons
Grain	Bulk	25 tons
Ores	Bulk	25 tons
Fertiliser	Bag	20 tons

Average Loading Rate per gang/hour:
(Only with labourer hands – manually)

Ores	Bulk	20 tons

Average Loading Rate per gang/hour:
(By shore loading facilities)

Coal/Graphite	Bulk	350 tons
Cement	Bulk	350 tons
Cement	Bag	60 tons
Cement Clinker	Bulk	350 tons

ULK CARGO FACILITIES: No discharging facilities. Loading facilities e "Berthing".

EDICAL: Several hospitals available.

ANKERS: No facilities.

ENSITY: Average salinity of water in the port is 1.025.

ESH WATER: Supply of fresh water available by water barge and om shore water works.

Supply at pier	50 t.p.h.
Supply by barge	100 tons per day

UEL: Most grades of domestic and bonded oil available with 4 days or notice.

E PRECAUTIONS: None.

NSULS: None.

PAIRS: None.

Y DOCKS: None.

RVEYORS: Classification Surveyors are in Seoul and/or Busan.

GWAY/DECK WATCHMAN: Owner's/Master's option.

TCHES: First Opening/Final Closing by crew and intermediate nding by stevedores.

STOMS ALLOWANCES: Cigarettes: 1 carton. Wine/Spirit: 2 bottles.

RGO GEAR: Shore loading facilities, see "Berthing". No heavy lift nes.

EPATRIATION: Possible.

RPORT: No airport locally, however there is an express bus service tween Mukho and Seoul.

LIDAYS: *Official Holidays are as follows:*

New Year Day	1st January	Work cannot be arranged
pendence Movement Day	1st March	Can be arranged
morial Day	6th June	Can be arranged
nstitution Day	17th July	Can be arranged
dependence Day	15th August	Can be arranged
ational Foundation Day	3rd October	Can be arranged
ngul (Korean Alphabet) Day	9th October	Can be arranged
med Forces Day	1st October	Can be arranged
stival Days:		
nar Calendar New Year	1st January (Lunar)	Work not possible
bour Day	10th March	Work possible

CRANES: 12 Shore cranes. (Lifting capacities 3,138 t.p.h.)

MEDICAL: 2 hospitals available.

FRESH WATER: Can be supplied alongside the quay or by water barge.

FUEL: Available locally. For large quantities 48 hours notice required. All grades obtainable from oil companies.

CUSTOMS ALLOWANCES: Tobacco: 400 cigarettes. Wine: 1,500 cc.

REPATRIATION: All facilities available for crew changes.

AIRPORT: Kimpo 200 km., Kimhae 150 km.

HOLIDAYS: New Year's Day – 3rd January, 1st March, 5th April, 5th May, Buddha's Birthday, 6th June, 17th July, 15th August, 3rd October, 9th October, Christmas Day.

POLICE/AMBULANCE/FIRE: Police 2-3419. Fire 119. Ambulance 2-5269.

SERVICES: Sub-Agents. Ship's laundries, etc.

SHORE LEAVE: Crew members allowed ashore.

IDENTIFICATION CARDS: Seaman's Book is sufficient.

DEVELOPMENTS: Central breakwater under construction.

Works in progress to increase capacity at first pier to 150,000 d.w.t. and draft to 16.5 m.

SHIPMASTER'S REPORT: June 1980.

The port is situated in the S.E. part of the country at the head of a bay and fully exposed to any weather from between North and East. Approaching the port there are very few navigational hazards except numerous small fishing craft. The B.A. Chart No. 3666 covering the area is out of date and the inset showing Pohang gives insufficient detail. I would recommend that with only B.A. Chart No. 3666 entry to the port should be attempted in daylight only. Korean Chart Nos. 132 and 135 cover the port and approaches and appear to be more up to date.

The Korean Pilot Book Supplement No. 9 1978 on Page 71 gives information on minefields and swept channels for approaching the port but the Harbour Pilots have no knowledge of these swept routes. However, there is a large area within the bay that is dangerous to navigation and anchoring but not marked on the chart. Vessels should not pass between the shoreline and a line drawn through the positions of the following lighthouse and buoys:

Fl. G. Lt.	– Lat. 36° 05′ 18″ N.,	Long. 129° 33′ 35″ E.
Buoy RW	– Lat. 36° 05′ 30″ N.,	Long. 129° 30′ 30″ E.
Buoy RW	– Lat. 36° 03′ 12″ N.,	Long. 129° 28′ 20″ E.
Buoy	– Lat. 36° 01′ 25″ N.,	Long. 129° 27′ 50″ E.

Also it is advisable to pass at least 2 miles North of the lighthouse so as to avoid the numerous fishing vessels and fishing stakes off the port, enter the bay passing the buoys on the port hand.

The indicated Quarantine Anchorage has only a limited depth of water and larger vessels are permitted to anchor in the vicinity of the second buoy where the vessel will be cleared by Quarantine Officers before the Pilot boards.

The ore/coal berth is situated in the new harbour where there is still a vast amount of new building and reconstruction taking place. The maximum draft is 14.5 m. and the approach through a short buoyed channel which offers no problems. The berth lies in an 035° – 215° direction with a depth alongside of 16.0 m. for 950 m. and vessels berth starboard side alongside. Standard moorings of 4–2–2 at each end and the port anchor with about three shackles, the latter being used for heaving off when unberthing.

Cargo discharge facilities are three units, with two more under construction, which should be completed by 1981, all suitable for the discharge of ore or coal. Discharge rate was about 30,000 tonnes per day using 2–3 units continuously.

Four tugs are used for berthing and unberthing operations, two of which are modern tugs. The two older tugs are due to be replaced soon with more powerful modern units.

Bulldozers are used for clearing hold bottoms and some shore labour is engaged sweeping up excess fallout off hatches, etc. Food and some form of accommodation has to be provided for the shift foremen on a continuous basis.

Fresh stores and provisions of good quality and reasonable price were obtainable but no frozen foods of any description available. Laundry service available and fair results.

Fuel oil bunkers were available by previous arrangements with Owners.

Shore leave is by launch only. Launch lands personnel in the old harbour about 5 miles away outside the breakwaters of the new harbour. No shore gangways available. Accommodation ladders required on each side as Port Officials and Agents board via the quay and ship's personnel are not allowed to walk on quay.

Repatriation for 26 Officers and Crew was done with very little effort and minimum paperwork. Personnel travel by coach to Busan thence by air to Osaka and Tokyo for London.

Arrival papers were as those required for Pusan and some company forms readily accepted.

The present maximum draft for the port is 14.5 m. but this is expected to increase to 14.75 m. next year.

Port limits have been extended and now join the following positions: Lat. 36° 04′ 30″ N., Long. 129° 25′ 20″ E.; Lat. 36° 03′ 00″ N., Long. 129° 28′ 00″ E.; Lat. 36° 01′ 12″ N., Long. 129° 29′ 54″ E.

SHIPMASTER'S REPORT: September, 1982.
Health: Radio Pratique not possible.
VHF: 16 then 6 with Pilot boats; 16 with Pohang Port Authorities; 16, 25, 26 and 27 with Pohang Radio.
Tugs: Four modern tugs.
Berthing: Depth alongside Berth No. 1 is 17 m. Vessels berth either side alongside. Berthing in daylight only for large vessels.
Fuel: All grades of bunkers and lubricants available from Korea Marine Bunkering Co., Ltd. Cable address: K Bunker Seoul. Telex: K28412.
Repairs: Sae Won Marine Engineering Co., Ltd., Cable address: Sae Marine Pohang. Telex: K4395. Tel: (72) 5400-1 (riding crew are available for ship repairs on passage).

Sam Yang Marine Engineering Co., Ltd., Telex: Symeco K4415. Tel: (3) 2251-2, (3) 4451., Agent for Unitor Service.

AUTHORITY: Pohang District Maritime and Port Authority, 58-7 Hangku-Dong, Pohang, Republic of Korea. *Tel:* (0562) 421812/5. *Telex:* K54300 Hangman.

PYEONG TAEK: 36.57 N. 126.01 E.

PILOTAGE: Pilot boards in position Lat. 36° 57′ 05″ N., Long. 126° 01′ 00″ E., which is 38 miles from the LNG Berth.
RESTRICTIONS: Vessels berth at daytime HW only.
MAX. SIZE: Berth designed for vessels 90,000 d.w.t. – 100,000 d.w.t.
BERTHING: The dolphin berth, for LNG only, is 480 m. long and has a depth of 14.0 m.
Storage: 4 tanks, each with a capacity of 110,000 cu.m.
AUTHORITY: *Owner:* Korea Electric Power Corporation.
Operators: Korea Maritime Port Authority and Korea Gas Corporation.

SAMCHEOG HAN (Sam Chuck): 37.30 N. 129.10 E.

(See Plan)

SHIPMASTER'S REPORT: June 1981

DOCUMENTS:

Ship's Register (1 copy required to be kept ashore)
Last Port Clearance.
10 Crew Lists.
3 Lists of Private Tobacco and Liquors.
4 Personal Effects Lists.
4 List of Foreign Money.
4 Stores Lists.
4 Ship's Property Declarations.

PILOTAGE: Pilot will board at Quarantine Anchorage.

After departure Sam Chuck vessel has to return Pilot to Tonghae. During night time no pilotage.

HEALTH: On arrival Sam Chuck the vessel has to proceed to Tonghae, about 5 nautical miles North of Sam Chuck, and has to anchor at the Quarantine Anchorage in position: Lat. 37° 29′ 36″ N., Long. 129° 10′ 30″ E.

The Port Health Officers will board the vessel and arrange Free Pratique.

Documents Required:

1 Crew List.
1 Maritime Declaration of Health.
1 Vaccination List.

VHF: "Mukho Radio" calling Channel 16, communication Channel 26 (slight interference).
TUGS: One tug available, equipped with own tow line.
BERTHING: Conveyor pier, left side of port entrance, exclusively for loading cement clinker in bulk.

Draft allowed according to Pilot is 6.8 m. Other berths, draft allowed is 6.7 m.

One belt conveyor with a loading rate about 300 tonnes per hour.

DENSITY: 1027.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits. Bonded store will not be sealed, as long as the Master only has the key.

One Customs Officer will stay on board for the whole time at berth.

SHORE LEAVE: Possible, shore passes issued for every crew member, have to be returned before departure.
GENERAL:
Ship Chandler: Available from Mukho.

SAMCHEON PO: 34.52 N. 128.05 E.

(See P

SHIPMASTER'S REPORT: June 1983.

DOCUMENTS: Formalities similar to other Korean Ports, but Authorities are not used to Foreign going ships yet and Port Clea is very slow. All crew members issued with shore passes by Immig Authorities, these passes are collected in again before sailing, to back to Immigration.
PILOTAGE: Although the Port Information Sheet states that pilot not compulsory, I feel that it would be unwise to attempt both ber and sailing without the benefit of local knowledge. The streams ca very strong, we estimated up to about 4 knots whilst we were the

Pilot boards at the Quarantine Anchorage. Pilot boarding regu similar to those at other Korean ports.

Requests for a Pilot should be made through the vessel's local Ag

ANCHORAGES: Quarantine Anchorage 34° 51′ 56″ N., 128° 05′ 2 (600 m. radius). Good holding ground – yellow mud. Depth 17 Anchorage is open to South. Channel to quay dredged to 18 m. a well buoyed.
RESTRICTIONS: Berthing/unberthing carried out at slack water, d daylight hours only.
MAX. SIZE: 100,000 tonnes deadweight. Max. depth alongside 18 Rise of tide 1.6 m.
TUGS: Two tugs are required. They come from Masan, 3 hours' t required.
BERTHING: Wharf is 540 m. long and is divided into 2 berths. Pri commodity is coal for the power station.

	Length	*Depth*	*Max. Size*
Northwest end	270 m.	15.10 m.	50,000 d.w.t.
Southeast end	270 m.	18.10 m.	100,000 d.w.t.

Wharf is very well fendered, and has lrage rubber, 'Buffer', fenders at regular intervals. There is a 2 m. high wall, which runs a the entire wharf frontage, the mooring bollards are set in breaks i wall; but the set up is dangerous; very awkward for the linesmen, virtually impossible to get a gangway out, ship to shore.

BULK CARGO FACILITIES: Two ship unloaders with 35 tonne g available for coal discharge. Capacity 1,500 t.p.h. each.
STEVEDORES: Working hours per day – 16 hours.
FRESH WATER: Not available.
FUEL: Not available.
CONSULS: Nearest Consuls at Busan.
REPAIRS: Limited repairs may be undertaken by local boat yard.
GANGWAY/DECK WATCHMEN: Three Watchmen and two Cus Officers on board at all times, and have to be fed and accommoda The Watchmen will use one room, but the Customs want t accommodated separately.
AIRPORT: Nearest at Pusan.
SHORE LEAVE: Shore leave by liberty boat only, takes crew t small fishing port of Sam Cheon Po, itself about 1 mile further W Crew members are not allowed to walk ashore through the power sta so only the liberty boat can be used.
IDENTIFICATION CARDS: See "Documents".
GENERAL: Fairly good quality fresh provisions may be obtained, A handles chandler's work as well. Agents very willing to be of assista but there are very grave language problems, hardly anyone spe English, and those that do are usually very limited in what t understand.

SHIPMASTER'S REPORT: May 1984.

CHARTS: B.A. No. 127; American 95142; Korean 452.
DOCUMENTS:

9 copies Crew List.
1 Declaration of Health.
1 Vaccination List.
3 Passenger Lists (Nil return required).
2 Crew Declaration of Personal Effects.
2 Currency Lists.
2 Ship's Currency Lists.
2 Bonded Stores Lists.
2 Ship's Stores Lists (all foodstuffs on board to be declared).
1 List of Ports of Call (previous 9 months ports and countries).
2 Ammunition and Firearms List.
2 Narcotics Lists (sealed once checked).
7 Reports of Entrance/Departure (Agent supplies and completes

ARRIVAL: 2 Customs and 2 Immigration officials and 1 army o board when vessel alongside, Agents assist.
PILOT: Boards in position Lat. 34° 50′ N., Long. 128° 6.5′ E., from blue coloured boat. Advance notice of arrival important as Pilot co from Masan (3 hours by bus) and there are no telex faciliti Samcheon Po. All messages in and out by telephone from/to respe radio stations. Best to use Seoul Radio. At least 24 hours notice which it is too late to change. Pilot boards and takes vessel to Quara anchorage, waits onboard until vessel cleared, then berths ve alongside, with the aid of 2 tugs.
BERTH: The berth is 1,550 m. long with depths of 14 m. at West and 16 m. at East end. Very well fendered for whole length, but due to very heavy swell during S.W. Monsoon, sufficient bollards a whole length.

There are 2 gantries for 2 berths with 20 ton grabs, onto conv belts to large storage yard. Air draft at least 25 m. from quay. Outs about 30 m.

Only import at this berth is coal for power station (Korean El Company).

FRESH WATER/FUEL: Available by barge only. Bunkers by barge Yusan or Busan. Fresh water obtained locally but costs U.S.$ ton.

PROVISIONS: Available locally, usual Korean standard.
SHORE LEAVE: Possible by launch from ship, nobody allowed through installation except Master.
AGENT: Only one Agent in Samcheon Po. (Boo Young Shipping Co. Telephone No. 8111) No telex available.

SHIPMASTER'S REPORT: November 1985.

Approach easy from South. Straight up between Jang Got and Suu

Approximately 16 m. of water in sheltered Quarantine Anchorage. Pilot not required for anchoring. VHF communication with Port Control just possible. Poor reception and language problem. Many small fishing boats and small buoys in the area. 2 tugs arrived by themselves and stood off. Unable to contact them, presumably they had come from town. Later a Pilot boarded who spoke a little English. Channel is well buoyed to the power station berth.
Vessel berthed at 1830 hrs. and commenced discharge at 1640 hrs. the following day.
A modern power station type berth, well able to cope with Panamax type vessels. Jetty well fendered with adequate mooring bollards. Unfortunately a wall 6 ft. (2 m.) high has been constructed along jetty edge with spaces left for bollards. The edges of which tend to chafe moorings. It also makes it hard to land gangway or accommodation ladder. This done by shore labour as crew not allowed to walk ashore. Boat service only, which ran to Si Racha.
There are guards on the jetty. Two modern grab dischargers available. There is no airdraft problem. Damage was done to hand rails in No. 4 hold, which ship repaired itself.
Cargo was completed at 0045 hrs. (56 hours after commencement) and vessel cleared at 0532 hrs.

TONGHAE (Bukpyung): 37.29 N. 129.08 E. **(See Plan)**

SHIPMASTER'S REPORT: June 1982

LOCATION: Tonghae (Lat. 37° 29.5′ N., Long. 129° 08.5′ E.) lies some miles to the South of Mukho, it has been under construction for the last 4 years and now ranks as the third largest port (by tonnage) in Korea. The port consists of 2 breakwaters extending from the shore and has been constructed primarily for the export of cement in bulk, clinker and bagged forms.
The port is linked to the Donghai Cement Plant which in itself is the largest unit cement factory in the world with an annual production capacity of 8.7 million tons.
This report is mainly directed to the facilities associated with the export of cement, however where possible relevant information has been included which could prove useful to other vessels trading in the area.
PORT LIMITS: Approximately 1 mile radius off the port but mainly to the North of the E./W. Line, passing through the South Breakwater Light. Port limits are indicated on Korean Chart No. 141.
DOCUMENTS:
6 Crew Lists (on blank paper).
3 Vaccination Lists.
2 Port Itineraries for past 6 months.
2 Passenger Lists.
2 Arms Lists.
2 Drugs Lists.
3 Personal Manifests.
3 Cargo Manifests.
3 Stores Lists (including fuel on arrival).
3 Bonded Stores Lists.
Korean Maritime Declaration of Health.
Various Korean entry forms.
APPROACHES: B.A. Chart 882, also Korean Chart 141. Best to run up miles off the coast to keep clear of 3.5 fathom patch reported in position Lat. 37° 28.5′ N., Long. 129° 13.0′ E., then alter course to 270° for approaches to anchor area off the port.
PILOTAGE: Generally operate from 0600 hrs. – 2100 hrs. 3 Pilots available and appear quite competent. As an exception they will sail vessels up to 2200 hrs. from the berth. Small pilot launch painted white. No VHF (1982). Pilot ladder required almost to the water, no manropes. In heavy swell the Pilot refuses to come out to the vessel and no compensation is given for the vessel to come under the lee of the North breakwater to pick the Pilot up, even though there is ample room. Pilotage is relatively simple with a wide deep water entrance to the port and a large swinging basin.
ANCHORAGE: Recommended anchorage about 1 mile to 1.5 miles off the breakwater in about 12 fathoms to 14 fathoms of water. We anchored with South Breakwater Lt. Ho. bearing 180° (T)×1.27 miles, with 7 shackles down on the port anchor and happily rode out a day of winds in excess of 40 knots, though engines were kept on immediate notice. A confused back swell is sometimes thrown off the breakwater during strong onshore winds. Bottom mainly sandy with some rocks. Ample visual and radar targets available to check anchorage position.
MAX. SIZE: No limitations to length or beam. Max. draft 11.8 m. (SW).
HEALTH: Quarantine Officials generally attend at the anchorage and inspect store rooms, galley, etc. Derat sighted and Vaccination List required. Korean Maritime Declaration of Health made out. Pratique granted. Various vaccinations can be obtained at the Port Health Office at Tonghae. The doctor/nurse will not attend onboard to do injections. No specific vaccinations required for Tonghae unless vessel from infected area.
RADAR: No port radar at present.
VHF: Tonghae Port Radio operates on Channels 16 and 12. Daylight operations only. Initial contact is made via this station and arrival time and ships' particulars noted. Berthing instructions are generally relayed through Mukho Radio, VHF Channels 16 and 26 from Agents. Local and overseas calls are also possible through Mukho, with a 24 hour watch kept.
TUGS: Three available: 2×2,000 b.h.p. and 1×1,000 b.h.p. Make fast with tugs' lines with the tugs joining vessel just inside the breakwater. There are an additional 2 tugs at Mukho (5 miles to the North) and these will work at Tonghae if required. Communication with tugs is by walkie talkie.
BERTHING: Vessels generally berth port side alongside the South Pier (Ssangyong) and starboard side alongside the North Pier. Tugs join just inside the breakwater, the offshore anchor is used when off the berth. Boat takes the headlines only. The North Pier is more exposed than the South and a substantial tie up is recommended. The bollards are 25 m. apart and the jetties very well protected with modern horizontal rubber type fenders. The gangway can be swung out prior to berthing with no obstructions to cause damage. South Pier length 735 m., North Pier length 540 m.
Present Capacity: 4×30,000 d.w.t., 1×10,000 d.w.t. and 4×5,000 d.w.t.
Additional Future Capacity (1986): 6×50,000 d.w.t., 1×20,000 d.w.t. and 1×10,000 d.w.t.
BULK HANDLING FACILITIES:
Coal: One coal berth lies at the seaward end of the South Pier, whilst the other berth is at the inner end of the North Pier. Vessels use their own cranes and grabs for discharging the coal onto the quayside, whereupon it is handled by payloaders and loaded into road trucks. Discharge rate is in the region of 5,000 tonnes per day but could improve if more payloaders were brought in to handle the quayside operation. Generally speaking, only two payloaders are used at any one time. Road trucks carry the coal to a stockpile 3 miles away and there appears to be ample supply of trucks available. The final few hundred tonnes in each hatch is shovelled by stevedores into savealls and rubber mats. No bulldozers are available for hatch work.
If a vessel is not equipped with her own grabs then the complete discharge is handled using savealls and manpower. Using this method a discharge rate of about 3,000 tonnes per day could be expected. The crane drivers are quite competent and stevedores helpful. Any damage to ship can be repaired on the spot and stevedores accept full liability.
Bagged Cement: Two companies export cement from Tonghae. Ssangyong Corporation, the largest, operate from the South Pier whilst Tongyan M&G work off the North Pier. Ssangyong have the facility for loading clinker/bulk and bagged cement by conveyors and loaders. Tongyan can only handle clinker and bulk cement by loader, any bagged cargo being handled by ship's gear.
The Ssangyong export terminal serves the largest unit cement plant in the world with an annual production capacity of 8.7 million tons. This main plant, situated a few miles away at Donghai, is linked to the port of Tonghae by an extensive conveyor system. Further conveyors link the storage facilities to 2 ship loaders (for bagged cargoes) and 2 spout loaders for clinker and bulk cargoes.
The bagged ship loaders were each rated at 150 tonnes per hour, though actual loading rate worked out at nearer 75 tonnes per hour, with both loaders suffering occasional breakdowns. In addition to the loaders, ship's cranes were also used to lift bagged cement directly from lorries. In all, 5 gangs were used (2 loader and 3 crane) and a daily load rate of about 4,000 tonnes experienced. The cement was bagged in triple skinned paper/polythene and very little breakage was observed, the loader however throws off some cement dust and the ship receives a liberal covering.
The bagged cement was initially ordered, by Charterers, in nett weight i.e. bags each weighing 50 kg. (gross 50.17 kg.), however as loading progressed it became obvious that the actual weight loaded was considerably more than that tallied aboard. On checking the actual weight of a number of bags, all were found to be in excess of 50.50 kg. (gross). Initial instructions from Charterers required the vessel to load a cargo geared to a limiting draft of 32 ft. at the discharge port, but when realising the full shore tally weight could not be lifted then authorisation was received to load the shore figure. By shore tally and Bills of Lading we loaded 490,000 bags cement at 50 kg. nett per bag equalling 24,500 tonnes.
Actual deadweight on board by draft survey showed some 24,886 tonnes of cargo. One per cent. of spare bags were also loaded with the cargo.
The bagged cement was pre-slung wherever possible in the hatch to facilitate a quick discharge, the discharge port, was not nominated however, this depending upon the number of cement ships discharging on the Indian coast. Ahjin intend sending a supercargo to India to assist in the discharge.
No problem exists with the loaders regarding height clearance over the coamings, however conversely if the vessel is too deeply ballasted then the base of the shoot cannot reach the tank top and it is then necessary to de-ballast to bring the ship up to the loader.
Cargo manifests, etc., were prepared, by the Agents, prior to sailing. Normal procedure is to authorise Agents to sign Bills of Lading on Master's behalf.
Stevedore companies: Ssangyong Cement Co. Ltd., Tongyan M&G Co. Ltd., Korea Express Co. Ltd.
MEDICAL: Doctor and hospitals situated at Mukho some 5 miles away. Agents will arrange car to transport crew members to and from doctors. Medical attention is quite expensive. Medical reports issued on request. An ambulance service is available if required.
FRESH WATER: Available by barge in 100 tonne quantities.
FUEL: Supplied only by barge either alongside or whilst the vessel in the anchorage. The bunker barges are not equipped with heaters and consequently the pumping rate very slow (about 90 tonnes per hour for heavy oil and 120 tonnes per hour for diesel oil). Each barge has a capacity of about 400 tonnes; No blending on the barge, this being performed at the refinery. The barges generally sail up from Pohang and have to clear customs formalities at Tonghae. Fenders on the

barges are virtually non-existent and if taking bunkers at the anchorage in any kind of weather extra tyres etc., should be used. We were supplied by Korean Marine Bunkering: Seoul 776-8531.

REPAIRS: Engine and general dock repairs possible from Donghai Marine Engineering Co. Ltd. The company has a staff of about 12 and are capable of handling most repairs. Welders are Korean registered. Various Customs formalities have to be completed before spare parts are removed from the port area. Prices appear reasonable though slightly higher than Ulsan and Inchon. Radar repairs can be arranged with ample notice. Chemical cleaning of heaters, etc., can be arranged.

SURVEYORS: Local Korean inspectors/surveyors are available at Mukho for draft surveys, on/off hire surveys, etc.

Lloyd's and Bureau Veritas are available from Seoul and will attend vessels at Tonghae if necessary, with ample notice.

WATCHMEN: Available from Sanghyup Kongsa (again) recommended mainly for their ability to use telephone especially with the Agency 5 miles away. Cost about £12 per day.

CUSTOMS: Attend on berthing. Quite casual and friendly. Spirits and cigarettes sealed though beer and wine left unsealed. Normal allowances per person and an issue available after vessel has been in port for 5 days. One Customs Officer remains on the vessel during the stay in port, he requires a cabin and meals. Drugs are also sighted and sealed.

REPATRIATION: No difficulties in this area. Seoul some 300 km. away is served by an express bus service. Sub-Agents liaise with main Agents and all repatriations seem to run smoothly. An overnight stay is normally arranged at Seoul for incoming and outgoing crew members though this depends on flight times. The journey between Tonghae and Seoul takes about 4.5 hours. It is necessary for joining crew members to fill out a personal manifest once aboard the vessel, this is collected prior to sailing.

HOLIDAYS: See "Inchon".

Arbor Day (April 5th) is also an official holiday at Tonghae. Work is possible during all holidays.

TELEPHONES: Available at all berths. Only local calls taken.

SHORE LEAVE: No restrictions, no curfew.

GENERAL:

Weather: Refer to Pilot Book.

During the latter part of March and April long periods of relatively calm weather were disturbed by severe Lows and Fronts causing strong on shore winds and high seas. During these periods the port remains closed for berthing vessels, though sailing is possible. Smaller ships in the anchorage generally steam offshore during these periods.

Stores: Fresh supplies and all chandlery items supplied by Sanghyup Kongsa Co. Ltd., Tonghae (the only chandler in the area). Fresh vegetables, fruit, fish, etc., are in plentiful supply locally. Deck and engine stores also available in the area, though more selective items can be obtained from Seoul. Local supplies are reasonably priced, though meat expensive. Bonded stores are also available. Medical supplies can be obtained from Seoul as well as current BA. Charts and Admiralty publications. These again are quite expensive.

Immobilisation: Possible with Port Authority approval.

Port Regulations: Tonghae also serves as a naval port and consequently no photography allowed. No written port regulations. Painting over the side not allowed for fear of pollution, similarly no painting allowed from the quayside.

Launch Service: A launch service is available from the anchorage and is useful for crew repatriation. It can also be used for shore leave, once vessel has been cleared, though price is unknown.

Garbage: Arranged by Agents, taken away from ship by road truck. Rubbish should be retained on board, even at the anchorage, various naval craft regularly patrol around the port area and anchorage.

Consuls/Notary: No Consular offices at Tonghae or Mukho, it being necessary to travel to Seoul for these purposes. It is also impossible to Note Protest at Tonghae or Mukho.

Laundry: Adequate laundry facilities exist at Mukho, again arranged by Sanghyup Kongsa Co. Ltd., a 24 hour service is available.

Cleaning Gangs: These are available and will clean hatches between cargoes. It is not possible to pump out hold residue whilst alongside. Cleaning gangs do not generally work at night so some pre-planning required if vessel to discharge and load at the same port. Work requires constant supervision. Labour for the gangs picked up off the street.

Immigration: All passports inspected: Shore passes issued for all crew members and these renewable every four or five days. No Curfew exists at Tonghae or Mukho. It is necessary to pass through Customs Office and Immigration Office before leaving the port area. Again all Immigration Officials most helpful and friendly and eager to practise their English. Shore passes collected prior to sailing before obtaining clearance.

Air Freight: Little difficulty in obtaining spare parts, air freight etc., from other countries. Main Agents at Seoul arrange necessary customs clearance and transport.

Agency: Main Agents at Tonghae: Chokwang Shipping Co. Ltd. They are sub-Agents for most of the main Korean Agencies. Their office is situated at Mukho. With the number of vessels entering and using Mukho and Tonghae they are kept extremely busy, however all Agency work is eventually attended to and their services are quite satisfactory. Telex and telephone facilities exist at their office, most telexes are directed through the main Agents in Seoul, however a direct line can be obtained if necessary.

SHIPMASTER'S REPORT: November 1985.

On British Admiralty Chart No. 882 Bukpyung. Name seems interchangeable on signs, etc.

The anchorage off the port between 0.5 – 0.75 miles W.N.W. of the South Breakwater Light seems good but exposed to E'ly weather. A good swell was running when we anchored off and vessel did not berth for 24 hours. Contact could be made with Agents through Mukho Radio on VHF Channel 16, switching to Channel 26. Language is a problem.

Panamax bulk carriers are the largest vessels taken at th Max. permitted draft 12.5 m. 2 moderate powered tugs and 2 sma In bad weather would advise a panamax not to berth.

The commercial port is dominated by Ssang Yong cement which exports over 2 million tons of cement a year. The bulk be clear and modern. Two grab dischargers are said to work 24 ho day. But there are many stoppages. The jetty is well fendered, bollards at approximately 100 ft. intervals. We would suggest 4 stern lines, 2 breast and 2 springs each end. Extra moorings weather.

Pratique: Vessel was informed before arrival that Pratique granted. After anchoring vessel was boarded and store rooms inspe Derat not asked for. Pratique was again granted timed and dated

Documents: Only Register asked for. Ship had made out personnel goods, narcotic and arms lists on our paper and these accepted. Only narcotics in Master's safe being checked. Shore pa were made out (by ship). These are required and checked at gate time. Bond not sealed.

I was unable to Note Protest either here or at Mukho. No ABS sur available locally. Checked with Agent before lowering and run lifeboat for normal upkeep. I was informed that it was in order. A naval craft wanted to arrest it shortly after it was lowered into the and so we recovered it fast. Painting over the side is allowed.

Nearest airport at Seoul. There is an express bus service (5 h or train (6 hours) to Seoul.

Fresh water is available by barge. Bunkers, heavy fuels, diese oils, can be supplied if several days notice is given, I underst coaster brings same from Busan.

SHIPMASTER'S REPORT: June 1993.

This vessel: Panamax size, LOA 225 m., 66,894 tonnes d.w.t.

The port's new name is Tonghae, and the old name Bukpyung longer used.

For approaching the anchorage, it is best to come on a para Lat. 37° 30′ N., about 4-5 miles from coast and approach anchora a course of 270°. In good weather, a large number of fishing tra are encountered which carry out sudden manoeuvres.

Radio Free Pratique is not granted and upon arrival, vessel h anchor for Quarantine Inspection. Pratique is granted after inspe provision stores, galley, mess room and garbage drums, etc.

Vessel was advised to anchor at Quarantine Anchorage (po Lat. 37° 30′ N., Long. 29° 10′ E.) (marked on chart), but this posit usually occupied by ships awaiting berth. There can be as man 10 vessels at anchorage awaiting berth (usually small vessels 150 m. in length). Small vessels anchor within a 6 cable wide belt breakwater and coast. In case anchorage is crowded, best pla anchor for large vessels will be N.E. corner of harbour limit, in 40 45 m. depth, or about 1.5 miles North of Breakwater Head Light.

Berthing of large ships (200 m. or more) is done during daytime

Pilot boards 2 miles East of red Breakwater Head Light appreciable affect of streams or current near breakwater.

Naval warships frequently move in and out of port and have watched for while approaching breakwater.

Visibility is usually bad during S.W. monsoon and considerable can build up.

For entering port, Pilot heads the vessel for a position 6 cables of Breakwater Light, and gradually aligns the head into the direct Fairway.

Tugs meet vessel at breakwater. 3 tugs are used for Panamax ships, due to small turning basin. Max. permissible draft is 12.5 m

Coal Pier has 2 unloaders and can achieve a discharge rate of 14,000 tonnes per day.

Nearest major business centre is Seoul.

All stores, charts and technicians, etc., are arranged from Seou

Regular bus service available for Seoul.

Fuel oil and fresh water supplied by barge.

Workshop is available.

Tonghae is a Naval port and the Northwest sector of port is occu by a number of Naval vessels.

Pollution can invite big problems. After berthing, Coast G personnel board vessel to check Oil Record Book, IOPP Certificat inspect Oil Water Separator and enquire about mode of disposing sludge, etc.

PILOTAGE: Compulsory. Quarantine/pilot station situated in pos Lat. 35° 27′ 26″ N., Long. 129° 24′ 30″ E.

VHF: Port Control on VHF Channel 16. Vessel's to advise requir and ETA 3 hours prior to arrival.

TUGS: 7 tugs. 600 h.p. – 2,600 h.p.

ERTHING: The commercial port handles steel products, coal, and emicals required by the Ulsan Industrial Complex, which is adjacent the port area and houses a car factory, an oil refinery, and a number other heavy industry and chemical plants.

rth	*Length* (m.)	*Depth* (m.)	*Remarks*

san – see "Shipmaster's Report", March 1987.

ESH WATER: Available by barge at anchorage. Prohibited during at buoy.

EL: Available with 24 hours' notice.

RBAGE DISPOSAL: Two companies provide these services: angmyung Marine Service Co., Tel: 0522-74-5746, and Samhan ne Enterprise Co., Tel: 0522-73-7895.

llection charges:

Within 10 km. of Custom Gate:	62,480 Won/trip
10 km. – 15 km. from Custom Gate:	117,180 Won/trip
15 km. – 18 km. from Custom Gate:	149,630 Won/trip

Collection one per day.

dditional charges levied for holidays, Sundays or night work.

STE OIL DISPOSAL: Service available from Yusung Ltd. Tel: 0522-671/2/3. Fax: 0522-77-0513. Capacity of shore tanks: 8,000 cu.m. ge: Two barges available (1,500 cu.m. and 80 cu.m.). Tanker trucks 6 cu.m. available. Basic charge: 200,000 Won for 3 cu.m. Additional rge: 80,000 Won/cu.m.

EAMAN'S CLUBS: Seamen's Club, 2116 Mae-Am dong, Nam-ku, san, South Korea. Tel: 0522-40-6901, 24 hours service. Facilities ilable: Currency exchange, international telephone, shopping and bar vice. Mini-bus service free of charge.

RRENCY: Korean Won. U.S.$ 1.00 = 800 Won (April 1994).

EVELOPMENTS: Grain terminal under construction for handling essels of 15,000 d.w.t. – 60,000 d.w.t. 2×750 t.p.h. ship unloaders will e available.

coal import facility is to be built, Korea Oil Corporation will be the er.

EF OFFICER'S REPORT: 1975 (Updated 1994).

sel's Particulars:

ength Overall – 162.18 m. Breadth – 22.8 m.

Summer Draft – 10.382 m. Summer d.w.t. 21,705 m./tons.

chorage: Local Agents generally wireless the Quarantine Anchorage sition which is approx. 1.5 miles W.N.W. from the position shown on Chart No. 898. Care should be taken while anchoring as there are umerable fishing floats, nets, etc. North of 35° 28′ N., and West of 9° 23.7′ E.

estrictions: No pilotage between sunset and sunrise.

lotage & Berthing: The standard of pilotage was generally good. Pilot ranged by Agents and embarks at Quarantine Anchorage after vessel cleared by Authorities. 1 anchor is used while going alongside. 1 tug unknown h.p. and 2 mooring boats assist while berthing. 4 berths are ailable:

No. 1 Pier – Length 300 m. Depth variable.

No. 2 Pier – Length unknown. Depth supposed to be 36 ft.

No. 3 Pier – Length 165 m. Depth 29 ft.

No. 4 Pier – No details known.

Local Authorities themselves do not have any idea as to the actual epths alongside. It is advisable to sound the bottom twice daily specially at No. 1 Pier as the depths were found to vary almost every ft. Cargo is loaded/discharged by vessel's cargo gear. Rate of loading gged urea is approx. 400 m/tons per gang per day. Working hours e normally between 0700 hrs. and 1900 hrs. every day, Saturdays and ndays included. Only on National Holidays no cargo is worked. scharge of bulk sulphur and gas/product carriers is around the clock. vessel carrying 28,000 tons of bulk sulphur was discharged in 5 days. ere is 1 crane and conveyor belt on No. 1 Pier only for handling phur. It was observed that sometimes small coasters were loaded/ charged by mobile cranes.

edores: Ulsan Port has a rule that a gang engaged for one particular tch will only work that hatch from start to finish and will not work any ther hatch, not even the other end of the hatch if the hatch has more an 1 set of derricks. Gangs have to be ordered before noon for the xt day.

edical: Local hospital used, patients normally taken there by atchmen.

ensity: Apparently varies. Once 1016 was obtained while 10 days arlier 1020 was obtained.

resh Water: Available from barge whose capacity appears to be 50 tons. At least 24 hours notice necessary.

uel: Not available.

epairs: Facility available but rates high.

ry Docks: Hyundai Shipyard located at Ulsan builds VLCCs.

atchmen: Not necessary on foreign vessels. Arranged by Agents if quired by Master.

atches: As per charter party but suggest use own crew as labour are nly experienced with wooden hatchboards.

epatriation: Usually done through Seoul. We changed Radio Officers nd experienced no difficulty.

elephones: Placed on board, but only for collect calls via exchange Tel: 114).

ervices: Only 1 ship chandler who handles everything including roviding watchmen, laundrymen, etc.

entity Cards: Shore pass issued for Ulsan valid for 15 days. To be renewed every fourth day. Usually done by Agent who collects all asses.

Surveyors: Lloyd's can be arranged from Busan or Ulsan (Hyundai Mipo Repair Yard).

General: Ulsan is a very busy port with a large amount of local and Japanese coastal traffic. Local Agents keep trying to shift bigger vessels ahead and astern to try and squeeze in small coasters. It is advisable to strictly adhere to the charter party rules at all times in this port to prevent delays and expense on vessel's account.

SHIPMASTER'S REPORT: May 1979 (Updated 1994).

Vessel: Summer d.w.t., 37,300; LOA, 194 m.; breadth, 28 m.; Summer draft, 36 ft.

Vessel loaded 30,000 tonnes of bagged fertiliser at No. 2 Berth using ship's cranes. The loaded departure draft was 33 ft.

Port Limits: As shown on Korean chart 119, arc passing through:

Lat. 35° 28′ 29″ N., Long. 129° 24′ 25″ E.
Lat. 35° 26′ 00″ N., Long. 129° 24′ 23″ E.
Lat. 35° 24′ 13″ N., Long. 129° 22′ 00″ E.

Documents: As per "Guide to Port Entry".

Pilotage: The Pilot was ordered through the Agent. The Pilot joins the ship in the anchorage from a white coloured pilot boat which has VHF. A portable VHF is carried by the Pilot for communication with tugs and pilot station. Only 2 Pilots are on duty each day and there are no movements in port between 1900 hrs. and 0600 hrs. The standard of pilotage was good.

Anchorage: The Quarantine Anchorage as shown on Korean Chart 119 is centred on Lat. 35° 27′ 25″ N., Long. 129° 25′ 34″ E. (Radius 400 m.)

Depth in this anchorage is 33 m. to 47 m. This anchorage is outside the harbour limits. A good anchorage was found 1 mile N.E. of No. 2 Imodco Buoy in 24 m. A boat service is available from the anchorage.

Restrictions: No night movements.

Max. Size: Not known.

Health: As per "Guide".

VHF: "Ulsan Radio" maintains a listening watch on Channel 16, contact is made on this Channel then switched to a working Channel. This station is used for local calls only.

Radar: No port radar.

Tugs: There are 2 tugs available of unknown horsepower. The tugs join the vessel off the berth and use their own lines.

Berthing: No. 2 Berth: Length approximately 250 m. The depth alongside was 11 m. with 13 m. offshore, the density varied but averaged 1006. There are no fixed shore facilities at this berth and it appears that it is often used by car carriers.

Cranes: Stevedores have 100, 60, 30 and 10 tonne mobile cranes available.

Bulk Cargo: 30,000 tonnes of bagged fertiliser was loaded using 4 ships cranes. Cargo was delivered to the berth in trucks and made up into slings on the jetty. The loading rate was 700 tonnes per hatch/day.

Stevedores: Gangs should be ordered before 1400 hrs. the previous day. There are a limited number of gangs available. Normal working hours are from 0700 – 1900 hrs. with 1 hour break. It is possible to shift gangs to different hatches under certain circumstances and night working is possible but not advised as same men work through to next day. The standard of cargo handling equipment supplied by stevedores is good.

Medical: Medical treatment and hospital facilities are available.

Hatches: Hatches should be opened before stevedores arrive on board or waiting time is incured.

Fresh Water: Fresh water is available and is delivered by barge.

Repatriation: Repatriation was carried out via Busan about 2 hours drive away without any problems. It can also be carried out via Ulsan.

Airport: Nearest airport Ulsan, regular daily flights to Seoul.

Telephones: A telephone is placed on board which is for local calls only via exchange. Overseas calls can be made from shore, these calls are collect, person to person, only with a waiting time of 2 hours (approximately).

Identity Cards: A shore pass is issued for Ulsan which is renewed every fifteenth day, usually done by Agent.

Stores: There are many ship chandlers, and all stores are ordered through them. The quality is poor and the prices high.

SHIPMASTER'S REPORT: Port of Onsan. March 1987.

This port is, to all intents and purposes, part of the Port of Ulsan – all services (tugs, Pilots, Agents etc.) – are from Ulsan.

The port itself consists of a dolphin jetty, with berths on both sides and is owned and operated by "Ssangyang Oil Co." (See B.A. Chart 898 (Ports on East Coast of Korea) "On San Hang").

Berthing/unberthing is during daylight only.

Normal berthing is on either side of the jetty, with ship's head to the N.E. (vessel swung before berthing). It is recommended that good moorings, and as many as possible are used, as the jetty is open to Easterly swells which are common during summer months.

No services are available at the berth. Any fresh water or bunkers come, by barge, from Ulsan.

Cargo Connections: There appear to be only 2 per berth (on our call we used 1×8 in. Chicksan attached to a flexible length of hose. Aft of the "deep sea" berths there are coaster berths which appear to have larger Chicksans.

Maximum draft on the berth is reputed to be 10.8 m.

Documents are as listed in the "Guide".

SHIPMASTER'S REPORT: April 1988.

Restrictions: Vessels carrying dangerous cargoes are not allowed to berth/unberth during hours of darkness.

Health: Quarantine deadline is 1700 hrs.

Currency: Currency Lists no longer required. Japanese Yen may be taken ashore.

Shore Leave: No restrictions.

AUTHORITY: Ulsan District Maritime & Port Administration, 139-9, Maeam-Dong, Nam-Ku, Ulsan, Korea 680-050. *Tel:* 0522-61-4881/9. *Telex:* K 53425 USPORT.

(B) YUKONG – SBM.

DOCUMENTS:
2 copies of Manifested Parcels on board.
2 copies of the Stores List.
2 copies of List of Narcotics on board.
2 copies of List of Arms and Ammunition on board.
2 copies of List of Vessel's Tobacco, Cigarettes, Spirits, etc.
11 copies of the Crew List.
2 copies of List of Crew's Personal Effects, Tobacco, Cigarettes, Spirits, etc.
Crew's Vaccination Certificates.
Derat Exemption Certificates.
Clearance from Last Port.
6 copies of List of Landing Passengers, if any.
6 copies of List of Passengers in Transit, if any.
2 copies of List of Passengers Baggage.

PILOTAGE: The seaward approaches to the Imodco Terminal mooring site are free of underwater obstructions, and existing landmarks and navigation aids are adequate. Depth of water not less than 65 ft. in approaches. The Imodco Terminal can be approached with the summit of Pongdae San bearing 333° true. When in position the following navigation fix will obtain at the mooring site:

Pongdae San (summit)	bearing	333° true	distance	2,915 yd.
Pongjin Hang Light (end of breakwater)	"	053° true	"	4,770 yd.
Chuck To (centre cut)	"	255° true	"	3,800 yd.

A good radar echo will be obtained from the tanks ashore at approximately 20 miles, the Imodco buoys at a distance of 8 miles, and the small buoys, marking the floating hose heading off the Imodco Buoy, at 1.5 miles.

Lights ashore, lights on the Imodco Buoys and on the small buoys appear to be unreliable.

After clearing Customs a Harbour Pilot will board the vessel to direct it to the buoy and conduct the mooring operations if required. There is no night mooring. However, unmooring is carried out during darkness as well as in daylight.

ANCHORAGE: Anchor the vessel about 1 mile S.E. of the buoy, if the weather permits. In this location it is less difficult to find vessel, when in fog. Do not anchor less than 1.5 miles from buoy, and under no circumstances can the anchors ever be used on approaching the buoy terminal, chain cables and pipelines are located at this site and anchoring is strictly prohibited.

RESTRICTIONS: No night mooring at any time at SBM. Unmooring possible at any time.

MAX. SIZE: Max. mooring capacity 325,000 d.w.t. Max. draft 64.5 ft.

HEALTH: Entry prediction to be supplied to Quarantine Authorities by vessel's Agent 24 hours before arrival. Master required to complete Health Declaration when officer boards on arrival. Free Pratique is automatic when coming from another Korean port.

RADIO: It is recommended that vessel communicates with Agent through Busan Radio or Ulsan Radio.

VHF: Communication available in Ulsan Port 24 hours a day.

"Ulsan Harbour Control" on Channels 14 and 16 for reporting vessel's arrival and departure.

"Ulsan Pilot" on Channels 13 and 16 and "Ulsan Port Radio" on Channel 16 for calling and working channels are Channels 24, 25, 26 and 27 for public messages.

TUGS: 2 workboats assist in mooring operations and 1 workboat assists with unmooring operation.

Workboats will join vessel about 1.5 miles East of No. 2 SBM.

BERTH DESCRIPTION: 2 berths at single buoy moorings.

Yukong Terminal No. 1 SBM:
Position: Lat. 35° 27′ 03″ N., Long. 129° 23′ 44″ E.
Max. Size: 325,000 d.w.t.
Depth: 23.0 m.
Max. Draft: 64.5 ft. (19.66 m.).

Description: A 12.5 m. diameter yellow buoy installed in August 1988. 2×16 in. hoses with length 980 ft. and 945 ft. respectively installed. The hose connections are made to the port manifold of the vessel only and lifted one at a time for connection to the ship's manifold. Each hose when full of oil is over 10.5 tons in weight.

Light: Gp. Fl. 4 yellow, 8 seconds. Visibility over 5 miles on radar.

Radar Reflector and Fog Horn: Radar reflector equipped, battery powered fog horn with a range in excess of 0.5 miles.

Yukong Terminal No. 2 SBM:
Position: Lat. 35° 26′ 42″ N., Long. 129° 23′ 18″ E.
Max. Size: 325,000 d.w.t.
Depth: 23.0 m.
Max. Draft: 64.5 ft. (19.66 m.).

Description: A 11.4 m. diameter yellow coloured buoy. Hose arrangement same as Buoy No. 1.

Lights: On buoy: Gp. Fl. Y. 6 secs. visibility over 5 miles. On hoses: 4 red winking marker lights equally spaced along the 980 ft. floating hoses, visible for 2 miles.

Fog Horn: A battery powered fog horn with a range in excess of 0.5 miles.

Weather: The berth is open to the weather and a short sharp swell is experienced when the wind is from the N.E.

BERTHING: 2 workboats (16 tons and 10 tons) are in attendance during mooring operations.

1 workboat will keep the hoses clear and the other handles the mooring ropes.

Both bow anchors are to be hove well up in the hawse pipes and properly secured before reaching the buoy.

Anchors are never to be used while at the buoy. They can foul buoy cables and pipeline on the bottom if released.

The vessel will be moored with chain (OCIMF recommended).

Onsan: See "Shipmaster's Report", dated March 1987, in Section (A).

HOSES: There are 2×16 in. hoses, 980 ft. and 945 ft. respec length. The hose connections are made to the port manifold of the only and lifted one at a time to the ship's manifold. Each hose full of cargo is over 10 tons in weight.

Hose Mooring and Connection: Mooring and hose conne disconnection will be carried out by Berthing Master and shore and while the vessel is at the buoy, 1 Berthing Master and 6 cre remain on board during entire operations on the buoy. The vess be required to provide sleeping quarters and meals for them. The mainly kept on board for emergency.

BUNKERS AND WATER: Available by barge at the ancho Bunkering is prohibited at SBM.

BALLASTING: After the vessel has discharged about half of her cargo, the vessel should be ballasted to a safe margin, to draw no than 18 ft. forward.

This will avoid the vessel yawing widely on the buoy with strong and assist in avoiding contact with the buoy and hoses. Vessel w moored at all times about 120 ft. from buoy.

REPAIRS/DRY DOCKS: All types of repairs possible at Hyundai Repair Yard, Hanjin Heavy Industry and Hyundai Heavy Industry. S docks available, largest being 380 m.×65 m.×12.7 m.

ENGINES: The ship's engines must remain ready with full pow immediate use and to keep the vessel a safe distance from the Any repair work or hot work prohibited without the Berth Ma permission.

CUSTOMS ALLOWANCES: One carton cigarettes or 1 lb. of toba and one bottle wine or spirits allowed, each man.

REPATRIATION: Nearest facilities for crew repatriation are at U

HOLIDAYS: 1st, 2nd January; 1st March; 5th April; 1st May; 5th 6th June; 17th July; 15th August; 3rd October; 25th December and Year's Day, (Lunar Calendar Day 1st January); Buddha's Day (L Calendar Day, 8th April); Moon Festival Day (Lunar Calendar Day August).

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Crew required to carry valid identific cards at all times.

REGULATIONS:

Notice to Vessels Arriving at Yukong Limited – SBM Termin Ulsan

In the interest of your vessel and Yukong SBM, we wish to br your attention the pecularities that are most likely to occur while vessel is moored to this terminal for discharge of cargo.

The buoy in its location is subject to wind, sea and tides and alth the weather here is generally favourable we find that during each ch of tide the vessel is quite frequently inclined to ride up on the buo

Our past experiences have taught us that *the best way to avoi hazard is by use of the vessel's engine. In this instance we will re the co-operation of you and your officers.* The Berth Master who assist you in mooring will also remain with the vessel througho entire discharge.

Tide or wind changes may cause the ship to ride up against the *In this case the Berth Master will anticipate the ship's movements advise a dead slow bell astern to avoid ship's contact with the When the tide or other condition has again resumed its normal your engineers will be notified that the Berth Master is finished wi engine.*

During this period while the ship's engineer is on stand-by, on your deck officers will be required to stand-by on the bridge, to pas engine order from the Berth Master, who will be stationed on the s bridge to observe and direct this operation. The SBM's crew will s by at ship's bow and will inform of ship's movements to the Berth Ma

The seaward approaches to the Yukong Ltd. SBM terminal mo site are free of underwater obstructions. Depth of water is more 64.5 ft. in the approaches. Existing landmarks and navigation aids adequate (Chart No. 119, published by H.O. of Korea is useful). A radar echo will be obtained from the radar reflector located at buoy b

Do not anchor within one mile of buoy and under no circumsta can anchors ever be used on approaching the buoy site and anch is strictly prohibited.

Vessels should be anchored 1.5 miles East of No. 2 SBM, whe vessel could be in sight of shore people and the people can board safely. Vessel should not be confused with the Yukong No. 2 Buoy Ssangyong Refinery Buoy, which is located at Lat. 35° 25′ 13. Long. 129° 23′ 08.5″ E. on the South side of Yukong No. 2 Buoy.

Use of Korean Government Pilots is compulsory. They will boar ship in daytime within the anchorage and before commenceme mooring operations. *There is no night-time mooring. Vessel unmo is carried out day or night upon completion of cargo discharge.*

The Berth Master will board the ship while at anchorage and wi charge of mooring the vessel to the SBM. He will be stationed a ship's forecastle during mooring.

Two tugs assist with mooring and one tug with unmooring opera Two launches are in attendance, one launch will keep the hose free of the vessel while the other launch handles the mooring during mooring operations. If the bight of the floating hoses protru considerable distance beyond the buoy, the above hoses will be ta to avoid fouling the mooring buoy system while unmooring.

In the event it becomes necessary to vacate the buoy du inclement weather or any other emergency, we caution you not t the propeller because it may foul hoses drifting near the ship's A boat in attendance will tow the hoses away and clear of your v so that the ship's propeller can be used.

To avoid undue strain on the buoy, anchors, floating hoses, mo ropes and chains, it will be necessary to ballast your vessel whi the buoy. Approximately 40% of her deadweight may be requ ballast to prevent undue strain on the buoy system. Dirty ballast should be selected before hoses are connected to the manifold so discharge of cargo and ballasting can be carried out simultane without contamination of cargo. The vessel will moor about 120 ft. the buoy which will assist in avoiding contact with the buoy.

When the cargo has been discharged, your tanks inspected and found dry and the hoses disconnected, we will then request that you vacate the buoy mooring. If you desire to take on ballast or more time is required to complete your vessel's business you may go to anchorage to do so.

Yukong Limited will provide you with a copy of our crude oil unloading procedures which provides information and instructions for safe unloading of the crude oil cargo. It will be necessary to release tank inert gas pressure after the tugs have left. *The Yukong procedure specifies certain methods for gauging, water cut, temperature reading, sampling cargo and calculation of cargo. These procedures will be strictly followed by the Cargo Inspector together with Surveyor.*

If a VLCC is going to carry out crude oil washing, her equipment must satisfy Ulsan open sea buoy's crude oil washing regulations and peculiarities. Crude oil washing can be done under ship's responsibility if she must confirm to Yukong Ltd. not less than 7 days before her arrival that vessel's crude oil washing system is operational. Yukong Its crude terminal provides booster pump to increase pumping rate, also an in-line sampler is installed in the shore line to monitor BS&W plus crude oil contamination with water.

The Berth Master is responsible for carrying out terminal's cargo unloading procedures. The Cargo Inspector will be on board for cargo inspection and will carry out cargo gauging and inspection of cargo compartments. Yukong Inspectors will also be on board prior to cargo unloading for sampling of cargo. Slop oil and BS&W shall be subtracted from the quantity of cargo. When the Cargo Inspector is satisfied that all obtainable crude oil cargo is discharged to shore tanks, he will inspect the ship and sign the ship's empty and dry certificate along with the appointed ship's officer and the independent Surveyor.

Health: ETA to be supplied to Korean Quarantine Authorities by the vessel's Agent 24 hours before ship's arrival. The Ship's Master is required to complete the Health Declaration upon arrival of the Korean Quarantine Officer. Free Pratique is automatic when the ship is coming from another Korean port.

Radio: It is recommended that the Master communicates with the ship's Agent through Pusan Radio, which covers Ulsan port.

VHF communication is available in Ulsan port 24 hours/day, every day. Call sign "Ulsan Port Radio", calling Channel 16, working Channels 5, 26, and 27. A small walkie-talkie can communicate with the shore by the attendant launch. Pilot office: Tel: 61-7703. Sunjin Tugs Co. Tel: 61-2311.

Ship's Repairs: Possible if arrangements with local shipyards are made prior to the vessel's arrival at Ulsan.

Identification Cards: Seaman's Book is sufficient, a ferry boat operates at all times.

BM Team of Stand-by Men: While the ship is on the buoy, the vessel should provide sleeping quarters and linen for 8 men, this includes one Berth Master and Cargo Inspector. The stand-by men connect and disconnect hoses, clear floating hoses when necessary and are mainly kept on board for emergency purposes. Under certain conditions should it become necessary, they may ask the vessel for meals.

Safety: All ships and their Agents or concerned persons shall follow good safety practices including, in particular, but not limited to, those described in the International Oil Tankers of Terminal Safety Guide as issued by the OCIMF.

1. The vessel's personnel are responsible for the safety of the vessel and must take all necessary precautions, whether or not so advised by the Berth Master, bearing in mind the weather conditions, or any other circumstances requiring special care or attention.
2. While the vessel is moored or within the vicinity of moorings, all vessel's personnel and vessel's operations must comply with or be in accordance with the following safety rules:
    - The ship's engines must remain ready with full power for immediate use.
    - Not less than one deck officer and two seamen shall be available on deck at all times while vessel is in the moorings.
    - Power must be available at all times on all deck winches and on anchor windlass during vessel's stay at the buoy.
    - A good floodlight will be required to illuminate the area around the submarine and cargo hose connections during cargo transfer operations.
    - During the discharge of ballast at night, the sea area around the vessel must be adequately lighted.
    - Engine repair work is prohibited without the Berth Master's permission.
    - Hot work is strictly prohibited while cargo is being discharged.
    - Laundry service is available if requested prior to ship's arrival.

General: Many ship repair parts and equipment are obtainable in Ulsan, located some 40 miles away from Ulsan. Allow about 4 hours for their procurement.

OPERATOR: Yukong Limited, 26-4 Yoido-Dong, Youngdungpo-Gu, Seoul, Korea 150. (Postal Address: Yoido P.O.Box 548, Seoul, Korea). Tel: (02) 788-6085-8. *FAX:* 82-522-70-2895. *Contact:* Captain T. Hwang or Captain O.J. Lee.

(C) YUKONG LIMITED – DOLPHIN.

BERTHING: Berthing operation is permitted during daylight only, and unberthing operation takes place throughout 24 hours in case of ballast voyage only.

Berths No. 3, No. 6 and No. 7 are equipped with a docking sonar system.

No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by VHF or telex.

(B) PRODUCT WHARF, HONAM OIL REFINERY
(C) NAKPO WHARF, BERTHS NO. 1, 2, 3, 4 AND 5
(D) PIER, LUCKY ADVANCED MATERIALS
(E) DRY CARGO, YOSU HARBOUR
(F) YOSU ENERGY
(G) KWANGYANG STEEL MILL, RAW AND PRODUCTS BERTHS

DOCUMENTS:
Last Port Clearance.
Register.
13 copies of Crew List.
12 copies of Passenger Manifest.
3 copies of Stores List.
3 copies of Bonded Store List.
3 copies of Arms and Ammunition List.
3 copies of Livestock List.
5 copies of Cargo Manifest.
1 copy of Vaccination List showing dates of last yellow fever vaccination, etc.

PILOTAGE: There are 2 pilot stations. Pilot station for vessels of less than 30,000 g.r.t. is located at Lat. 34° 44′ N., Long. 127° 49′ E., and for more than 30,000 g.r.t., such as crude tankers, is located at Lat.34° 39′ N., Long. 127° 58′ E.

RESTRICTIONS: 2 overhead power cables with clearance of 27 m. and 39 m. respectively in approximate position: Lat. 34° 44′ N., Long.127° 45′ E.

HEALTH: Before proceeding to respective berth vessels must anchor at the Quarantine Station to obtain Free Pratique.
RADIO: Yosu Port Radio Station, call sign 6MYS, operates on 500 kHz on 24 hour service.

The station's range is about 100/150 nautical miles and it is recommended that tanker Masters should contact the station giving their ETA at the pilot station.

Vessels calling at Yosu must cable the exact time of arrival at the pilot station to ship's Agent and Harbour Pilot's office. VHF Radio for calling Agent is Channel 16, name Agent and switch to Channel 26 to talk.
TUGS: 3×4,200 h.p., 4×3,000 h.p., 2×2,000 h.p. and 5×1,000 h.p.
MEDICAL: ETA to be supplied to quarantine authorities by vessel's Agent 24 hours before arrival. Master required to complete Health Declaration when officer boards on arrival. Free Pratique is automatic when coming from another Korean port.

There are medical facilities in Yosu town. Inoculations and vaccinations can be arranged by the quarantine doctor.

The Quarantine Stations are located at Lat. 34° 42.5′ N., Long.127° 52.7′ E., for deep drafted vessel and Lat. 34° 45.2′ N., Long.127° 46.3′ E., for less drafted vessel. The Quarantine inspection can be made at other than the above location depending on the situations. The inspection takes place during daylight.
DENSITY: 1025.
FRESH WATER: Fresh water is available for delivery to ships.
FUEL: Bunkers available by barge, subject to advance notice being given.
REPAIRS: There are repair facilities in Yosu.
CUSTOMS ALLOWANCES: One carton cigarettes or 1 lb. of tobacco, and one bottle wine or spirits allowed, each man.
REPATRIATION: Crew changes or repatriation can be arranged.
HOLIDAYS: 1st, 2nd and 3rd January, 1st March, 10th March, 5th April, 5th May, 6th June, 17th July, 15th August, 1st October, 3rd October, 9th October, 25th December. 1st January (Lunar Calendar), 8th April (Lunar Calendar), 15th August (Lunar Calendar).
SHORE LEAVE: Shore leave for ship's personnel is arranged by ship's Agent and the local authorities.
IDENTIFICATION CARDS: Crew required to carry valid identification cards at all times.
CHARTS: Republic of Korea H.O. Charts No. 209, 241 and 242.

(A) CRUDE WHARF, HONAM OIL REFINERY

GENERAL DESCRIPTION: The crude wharf is located at Lat.34° 51′ N., Long. 127° 46′ 55″ E. running in a 336°/156° direction.
APPROACHES: En route to the wharf, at approximately Lat.34° 47.3′ N., Long. 127° 48.8′ E. vessels pass narrowest part of channel, Sam Gi, which has about 22.5 m. depth of water at MLLW, and marked by 5 light-buoys and one lighthouse. The course is laid midway between the 5 buoys.
PILOTAGE: Pilot station for crude tankers is located at outer harbour in positon: Lat. 34° 39′ N., Long. 127° 58′ E. in the vicinity of Tae Do Island, where the Harbour Pilot boards to lead the vessel to Quarantine Anchorage.
RESTRICTIONS: Berthing and operating restrictions are as follows:
1. Maximum approach angle: 10°
2. Maximum approach velocity: 0.15 m./sec.
3. Maximum current speed: 2.1 m./sec.
4. Winds
   (a) Non-operating conditions
   Maximum design velocity 38 m./sec.
   (b) Operating Conditions (Moored at berth)
   Maximum sustained velocity 18m./sec.
   Maximum instant gust 27 m./sec.
   (c) Maximum berthing wind velocity
   13 m./sec. of Southerly wind
   15 m./sec. of Northerly wind

MAX. SIZE: Crude Wharves No. 1 and 2:
Maximum crude carrier: 285,000 d.w.t.
Maximum products carrier (Clean): 80,000 d.w.t.
Maximum draft: 21 m.
Minimum crude carrier: 80,000 d.w.t.
Minimum products carrier (Clean): 30,000 d.w.t.

HEALTH: Normally vessels who could not be granted Radio Pratique anchor at the Quarantine Station which is located at around Lat. 34° 42.5′ N., Long. 127° 52.6′ E. At this anchorage, Quarantine doctors come on board. After quarantine inspection, the vessel should have port clearance of Customs, Immigration and so on.
BERTHING: *Approaching the Wharf:* It will be normal tanker practice that all tankers be berthed bow seaward to ensure a quick and uncomplicated departure in the event of an emergency. Main conditions for following this practice are as below:
1. Natural environment's conditions to be favourable.
2. Early passage of Sam Gi Channel prior to high tide to meet slack tide while berthing.
3. Vessel should swing to the North of Crude Wharf with the assistance of tug-boats and approaching course will be about 160°.

When the above is impracticable due to the limited effective manoeuvring space in the vicinity of the wharf, vessels will approach almost parallel to the wharf whose direction is about 336°.

All tugs will come alongside to the vessel's bow, mid-ship and quarter at No. 3 Buoy. At about half mile off the wharf, the vessel's speed should be 2 knots and when abreast of the wharf, the vessel should be stopped. When stopped, the abreast distance between vessel and wharf should be about 100 m. – 200 m.

Abreast distance will be reduced with the assistance of tugs. speed must be 10 cm./sec. or less at a distance of 20 m. and 5 cm./sec. at a distance of 3 m. between the vessel and wharf. and speed for both bow and stern will be displayed on the tower of wharf upon vessel reaching about 160 m. from wharf.
Mooring: The wharf has 8 dolphins for mooring VLCCs as show "Plan Section". Nos. 1 and 4 (or 6) dolphins are to be used and stern lines, Nos. 2 and 3 for breast lines, and Nos. 5, 6, 7 dolphins for fore and aft spring lines. Each dolphin has quick hooks with a capstan and about 100 m. of 3 in. messenger lines up mooring wires/ropes.

To monitor tanker approach, the wharf is equipped with sonars which detect distance and approaching speed, which displayed on top of the gangway tower with visibility of about

Line handling service agency will render services to handle the wharf. The agency will provide 2 launches relaying mooring from berthing vessel to the wharf and 9 men including a chief in of the team hooking mooring lines to the dolphins.

About 20 mooring lines for 200,000 d.w.t. tanker are required and quality of mooring lines are in accordance with ISGOTT para 3.3.3 – i.e. "Preferably the mooring lines used to secure the should all be of the same materials and construction. Wire rope recommended especially for larger tankers as they limit the movement at the berth. Moorings composed entirely of fibres, esp synthetics, are not recommended as their high elasticity can excessive movement due to strong wind or current forces or ships. Wire ropes and fibre ropes should never be used together same direction because of the difference in their elastic proper

Vessel puts out springs first, then breast lines and finally head lines or vice versa. Normally breast and long lines will be relay launches to the wharf. While making fast spring lines, vessel adjust centre of her manifolds to wharf loading arms at the requ shore operator. Vessels should be held tightly to breasting dolphin the assistance of tug-boats, mainly by tug stationed midship mooring has been completed.

Anchoring in the vicinity of the wharf is not allowed except emergency.
Unberthing: Tugs will be stationed on seaward side of the vessel midship and quarter as necessary and will push the vessel so as the vessel tightly to the breast dolphins while letting-go all mooring Sequences of letting-go lines is the reverse of mooring. Therefore head and stern lines let go first, breast next and springs last.
DISCHARGING: *Prior to arrival:* Prior to arrival at the wharf, should stand-by/warm-up her cargo pumps and designate 3 man which are convenient for unloading cargo. The designated man should be marked by rags or other materials so as to be able to them easily from the wharf and adjust the vessel's position corre loading arms of the wharf. All the vessel's manifolds should be blinded until vessel is moored. Also, all crude oil tankers mu equipped with 16 in. ASA type flanges on her manifolds.
Connection of hoses: Discharging arms are as follows:
Berth No.1: 3×16 in. for crude oils.
2×12 in. for clean oils.
Berth No.2: 3×16 in. for crude oils.
2×12 in. for clean oils.

After completion of berthing, terminal representative and operators will come on board and check readiness to co discharging arms, fire fighting equipment, drip pans and oil ren materials. The 3×16 in. discharging arms for crude oil are rotary co weighted marine arms with hydraulic quick connect couplings. R controlled hydraulic positioners are provided and wharf operator position and connect the outboard flanges of the arms to the manifold. The vessel's crew, consisting of one responsible office 4 other crew, standby at the manifolds, prepare manifolds to be and co-ordinate with wharf operators in adjusting, connecting securing discharging arms.
Operating Envelope: Berth No. 1: The unloading arms have designed for an operating-height envelope that accounts for elevation changes due to tide and varying freeboard of the larges smallest tankers for which berth is designed. The 16 in. unloading will accommodate a maximum 255,000 d.w.t. tanker and a min 80,000 d.w.t. tanker, or heights of 26.3 m. to 5.2 m. above the water level. The 12 in. unloading arms will accommodate a max 80,000 d.w.t. tanker and a minimum 30,000 d.w.t. tanker, or heig 19.6 m. to 4.6 m.
Berth No. 2: The 16 in. unloading arms will accommodate a max 285,000 d.w.t. tanker and a minimum 80,000 d.w.t. tanker, or h of 25.73 m. to 3.83 m. above the lowest water level. The 16 in. N unloading arms will accommodate a maximum 160,000 d.w.t. and a minimum 30,000 d.w.t. tanker, or heights of 22.33 m. to 3

A longitudinal drift of ±5.0 m. and a lateral drift of ±4.57 m. have allowed for both sizes of unloading arms.
Rates and Pressure: After hoses have been connected, all shore will be opened and vessel's Chief Officer informed of shore rea Vessel will open all valves necessary to discharge except man valves which will be opened just prior to start of discharge.

After confirming that the cargo is flowing into designated shore tanker rail pressure for all vessel sizes shall be 140 p.s.i.g. maximum discharging rates are:
Arab Medium Crude Oil 80,000 b.p.h.
High Pour } Crude Oil 40,000 b.p.h.
Low Sulphur }
Naphtha 30,000 b.p.h.

Crude Oil Washing (COW): Crude oil washing of cargo tanks using tank washing machines in conjunction with fully inerted gas permitted on Master's acceptance of Honam Oil's conditions out COW at the crude wharf which will be delivered to the vess vessel requiring COW should notify it to Honam Oil in advance with the information of previous COWs conducted and COW sch to be carried out.

LLAST: The ballasting operation should be discussed and agreed h the terminal representative regarding the approximate time of mencement and duration of ballasting both into permanent ballast s and cargo tanks.

o obtain quick turn around, the terminal encourages simultaneous ding of cargo and ballast, other than permanent ballast, if the vessel s equipped. Ballasting should be minimum after discharging cargo.

ESH WATER: Not available.

EL: Not available.

VICES: Honam Oil provide the following services: Telex service y day from 0800 hrs. to 1800 hrs., except Saturdays when service ailable from 0800 hrs. to 1300 hrs., and no service on Sundays and days.

lephone service every day from 0800 hrs. to 1900 hours.

st of emergency telephone numbers will be available at the wharf.

ORITY: Honam Oil Refinery Co.Ltd., Yocheon Refinery, Box 7, Yosu, Korea. *Tel:* 80-2114. *Telex:* 66762. *FAX:* 82-2228.

act: Kim Sa Bong, Port Captain.

ead office: Seoul. *Tel:* 787-1114. *Telex:* Honam K-27234 or K-23261.

787-6051, 785-5451.

PRODUCTS WHARF, HONAM OIL REFINERY

ROACHES:

vigation: The route for product tankers up through to Yosu Gulf is without any navigational hazards. After passing the Nak-Po, ls will steer in a Northwesterly direction for about one nautical mile then Westerly, keeping within the 10 metre contours.

ere are 10.5 metres' shallows at approximate LLW along Myodo , so vessel's draft limit to pass this channel on high tide will be up 0.5 m. or more, depending upon tidal rises and in accordance with MF.

e hydrographic charts for navigation and approaching to the uct Wharf area have been published by the Republic of Korea rographic Office.

proaching and mooring to the Wharf:

a. Pilotage is compulsory for vessels over 1,000 gross tons in accordance with Yosu Port Rules. Tankers calling at the Product Wharf of Honam Oil for loading or unloading products should notify the latest ETA by radio to Port Authority and related Agents for Pilot.

b. The direction of tidal current stream in the vicinity of the wharf is nearly rectilinear and parallel to the wharf, running about 272° on flooding and 084° on ebbing at about 3 knots, the tidal range between maximum high and low water is about 4.0 m. The duration of ebb/flood is about 6.75 hours and 5.5 hours respectively.

c. Vessels are to be berthed with bow to seaward whenever possible, in order to facilitate unberthing as quickly as possible when an emergency situation arises. Use of anchors is not allowed while berthing, except in an emergency.

DIO: See "Radio" in Section "A".

ERTHING: *Product Wharf:* The Product Wharf is located in proximate position Lat. 34° 51′ 40″ N., Long. 127° 44′ 10″ E.

he Product Wharf is designed to accommodate 7 tankers multaneously. Berths No. 1 and No. 4 for approximately 5,000 d.w.t., rth No. 2 for 2,000 d.w.t., Berth No. 3A for 35,000 d.w.t., Berth No. 5 50,000 d.w.t., Berth No. 6 for 5,000 d.w.t. and Berth No. 7 for 000 d.w.t. tankers, respectively.

e wharf is designed to moor and unmoor tankers on a 24 hour sis, depending on the tidal conditions at the time and the Master's gement. The illumination for night work is satisfactory.

mos Wharf: There is one berth located in position Lat. 34° 51′ 20″ N., g. 127° 42′ 45″ E., designed to accommodate LPG and Chemical ssels of less than 5,000 d.w.t. Shallowest depths of water in the proach channel and wharf area are 3.2 m. and 6.2 m. respectively. erefore, vessels approaching the wharf should choose high tide to ss through this channel. Illumination for night work is excellent.

rth Assignment for Loading/Unloading: Berths will be assigned to the sel after review of the vessel's size and types of product to be loaded. erth designations will be advised in advance, to the vessel through sel's Agent.

nges: Honam Oil Refinery Wharves are equipped with ASA type nges for loading arms and hoses.

ADING:

pervision: All cargo operations of loading, unloading, switching of ks and topping-off should be supervised by a ship's responsible cer, and sufficient personnel should be on deck at all times to attend the loading and/or unloading operations.

ding Arm/Hose Connection: It is Honam Oil Refinery's policy that sel's crew shall be responsible for connecting/disconnecting loading m hoses to and from vessel's manifold. Also proper reducers and ows to fit to wharf loading arm couplings must be connected and connected by ship's crew. Wharf operators are always on watch to ndle loading arms and winches for loading hoses.

quences: After mooring at the berth, Honam Oil Wharf Operators will me on board and check readiness to connect loading arms, fire hting equipment, oil drip pans or oil removing materials. When the ssel is in all respects ready to connect loading arms/ hoses, the owing loading procedure will apply:

a. The loading arms/hoses will be swung on board the vessel.

b. Connect loading arms/hoses by vessels's crew.

c. Notice must be given by the vessel to the wharf shift foreman one hour before the vessel completes deballasting.

d. Loading will be commenced by gravity. When the vessel advises wharf operator that the cargo is flowing into vessel's tanks, the loading rate will gradually be increased by pumping until the desired rate has been reached.

e. The vessel must give 30 minutes' notice to the wharf operator before starting "top-off", and shall advise if a decreased rate is desired.

f. The vessel must give 15 minutes' notice to the wharf operator prior to completion of loading at which time the wharf operator may reduce loading rate and/or stop loading pumps.

g. Ship's valves shall not be closed while loading pump is operating.

h. On completion of loading, loading arms/hoses must be drained and disconnected immediately. Samples must be taken upon completion of loading.

Loading Rates: The loading rates vary and depend upon kinds of products, sizes of loading arms and pipe lines, vessel conditions, etc. Detailed loading rates will be determined by close co-ordination between responsible vessel's officer and the wharf operator.

Each berth is equipped with counter weighted marine loading arms. Sizes of these arms' flanges are 6 in., 8 in., 10 in. and 12 in. ASA.

Deballasting: The discharge of dirty ballast within the territorial waters and entrance is strictly prohibited. Shore facilities for disposal of dirty/oily ballast water is available at Honam Oil Refinery. The deballasting operation should be discussed and agreed with the Product Wharf representative regarding the approximate time of commencement, duration of deballasting and kind of ballast oil.

FRESH WATER: Vessels requiring fresh water request required amount of water to ship's agent in advance.

REPAIRS: There are no repair facilities and also repairs are not allowed on the product wharf. In the event of emergency cases, Honam Oil will assist in carrying out repairs under the supervision of refinery's safety personnel to expedite vessels from the wharf and a quick turn around.

AUTHORITY: Honam Oil Refinery.

(C) NAKPO WHARF, NAMHAE CHEMICAL CORPORATION

A straight berth which could accommodate one 50,000, one 30,000 and two 20,000 d.w.t. vessels is located at about Lat. 34° 51′ 40″ N., Long. 127° 44′ 40″ E. The wharf is handling raw material by 800 tons crane and product of fertiliser by 300 tons crane.

(D) PIER, LUCKY ADVANCED MATERIALS, INC.

Located close to the product wharf of Honam Oil Refinery at about Lat. 34° 51′ 30″ N., Long. 127° 44′ 05″ E. Maximum vessel size and draft are about 4,400 d.w.t. and 5.5 m. respectively.

(E) DRY CARGO, YOSU HARBOUR

PIERS: 3 piers are located in Yosu town at about Lat. 34° 44.3′ N., Long. 127° 45.3′ East and consist of No. 1, No. 2 and No. 3 Piers.

RESTRICTIONS: No. 1 Pier is used for only small vessels. No. 2 Pier for vessels of less than 20 ft. draft and max. draft at No. 3 Pier is 26 ft. At anchor draft up to 35 ft.

CARGO-HANDLING FACILITIES: Crane barge of 30 tons capacity is available.

(F) YOSU ENERGY

LOCATION: 34° 51′ 38.96″ N., 127° 46′ 10.91″ E.

BERTH:

(1) *Principals:*
    Max. size: 75,000 CBM., LOA 230 m.
    Max. draft allowable: 13 m.
    Required minimum U.K.C.: 2.5 m.

(2) *Operating Condition:*
  (a) Allowable conditions for mooring:

Max. Wind Speed	*Wind Direction*
13 m./sec.	Southerly
15 m./sec.	Northerly

Max. wave height: 1.64 m.
Approach speed: 0.15 m./sec.
Tidal time for mooring: Mooring at slack tide.
Tugs will assist with berthing when strong tidal current.
Time limit: Berthing operation only carried out in daylight.

  (b) Circumstances where unloading is not allowed:
Wind Speed: Over 18 m./sec.
Max. wave height: 0.93 m.
Speed of tidal current: Tugs will assist with berthing when there is a strong tidal current.
Time Limit: No restriction.
Other conditions: (1) Lightening.
(2) Lack of proper safety plan and safety regulations on board.

SHORE CONNECTION: For LPG tanker, cargo operation and shore facilities.

(1) Shore Connection: (P: Propane, B: Butane, L: Liquid, V: Vapour)

(a) Arrangement as seen from seaward (from right to left): BL, BV, PV, PL.

(b) Specification:

Standard of Flange	12 in. ASA 150	8 in. ASA 300	8 in. ASA 300	12 in. ASA 150
Use	BL	BV	PV	PL
Range of temperature	−9°C/0°C	−9°C/5°C	−50°C/5°C	−50°C/−30°C
Max. press.for operation	10 kg./sq.cm	5 kg./sq.cm	5 kg./sq.cm.	10 kg./sq.cm
Max. flow rate	2200 cu.m.p.h.	2200 cu.m.p.h.	2200 cu.m.p.h.	2200 cu.m.p.h.

(c) Movable range:
Limit angle: 60°
Max. distance for angle of depression: 0.9 m. – 10.6 m.
Height above sea level: 22 m. (Mean sea level)

(d) Required ship's manifold position:
– Distance between bow/stern and manifold: About 110 m.
– Distance between side plating and manifold: Minimum 1.0 m.
– Height above sea level: 20.5 m. (Mean sea level)
– Distance between each centre of flange: 2.0 m.

(e) Size and number of reducers with onshore facilities: 2×10 in. ASA 150 and 2× 8 in. ASA 300.

(2) Cargo Operation:

(a) Requirements of ship's cargo tank and liquid line for discharging:

	Propane	*Butane*
Tank pressure:	Not exceeding 0.25 kg./sq.cm.	Not exceeding 0.25 kg./sq.cm.
Line Temperature:	Not exceeding −42°C	Not exceeding −5°C

(b) Procedure for purging and cool down for connection (Arm and unloading line):
Procedure for purging before: 3 – 5 times vent with shore vapour.
Procedure for purging after: 3 – 5 times loading arm flushing with ship's hot gas.
Procedure for cool down: Not required.

(c) Procedure and Rate of Discharging:

	Series Discharging Propane	*Series Discharging Butane*	*Parallel Discharging Propane*	*Parallel Discharging Butane*
	(cu.m.p.h.)			
Rate at start	500	500	500	500
Average Rate	1,200	1,200	1,200	1,200
Max. Rate	2,000	2,000	2,000	2,000
Rate of Finish	500	500	500	500
Vapour Return from Shore	6.9	8.9	6.9	8.9

(d) Discharging quantity for B/L: Ship's calculated figure.

(e) Circumstances when unberthing is requested:
– Wind speed: Over 30 m./sec.
– Wind direction: N.W., S.W.
– Max. wave height: 1.64 m.
– Other Conditions: (1) Typhoon.
(2) In case of emergency.

MOORING:

(a) Required numbers and quality of mooring ropes:
Fore lines: 4 wire and P.P. ropes.
Fore breast lines: 3 ,, ,, ,, ,,
Fore spring lines: 2 ,, ,, ,, ,,
After lines: 4 ,, ,, ,, ,,
After breast lines: 3 ,, ,, ,, ,,
After spring lines: 2 ,, ,, ,, ,,

(b) Additional mooring ropes from shore: None.

(c) Gangway: Shore gangway will be used.

(d) Ship's derrick: To be kept on stand-by.

(e) Indication of ship's manifold position: Required.

(f) Mooring facilities – requirements:
– Types of bitts: Quick release hooks.
– Distance between bitts: 50 m. (average).
– Location and types of oil fence: Not available.
– Availability and location of speedmeter for approaching speed: Docking sonar on No. 1 breasting dolphin.
– Place for bonding cable: Not necessary.

(g) Operation system at berth:
– Mooring personnel: At the bow: 5 persons.
At the stern: 5 persons.
– Connection of arms: 5 persons.
– Required time: 15 minutes for each arm.
– Disconnection of Arms: 4 persons.
– Required time: 15 minutes for each arm.
– Unmooring Personnel: At the bow: 3 persons.
At the stern: 3 persons.
– Communications: Shore can supply a walkie-talkie.

(h) Disaster prevention system:
– External System: None
– Internal System: Emergency shut down system.
Fire fighting system (fire hose).
– Disaster prevention facilities at the berth: E.S. system – fire fighting system (monitor).
– Availability of sea water pollution prevention facilities: None.

SHORE FACILITIES:

(a) Shore liquid lines: (Distance from tank (heater) to ship's connection, diameter and max. pressure).
– Propane: 1,600 m. (600 m.) – 18 in. – 23 kg./sq.cm.
– Butane: 1,800 m. (600 m.) – 18 in. – 14 kg./sq.cm.

(b) Flare stack capacity: Nil.

SUPPLIES AND SERVICE:

(1) Drinking water and bunkers:
(a) Supply place: Yosu Anchorage.
(b) Method of supply: Barge.
(c) Advance notice: Advise Agent.
(d) Average rate: Bunkers: 100 – 200 t.p.h.
Water: 800 tons per day.

(2) Provisions:
(a) Available.
(b) Method of supply: From barge.
(c) Advance notice: Advise Agent.
(d) Kind of provisions available: Meat, fish, vegetables, etc.

(3) Medical:
(a) Preventive injection: Cholera available.
(b) Advance notice: Advise Agent.

(4) Landing: Possible.

(5) Ship's repairs availability:
(a) Hull } Only at anchorage.
(b) Machinery }

(6) Surveyor/Diver: Available.

BERTH SAFETY REGULATIONS:

Pier I: (Ocean and Coastal Tanker).
(1) Vessel size:
Ocean: Max. 75,000 CBM.
Min. 30,000 CBM.
Coastal: Max. 3,500 CBM.
Min. 1,000 CBM.

Pier II: (Only Coastal Tanker).
(1) Vessel size – Max.: 3,500 CBM.
Min.: 1,000 CBM.
(2) Loading Arms:
2 self-standing for liquid LPG, equipped with 8 in. ASA manual quick release couplings.

(G) KWANGYANG STEEL MILL, RAW AND PROD BERTH

LOCATION: 34° 54′ N., 127° 45′ E.

GENERAL: Port under construction.

Pohang Steel Co. discharge will handle vessels of 250,000 d a 900 m. length berth with depth of 20 m. The loading berth of will accept vessels of 50,000 d.w.t.

2×2,000 t.p.h. grab unloaders and 1×2,000 t.p.h. shiploader available in the initial stages.

A 280 m. long quay is to be constructed to accommodate con vessels up to 50,000 d.w.t. Container handling equipment and facilities will be available.

SHIPMASTER'S REPORT: July 1988.

Pohang Iron & Steel Company's complex is built on about 9 kilometres of reclaimed land on the North side of Kwangyang Ha started production in May 1987 and at present manufactures 5.5 million tons of steel products annually, with 8 million tons pla for 1991. The wharf fronting this area runs in a 101°/281° direction an eventual length of 5.4 km. by 1991.

At the Eastern end a causeway running North and South has built connecting Chijin Do Island with the complex.

Charts: B.A. Chart No. 3391. Korean Chart No. 241.

Documents:
10 copies Crew List.
5 copies Stores List.
5 copies Personal Effects List.
3 copies Arms & Ammunition List (See "Notice").
3 copies Narcotics List.
2 copies Ports of Call List (previous 3 months).
5 copies Cargo Manifest.
5 copies Through Manifest (where applicable).
1 copy Maritime Declaration of Health.
Last Port Clearance.
Ship's Register.
Derat Exemption Certificate.

Pilotage: There are 5 licensed Pilots available at the present Vessels exceeding 30,000 g.r.t. embark their Pilots at 34° 127° 58′ E., and vessels under 30,000 g.r.t. at 34° 39′ N., 127° Pilots should be contacted on VHF Channels 16 and 14, 2 hours arrival. This message should be repeated to Yeosu Harbour Con the same time. There are no overhead power lines or bridges buoyed channel, but many fishing vessels operate in the area and are usually cleared out of the way by a tug steaming ahead of the from the Quarantine Anchorage to the berth. When in southbound, the Pilot leaves in the vicinity of the Quarantine Anchor and the ship should stay outside the buoyed channel.

Anchorages: Large vessels are usually instructed by Yeosu Har Control to anchor in the vicinity of Tae Do Island, there is plenty of and good holding ground (mud) here. The Pilot takes the ship up Quarantine Anchorage for Clearance by Port Officials from No mail is delivered unless requested. No Radio Pratique availa

Max. Size: 250,000 d.w.t. LOA 1,030 m. Beam 50 m. Draft 20.0

Tugs: Tugs usually start to make fast off Nakpo Gak Light, using ropes. This ship (loaded inbound) used 4 tugs, both for berthing unberthing. The Pilot communicates with the tugs on VHF Chann

The following tugs are available: 3 × 4,200 h.p., 1 × 3,400 1 × 3,200 h.p., 1 × 2,600 h.p., 1 × 1,900 h.p. and 2 × 1,200 h.p.

rthing: Most ships using the Bulk Handling Berth are moored port e to (i.e. head out). This ship, 141,000 d.w.t. used 4 headlines, nlines, 2 breastlines each end and 2 back springs each end. oring boats are used to run the first ropes. On the quay is a digital bout giving the distance off for bow and stern and speed of approach. here are no berthing or sailing operations during the hours of kness.

k Handling Berth: This is used for the import of iron ore, coal and estone to feed the steelworks. Coal, via the conveyor system, also ds the Coal Loading Berth for transhipping coal for coastal ribution. The berth is built on heavy steel piles, running 101°/281° h its present length of about 1.5 km. It is well fendered at 40 m. rvals with buffer type fenders having face pads 7 m. in width and vertically, these keep vessel about 3 m. off the quay. The ship must de its own brow for the gangway platform for access. The minimum h alongside is 21.5 m. at MLWST, minimum keel clearance 1.5 m. m is sand.

harging Facilities: 1×20 ton cantilever crane is situated at the tern end of the quay, usually the limestone berth.

e electric gantry cranes with grab trolleys are mounted on rails ch run the full length of the pier. Maximum air draft is 18 m. at HW. each from the face of the fenders is 34.85 m. Grab capacity about nnes.

scharging Rates: Maximum 40,000 t.p.d., normally 25,000 t.p.d. each.

ree separate conveyor belts run the full length of the pier to enable stone, coal and ore to be discharged simultaneously.

l Loading Berth: This has been built into the Chijin Do Causeway runs from the Eastern end of the Bulk Handling Berth, North and th, for about 350 m. It has a moving arm loader and handles ships p to about 30,000 d.w.t., mainly coasters, the coal can come via the r system either from the stock-pile or from larger ships discharging he Bulk Handling Berth, at up to 20,000 t.p.d. There is a regular run n to Yeosu by coal barges.

el Products Berth: This lies about 2 km. West of the Bulk Handling th in the same line and will eventually make up the Western end of ntinuous line of berths. It has 2 container type gantry cranes and 0 ton cantilever cranes. Main exports at present are steel coils.

ainer Terminal: This is still under construction at Golyak-myon. The nnel is being widened from 300 m. to 500 m. by dredging. There are to 4 dredgers at a time working in different parts of the Bay.

vedores: Foremen, labour and crane drivers are in different Unions, is combined with language difficulties causes some confusion, fully over a period of time this will resolve itself.

ical: Medical treatment and hospital facilities available.

sity: Ranges from 1022 to 1025, depending on the season.

sh Water: Available only by barge.

el: Available only by barge, at least 2 day's notice required.

pairs: Minor repairs are available at Yeosu, about 23 km. by launch, d divers are also available, but both are expensive.

tchmen: From the time of obtaining Clearance to the time of sailing, Customs Guard lives on board.

patriation: Possible. Normally by launch to Yeosu then by mini-bus Yeosu Airport.

e: GMT plus 9 hours.

re Passes: Necessary for aliens, renewed weekly. Korean crew have r Seaman's Books kept by Immigration until sailing time. As the dock e is about 5 km. from ship and Kwangyang about 25 km., it is essary to hire a mini-bus from the Agent at about U.S.$40 per trip.

ephone: No telephones available from shore.

res: Local chandler can deliver alongside by truck. Western style at and dry stores are usually imported and expensive, fruit and fresh etables plentiful in season. Spares are not easy to obtain.

tice:

Declaration of Weapons

As you might know, the Republic of Korea is in a "Quasi-War" status with North Korea. Therefore, national security is of the utmost importance in our country.

For the above mentioned reason, you must declare/report any guns, bullets, explosives, etc., to this country.

At the time of your departure from this port, you will be permitted by the Custom's Office to take your weapons with you.

For your own peace of mind, however, the overall security in Korea is well provided for and it is therefore unnecessary to carry weapons.

Additionally, you are reminded that failure to properly declare/ report your weapons is illegal and punishable by law.

Thank you for your co-operation.

Signed: .... Customs Director.

NOTES

Please also advise Shipping Guides Ltd.

Kuwait

GENERAL

VISA REGULATIONS: *Crew Changes:* Crew members joining ships at Kuwaiti ports can enter Kuwait with a valid Seaman's Book, against a "Seaman's Guarantee Letter" from Agent, allowing 24 hour transit only to join a vessel in port.

For the preparation of a Seaman's Guarantee Letter (S.G.L.) and to arrange an "Airline's OK Board Telex" from Kuwait (to allow crew to board a flight to Kuwait without Kuwaiti visa), please telex the following particulars to vessel's Agent:

Full Name
Nationality
Seaman's Book Number/Date and Place of Issue
Age/Date of Birth
Profession
Flight Details

Once a seaman enters/joins vessel on S.G.L. as above, it is not permitted for him to sign off/leave the vessel in Kuwait due to Immigration restrictions applicable to seamen entering on S.G.L.

Visitors to ships, repairmen and business visitors should obtain a visa before travelling to Kuwait. It is also possible for the Agent to obtain a visitor's visa (N.O.C.) locally in Kuwait. However, visitors must send, 15 days prior to arrival, a photo-copy of the passport pages containing full passport particulars (imperative) and 3 passport size photographs to the Agent in order to apply for such a visa.

SPARES/MAIL: *Air Freight of Ship's Spares, Mail etc.:* Air-freighted spare parts and ship's mail should be addressed to the Master c/o the Agent, and marked: "Ship's Spares (Stores) in Transit" and be accompanied by packing list and commercial invoice and Certificate of Origin both in original, with name and address of manufacturer (imperative) and certified by Chamber of Commerce and legalised by any Arab Embassy/Consulate.

Contents and weight of consignment should be correctly stated in all documents and air way-bill.

Customs clearance formalities and delivery of air freight consignments in Kuwait will take 10-14 days. It is, therefore, advisable to despatch air freight parcels sufficiently well in advance of ship's arrival. The flight details and air way-bill number should be telexed to the Agent enabling the Agent to collect delivery order from the airline and commence clearance formalities immediately.

N.B.: No documents are needed for ship's mail. It is advisable to send ship's mail/printed matter/documents by air courier, due to faster handling at airport, and to avoid the lengthy procedures applicable to air freight consignments.

PACKING REGULATIONS: *Chemicals in Bags:* The following is from the Director General, Ports Public Authority.

"You will appreciate that chemical materials arriving in bags require careful and special handling to prevent tearing and contamination, and we would, therefore, request you to ask all Steamship Agents and Owners of vessels to give their best attention to shipments of this type of cargo, in an effort to ease its handling by the stevedoring labourers without obstacles.

The bags should properly be bundled and placed on pallets, covered by thick plastic and/or canvas covers for safety and security of the cargo and fast discharging.

It should be noted that unless this type of cargo is shipped on vessels under the condition mentioned above, the Ports Public Authority shall not permit discharging and the cargo will remain on board the on-carrying vessel".

In Transit and Kuwait Cargo Mixed Together in Ships' Holds: The Kuwait Ports Public Authority have reported a recent incident which occurred during discharge of cargo from a vessel.

The berthing of the vessel as usual was arranged according to the cable from the Master that Kuwait cargo was clear for discharge in all respects, but when the discharging operation was carried out, they observed that the in transit and Kuwait cargo in all hatches were mixed together. Such being the case the Ports Public Authority were compelled to move one truck out to receive Kuwait cargo, and then bring back the truck of receivers of the in transit cargo, and so on until the discharging was completed. This situation naturally entangled the work altogether and caused considerable delay in discharging the cargo from the vessel.

Therefore, the Ports Public Authority have requested that we draw Principals' attention to this and ask you to take good care in stowing cargo properly in ships' holds and that it not be mixed together.

MINA ABDULLA: 29.02 N. 48.11E. (See Plan)

LOCATION: Mina Abdulla bounded on South by parallel of Lat. 28° 56′ N. on the East by Long. 48° 18′ E. and on North by a line joining following points:

(1)	29° 01′ 45″ N.	48° 09′ 25″ E.
(2)	29° 01′ 45″ N.	48° 10′ 06″ E.
(3)	29° 02′ N.	48° 10′ 18″ E.
(4)	29° 02′ N.	48° 18′ 00″ E.

FLAG: Every merchant ship when entering or leaving port between sunrise and sunset shall fly her national flag and national flag of Kuwait and, when entering port, shall fly her signal letters. All vessels required to fly Kuwait flag on foremast during daylight hours. Flags may be obtained from Agent.

APPROACHES: Mina Abdulla is easily located as it is the South refinery of the group of refineries which form Ahmadi, Shuaiba an Abdulla. A number of flares will be seen. The Sea Island is about 3 miles offshore of the refinery.

When a vessel is ready to enter at the same time as anothe is ready to leave the port, the outgoing vessel shall have prior the incoming vessel, subject always to the provisions of the Inter Regulations for Preventing Collisions at Sea and to the requireme safe navigation.

DOCUMENTS: Before leaving Kuwait the Master shall be respo for obtaining a Port Clearance Certificate. The documents necess vessels to enter and leave Mina Abdulla are:

Entry
Ship's Manifest.
Bill of Health.
Crew List.
Clearance from Last Port.
Light Dues Certificate.

Leaving
Register.
Load Line Certificate.
Radio Certificate.
Safety Certificate.
Last Port Clearance.

Masters and Agents of vessels shall, when called upon by a Cu Officer or Marine Officer, produce any documents relative to the la or shipment of their vessel's cargo in the port. The Master representative is required to hand to the Company a written No Readiness to load.

Discharging certificates of oil cargo loaded from Kuwai Partitioned Zone ports are to be sent to vessels' local A immediately duly attested by the Customs Authorities and Consulate covering full quantity as per Bill of Lading.

If a vessel which has not submitted the certificate for the pre voyage calls for the second time, she will be allowed to load an only after paying a cash deposit of KD 2,000.

In order to avoid delay in berthing, loading and outward clearan vessels, all owners must give instructions to Agents at discharging to forward relevant cargo discharge certificates to Agents at loading without delay.

PILOTAGE: Pilot normally boards the vessel about 1.0 miles – 1.5 to the Eastward of the Sea Island. Vessels are requested to have ladder of approved pattern, safely and securely rigged, and read immediate use. When it is necessary for a vessel to anchor berthing, she should do so in the recommended anchorage area. times a Pilot will be available on the Sea Island.

Vessel with a Pilot on board shall display International Code Fla in a prominent position whilst manoeuvring under his advice, and if so instructed by Pilot, display a flag indicating berth to which v is proceeding.

ANCHORAGES: Vessels requiring to anchor for any reason in port should do so within area enclosed between positions:

29° 02′ N.	48° 14.3′ E.
29° 02′ N.	48° 15.1′ E.
29° 01.2′ N.	48° 15.1′ E.
29° 01.2′ N.	48° 14.1′ E.

or within reasonable proximity to the East if congestion arise anchorage area.

All vessels and craft within the port shall be navigated with care caution, at a speed, and in a manner which shall not endanger the s of other vessels or craft. In particular, special care and caution is observed in passing vessels or craft of the following category: we lifting or deeply-laden craft, vessels or craft in tow and vessels or engaged on diving, dredging, grabbing, pile-driving or construction survey operations or the removal of obstructions.

All vessels within the port shall anchor, or moor and unmoor, and where required by the Pilot, and shall be moved from place to as required and by such means or appliances as may be orders the Marine Officer.

Vessels or craft shall not anchor near any submarine lines withi port limits, unless engaged on work which, in the opinion of the necessitates their doing so.

MAX. SIZE: Mina Abdulla Sea Island consists of 2 berths, primari loading, although unloading facilities are also available. The offs berth (No. 19) is designed to receive tankers up to 276,000 to displacement in ballast to load products and can also accommo loaded tankers of 35 ft. It is envisaged that loaded tankers will on handled in an emergency.

The inshore berth (No. 18) is designed to receive tankers from 25 to 140,000 tonnes deadweight in ballast annd can also accommo loaded tankers of 25,000 – 90,000 tonnes deadweight in emergen

The minimum depth of water at Berth No. 19 is 59 ft. and at B No. 18 minimum depth is 57 ft.

June 1993: Max. size 276,000 d.w.t. Max. draft 16.92 m. Max. 300 m.

MOORING: Pilots may decline to moor any vessel if in his opinion not equipped with satisfactory mooring facilities, lines and gear, et

The Sea Island consists of 6 mooring dolphins and 8 breas dolphins all connected to the loading platform by walkways.

Mooring hooks and capstans for handling ropes are provided. H are of the quick release type, and in an emergency can al immediately released from the Control Tower. A shore gangw provided at each berth.

All vessels berthing at Mina Abdulla must be provided with a mini of 8 mooring ropes forward and aft.

HEALTH: Quarantine regulations administered by Kuwait Governm Quarantine Medical Officer. Pratique granted at anchorage or bert essels calling at Mina Abdulla are requested to send following rmation to "Health Shuaiba Port" via Harbour Master at Mina Al-rmed:

1) Name of vessel.
2) Last port of call.
3) Health condition of crew.
4) Validity of Cholera Certificates.
5) Request for Free Pratique.

o craft, other than one having on board the Mooring Master or Port th Officer, may approach any vessel entering the port and no other rson may board any such vessel until Free Pratique has been granted.

dequate covers shall be placed over all overside discharges.

asters shall be responsible for ensuring that no unhealthy or sive matter is deposited from their vessels on port premises. Any matter so deposited that is, or becomes offensive, or, in the opinion e Port Health Officer, injurious to health, may be removed, cated or destroyed and the place of deposit cleaned or disinfected he direction of the Marine Officer at the expense of the Master onsible.

ny vessel, having on board offensive goods, or goods which, in the nion of the Port Health Officer, are injurious to health, may be ordered ave the port by the Marine Officer.

o ashes, refuse or other objectionable matter shall be thrown board from any vessel either on to any premises or into any waters he port.

DIO/VHF: All communications are to be made through the vessel's t, with the request that they be passed to K.O.C. Mina Al-Ahmadi, our Master and Marine and Export Operations Department.

S: 2×70 ton bollard pull tugs are available to assist in berthing and operate to the Pilot's instructions, but will normally both be used e berthing, usually making fast on the starboard side, by means of pes each of which will be provided by the tug.

oth tugs are fully fitted with Fire Fighting and Dispersant spraying uipment.

ADING: All products are loaded at the Sea Island by means of rigid ding arms. They are all fitted with hydraulically operated quick nect/disconnect couplings.

he black products are loaded by means of 10 in. connections and white products by 16 in. connections.

he maximum loading rate will be approximately 2,000 t.p.h. for white nd 1,500 t.p.h. for black oil.

ution: The incoming oil stream is pumped from shore and it is emely dangerous to close a ship's valve against the incoming oil am. Such a procedure creates an excessive pressure, which may mage submarine lines, ship's pipelines or the terminal facilities. ssels will be held liable for damages resulting from failure to observe s precaution.

oading and discharging of petroleum vessels shall not be undertaken hout permission of the Oil Movements Department.

oading and discharging of petroleum vessels shall not commence til:

1) Master or Chief Officer has certified to the Oil Movements partment that all necessary valves are open and that vessel is in per condition to receive or discharge cargo.

2) Master or Chief Officer has certified to the Oil Movements partment that all ship's sea valves are closed or blank flanged except se required for water circulation purposes, and that these regulations being and will be observed.

3) Ship's tanks have been inspected by an authorised inspector and ssed as suitable for loading.

hroughout period of loading and discharging operations, following nditions shall be observed:

1) A responsible Ship's Officer shall be on watch on board at a point er tanks which are receiving oil during process of loading. The mpany's staff have received instructions to stop loading immediately enever this rule is disregarded.

2) A capable member of ship's crew shall be stationed by ship's tank ves which are receiving oil during loading.

3) All pipelines shall, while rigged for loading or discharging troleum, be directly and continuously earthed and kept constantly ter supervision.

No petroleum shall be allowed to escape or overflow.

The following signals will be observed, as well as the radio mmunications, between ship and shore:

Signal Flag by Day		*Light Signal by Night*
	Starting	
1 Red Flag	Slow Speed	1 Red Light
2 Red Flags	Full Speed	2 Red Lights
	Stopping	
1 Red Flag	Slow Speed	1 Red Light
All Flags Down	Stop	No Lights

6) When normal ship-to-shore communication fails, the emergency gnal to stop the oil flow will be a continuous blast on the ship's whistle til the oil ceases to flow. Steam or air should never be shut off from histle during loading. When practical, means should be provided for owing the whistle from the after section of the cat walk. Whenever an mergency Whistle Signal is used, all loading operations in the berths ll be shut down until normal communication is restored. For this reason s requested that ships in the area refrain from using ship's whistle for ther than essential purposes.

oad Lines: Masters are warned that their load lines are subject to rutiny by the Port Officer from Mina-Al-Ahmadi on completion of ading or bunkering. It is in their own interest therefore, to observe the gulations, as vessels are liable to be delayed and have to pump ashore r be fined if overloaded, and Port Clearance withheld.

EDICAL: Patients will in normal course of events be treated by uarantine Medical Officer on board. Neither medical nor hospital cilities are provided by the Company. However, in cases of emergency ose requiring urgent hospitalisation may be taken by vessel's Agent.

BALLAST: As soon as practicable after arrival, all vessel's tanks will be inspected for evidence of oil in ballast. During discharge of ballast, similar inspections will continue. If evidence of oil appears at any of these inspections, the ship must return at once to a point not less than 100 miles from the coastline and there clean tanks and segregate slops.

Masters will be required to sign a declaration certifying that any water ballast intended for discharge from vessel is clean and free from oil.

No deballast reception facilities are available.

POLLUTION: Cases of discharging dirty ballast or oil spillages will be investigated and vessels are liable to fines and/or detention. Vessels shall not discharge into the water of the port any part of the content of their cargo, slop, or ballast tanks or bilges which is liable to pollute these waters. Masters shall ensure that pipeline and equipment are clean before using them for discharging anything into the water of the port. Scuppers shall be plugged effectively and no leakage or spillage of petroleum on board shall be allowed to leak or be swept overboard.

The State of Kuwait has stringent laws in force concerning the pollution of the sea by oil. The following are 2 amended paragraphs of this law:

Paragraph 1, Art. 4. "A person responsible for any pollution as described in Articles 1 and 2 shall be punished by a fine of not less than 1,500 Dinars and not more then 40,000 Dinars. In the event of his committing a similar crime within a period of 1 year from the date of his conviction, such a person shall be punished by a fine of not less than 3,000 Dinars and not more than 40,000 Dinars, and in the event of his committing yet another crime within a year from this last conviction he shall be punished by a fine of not less than 6,000 Dinars and not more than 40,000 Dinars".

For each offence a bond of 40,000 Kuwaiti Dinars must be deposited prior to release of vessel.

Paragraph 3, Art. 6.. "The person responsible for pollution may suspend the detention order against the ship on payment, as a cash guarantee, of 40,000 Kuwaiti Dinars to the official entrusted with the execution of such order".

TIDE: The maximum tidal range is 10 ft. 6 in. and velocity of tide is from 0.5 to 2 knots.

DENSITY: 1025.

FRESH WATER: Cannot be supplied at Mina Abdulla. In case of utmost need Agent may hire a barge with a capacity of 100 tons of fresh water from Kuwait, and send to Mina Abdulla.

FUEL: Fuel oil bunkers can be loaded in either berth at a max. rate of 500 t.p.h, thus raising the max. loading rate of either berth by 500 t.p.h. for fuel oil cargoes only.

CONSULS: See "Shuwaikh". Consuls are situated just outside Kuwait town, some 30 miles from the terminal.

CERTIFICATES: There is no organisation for dealing with Derat Certificate at Mina Abdulla. Agents are responsible for presentation of Oil-discharging Certificate to Customs Authorities as guaranteed by them. All Cargo Discharge Certificates duly attested by the Arab Consulate are to be sent to Agents directly.

REPAIRS: No facilities.

CUSTOMS: Import of firearms and ammunition is forbidden. Under Kuwait Law No. 46, it is an offence to sell or trade liquor within the State of Kuwait. Any person convicted for selling, purchasing, giving away, accepting or acquiring in any manner, liquor or any intoxicating drinks for the purpose of trading and marketing shall be punished by a maximum 3 year's imprisonment and a maximum fine of KD. 300 or by only 1 of the 2 aforesaid penalties. Alcoholic beverage is strictly prohibited to be held out of bond. Master allowed to keep limited quantity in his cabin.

REPATRIATION: See "Visa Regulations" under General before first port

AIRPORT: Kuwait.

TIME: GMT plus 3 hours.

PROVISIONS: K.O.T.C. does not provide any chandlering facilities. Masters of vessels calling at Mina Abdulla must arrange for supplies through ship's Agent. Foodstuffs, beverages, tobaccos, etc., are available from ship chandlers in Kuwait in limited kinds and quantities. Prices a little more expensive than in Kuwait due to long transportation. Ship's Agent should be advised by cable well in advance.

SHORE LEAVE: At present, crews not allowed ashore at Mina Abdulla, and this rule will be strictly adhered to.

GARBAGE DISPOSAL: Vessels have to retain garbage on board.

WASTE OIL DISPOSAL: No service available.

SEAMAN'S CLUBS: None.

CURRENCY: Kuwaiti Dinar.

REGULATIONS: Main engines shall always be kept ready for use. Steam pressure shall be maintained at minimum necessary to operate auxiliaries and to manoeuvre in case of need. Deck steam is to be maintained at all times.

Engine repairs which may prevent working of main engines may only be undertaken with written permission of the Oil Movements Department.

Master shall at all times retain on board sufficient crew to work vessels.

Vessels shall have both anchors ready for immediate use on arrival and departure.

Vessels berthed at sea terminals shall not carry out engine trials without permission of the Oil Movements Department.

No swimming in vicinity of vessels or from vessels in berth is allowed.

DEVELOPMENTS: The CBM berths formerly used have been removed, but the pipelines and ground tackle remain in place. The former position of the CBM berths, which are about 1 mile South of the Sea Island, are marked by a navigation buoy and Masters are cautioned from anchoring in this area.

AUTHORITY: Kuwait National Petroleum Co. (KSC), Mina Abdulla Refinery, P.O.Box 69, Safat, 13001-Safat-Kuwait. *Tel:* (965) 3260233, Ext. 3232/3535. *Telex:* Kunpema 44204 Kt. *Cables:* Kunpetco-KWT-Marine, MAB. *FAX:* 3260280, 3261704. *Contact:* B.P.N. Sinha, Superintendent – Oil Movement.

All shipping movements are directed by Mina Al-Ahmadi Harbour Master. *FAX:* 3262265.

MINA AL-AHMADI: 29.04 N. 48.09 E. (See Plan)

OPERATORS: Kuwait Oil Company.

LOCATION: Port of Mina Al-Ahmadi is open roadstead situated on Western shores of the Gulf.

PORT LIMITS: From the shore at Lat. 29° 02′ 50″ N. Eastward to Long. 48° 09′ 42″ E. Thence in a S.E. direction to position Lat. 29° 02′ 45″ N., Long. 48° 09′ 47″ E. then in an Easterly direction towards Long. 48° 11′ 30″ E. and the Northerly limit Lat. 29° 10′ 00″ N. from the shore to Long. 48° 11′ 30″ E.

Note: Southern limits liable to slight modification due to Shuaiba Port expansion. Changes of no consequence to visiting vessels.

FLAG: National flag of Kuwait is to be flown at foremast head during vessel's stay in port.

DOCUMENTS:

1. To obtain clearance inwards, following documents required by Agents:
   (i) Ship's Register.
   (ii) Safety Equipment Certificate.
   (iii) Safety Radio Certificate.
   (iv) Load Line Certificate.
   (v) Last Port Clearance.
   (vi) Two copies of Crew List showing names, nationalities and Passport/Seaman's Book numbers.

Items (i) to (v) are returned to Master together with Port Clearance (valid 24 hours only) prior to sailing.

2. Customs boarding officers require following:
   (a) One copy of Crew List.
   (b) Log Books covering period from last visit.
   (c) Completed Customs Declaration Form (supplied by boarding officer).
   (d) List of Ports visited with arrival and departure dates since last visit (form also supplied by boarding officer).
   (e) Completed Ballast Form (form also supplied by boarding officer).

3. Immigration Officials require the following:
   (a) Valid Passport or Seamen's Book – the latter is preferable for landing.
   (b) Letter of Guarantee from Agents.
   (c) Two copies of Crew Lists.

4. Early Departure Procedure: KOC Documents Section are now operating an Early Departure Procedure to cut down delays in documentation. Masters may opt to use this scheme, full details of which can be obtained from KOTC. Those vessels not accepting this system of documentation are unberthed to anchorage to await documentation and therefore subject to delay in sailing until documents are ready and delivered onboard by launch. Weather conditions may prolong such delays on occasions.

5. Discharge Certificates: Discharging certificates of oil cargo loaded from Kuwait and neutral zone ports are to be sent to vessels' local Agent immediately, duly attested by Customs Authorities and Arab Consulate covering full quantity as per Bill of Lading.

If a vessel, which has not submitted the certificate for the previous voyage, calls for the second time, she will be allowed to load and sail only after paying a cash deposit of KD. 2,000.

In order to avoid delay in berthing, loading and outward clearance for vessels, all owners must give instructions to Agent at discharging ports to forward relevant cargo discharge certificates to Agent at loading ports without delay.

NAVIGATIONAL AIDS:

Current hydrographic information may be obtained by radio from the "Middle East Navigation Aids Service, Bahrain".

Lights and Fog Signals: A fog signal on the extreme South end of South Pier – MAA with characteristics of one 3-second blast every minute. Approx. position Lat. 29° 03′ 42″ N., Long. 48° 09′ 42″ E.

A fog signal situated on the North Pier with a characteristic of 2.5 second blast, 3 second silence, 2.5 second blast, 3 second silence, 2.5 second blast, 46.5 second silence, Approximate position Lat. 29° 07′ 24″ N., Long. 48° 09′ 00″ E.

A fog signal situated on MAA – KOC Sea Island with a characteristic of 2×3 second blasts every 90 seconds. Approximate position Lat. 29° 06′ 48″ N., Long. 48° 17′ 29″ E.

A fog signal situated on MAA – KOC Single Point Mooring with a characteristic of a 10 second blast every 60 seconds. Approximate position Lat. 29° 06.9′ N., Long. 48° 19.2′ E.

A fog horn situated on the Shuaiba Petroleum Products Pier – SPPP – with a characteristic of a 3 second blast every 17 seconds. Approximate position Lat. 29° 02′ 46″ N., Long. 48° 10′ 46″ E.

A fog horn situated on the Mina Abdullah Sea Island – MAB – with a characteristic of prolonged blast duration of 2 seconds on and 18 seconds intervals off. Followed by morse "LI". Approximate position Lat. 29° 01.5′ N., Long. 48° 12′ 45″ E.

PILOTAGE: Vessels should arrive with sufficient clean ballast for safe manoeuvring under prevailing weather conditions. Under certain conditions the Pilot, after consulting the Harbour Master, may require additional ballast to be run in before berthing.

All berthing, unberthing and manoeuvring of vessels within the port limits, restricted area and prohibited anchorage must be done under the supervision of a KOC Pilot.

It is the duty of the Master to inform the Pilot of any special conditions, difficulties, or peculiarities whatsoever pertaining to his vessel which might impose hazards in connections with the handling, mooring, unmooring, loading or discharging of the vessel.

The Pilot boarding places for North Pier and Shuaiba Petroleum Products Pier (SPPP) are 2 miles East of the respective piers, and for the offshore terminals (MAA-SPM and MAB-Sea Island) 2 miles off the terminals, or any other place advised by the Duty Harbour Master.

Caution: Vessels are cautioned to keep well clear of the port area and on no account to pass within a distance of 2 miles of all terminals without a Pilot on board.

ANCHORAGES: The suggested anchorages in the Port of Ahmadi, SPPP and MAB-Sea Island have been laid out to shipping in general. These anchorage areas are outside of the and clear of the prohibited anchorage and restricted areas. the anchorages range from 10 to 15 fathoms, the seabed is of soft coral with mud patches and affords good holding ground.

Incoming vessels are assigned berths by the Harbour accordance with time of arrival, type of cargo required, size of and loaded draft. Endeavour is made to berth vessels on Masters will be advised, prior to arrival, of the pier at which berth. If a berth is not available, vessels will be requested to one of the four anchorages as follows:

1. To the North-West or South-East of MAA-SPM.
2. To the East of the North Pier, outside of the port limits and North of the Prohibited Anchorage.
3. To the East of the South Pier, outside of the port limits and the Southern limit of the Prohibited Anchorage and the port limit of Shuaiba Port.
4. To the East of MAB-Sea Island (For both MAB-Sea SPPP vessels).

To the East of the port limits exists a Prohibited Anchorage Restricted Area which embraces the MAA-Sea Island and sub feeder pipelines.

Positions of these areas are:

Prohibited Anchorage	29° 05′ 00″ N.		29° 05′ 00″ N.
	48° 11′ 30″ E.	to	48° 15′ 00″ E.
	29° 07′ 00″ N.		29° 07′ 00″ N.
	48° 11′ 30″ E.		48° 15′ 00″ E.
Restricted Area	29° 05′ 00″ N.	to	29° 05′ 00″ N.
	48° 15′ 00″ E.		48° 20′ 00″ E.
	29° 05′ 00″ N.		29° 05′ 00″ N.
	48° 15′ 00″ E.		48° 20′ 00″ E.

Prohibited anchorage for Mina Abdulla is the area formed by joining the following position:

1.	29° 02.0′ N.	48° 13.0′ E.
2.	29° 00.8′ N.	48° 13.0′ E.
3.	29° 00.8′ N.	48° 09.5′ E.
4.	29° 02.0′ N.	48° 09.4′ E.

HEALTH: Vessels calling at Mina Al-Ahmadi are requested to following information to "Health Minahmadi Port":

(1) Name of vessel.
(2) Last port of call.
(3) Health condition of crew.
(4) Validity of Cholera Certificates.
(5) Request for Free Pratique.

Free Pratique will be considered at the discretion of the Qua Officer, and vessels must hoist the yellow flag unless they are by Agent or Harbour Control that Free Pratique has been grante

Regulations.

(i) All vessels must exhibit quarantine signals until qua formalities are completed or Free Pratique granted. International Code Flag "Q"; by night, red light over whi No person other than the Pilot is allowed to board any either alongside pier or at anchorage until pratique has granted.
(ii) Valid Cholera Certificates will be required from travellers from infected areas with the exception of children under one
(iii) Ratguards must be fitted to all moorings – this is being enforced.
(iv) Maritime Declaration of Health Form (supplied by Quarantine Officer) to be completed.
(v) One copy of Crew List containing dates of vaccinatio inoculation is required.
(vi) International Certificates of Vaccination and Inoculation available for inspection if required.
(vii) Details of air-conditioning available in vessel (form suppl boarding officer).
(viii) A valid Derat Certificate must be produced. Facilities are av locally for renewal.

RADIO:

1. *Station:* All radio communications to the Kuwait Oil Company be quoted in Greenwich Mean Time and should be routed Kuwait Coast Station 9KK, details of which are given below:

412G Al Kuwait (9KK) Lat. 29° 10′ 09″ N., Long. 47° 45′ 42

Frequency			*Hours*
(9KK) 430*, 450, 500	A1, A2	2 kW.	0300–2100
(9KK2) 4,287	A1	0.75 kW.	On reques
(9KK3) 6,370	A1	0.75 kW.	On reques
(9KK4) 8,525	A1	0.75 kW.	0300–2100
(9KK5) 12,895	A1	0.75 kW.	0300–2100
2,182, 2,200, 2,750	A3	0.1 kW.	0300–2100

*On request.

Procedure: Transmits traffic lists on 450 kHz each even hour and 12,895 kHz each odd hour plus 35, listens for 30 mins. the 2,750 kHz each odd hour plus 05.

2. *ETA:* 72 hours before arrival Masters should transmit to the Harbour Master through the Agent the following information requ Kuwait Oil Company.

1. ETA.
2. Last port of call.
3. Deballasting time.
4. Loading capacity while deballasting.
5. Maximum loading rate.
6. Bunker type and quantity.
7. Arrival draft.
8. Sailing draft.
9. Maximum loaded draft.
10. LOA.
11. Beam.
12. Light freeboard.

13. Arrival displacement.
14. Sailing displacement.
15. Fully laden displacement.
16. Summer deadweight.
17. Year built.
18. G.r.t./n.r.t.
19. Flag.
20. Notice of any repairs which may immobilise vessel.

The ETA should be confirmed 24 hours before arrival. The Master uld also provide Agent with following information prior to arrival:

1. ETA.
2. Last port of call.
3. Any sickness on board.
4. Number of crew members unprotected against Smallpox.
5. Number of crew to see doctor or dentist.
6. All requirements – provisions, supplies, lubricating oils, repairs, stores, machinery for landing, crew repatriation, etc.
7. Any special requirements regarding cargo documents.
8. Any repairs prior to loading.

HF: A short range VHF Radio Telephone. Port control system is in ation and continuous watch is maintained on International Channel Port working Channels are:

16 Port Control – Harbour Master.
69 Harbour Master, Pilots, tugs, North Pier, South Pier and SPPP Supervisors.
14 MAB S/I and craft, S/B and Operations channel.
7 SPM Operators.
1 MAB S/I Operations.
9 General port working.
10 General port working.
11 General port working.
12 General port working.
68 Operations.
70 Operations.
73 Operations.

essels bound for Mina Al-Ahmadi should make contact, as soon as they within range, calling "Mina Al-Ahmadi Port Control" on Channel 73. te: As Channel 16 is reserved for calling, safety and emergency, tions should refrain from using this Channel unnecessarily.

TICE OF READINESS: Vessels are accepted for loading either by ng given a range date or "As convenient". If a crude oil loading tanker es within her nominated range date (a 3 day period) her Notice of diness will be taken as the time of her arrival whether or not she is ted on arrival. An LPG vessel is nominated an "Acceptance Date" s 1 day and her Notice of Readiness will likewise be taken as the e of her arrival, whether or not she berths so long as her arrival time within her range. If a vessel arrives "As convenient" or for lifting kers only then her notice of readiness will be taken as the time that Pilot boards. Time of anchoring, together with position relative to respective pier should be advised to the Harbour Master by VHF as soon as possible. All vessels at anchor are required to be ready receipt of 1 hour's notice from Port Control, this notice will be given VHF and vessels should ensure an efficient watch is maintained to ceive notice.

ncellation of Notice of Readiness: In all cases, including vessels ing Range Dates, if after having received 1 hour's notice a vessel is ready to berth when Pilot boards, at the expiry of that notice the ginal Notice of Readiness will be cancelled and the Pilot withdrawn. e new Notice of Readiness will be the time the Pilot re-boards the sel concerned. As vessels are normally berthed in strict Notice of adiness sequence, a vessel could lose considerable time through not ng ready and Master should ensure that delays of this nature do not occur.

DAR: Damaged.

GS: K.O.C. maintain 5 diesel tugs for port use. They are 5,200 h.p. a designated bollard pull of 70 tons. 2 tugs are normally on duty at times. Hire charges for the services of Pilots, tugs and rope launches covered by comprehensive port charges. Under normal operating ditions no tugs or other craft will come alongside the vessel before Pilot boards. Ship's personnel must not signal for tugs or other boats come alongside.

gs will make fast during all berthing operations, two lines will be n to the vessel. A messenger line is recommended for handling lines from the tug to the vessel's deck. Tugs could also be used acating purposes.

ORINGS: When at berth, vessels must be moored to entire atisfaction of Pilot. Vessels must be ready at all times to put out extra orings as requested by pier personnel or dictated by weather nges.

Mina Al-Ahmadi is subject to sudden fierce squalls; winds of 70 knots e been recorded, therefore vessel's mooring lines must be checked quently to prevent excessive movement of vessel in berth. Experience s shown that wholly synthetic moorings have too much elasticity and ow vessel to range or drift away from the berth during periods of verse weather. Whilst these moorings are acceptable as head/stern pes, it is felt that the ideal breast moorings should be of wire or a wire pe combination with the end being sent ashore fitted with a synthetic nnant or tail. This type of mooring provides the necessary elasticity ile still being able to hold the vessel in position. All vessels moored h automatic tension winches must set the manual brakes on these nches.

ERTHING: *THE FOLLOWING FACILITIES AND SERVICES ARE VAILABLE AT PRESENT (JUNE 1993):*

South Pier:

Max. Size:	80,000 tonnes d.w.t.
Max. Draft:	13.72 m. (Crude and products). 14.02 m. (LPG).
Max. LOA:	292.6 m.
Max. Beam:	No restriction.
Restrictions:	Height of manifold – 65 ft. (maximum).
Ballast Facilities:	None.

North Pier:

Max. Size:	300,000 tonnes d.w.t. (Part load – crude and fuel oil).
Max. Draft:	16.92 m.
Max. LOA:	454.3 m.
Max. Beam:	No restriction.
Restrictions:	Height of manifold – 85 ft. (maximum).
Ballast Facilities:	None.

SPM:

Max. Size:	530,000 d.w.t.
Max. Draft:	27.43 m.
Max. LOA:	No restriction.
Max. Beam:	No restriction.
Ballast Facilities:	None.
Departure:	Vessel to utilise Deep Water Departure Channel on leaving, due to high sailing draft.

MAB S/I:

Max. Size:	276,000 tonnes d.w.t. (Berth No. 19).
Max. Draft:	16.92 m.
Max. LOA:	350.5 m.
Max. Beam:	No restriction.
Restrictions:	Height of manifold – 80 ft. (maximum).
Ballast Facilities:	None.

S.P.P.P.:

Max. Size:	100,000 tonnes d.w.t.
Max. Draft:	15.85 m.
Max. LOA:	427.8 m.
Max. Beam:	No restriction.
Restrictions:	Height of manifold – 65 ft.
Ballast Facilities:	None.

THE FOLLOWING INFORMATION RELATES TO FACILITIES AVAILABLE IN MAY 1994:

Vessels can berth at any time of the day and night. Berths are allocated by the Harbour Master depending on various factors and the berthing position is advised by VHF. All vessels must establish contact with Mina Al-Ahmadi Port Control before anchoring to ascertain position. Vessels should remain at 1 hour notice for berthing at all times and maintain a continuous listening watch on VHF Channel 16.

The Port facilities consists of 4 Piers, 1 Sea Island and 1 SPM.

South Pier: The South Pier is connected to the shore by an approach trestle, which leaves the shore in position Lat. 29° 04′ N., Long. 48° 09′ E., and runs seaward in an 071° 26′ direction for a distance of 4,200 ft. (1,280 m.). The "T" head is formed by the oil pier running Northwards in a 341° 26′ direction for 2,805 ft. (855 m.) and the South arm running in a 174° 26′ direction for 1,076 ft. (328 m.). The pier is a steel piled structure with a wooden deck, 24 ft. above zero tide. The South Pier has 4 oil-loading berths and 2 L.P.G. berths. New fendering system independent of main structure installed to berths towards sea. Vessel to provide safe access between ship and terminal.

Bitumen Pier: A Bitumen Pier, for the export of Bitumen is located in an approximate position Lat. 29° 03.9′ N., Long. 48° 09′ E. The Pier approach projects out from the shore opposite the Bitumen plant in an 071° direction for approximately 600 m. The Pier head is 100 m. long and runs in a 341° – 161° direction. Water depth approximately 20 ft 6 in. (zero tide). Largest vessel to be accommodated 5,000 ton S.D.W.

North Pier – MAA: The North Pier is situated 3.5 nautical miles North of the South Pier – MAA and is connected to the shore by an approach trestle which runs seaward from Lat. 29° 07.1′ N., Long. 48° 08.2′ E. in a direction of 071° for a distance of 4,754 ft. (1,449 m.). The head is formed by the Oil Pier which runs Northward in a direction of 341° for a distance of 2,304 ft. (702 m.). The pier is a steel piled structure with a wooden deck, 20 ft. above zero tide. The North Pier has 4 oil-loading berths. An independent berthing dolphin and associated mooring dolphin have been installed as improved facilities at the South end of the Pier, together with an independent protective dolphin to improve docking facilities at the Northwest end of the Pier. Vessels to provide safe access between ship and terminal.

Multi-pile Single Point Mooring: A Single Point Mooring is located in position Lat. 29° 06.9′ N., Long. 48° 19.2′ E. approximately 1.5 nautical miles East of the Sea Island. The SPM is currently mothballed. The hose strings have been removed to store.

MAB – Sea Island: This terminal has 2 cargo handling berths. This terminal is for loading products only which are fed to the terminal by 4×24 in. white product lines and 1×24 in. black product line. This terminal is located in position Lat. 29° 0.175′ N., Long. 48° 12.27′ E., approximately 3.03 miles East of Mina Abdulla shoreline. The terminal is a steel piled structure in 59 ft. of water (zero tide), and lies in a 323° – 143° direction, 1,350 ft. in length. The height above Chart Datum (zero tide) of the loading platform is 42 ft. Shore gangways available on this terminal.

Shuaiba Petroleum Products Pier: This terminal has 4 product handling berths. It is approximately 1.1 miles East of Shuaiba Port and 1.3 miles South of Mina Al-Ahmadi South Pier. The terminal is connected to the shore by an approach trestle which leaves the shore at 29° 02′ 25″ N., 48° 09′ 55″ E. and runs seawards in an 062°T direction for distance of 997 m. The "T" head is formed by the oil piers running Northwest in a 331.5° T direction for 336.1 m. and Southwards in a 151.5° T direction for 453.7 m. Vessels to provide safe access between ship and terminal.

Limiting Depths and Berth Lengths:

Berth	*Depth at Zero Tide* (ft.)	*Nominal Length* (ft.)
South Pier – MAA		
1.	47	930
3.	47	930
4.	48.5	960
5.	41.5	765
6.	43	705
10.	49.5	1,050

Berth	*Depth at Zero Tide* (ft.)	*Nominal Length* (ft.)
North Pier – MAA		
11.	59	1,490
12.	59	1,152
15.	57	870
16.	57	840
Sea Island – MAA KOC		
20.	94	1,420
21.	94	1,420

Loading Manifold, Loading Connection Sizes: South Pier: Berths 5 and 6 only are equipped with 10 in. cargo hoses and 8 in. bunker hoses – standard 150/ASA.

Berth 1 is equipped with	5×16 in. Cargo Arms. 2×12 in. Bunker Arms.
Berths 3 and 4 are equipped with	1×12 in. Cargo Arm, white products 2×16 in. Cargo Arms, white products 2×16 in. Cargo and Bunker Arms, black products
Berth 10 is equipped with	4×16 in. Cargo Arms. 2×12 in. Bunker Arms.
North Pier:	
Berths 11 and 12 Loading Arms	3×16 in. Cargo Arms. 2×12 in. Bunker Arms. 1×16 in. Chicksan for P.C.NA. (Berth 12)
Berths 15 and 16 Chicksan Units	4×12 in. Cargo Flanges. 2×8 in. Bunker Flanges. Standard 150/ASA.
SPM:	
Berth 22 Floating Hoses	2×16 Cargo Flanges. 1×12 in. Bunker Flanges. Standard 150/ASA.

Reducers: All vessels using the Port of Mina Al-Ahmadi should be equipped with reducing spools to fit these loading connections. These fittings should be in place, prior to berthing to help expedite the vessel's turn around.

Crude/Product Loading Rates: The following table shows the crude and products available at each berth and the nominal loading rates.

Grade	*Location*	*Nominal Rate* (t.p.h.)
Crude Oil	SPM	11,000
Crude Oil	North Pier	7,200
Crude Oil	South Pier	2,100
HFO Bunkers	SPM	1,000
HFO Bunkers	MAB S/I	1,000
HFO Bunkers	SPPP	300
HFO Bunkers	North Pier	500
HFO Bunkers	South Pier	500
HFO Cargo	North Pier	2,000
HFO Cargo	South Pier	2,000
HFO Cargo	MAB S/I	2,000
HFO Cargo	SPPP	3,000
LFO Bunkers	North Pier	500
LFO Bunkers	South Pier	500
LFO Bunkers	SPPP	400
LFO Cargo	South Pier	1,100
LFO Cargo	MAB S/I	2,000
LFO Cargo	SPPP	3,000
D.O. Bunkers	South Pier	500
D.O. Bunkers	MAB S/I	500
D.O. Bunkers	SPPP	150
Line Blend Fuel Oil	South Pier	1,200
Gas Oil & HSD	North Pier	2,600
Gas Oil & HSD	South Pier	1,500
Gas Oil & HSD	MAB S/I	2,200
Gas Oil & HSD	SPPP	1,300
LSFO	South Pier	2,600
LSFO	SPPP	3,000
ATK	N. & S. Piers	1,500
ATK	MAB S/I	2,200
ATK	SPPP	1,300
M.S.	N. & S. Piers	1,200
PCNA	N. & S. Piers	2,600
PCNA	MAB S/I	2,200
PCNA	SPPP	1,300
Bulk L.P.G.	South Pier	2,000

HSD: High Speed Diesel.
L.S.F.O.: Low Sulphur Fuel Oil.
A.T.K.: Aviation Turbine Kerosene.
M.S.: Motor Spirit.
P.C.NA.: Petrol Chemical Naphtha.

Note: All blended cargoes containing crude oil as one of the components can be loaded at any crude berth.

K.O.C. are in the process of installing a new metering system for Exports.

Slops: A 10 in. slop-line is available on all berths on North and South Piers for reception of slops. For first 3 hours use of this facility is free, for each additional hour or part thereof, a charge is made. Reception of slops is necessarily slow and a vessel may be considerably delayed in having to pump slops ashore. Vessels are therefore expected to arrive with clean ballast and Masters are asked to certify that all tanks and lines have been thoroughly washed unless "Load on Top" techniques are being operated.

MEDICAL: Patients will normally be treated at State Quarantine Clinic, where doctors are on duty between 0800 – 1200 hrs. and 1500 – 2000 hrs. daily. In emergencies doctors are available any time. Patients requiring hospital treatment will be transported by Agents to either KOC hospital in Ahmadi or to State hospital in Kuwait. Dental treatment can be arranged by Agents.

FRESH WATER: Fresh water is not available at Mina Al- Vessels should contact their Agents for supply from alternative such as Shuwaikh Anchorage, Shuaiba Port, etc.

FUEL: Heavy, light and diesel fuel can be supplied on all berth SPM, where only heavy fuel is available and North Pier where is not available. There are no bunkering facilities on the Bitume

	API	*Viscosity*	*Sulphur co*
Heavy Fuel	15.2–15.8	2,900–3,400	4.0 or le
Light Fuel	19.0–20.0	600	3.5 or le
Diesel Fuel	35.5–36.5	36	1.5 or le

LUBRICATING OILS: The stock of marine products of BP, Sh Gulf Oil are maintained at Mina Al-Ahmadi and requests indica quantities are to be made in advance. All drums are to be handled deballasting or before loading. Vessels will not be allowed to loa than 9 drums after loading unless under special circumstance depending on shipping congestion. No bulk luboil delivery available in Kuwait.

CONSULS: Most friendly countries maintain Embassies or Cons in Kuwait Town.

CUSTOMS: Customs Officials will board vessels to inspect log to ascertain violation of Israeli Boycott Rules and seal the liquo during stay in berth. An accurate list of alcoholic drinks in *Bonded* only is to be presented to the officials sealing the bond and the not to be broken until vessel leaves the port.

(i) Personal effects mainly required for personal use and not sale or purpose of commercial gain are allowed free o However, all other goods are subject to a 4% ad valorem du value). Suppliers' invoices and Certificate of Origin are requ clearance.
(ii) Importation and the sale of alcoholic beverages is strictly proh
(iii) All goods for landing from tankers must be declared to bo Customs Officer and necessary documentation completed
(iv) Israeli goods, goods made by companies having inte branches in Israel, Israeli vessels and vessels trading wi are boycotted and not allowed entry into Kuwait.

IMMIGRATION:

(i) Nationals of all friendly countries normally allowed to land. forbidden entry into Kuwait.
(ii) Transit visas should be obtained from Kuwait Embass Consulates abroad. However, in emergencies entry visas arranged at airport.
(iii) Transit passengers having valid connecting airline ticket t port are allowed to land without visas up to 24 hours, exten to 48 hours if required.
(iv) Seamen of all friendly countries normally allowed to land in to join vessels, without visas but on Agents guarantee. A information regarding names, nationalities, age, sex, required by Agents in order to facilitate reception and immi clearance.
N.B. Thursdays and Fridays are Company holidays.
(v) Seamen allowed to land for hospitalisation, repatriation, tr etc., on a written undertaking that all expenses are met by on behalf of Owners.
(vi) Passports must be valid for Kuwait for citizens of all cou Stateless persons are required to have a visa before ar Kuwait.

Also see "Visa Regulations" in "General" before first port.

TIME: Kuwait State bases local time on the 45th meridian (GM 3 hours). This time is in force the whole year.

STORING: Vessels can only be stored by barge at the anchorage storing alongside at the berth, trucks can only proceed to the h the jetty. From this point hand carts are used to the berth. No can be used on the jetty. The labour force is supplied by the Chandler who also deals with the Customs Regulations.

SHORE LEAVE: Ship's personnel and passengers not permitted for any purpose whatsoever until pratique granted. All shore le contingent upon compliance with quarantine regulations and, limited conditions and hours, shore leave may be granted. M should consult Agents to obtain the necessary passes.

DEEP WATER DEPARTURE CHANNEL: A comprehensive surve carried out to determine the route of the Departure Channel for the and deep draft vessels leaving the port of Mina Al-Ahmadi in a condition. This channel is some 28 miles in length; it extends fro Sea Island Terminal to Madira Reef and is marked by 21 light and 2 light beacons, one established on Taylor Rock and the ot Madira Reef. In addition to the above aids, Madira Reef Light has been re-positioned further to the East and renamed Ahmad as a fairway mark. Water depth in the departure channel is from to 100 ft. and above. Two shallow patches, one is about 9 miles Sea Island with a minimum 91 ft. and the second is 14 miles fro Island with 92 ft. minimum water. Vessels which by reason of the are confined to this deep water channel and consequently hampe their freedom to manoeuvre, will exhibit the following signals:

(i) *By day.* A black cylinder 4 ft. long by 2 ft. in diameter ex where it can best be seen.
(ii) *By night.* Four red lights vertically disposed spaced 3 ft with an all round visibility of 4 miles exhibited where the best be seen.

The exhibition of these signals in no way absolves any vesse taking all appropriate action to avoid collision as required b International Rules and Regulations for Preventing Collisions but if a deep draft vessel is in doubt that an approaching vessel giving her sufficient room to manoeuvre she should indicate such by giving at least 5 short and rapid blasts on her whistle.

Vessels having less draft should, when able to do so, give w vessels exhibiting and sounding these signals and indicate this in by giving 1 short blast followed immediately by 1 long blast on the Normal sound signals for vessels in sight of another should then fol nchoring and fishing are forbidden within deep water Departure Channel. The Departure Channel is marked by the following buoys and beacons forming to the I.A.L.A. "A" system:

Shape & Colour	Position N. Lat.	Position E. Long	Character	Port/Starboard/ Special/Cardinal
Conical G.	28° 57′ 33″	48° 46′ 18″	Qk. Fl. G	Starboard

oys A1, B1 and C1 mark the submarine pipeline from shore to Pier Terminal (See "Plan").

ERVICES: To avoid delay all vessels advised to cable Agent of all r requirements in advance, giving full details.

pairs:

Ship Repair: All running repairs are undertaken through local contractors.

Radar/Radio and Electronic Equipment: Maintenance service of this equipment is available through KOTC whose engineers/technicians are available for service on request.

pplies: Supply of chemicals, paints, spare parts and provisions are ailable through local Agents.

undry: Laundry service is available on advance notice.

Inspection: An independent oil inspection service is maintained at a Al-Ahmadi by the following: E. W. Saybolt & Co., B. & R. Redwood , and Chas. Martin.

assification Societies: Lloyd's Register of Shipping has a Resident veyor in Kuwait and maintains an office with Kuwait Maritime & cantile Co., who attend marine and non-marine work. Other societies e non-exclusive surveyors and their services can be obtained ugh KOTC.

ers: Divers' services are available, including underwater hull cleaning vice, through KOTC.

GULATIONS:

Local Laws: The laws of Kuwait are in force at the Port of Mina Al-madi. Masters and crew members are advised for their own protection bide by them. Comprehensive regulations governing the use of the t are promulgated in Law No. 21 of 1961. Masters of visiting vessels ld acquaint themselves with this law.

Pollution: The State of Kuwait has stringent laws in force concerning pollution of the sea by oil. For information, the following are two graphs of this law:

Para 1, Art. 4: "A person responsible for any pollution as described Articles 1 and 2 shall be punished by a fine of not less than 1,500 d not more than 40,000 Kuwaiti Dinars. In the event of his committing milar crime within a period of one year from the date of his conviction ch a person shall be fined not less than 3,000 and not more than 000 Kuwaiti Dinars, and in the event of his committing yet another me within a year from the date of this last conviction he shall be nished by a fine of not less than 6,000 but not exceeding 40,000 waiti Dinars.

Para 3, Art. 6: The person responsible for pollution may suspend tention order against the ship on payment, as a cash guarantee, of 000 Kuwaiti Dinars to the official entrusted with the execution of such der".

Certificates: All vessels must comply with International Safety gulations and ensure that ship's certificates, i.e. Safety Radio, Safety uipment and Load Line are valid. Facilities are available for renewal extension providing proper notice is given. At least 48 hours should e allowed *excluding* Thursdays, Fridays or other local holidays.

Load Line Regulations are strictly enforced, vessels overloaded will t be allowed to sail and subject to lengthy delay awaiting suitable cilities for pumping ashore. No facilities for pumping cargo ashore from ea Island and S.P.M. are available.

A Cargo Discharge Certificate for cargo loaded from Kuwait each yage is to be presented to the Customs and Ports in Kuwait through e Agents within 4 months from sailing and these certificates are to be gned and stamped by local Customs officials and authenticated by an ab Embassy or Consulate in the country of discharge.

PORT TAX: Introduced by the State of Kuwait at the rate of 45.25 fils (KD. 0.4525) calculated on ship's N.R.T. and outward clearance is subject to payment of their dues before departure.

Declaration of g.r.t. and n.r.t. details essential to avoid overcharge.

AUTHORITY: Kuwait Oil Company (K.S.C.), P.O.Box 9758, Ahmadi-61008, Kuwait. *Tel:* Kuwait 3261558, 3262268. *Telex:* 44233 KT, 44293 KT. *Cables:* Kuoco Kuwait. *FAX:* 3262265. *Contact:* Captain Khalifa Al-Duaij, General Superintendent, Marine & Export Operations.

AGENT: For all tankers loading/discharging or sundry errands on a sole agency basis. Address: Kuwait Oil Tanker S.A.K. (Agency Branch), P.O. Box Fahaheel No. 7055, 64001 Kuwait. Telex: 44201, 44202. A/B Minatank Kwt. Tel. 3911811; 3914286; 3914276. Cables: "Minatank Kuwait".

KOTC Agency is also connected with direct short range telephone VHF system and continuous watch is maintained on Channel 16. Working channels are and can be reached by calling "Minatank". Channel 16, calling only. Channel 20, Agency Working. Channel 21, Agency Working.

MINA SAUD (Mina Al Zoor): 28.45 N. 48.24 E.

(See Plan)

OPERATORS: Mina Saud Marine Terminal operated by Saudi Arabian Texaco Inc., a subsidiary of Texaco. (hereinafter referred to as the Company). Weather and other circumstances permitting, ships will be loaded, moored and unmoored at all hours of the day, 7 days a week. Company representatives available at all times to discuss with Master any problems affecting vessel turnaround.

LOCATION: Mina Saud located just South of Ras Az Zaur approximately 23 miles 244° from Madira Light Vessel. Terminal connected to field and production centre at Wafra, 31 miles to N.W., by 16 in., and 10 in. oil pipelines, and 8 in. gas line.

The most conspicuous object at the terminal is the refinery flare (temporary out of order). Other objects conspicuous to the navigator: Ras Al Zour Beacon, a 35 ft. high frame exhibiting 1 flash every 5 secs.

A conspicuous power station/desalination plant close South of the terminal with two chimneys 192 m. high in position Lat. 28° 42′ 21″ N., Long. 48° 22′ 30″ E.

A new pentagonal (meteorological tower) has been erected in position Lat. 28° 46′ 00″ N., Long. 48° 26′ 08″ E., 5.5 m. above sea level, exhibiting Gp. Fl. 4 ev. 15 sec. (just North of Berth No. 2).

FLAG: All vessels required to fly Kuwait flag at foremast during daylight hours. Flags may be obtained from Agents.

APPROACHES: Vessels on passage direct to Mina Saud up Gulf should pass about 1 mile South of Madira Reef Light Vessel, thence make good a course of 242° to an anchorage off Mina Saud in 17 m.

DOCUMENTS:

Ship's Manifest.
Bill of Health.
Crew List.
Clearance from Last Port.
Passengers Manifest, if any.
Stores List.
Bonded Stores List.

Agents are responsible for presentation of Oil Discharging Certificate to Customs Authorities as guaranteed by them. All cargo discharge certificates duly attested by Arab Consulate to be sent to the Agents directly.

Cargo documentation carried out by Terminal. Masters will greatly assist Terminal Staff by prompt provision of ship's tank ullages on completion of loading. Normal practice is for Master to sign blank documents during loading in order to save time on departure. (Should the Master desire, he may protect Owners interest by issuing a protest letter at time of signing blank documents. This letter can be rescinded if document figures are acceptable.)

PILOTAGE: Vessels boarded by Mooring Master either on approach or at anchorage. Mooring Masters are Licensed Masters Foreign Going. They act in an advisory capacity to Master and have expert knowledge of local conditions.

Mooring Master will pilot the vessel into the berth, supervise the mooring and unmooring, and advise Master with respect to the connecting and disconnecting submarine hose. A ship's deck officer must be on the bridge at all times while ship is manoeuvring, and deck officer must direct ship's crew in all hose handling. During loading operations Mooring Master will act as Company's representative. A shore crew of 5 persons handle ropes to and from buoys during berthing and unberthing.

The same crew connect/disconnect hoses and remain on board throughout loading.

ANCHORAGES: Centre of the recommended anchorage area is in position 090° from Flare 4.3 miles, which has good holding ground with mud and sand bottom.

Prohibited anchorage area defined as follows: beginning at refinery flare 060° 3.5 miles thence 180° 1.75 miles thence 270° 3.0 miles to refinery flare.

HEALTH: Vessels calling at Mina Saud are requested to include the following information.

(1) Name of vessel.
(2) Last port of call.
(3) Health condition of crew.
(4) Validity of Cholera Certificates.
(5) Request for Free Pratique or details or any cases or suspected cases of infectious diseases during the last four weeks.

Free Pratique will be considered at the discretion of the Quarantine Officer and vessel must hoist the yellow flag unless informed by Agent or Harbour Control that Free Pratique has been granted.

MAX. SIZE: *Guidance for Maximum Dimensions:*

	Berth No. 1	*Berth No. 2*
LOA	800 ft.	1200 ft.††
Beam	No limit	No limit
Max. Sailing Draft	41 ft.	52 ft. (56 ft.*)
	50,000†	approx. 140,000†
Min. depth in berth	43.6 ft.	55.8 ft. (48.5 ft. on inshore bar)
Min. depth on exit route	43.6 ft.	53.8 ft.

*Tidal loading to 56 ft. allowed in suitable conditions.

†Larger vessels (up to 370,000 d.w.t.) are allowed for part cargo or bunkers providing other parameters are satisfied.

††Limiting parameter is maximum distance stern to manifold of 600 ft.

RADIO/VHF: *Communications:* Messages should either be telexed direct (Fax: (965) 3950078 Marine or (965) 3951022 Management) or by cable via Kuwait Radio (call sign 9KK on 500 kHz) for onward transmission to Saudi Arabian Texaco Mina Al Zour (Mina Saud).

Kuwait Radio transmits traffic lists on 450 kHz at 25 minutes past every even hour and on 8525 kHz and 12895 kHz at 35 minutes past every odd hour.

VHF Service maintained by Mina Saud Marine. Listening on Channel 16 (156.8 MHz). Operating hours: Continuous 24 hours a day, 7 days per week.

Masters are requested to advise ETA 72 hours before arrival Mina Saud, and to confirm this when 48 hours and 24 hours distant from the Port.

It will assist if the following information is passed to Saudi Arabian Texaco Mina Saud before vessel's arrival.

Bunker fuel requirements in metric tons or U.S. bbls. at 60° F.

Cargo requirements in long tons or U.S. bbls. at 60° F.

Confirmation that only clean ballast is to be discharged and expected deballasting time.

Confirmation that ballast and pipelines are clean, 2 ropes or wires and both anchors forward and 9 synthetic ropes or wires available aft. Arrival draft fore and aft, expected sailing draft fore and aft.

When berthed at Mina Saud contact with the shore is maintained by VHF R/T portable units supplied by the Company.

TUGS: Two tugs are available to assist berthing and unberthing, also to stand-by for emergencies while vessels are in berth.

Tug charges of 160 KD. per tug, per hour or part thereof based upon hours of actual usage when made fast or standing by ready to assist the vessel e.g. during berthing/unberthing operations. (whilst vessel is in the berth and throughout deballasting/loading operations. Additional tug charges will be levied if called to assist, e.g. tug(s) called to assist vessel to remain in berth in the event of bad weather or for any other reasons concerning safety).

READINESS: Notice of Readiness will be received by Company within terms of Charter Party or Contract when known, otherwise during ordinary business hours, which shall be between 0700 hrs. and 1800 hrs. local time except on Fridays and Public Holidays.

Laytime to commence 6 hours after time of acceptance or upon commencement of loading, whichever occurs first, except that when Notice of Readiness received before 1600 hrs. local time the 6 hours shall be continuous, but if received after 1600 hrs. then such 6 hours shall be daylight hours, daylight hours for such purpose being between 0600 hrs. and 1800 hrs. local time.

If after giving Notice of Readiness, vessel is delayed in getting into berth or in loading, such delay shall not count as used laytime unless delay shall be due to default of Company. On completion of loading, laytime shall cease upon disconnecting cargo hoses.

Should Company Mooring Master be handed a Notice of Readiness out of business hours and before commencement of loading he will note it as "Received" at that time, for acceptance by the Company at earliest recommencement of business hours, or at time of commencement of loading, whichever shall be first.

If Notice of Readiness given after latest accepted nominated lifting date, laytime shall not commence before commencement of loading.

BALLAST: Vessels must have enough clean ballast to permit safe manoeuvring under any conditions. All vessels, particularly VLCCs must retain ballast during early stages of loading and discharge ballast as necessary during latter stages of loading.

Mooring Master will advise when ballast discharge may commence. Inspection of ship's tanks for suitability to receive cargo carried out by Mooring Master or by qualified petroleum inspectors if required.

GEAR: For handling 2×10 in. strings of hoses ship's derrick should have a minimum safe working load of at least 5 tons. Outreach overside should be at least 5 ft.

2 lengths of 1 in. diameter good quality rope each of 20 fathoms in length should be available for use as slip ropes for flexible hoses.

Reducers should be available for connection of hoses to ship's manifold and to ship's bunker line connection.

Company provides snub lines of manila and wire rope for hanging off hoses.

In the event that ship's derrick gear is inadequate for loads required, a work barge can be made available. Charge for this barge, including positioning and personnel, is equivalent of U.S.$ 250 per hour (approx.).

BERTHING: There are 2 loading berths, each conventional multi-buoy moorings which are connected by a 20 in. submarine line for fuel or crude and a 12 in. submarine line for naphtha. Each berth has 2×10 in. hoses for fuel or crude and a 10 in. hose for naphtha.

Vessels taking bunkers will use fuel cargo hose before or after loading cargo. Manifolds should be prepared with 10 in. 150 ASA standard connections.

The outer berth, 073° – 2.6 miles from refinery flare, is equipped to take vessels of up to approx. 140,000 d.w.t. for full cargo. Larger vessels can be accommodated for bunkering only or part cargo. Max. draft allowed is 52 ft. In exceptional circumstances tidal loading to 56 ft. is allowed. See "Appendix".

Appendix A. Mina Saud Tidal Loading Procedure, Decembe

Assuming 1,000 ft. ship has berthed. Starboard anchor betwee and 300 ft. South of starboard anchor marker and one ship (1,000 ft.) inside, (Course made good 270°T). Starboard ancho along bottom and port anchor let go when 11 – 12 shackles starboard. i.e. 1,000 ft. West of starboard (allowing for slack), would be in berth with between 8 – 10 shackles on each ancho

When letting go at HW with ebb tide and heaving port anchor, should manage to remain in at least 16.4 m. charted depth, about 340°T with stern in line with, or to seaward, of manifold buoy.

Every effort should be made to pick up port anchor without too much on starboard anchor. Ideally, last shot of port cable is home whilst starboard cable is fairly tight, so that when port an aweigh vessel swings to starboard and presents her port side ebb, thus regaining a mid berth position. (Sometimes necessary engines ahead in order to clear manifold marker hose buoys).

Pilot should endeavour to have vessel heading North when sta anchor is aweigh. Vessel should then steam North or slightly W North in order to maintain a distance of approx. 1,000 ft. from sta anchor marker buoy. Vessel should start turn to starboard (bea mind ebb tide) when abeam of starboard anchor marker buo endeavour to turn on radius of about 1,000 ft. with starboard a marker buoy at centre. A course of 066°T should be made goo deep water is reached. If this procedure is followed, the minimum should be not less than 16.4 m. (chart datum).

Note: 16.4 m. exists in berth and on exit channel. Close attentio be paid to vessel's position, as depths of less than 16 m. are i proximity to exit channel.

Vessel should finish loading cargo or bunkers at least 3 hours b HW thus ensuring maximum height of tide for bottom clearanc ebbing tide for easier control. (Ebb tide usually commences 2 before HW). See "Tides".

16.4 m. must be reckoned governing depth.

Calculate thus: 16.4 + height of tide then subtract 1 m. Result max. allowable draft (only if weather conditions are ideal).

eg.

16.4 m.
+ 1.8 m. height of tide

18.2 m.
– 1.0 m. clearance

17.2 m. allowable draft (56 ft. 5 in.)

It must be borne in mind that mentioned clearances are the ab minimum that can be tolerated in ideal conditions.

Seismic survey indicates feasibility of dredging or burying pip should it ever be necessary and also indicates good anchor h power potential throughout area. *End of appendix.*

The inner berth, 073° – 2.0 miles from refinery flare, has a min depth of 44 ft. at LLW and can accommodate vessels up to 80 length. Max. draft allowed is 41 ft.

MOORING: *(a)* Port is an open roadstead and ships must be pre to use main engines, unmoor and leave at any time.

(b) Mooring and unmooring carried out during day or nig required. Except mooring at Berth No. 1, during daylight only.

(c) Vessels moored to ebb tide stream at both inner and outer b

Resilience in mooring achieved by weight of clump ancho catenary of chain cable. Remotely operated quick release hooks co ship's ropes to the buoy (at outer berth (No. 2) only.)

(d) Both port and starboard anchors should be lowered clear of th pipes and ready for instant letting-go from brakes.

Spar buoys established to mark starboard and port anchor dro positions (exhibiting Fl. G. for starboard and Fl. R for port).

(e) 9 good quality synthetic ropes (or wires for VLCCs) shou flaked ready for running from the stern. After anchoring, as v proceeds astern in berth, quarter lines are run by Company laun secured to quick release hooks on quarter buoys. 2 Lines are th to No. 5 buoy on the Port Bow.

(f) When securely moored in correct position for handling hoses anchor should have about 8 shackles out and it is advisable that ta using these submarine berths be provided with not less 10×15 fathom lengths of cable on each anchor.

(g) Masters are requested to ensure that power to deck mac and sufficient seamen to operate it are immediately available at al when in berth.

LOADING: Submarine line marked by permanent red coloured bu each berth, and marker buoys fitted to all hoses.

Recovery of flexible hoses is by fleeting with ship's tackle makin of beckets fitted to recovery chain.

"Ship's Stop" is invariable rule except in an emergency. Ship give reasonable stand-by time to Mooring Master, 15 to 20 minu alert Terminal staff on shore for closing valves.

Loading rate at present averages 2,500 long tons p.h.

MEDICAL: In emergency only. For normal cases, Agent arrange to Port Health Doctor.

FRESH WATER: Not available.

FUEL: Not available.

FIRE PRECAUTIONS: Masters are responsible for enforcin Smoking" regulations for their vessels and Mooring Master wi loading if he considers them to be inadequate or if they are not obeyed. Smoking in Company craft in the berths is forbidden.

CONSULS: See "Kuwait."

REPAIRS: Repair facilities are available. Fully qualified dive available from Terminal. Underwater cutting gear, welding equip and a full range of underwater tools are available.

Services of divers and equipment are available at rates to be ar for the job and agreed by Superintendent of Marine and Te Operations, Mina Saud.

pairs to main engines must not be carried out in the berth without mission of Superintendent of Marine and Terminal Operations. mally vessels requiring to immobilise engines will be anchored well of other ships.

TOMS: Alcoholic beverages strictly prohibited to be held out of d.

is important to remind Owners and Masters that all goods, either d or embarked, must be cleared by Agent through local Kuwait rnment Customs.

port of firearms and ammunition forbidden.

TRIATION: Crew changes normally effected through Kuwait.

so see "Visa Regulations" in "General" before first port.

E GMT plus 3 hours. Permanent.

RES: Provisions and stores are available from Kuwait. rements should be arranged with Agents through Kuwait Radio o arrival at Mina Saud.

E LEAVE: Can be arranged through Agent.

THER: In Summer months of June, July and August light to rate Northerly and North-westerly winds are general rule at Mina d. Occasional strong N.W. winds of Gale force. Strength and ion governed by strength of S.W. monsoon blowing outside the f.

ring Autumn and early Winter months fine weather is generally enced associated with moderate N.E. monsoon prevailing outside ulf. Occasional 'Shamals' (N.W. winds) occur.

ate Winter period and Spring, strong S.E. winds with moderately seas frequently experienced at Mina Saud. These are due to ach of low pressure systems from Atlantic and Mediterranean Sea ding Eastwards across Levant and Iraq. Extremely violent local ms sometimes occur without warning especially at change of sons. These disturbances sometimes attain hurricane force and are panied by erratic changes in wind direction and poor visibility due spended sand.

ES: Tide cycle is combination of diurnal and semi-diurnal tides giving gher High, Lower High, Higher Low and Lower Low Waters during 4 hour period. Range of tide is average 7.5 ft. at Springs and 5 ft. at ps.

mmencement of ebb stream (direction 190°) after HW may be taken 2 hours before predicted time of HW at Mina Saud published in ralty Tide Tables.

ain direction of flood and ebb streams are 010° and 190° ectively. Direction is extremely variable between LHW and HLW d. Average direction during this period about 045°.

e heights are affected by meteorological conditions and could vary ore than 3 ft. from predicted heights in extreme circumstances. es of high and low water may also be considerably affected.

e Mooring Masters have access to information from the Marine eorological Station at Mina Saud.

THORITY: Saudi Arabian Texaco Inc., P.O.Box 6, Mina Al Zour, -Zour, Kuwait. *Tel:* (965) 3950444 (ext. 339) or 3950221 or 0096. *FAX:* (965) 3950078 (Marine); (965) 3951022 (Management). ies: Saudi Arabian Texaco. *Contact:* Larry Andersen, President. tain Hadi M. Al-Abbas, Marine Superintendent.

UAIBA: 29.02 N. 48.10 E. (See Plan)

RT LIMITS: From a point on the coastline in position:

29° 03′ 09.7″ N., 48° 09′ 04.6″ E. in direction 090° to
29° 03′ 09.7″ N., 48° 09′ 27.58″ E. thence 116° to
29° 02′ 45″ N., 48° 10′ 24.6″ E. thence 090° to
29° 02′ 45″ N., 48° 15′ 09″ E. thence 180° to
29° 02′ 00″ N., 48° 15′ 09″ E. thence 270° to
29° 02′ 00″ N., 48° 10′ 16.8″ E. thence 180° to
29° 01′ 15″ N., 48° 10′ 16.8″ E. thence 270° to a point on the coastline at
29° 01′ 15″ N., 48° 09′ 29.4″ E.

above limits are shown on Admiralty Chart No. 1223, and the nates of the first two points are amended according to last ement with KOC in May 1983.

ips whilst in port limits during daylight hours shall fly their national at the after part of the ship and where a ship is of foreign registry the Kuwait National Flag at the fore.

CUMENTS:

ifest: 15 copies which should clearly indicate weights in metric tons measurements in cubic metres and each copy should be duly signed stamped by the loading port Agent.

e copies of the manifest may be photostat copies or carbon copies t is imperative that the stamp and signature made by the loading Agent is appearing in original on each copy.

cargo is carried in-transit a separate Transit Cargo Manifest (15 es) is also required in same fashion as above.

of Lading: 5 sets of non-negotiable copies Bills of Lading, ordinary carbon copies of Bills of Lading. Photostat copies will not accepted.

addition the following documents are to be provided:

copies of Final Stowage Plan, duly signed and stamped on each py by the loading port Agent. Photostat copies are accepted as long s same are signed and stamped.

copies of Hatch List as above.

dangerous cargo is being carried 2 copies of a separate Dangerous argo List are also required and again each copy to be duly signed nd stamped by the loading port Agent.

so 2 copies of Crew List to be presented to Customs Office.

N.B. Since all cargo for discharging at Port of Shuaiba has to go on direct delivery, and Customs clearance has to be completed prior to berthing of a vessel, it is therefore imperative that all documents, as above, are in Agent's hands for submission to relative authorities at least 7 working days prior to vessel's ETA, otherwise berthing of vessel is likely to be delayed.

PILOTAGE: Pilotage is compulsory and requests for Pilots may be made to Shuaiba Port Communications Centre (call sign "Shuaiba Port"). The Port Communications Centre is equipped with VHF Channels 16, 9 and 13. Shuaiba Port Pilots, Fax: 3263825. All working around the clock.

ANCHORAGES: Ships bound for Shuaiba Port, with cargo to load or discharge, or intending to use facilities supplied in the port such as bunkering, will be permitted to use Shuaiba Port Anchorage between Lat. 29° 02.75′ N. and Lat. 29° 02.00′ N. and between Long. 48° 15.11′ E. and Long. 48° 12.72′ E. Ships are not permitted to anchor to the West of Long. 48° 12.72′ E.

All other ships not falling in the categories listed in the first paragraph, such as vessels waiting for orders or which have not been nominated for bunkers, are not permitted to anchor in the Shuaiba Port Anchorage and must anchor well to the East of Long. 48° 15.11′ E.

RESTRICTIONS: Ships whilst in port limits during daylight hours shall fly their national flag at the aft part of the ship and where a ship is of foreign registry also the Kuwait National Flag on the main mast at the fore.

Vessels over 250 m. LOA, berth/unberth during daylight hours only.

MAX. SIZE:

Dry Cargo Berth No.	*Max. Draft Permitted* (m.)	*Max. Ship LOA* (m.)
1	9.50	120
2	9.50	120
3	10.50	180
4	6.71	170
5	6.71	170
6	10.00	180
7	11.00	180
8	11.00	180
9	13.00	200
10	13.00	200
11	13.00	200
12	13.00	200
13	13.00	200
14	13.00	200
15	13.00	As these berths will be utilised by container and Ro/Ro vessels, no limitations and subject only to berth occupancy.
16	13.00	
17	13.00	
18	13.00	
19	13.00	200
20	13.00	200

The seaward side Berths No. 4, 5, 6, 7 and 8 are occasionally affected by bad weather.

Agents of vessels with dimensions in excess of the above must make due representation to the Port Authority for permission for these vessels to be accepted and ample notice is necessary when submitting such requests.

HEALTH: Vessels calling at Shuaiba are requested to send the following information to "Health Shuaiba Port".

(1) Name of vessel.
(2) Last port of call.
(3) Health condition of crew.
(4) Validity of Cholera Certificates.
(5) Request for Free Pratique.

Free Pratique will be considered at the discretion of the Quarantine Officer, and vessels must hoist the yellow flag unless they are informed by Shuaiba Port Communications Centre that Free Pratique has been granted.

RADIO: All vessels calling at Shuaiba Port are required to submit an initial ETA 72 hours and 36 hours prior to arrival followed by a firm ETA 12 hours before arrival. ETAs should be passed through Kuwait Radio (9KK) either to the ship's Agent or to the Harbour Master, Shuaiba.

Vessels equipped with VHF should contact Shuaiba Port Communications Centre when within range.

ETAs should contain details of arrival draft, LOA and beam.

TUGS: Three tugs of 4,000 h.p., 3,600 h.p. and 3,200 h.p. respectively. One of these is an ocean-going/salvage tug and equipped with Voith Schneider unit, and is 4,000 h.p. The use of tugs is mandatory whenever directed by the Pilot or Harbour Master.

BERTHING: The port is divided into 3 main component areas:

1. Dry Cargo Berths.
2. Small Craft Harbour.
3. Barge Harbour.

See "Max. Size" for LOA and draft restrictions.

Dry Cargo Berths: Berths No. 1 and 2 are entirely for the export of fertiliser (Urea), bagged and bulk, by means of a conveyor belt.

Berth No. 6 is entirely for the export of bulk sulphur, by means of a conveyor belt (No facilities since 1991, under repair since 1992).

Berth No. 14 is usually for the export of bulk petcoke, by means of a conveyor belt. Other general cargo can be discharged at Berth No. 14.

Berths No. 12 and 13 are equipped with shore cranes, each with 15 ton capacity and movable on rails.

Berths No. 3, 7 and 8 are entirely for general cargo, clinker and iron ore.

Berths No. 9, 10, 11, 12, 13, 19 and 20 are entirely for general cargo and equipment. No warehousing facility, direct delivery.

Small Craft Harbour: Entirely for small craft. 3 berths with a total length of 476.2 m.

New Barge Harbour: Entirely for tugs and barges. 4 berths with a total length of 936.23 m.

CONTAINER FACILITIES: Berths No. 15 – 18: A modern container terminal (S.A.C.T.) occupies Berths No. 15, 16, 17 and 18 with a total length of 880 m., and a total storage area of 31 hectares, equipped with 3×41 tons gantry cranes, straddle carriers, heavy duty forklifts, tractors and trailers.

Both LCL and reefer services available. Ro/Ro vessels accepted, gantry cranes can be supplied for discharging/loading of containers stowed on deck. Cargo discharged/loaded via vessel's stern ramp will be handled by S.A.C.T., provided it is mobile. No length restrictions for vessels; but subject to berth occupancy and prior Port Authority's acceptance.

Breakbulk cargo loaded on flat beds or flat racks can be handled by 20 ft. – 40 ft. container spreaders in conjuction with the port overheight gear.

STEVEDORES: Stevedores shall be nominated by Owner or Agent from a list of stevedores registered by the port for cargo handling operations. A common tariff published by the port applies.

Vessels will be required to maintain a minimum daily tonnage dependent on the type of cargo they are carrying.

Permission for the landing of heavy lifts on the quays must be obtained from the Port Management each time in advance.

MEDICAL: There is a medical centre ashore which provides a very efficient service for vaccinations. Advance notice required if medical attendance needed on board.

TANKERS: Facilities re-opened November 1993.

Petroleum Products Pier: Operated by KNPC. Located to the East of the Southern Quay Mole and consisting of 4 berths for the accommodation of tankers. Berths No. 1 and 3 comprise the Eastern Berths whilst Berths No. 2 and 4 are located on the Western side.

Berth No. 1 Length 350 m., draft 13.71 m.
Berth No. 2 Length 369 m., draft 12.19 m.
Berth No. 3 Length 369 m., draft 13.71 m.
Berth No. 4 Length 331 m., draft 12.12 m.

The above lengths are inclusive of mooring dolphins positioned Northward and Southward of the pier. Because of draft restrictions at Berths No. 2 and 4, tankers in excess of 230 m. in length will be subjected to the Port Authority's acceptance. Each berth is supplied with 2×20 in. fuel lines and 5×16 in. supply lines for naphtha, avtur and gas oil. All lines reduce to 12 in. at the loading arms. Additionally at Berth No. 2 there are lines for discharging lubricating oil and for loading liquid ammonia (See "Shipmaster's Report"). An 8 in. line for slops is available. Each berth at the Petroleum Products Pier is equipped to provide bunkers by means of 2×20 in. lines for fuel oil and marine diesel oil whilst light fuel oil is supplied by an 8 in. line.

DENSITY: 1028.

FRESH WATER: Available at all berths except Berths No. 6, 7 and 8.

FUEL: Bunkering facilities are available by means of a bunkership (barge), while the vessels are discharging/loading cargo alongside the berth, except to vessels loading/discharging dangerous cargo. Vessels at anchor can replenish bunkers as and when needed.

REPAIRS: Small repairs can be arranged if sufficient notice is given.

DRY DOCK: No arrangements at Shuaiba Port. Drydocking facility available with Kuwait Shipbuilding and Repairyard Co., Kuwait. Telex: 24438KT A/B DOCKYARD. Tel: 4835488.

CONSULS: Most countries represented.

SURVEYORS: Lloyd's, ABS and others are represented in Kuwait.

GANGWAY/DECK WATCHMEN: Watch to be maintained by ship's crew.

CERTIFICATES: All usual documents such as:
Ship's Manifest.
Crew List.
Clearance from Last Port.
Passenger Manifest.
Stores List.
Bonded Stores List.
SOLAS Certificates.
Bill of Measurements, etc.

CUSTOMS ALLOWANCES: Tobacco, no restrictions. Wine and/or Spirit, alcoholic beverage strictly prohibited to be held out of bond.

REPATRIATION: Can be arranged.

Also see "Visa Regulations" in "General" before first port.

AIRPORT: 35 km. to Kuwait International Airport.

TIME: GMT plus 3 hours.

HOLIDAYS: Every Friday, New Year's Day (1st January), Kuwait National Day (25th February).

The following Islamic holidays are celebrated but dates are subject to alteration: Prophet's Birthday, Prophet's Ascension, Eid Al Fitr, Eid Al Adha and 1st Muharram.

POLICE/AMBULANCE/FIRE: Port Security Police, Ambulance and Fire Department assistance available upon request.

TELEPHONES: There are presently no facilities for shipboard telephones but it is programmed to provide telephones for the use of ships in the future.

SPECIAL SERVICES: The services of Classification Society Surveyors, Tank Cleaning Operators, Compass Adjusters, Divers and Underwater Cleaning and D/F Calibration Adjusters are available in the area.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Passport or Seamen's Book necessary.

GARBAGE DISPOSAL: Skips can be provided and placed alongside a vessel. Requests for this service should be made to the Port Authority.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Kuwaiti Dinar (KD).

PORT REGULATIONS: The following are excerpts of some of the more important port regulations:

Fire fighting appliances to be kept in readiness for immediate use.

Pumping or discharging in any way into the sea oil fuel tanks, bilges, dirty ballasts, etc., is prohibited.

Disposal of garbage over the side of the ship into the ha prohibited.

The presence of a Pilot on board a vessel shall not relieve the of his responsibility regarding the safety of the vessel. The Port A shall have the right to claim against a vessel for any damage by that vessel to berths, shore installations, tugs, buoys, etc.

The Harbour Master or his deputy may order a vessel to le berth at short notice in the case of emergency, bad weather, et

Vessels carrying explosives or dangerous cargoes must quantities and categories of same when they report their ETA.

Crew members are prohibited from swimming within the harb

Lowering into the water of ship's life-boats, launches or life- prohibited without the written approval of the Harbour Master deputy.

Mooring of ship's life-boats, launches or life-rafts to navigationa and buoys is prohibited.

Due regard shall be given to the safety of divers when they are w within the Port Limits. Engines should be stopped when appro their working area at a circle of 150 m. The launch attending displays the International flag letter "Alfa" during diving operatio

SHIPMASTER'S REPORT: May 1980 (Updated 1994). Vessel ammonia.

Approaches: Charts B.A. 3773 and BAP1223. The complex lies 1.5 miles South of the port of Mina Al-Ahmadi.

Approach is fairly straightforward with good positions being ob by radar and from the various light floats and buoys that abound

Currents appear to follow the trend of the coastline.

Anchorage: There is no night berthing allowed on the Ammonia Vessels arriving during the hours of darkness are asked to anchor 2 miles due East of the berth.

Pilotage: Pilots will board the vessel about 1.5 miles due East berth, usually from a tug.

Call Port and Pilots on Channel 16 VHF, usually work 13 thereafter. Communication was good, fluent English. Vessel h option of berthing either side alongside and, if not heavily loaded suggest starboard side to with the head out.

Two powerful tugs available for berthing, usually only one re for sailing. Tug's lines, lying alongside.

Length of pilotage about one and a half hours to being secure

Berth: Consists of a "T" jetty, the head of which lies about 340 The stem of the "T" is 1,000 m. long and the head about 800 m.

The Ammonia Berth lies on the Northern side of the "T" and

Quoted depth is 40 ft. which was borne out by soundings. The however quoted a max. sailing draft of 36 ft.

The Ammonia Berth itself is about 350 m. long. The concrete se of the jetty are currently undergoing repair and this affected the m arrangements. Besides this there are lamp standards which interfere with lines in the future. Usual mooring arrange 3 headlines, 2 breastlines and 2 springs.

Gangway: It is only possible to use ship's gangway when lying sta side to as it fouls the Chicksan area when head in. Careful pos and tending is required.

There is a group of Chicksans which handle oil products about h along the jetty and the ammonia Chicksans lie just South of the

No VRL. No venting.

Shore personnel connected the Chicksan (bolted) and no reduc necessary.

Cooldown: Charterers asked us to limit the amount of coolant ta 300 tonnes.

Petrochemical Industries Company (who operate the berth) have allowed us to take this coolant into more than one tank had possible or necessary. They were very conscious of us having excess pressure (using 'cascade' system for atmospheres) and w great lengths to ensure no ammonia vapour was discharg atmosphere.

Control of cargo rate was very good.

Vessel has to anchor at least three miles off berth to complete c

Notice of Readiness: Was tendered on arrival and again on comp of purging/cooling operations. Cable "Ammoniaship". This wa accepted until secured in the loading berth and ready to load.

Loading: Despite the length of pipeline from the refinery the p was reasonably cold and they have a recirculating system which en stopping cargo at very little notice.

Berth operators were quite happy with bottom temperatures o −32°. Loading rate is quoted at 1,000 t.p.h. but our overall averag only 605 t.p.h. at which the operators expressed themselves as sa

Throughout the whole cooling and loading programme the vesse under continual close scrutiny from shore personnel. The technical of these people was very high indeed (although very fair and pr minded). Pressure graphs and temperatures were checked and hourly together with hourly rates.

Redwoods attended as surveyors throughout. Bills of Ladin presented before sailing and are usually claused "Freight Prepa

Output of the plant is quoted as about 700 tonnes of liquid pe but the fertiliser division apparently has first call on product whic result in short loading.

Note: The port office, which is situated at the junction of the "T", sensitive to ammonia smells and the personnel there tes atmosphere using Draeger tubes.

Bunkers: Diesel oil taken at this call and vessel has to position the oil chicksans. This requires shifting ship to or from the chicksans.

Bunker suppliers, KNPC, will NOT accept bills signed over Charterer's stamp. Ask Owner for permission to sign the bills prior to arrival.

General: Shore passes required. Prior arrangements to be mad sending necessary information to the agent concerned, at least 3 prior to ship's arrival.

nsport: Necessary to get from jetty to shore. This is provided on a ntual basis.

lcohol: Customs will allow alcohol to be issued to bars. It is better to e with these emptied and ask for an allowance. As usual, it is a y grave offence to offer alcohol to shore personnel.

h Water: Available but none taken.

dical: There is a medical centre ashore which provides a very efficient ice for vaccinations.

eral: Service is available for radars and Decca Navigator.

o stores taken.

ems may be landed for despatch to UK after informing the Customs providing a description of the packages, etc.

ersonnel may be repatriated (no alcohol in baggage) and there is a uent service to UK.

nts: Kuwait Oil Tanker Company, cables 'Minatank Kuwait'.

case of emergencies they have an office on the shore which is ned 24 hours. If necessary to telephone UK one has to go to the office at Ahmadi. Agents usually work VHF Channel 26.

arture: About four hours should be allowed for completion of perwork before sailing. Vessel may leave the berth at night.

HORITY: Kuwait Ports Authority, P.O. Box 3874, Safat, 13039 t, Kuwait. *Tel:* 4812623, 4833709. *Telex:* 22740 Hmshp Kt. 4819714. *Contact:* Captain A.R. Al Naibari, Director General. rahim A. Aziz Al-Fulaij, Shuaiba Port Director., Shuaiba Port., Box 10099, Shuaiba, 65451 Kuwait. *Tel:* 3260137. *FAX:* 3260114.

ENT: Gulf Agency Company (Kuwait) Ltd., POB Safat 20637, 13067 Kuwait. Old KIC Building, 1st Floor, Safat Square, Ahmad al Jaber Kuwait, State of Kuwait. Tel: (965) 2441860, after hours 5390567. (965) 2415732. Telex: 22396 (Answerback "Isatug Kt"). es: "Confidence, Kuwait".

the case of tankers, agency services are provided by the Kuwait Tanker Company.

HUWAIKH (Kuwait Harbour): 29.21 N. 47.56 E.

(See Plan)

T LIMITS: According to the General Port Rules (1959) the Seaward s comprise all waters in the area confined by line drawn in direction from Ras Al Ajuza, (Lat. 29° 23′ 27″ N., Long. 48° 00′ 24″ E.) to parallel of Lat. 29° 30′ 00″ N. Hence in direction 230° to Ras Al airij Lat. 29° 23′ 15″ N., Long. 47° 51′ 00″ E. For the seaward ndaries of the Port within which a vessel is considered to be on ved ship", refer to "Anchorage".

CUMENTS:

nifest: 15 copies which should clearly indicate weights in metric tons measurements in cubic metres and each copy should be duly signed stamped by the loading port Agent.

The copies of the manifest may be photostat copies or carbon copies t is imperative that the stamp and signature made by the loading Agent is appearing in original on each copy.

cargo is carried in transit a separate transit cargo manifest (15 es) is also required in same fashion as above.

s of *Lading:* 5 sets of non-negotiable copy Bills of Lading i.e. ordinary on copy Bills of Lading. Photostat copies will not be accepted.

addition the following documents are to be provided:

copies of Final Cargo Stowage Plan, duly signed and stamped on each copy by the loading port Agent. Photostat copies are accepted as long as same are signed and stamped.

copies of Hatch List as above.

If dangerous cargo is being carried 2 copies of a separate Dangerous Cargo List is also required and again each copy to be duly signed and stamped by the loading port Agent.

Also 2 copies of Crew List to be presented to Customs Office.

copy of Crew List, 2 copies of Passenger List, all Seaman's Books r Passports, 1 photograph of each crew member for the Immigration Office.

copy of Crew List, 1 copy of Vaccination List, all vaccination books r Quarantine Office. Immediately on berthing place the rat guards n mooring lines.

Ship's Registry, Loadline, Cargo Safety Equipment Certificate, Safety Radio Certificate and Last Port Clearance to be presented for port clearance.

PROACHES: Vessels arriving at Shuwaikh port:

All vessels calling at Shuwaikh Port shall abide by taking their course at 000° from position: 28° 36′ 02″ N., 48° 54′ E. up to one nautical mile North East of Ahmadi Light Vessel.

To observe its course through 294°, from one nautical mile towards North East Ahmadi Light Vessel, up to a distance of 3.8 nautical miles towards 160° from the Sea Island. From such a position the vessel shall take the course and observe the direction leading it to Shuwaikh Anchorage.

Speed of vessels shall not be less than 10 knots until passing Ras Al Ard Lighthouse.

LOTAGE: Pilotage service available and request for Pilot should be de to Port Signals Station, or to look-out Signal Station when in use. ips proceeding through the dredged channel to Shuwaikh are boarded the Pilot in the anchorage. Pilotage not compulsory in the Outer chorage.

AX. SIZE: Max. draft at Berths No. 1 to 14, 9.5 m., and Berths No. 18 21, and dolphin berths, 8.0 m. Max. draft at Berths No. 15 to 17, 0 m. These drafts allow 0.6 m. of water under the keel. Tidal range is out 3.5 m. Berthing draft dependent upon tidal conditions at time of rival.

ANCHORAGES: Ships may take up anchor berth in the Outer Anchorage, without the Pilot.

Because of congested anchorage, and for the benefit of all concerned, the Outer Anchorage (BA Chart 1214) was divided into areas, and the approach waterway of 3.0 miles in width from Ras Al Ardh to anchorage and vice versa, is left free for navigation.

Anchorage Areas:

(a) Anchorage area reserved for the national fleet.
(b) Waiting area for vessels which have received berthing instructions.
(c) Anchorage area for vessels with cargo to discharge in Kuwait.
(d) Anchorage area for vessels calling for fresh water, provision, crew changes, transhipment, or any reason other than discharging cargo.
(e) Temporary anchorage area for vessels awaiting entry to anchorage (D).

When the movement is confirmed the vessel should hoist:

By Day: "G" Flag over a Black Ball or Shape.

By Night: A White Light over a Red Light, visible all round.

Note: (1) The Master shall advise the Director of Marine Operations (D.M.O.) and/or the Pilot of any damage or disability to the ship under his command, *before berthing*.

Ship unable to comply with the berthing instructions, should notify the D.M.O. in ample time of their inability to do so, by VHF, or by Telex No. 22740 HMSHP KT/44800 TCRA KT or by Fax No. (0965) 4818472/4814196.

Any ship sailing from the outer anchorage for any reason, should notify the Kuwait Harbour Control that she is sailing and give the reason.

(2) The D.M.O. may direct any vessel to move from one berth to another, or vacate a berth as circumstances demand.

HEALTH: Vessels calling at Shuwaikh Port must send the following information to "Health Port Shuwaikh" by cable:

(1) Name of vessel
(2) Last port of call
(3) Health condition Crew members
(4) Validity of Cholera Certificates
(5) Request for Free Pratique

Vessels arriving at Outer Anchorage must hoist "Q" flag, and keep it hoisted until Free Pratique is granted.

Free Pratique will be granted usually at anchorage, and in some cases alongside, at the discretion of the Quarantine Officer.

No person, except the Pilot, shall board the vessel, before Pratique is granted.

RADIO/VHF: *Signal Station:* (Call Kuwait Harbour Control)

There is Lookout Signal Station at Ras Al Ajuza (Lat. 29° 23.3′ N., Long. 47° 59.8′ E.) and a Port Operation VHF/RT Service at the same position. The VHF/RT is a Single Frequency Simplex Service, operating on Channel 11 (156.550 MHz) and 12 (156.600 MHz). Working restricted to messages relating to the Movements and Safety of Ships.

All vessels arriving should establish contact with Kuwait Harbour Control as soon as possible by VHF. Tel: 2449154, 2435873.

Kuwait Coastal Station (9 KK) operates throughout 24 hours.

THE FOLLOWING SERVICES ARE PRESENTLY SUSPENDED:

Radio Station:

2182 kHz	8802.4 kHz
2765 kHz	13182.5 kHz
2750 kHz	17328.5 kHz
4434.9 kHz	22699.0 kHz
6518.6 kHz	

Radio Telegraphy – 9 KK:

9 KK	9 KK 2	– 4299.4 kHz
500 kHz	9 KK 4	– 6381.4 kHz
450 kHz	9 KK 6	– 8525.4 kHz
	9 KK 8	– 12895.4 kHz
	9 KK20	– 12925.7 kHz
	9 KK22	– 16995.7 kHz
	9 KK23	– 22504.7 kHz

Marine Communications

This Service links the ship directly with their Agent or Principal in Kuwait and the Call for this Branch is "Kuwait Maritime".

The "Kuwait Maritime" Service covers all the ship's calls with Kuwait and abroad. The procedure is as follows:

Agent to Ship

Call by telephone No. 108 Kuwait Maritime, asking for connection, giving the Name of the Ship, and her Call Sign. The Kuwait Maritime operator will contact the ship for you on Channel 16 (156.800 MHz) and then transfer to vessel's frequency for communication.

Ship to Agent or Abroad

Call "Kuwait Maritime" on VHF Channel 16 (156.800 MHz) and ask to be connected to Agent or abroad.

REGISTRATION PROCEDURE: Notification of vessel's arrival. According to port regulations a questionnaire issued by the D.M.O., duly filled in and signed by the Master of the vessel, is to be submitted to the port prior to berthing. In many cases vessels arrive and obtain berth immediately and thus there is no possibility of presenting the questionnaire to Authorities in time. In order avoid berthing delays Masters should cable following information to the D.M.O. directly, 48 hours before arrival:

(a) ETA.
(b) Total cargo for discharging Kuwait.
(c) Distribution quantity each hatch.
(d) Declaration hazardous, flammable and explosives cargo, and guns and ammunition.
(e) Declaration all vessel's winches in good working condition and cargo clear for discharging at Kuwait.
(f) Draft fore and aft.

We quote below specimen cable covering the above:
"Vessel XXX ETA Kuwait 21/8 0600 local quantity discharging 1,400 tons general hatch one 300 hatch two 300 hatch three 250 hatch four 300 hatch five 250 no hazardous, flammable explosives guns ammunition stop All winches derricks good working condition draft fore 7.0 m. Aft 8.0 m. Kuwait cargo clear for discharging"

The above cable sent to the D.M.O. will facilitate berthing vessel on time. ETA to be reconfirmed before 24 hours, if any change.

Also see "Shuaiba – Notice".

Also cable Health, Port of Shuwaikh: ETA, last port, crew health, validity of certificates, and request Free Pratique.

Apart from above, on dropping anchor contact Port Health, Tel: 4811344, through Kuwait Maritime Channel 16 and request Free Pratique, and on receiving same inform Agent by VHF or by cable.

When approaching the anchorage vessel should hoist her "Call Sign" and "Quarantine" flag.

On arrival at anchorage contact Harbour Control and standby VHF Channel 16 when at anchorage.

Also send acknowledgement to ship's Agent stating time cable sent to Director Marine Operations Department.

TUGS: Join vessel entering dredged channel, Tug's lines used. The use of tugs by ships manoeuvring within Shuwaikh port limits under direction of D.M.O. or Pilots.

Charges:
(a) 75.000 K.D for over 750 h.p. tug per hour or a part of hour.
(b) 25.000 K.D for less than 750 h.p. tug per hour or a part of hour.
(c) Using of tug is compulsory, in the limit of port.
(d) Use of tugs is compulsory for ships over 63 m. length.

BERTHING/CRANES:

Berth No.	*Overall Length (m.)*	*Depth Below ACD (m.)*	*Max. LOA of vessel allowed to berth (m.)*	*Max. Permitted draft (m.)*	*Cranage*
1	186	10.06	175	9.6	Grain elevator 250 t/hr.

Iron and Timber Area	44,000	
Areas North of Ghazali Street	260,000	

Total area of open storage: 488,600 sq.m.

Container Stacking Areas:

Container Terminal	120,000 sq.m.
New Extension	145,000 sq.m.
Total Container Stacking Area:	265,000 sq.m.

STEVEDORES: All stevedoring and transport inside the performed by an authorised contractor.

Container work is handled by Shuwaikh Container Terminal

Plans are under consideration for specialised container berth

There are four Cement Silos of capacity 14,000 tons each to Berth No. 8. Discharging rate is 350 tons per hour.

Working Hours: General Cargo Handling:

Winter (1st November – 31st March):	
Saturday – Wednesday	0700-1430
	1430-2200
Thursday	0700-1230
	1230-1800
Summer (1st April – 31st October):	
Saturday – Wednesday	0630-1400
	1400-2130
Thursday	0630-1230
	1230-1830

Overtime is compulsory for all vessels. On Fridays, only vessels which are to be completed during the day.

Container Terminal: 24 hour working.

MEDICAL: Masters to radio prior arrival if medical attendance on board. Hospital facilities available.

A rescue vessel, 90 ft. and 20 knots speed, equipped with operating theatre and all medical appliances is maintained Ministry of Health.

FRESH WATER: All berths except Berths No. 1 to 7, have fresh connection, and water can be supplied by pipeline. Rate 20 to

In addition to water available alongside the berths by pipeline hose, water may be supplied by barge to ships alongside dolphin There are 2 private companies supplying fresh water alongside anchorage by barge.

FIRE PRECAUTIONS: Shuwaikh Fire Brigade is responsible for fighting in port areas and storage areas. There is also a fire situated near the Small Boat Harbour, where the 3 fire fighting are berthed. A salt water main for the fighting services is laid at all There are two 90 ft. fire fighting tenders capable of pumping gallons of water per minute from 4 nozzles. In addition they can 900 gallons of foam per minute. The 98 ft. fire fighting tender is of pumping 9,000 litres of water per minute and 650 litres of foam the capacity of her pump is 4,500 litres of water or 143.5 litres The tender has 8 nozzles for water and 2 nozzles for foam. modern fire-fighting units are equipped with radio, radio-tele radar, etc.

RGO GEAR: Ship's gear and cranes used for discharging.

ATRIATION: Can be arranged.
o see "Visa Regulations" in "General" before first port.

PORT: Served by regular airlines. Airport 17 km. from town.

E: GMT plus 3 hours.

LIDAYS: New Year's Day, Id Al Fitr, National Day (February 25th), ration Day (February 26th), Mount Arafat Day (Wakfa), Id Al Adha, Hijra Year, Birthday of Prophet Mohammad, Isra walma'raj. The e days are subject to alteration.

EPHONES: Cannot be arranged on board.

RVICES: Swedish Welfare for Seamen. Lloyd's Surveyor. terworth Tank Cleaning Machines and Equipment and also under- er cleaning.

OVISIONS: All kinds of food available at reasonable prices.

ORE LEAVE: Only permitted for Consular matters, medical reasons making emergency telephone calls. Contact Agent for further mation.

ore passes are issued and must be returned to Immigration prior eparture, if not returned a heavy fine will be imposed. Crew members re a photograph but this is not returned.

NTIFICATION CARDS: Passport or Seaman's Book necessary.

ERAL: The following is required from all vessels calling at Kuwaiti s for the first time:

Quote:

The Harbour Master Department of the Kuwait Ports Authority, with immediate effect, request that Masters of vessels calling for he first time at Shuwaikh Port should give in their ETA cables, details of cargo on board, the length, width, number and condition f hatches, discharging facilities, and any other information which hey may consider necessary in assisting the Ports Authority to llocate the vessels the best berth possible.

Such information will considerably help all concerned and at the ame time prevent unnecessary delay and unjustified extra charges o owners, since in the event that the allocated berth is not suitable, he Harbour Master shall have no alternative but to shift that particular vessel to another suitable berth, or take it out to anchorage.

Furthermore, it has been observed some Masters of vessels are not indicating in their ETA cables to the Harbour Master the word "Kuwait" when indicating the tonnage figures of cargo onboard, clear and ready for discharging. It is imperative that the Master should say in his cable 'ETA . . . hours. Cargo for Kuwait . . . tons clear and ready for discharging draft . . . ft.

Unquote.

GULATIONS: The State of Kuwait has stringent laws in force cerning the pollution of the sea by oil. The following are two amended agraphs of this law:

Paragraph 1, Art. 4. "A person responsible for any pollution as scribed in Articles 1 and 2 shall be punished by a fine of not less than e thousand and five hundred and not more than forty thousand Dinars. he event of his committing a similar crime within a period of one year m the date of his conviction, such a person shall be punished by a e of not less than three thousand and not more than forty thousand wait Dinars, and in the event of his committing yet another crime hin a year from this last conviction he shall be punished by a fine of ty thousand Kuwaiti Dinars".

Paragraph 3, Art. 6. "The person responsible for pollution may suspend the detention order against the ship on payment, as a cash guarantee, of forty thousand Kuwaiti Dinars to the official entrusted with the execution of such order".

The Master shall advise the Harbour Master and/or Pilot of any special damage or disability to the ship under his command before berthing or unberthing.

A vessel in outer anchorage receiving a Movement Order in writing, by signal or VHF, and awaiting the Pilot, shall carry:
By Day: "G" Flag, over a black ball or shape.
By Night: A white light over a red light.

Ships that receive instructions to berth at specified hours and not adhering to these instructions could lose their turn and be liable to pay charges for the time lost at the berth, and facilities arranged for and not used due to such delay.

Ships that receive instructions to unberth at specified hours and not adhering to these instructions, i.e. retarding the movement of incoming ship, will be liable to pay charges for time lost at the berth and the facilities for the incoming ship, and not used, due to such delay.

Ships unable to comply with the berthing or unberthing instructions should notify the Harbour Master in ample time of their inability to so do by VHF, visual signals, personally or through Agent.

A ship entering or navigating within the dredged channel or inner basin shall have at least 1 anchor ready for immediate use.

The Master of a ship alongside Shuwaikh Wharf or dolphin berth, shall ensure that:

(a) Vessel not allowed to use VHF to any vessel except to call Kuwait Harbour Control or Kuwait Maritime.

(b) A safe and proper accommodation ladder to the quay is provided, adequately lit during the hours of darkness.

(c) A Quartermaster or watchman is stationed on deck, in charge of the ship's gangway, who shall inform the Master or the Duty Officer whenever required by the Port Authority Officials, and shall check that no authorised persons will enter the officer's or crew's accommodations. Gangway must be lifted up whenever vessel is not working, and at 2200 hrs. daily.

(d) The crew or watchman to attend the mooring ropes and lines, and shall cause their adjustment from time to time, as necessary on the rise and fall of the water.

(e) That no substance, matter or material is thrown overboard, either into the water or on to the wharf.

(f) That no engine repairs are undertaken which would prevent the movement of the vessel under her own power, without first obtaining the permission of the Harbour Master.

(g) That all pipe discharges on that side of the ship nearest to the wharf are either adequately and properly covered to prevent their effluent falling on to the wharf, or their use discontinued while the ship remains alongside.

(h) It is forbidden to jettison or ballast other than clean water or pump out the bilges or oil of any description within the port limits.

(i) All ships loaded with petroleum or crude oil at the wharf shall have the end of a steel hawser of sufficient strength, paid out to the water edge, at the offshore bow and quarter, to enable tugs to take the vessel to place of safety with the least possible delay.

(j) The Master shall at all times retain on board sufficient crew to work his ship.

(k) Ratguards to be fixed to all ship's mooring ropes.

(l) The Master shall not shift his vessel while alongside the wharf, prior to receiving permission from the Harbour Master or Berthing Master.

(m) The Master shall not connect water hoses to the water supply points and take water on board before receiving permission from the person in charge of water distribution.

(n) The Master shall report to the Harbour Master or Berthing Master any incident, accident or unusual happening on board his ship.

The Master not complying with the above-stated Port Rules, shall be liable to suffer the penalties prescribed for contravention.

Warning: Port tugs are supplied with nylon and polypropylene hawsers, which require particular attention when securing to ship's bollards, in order that they do not slip. Extra turns than normal on the bollards are recommended.

NOTICE:

Supplied to Ship's Master, on arrival, by Agent (October 1984).

1. One watchman to be kept regularly on gangway.
2. Immediately the labourers leave the vessel after each night shift the gangway should be taken up and not to be lowered before 0600 hrs. next working day.
3. Strictly forbidden to sell any alcoholic drinks onboard or to bring on to jetty.
4. Rat guards to be fixed properly on the ropes.
5. No cleaning of decks, painting of hull or welding on deck is allowed when vessel is alongside jetty, unless prior written approval is received from the Harbour Master.
6. Neither fresh nor dirty water should be pumped out alongside jetty for any reason and under any circumstances.
7. No garbage should be thrown either on jetty or in to sea at any time and under any circumstances.
8. Any pollution either during supply of bunkers or at any other time and for any reason is entirely your responsibility.
9. No repairs or dismantling of engines are allowed unless prior written approval from the Harbour Master is granted.
10. Vessel's draft should not exceed that draft on which she was allocated a berth.

Maximum drafts of/on various berths are:

Jetty Nos. 1 – 14 inclusive	31 ft. 6 in.
Jetty Nos. 18 – 21 inclusive	26 ft. 6 in.
Dolphins	26 ft. 6 in.
Jetty Nos. 15 – 17 inclusive	19 ft. 6 in.

ALCOA OF AUSTRALIA LIMITED

BASIC ARRANGEMENT of SHIP'S MOORING LINES

① Headlines – Provide both longitudinal and transverse restraint. Best angle about 45°.
② Sternlines – Provide both longitudinal and transverse restraint. Best angle about 45°.
③ Breastlines – Provide transverse restraint. Best angle 90°.
④ For'd spring – Provides longitudinal restraint.
⑤ After spring – Provides longitudinal restraint.

LINE PRIORITIES

① Head/sternlines (2 each end)
② Springs
③ Breastlines
④ Extra head or sternlines, etc.

Dangerous Area. Keep clear when mooring, unmooring or shifting ship.

HASTINGS

MOORING DIAGRAM FOR VESSELS AT LONG ISLAND POINT

Where Ships mooring lines are considered inadequate

Oil tankers over 100,000 DWT and departure drafts exceeding 13 metres normally berth starboard-side-to (head out). Usual mooring plan for ships lines each end is:- 2 springs: 4 head-stern lines: 2 breast lines. In addition, all ships must take onboard each end 2 preventer wires (36 mm.). These shore wires have a rope and wire messenger attached and are run by launch. Ship must heave onboard and made tight to bitts. When letting go the shore wires are lowered down to launch, aft shore wires first, which are run back by launch to mooring dolphin. Launch then goes to for'd shore wires and runs them.

PREFERRED MOORING PLAN SEQUENCE (2 Launches and **5** Linesmen)

FIRST: Set both springs for'd and aft and position ship on berth.
SECOND: Run head and stern lines to shore.
THIRD: Run breast lines to shore.
FOURTH: Run shore wires to ship. Heave tight onboard and make fast.

WHILST ALONGSIDE VESSELS MUST HAVE READY
Offshore anchor lowered to water.
Offshore ladder rigged and lowered.
Offshore lifeboat at embarkation deck.
Emergency wires rigged and adjusted.

ALL MOORING LINES KEPT TIGHT WITH EVEN STRAIN AND WINCH BRAKES FULLY APPLIED.

PREFERRED LET GO SEQUENCE (1 Launch and **4** Linesmen)
WHEN ENGINE TEST COMPLETED

FIRST: Slack off AFT shore wires and lower to launch, which will tow to dolphin where winched in.
SECOND: Slack off FOR'D shore wires and lower to launch, which will tow to dolphin where winched in.
THIRD: Single up to Pilot's orders Fore and Aft.
FOURTH: Let go to Pilot's orders.

Depth of water 11.6m.(38ft.)

NOTES:

1. Ship must not present itself for loading with hatch coamings more than 17.4m.(57ft.) above I.S.L.W. and this height must not be exceeded during loading.
2. Working range of boom is horizontal to 11 degrees below horizontal.
3. Maximum throw of trimming machine is 18.3m.(60ft.)
4. Travel range between two loading heads along wharf is 149.4m.(490ft.) and the wharf length is 215m.(704ft.)
5. Depth of water at berth and approaches is 11.4m.
6. Minimum size hatch opening (without prior arrangement) with trimmer is 4.9m. × 4.9m.(16ft. × 16ft.).
7. Maximum length of vessel – dependent on shipping conditions – to be arranged with Harbour Master.
8. All dimensions in metres.
9. This drawing is not to scale.

HAIKOU
MACUN COAL TERMINAL

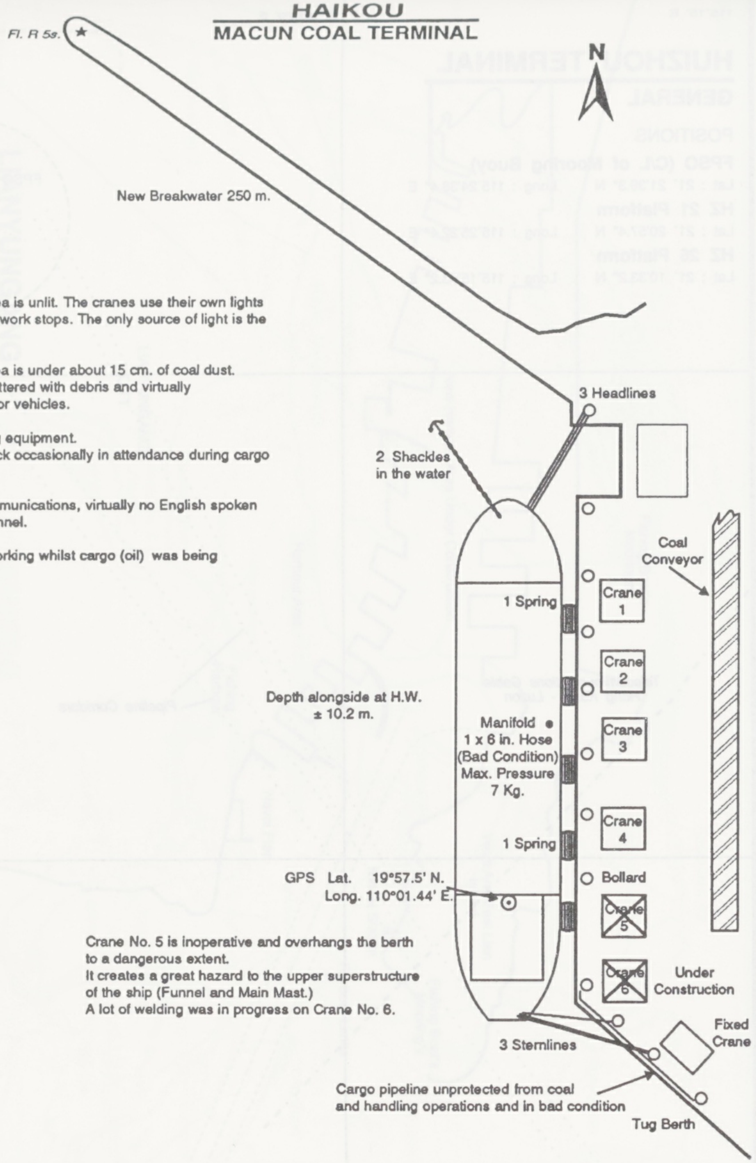
Notes:
The entire berth area is unlit. The cranes use their own lights and switch off after work stops. The only source of light is the ship.

The entire berth area is under about 15 cm. of coal dust. Wharf is heavily cluttered with debris and virtually inaccessible to motor vehicles.

No fixed fire fighting equipment.
One small foam truck occasionally in attendance during cargo operations.

No Ship-Shore communications, virtually no English spoken by any shore personnel.

The cranes were working whilst cargo (oil) was being discharged.



Fl. R 5s.

Bollard
GPS Lat. 19°57.5' N. Long. 110°01.44' E.
Under Construction
Fixed Crane
3 Sternlines
Cargo pipeline unprotected from coal and handling operations and in bad condition
Tug Berth

Crane No. 5 is inoperative and overhangs the berth to a dangerous extent.
It creates a great hazard to the upper superstructure of the ship (Funnel and Main Mast.)
A lot of welding was in progress on Crane No. 6.

Construction Work
New berths under construction.

Notes:

The whole area is uncharted.
No local charts are available.

Pilot brings vessel from Haikou Anchorage to channel buoy No. 4 (20°00.05'N. 110°03.2'E. P.A.) where Berthing Pilot boards.

On departure, pilot disembarks at Buoy No. 4 and vessel returns to Haikou Anchorage for clearance without Pilot.

LPG VESSEL BERTHING – PIER 'C'

Berthing arrangement for LPG vessels under normal weather and wind conditions:

Due to the LPG arm's limited work area, it is important that the vessel is very careful during berthing, and during the whole time it is at the berth, that lines be checked and adjusted as required. Should the vessel move along the quay, and the manifold area comes outside the work area of the LPG arm, an alarm of the rapid acting type is activated. Loading/discharge operations are stopped immediately, and the vessel is moved back to the original position.

CURRENT BUOYS

Article 94:

(A). Signals displayed on station signal masts to vessels

Signal No.

1. Stand by to proceed (general)
2. Proceed (general)
3. Stand by to make fast (signal mast 18)
4. Make Fast (signal mast 18)
5. Attention
6. Immediate Stopping
7. Make fast (vessels from North)
8. Make fast (vessels from South)
9. Proceed (vessels from North)
10. Proceed (vessels from South)
11. Current signal
12. Port closed
13. W/T Watch (vessels from North)
14. W/T Watch (vessels from South)
15. Passage authorization (Ferry Boats)
16. Isolated signal station

(B). Special signals used by vessels in Ports and in the Canal

Signal No.

1. Vessels carrying bulk petroleum, flash point between 73° and 150°
2. Vessels carrying explosives - vessels N.G.F.
3. Vessels carrying bulk petroleum flash point under 73°
4. Vessels carrying radioactive substances
5. I require a pilot
6. I require Free Pratique
7. Coming from an infected port
8. Under Quarantine
9. Tug required (in ports)
10. Mooring boats
11. Searchlight
12. Last in convoy
13. Making fast

13-bis. Doubling in G.B.L.

14. Vessel manoeuvering to Sea
15. Vessel manoeuvering to Canal
16. Voluntary stopping (G. V.)
17. Aground
18. I have a pilot
    (a). On Board
    (b). To Disembark
19. My vessel is isolated, I have no means of communication

(C). Signals used by Dredgers

(1) Dredgers Working Underway

Signal No

1. Dredgers underway
2. Passage clear on side shown
3. Passage clear on both sides
4. Passing not allowed on either side
5. I am going about
6. I am not under command

(2) Stationary dredgers and floating equipment

Signal No

1. Passage clear on side shown
2. Passage clear on both sides
3. Passage clear on side shown, with speed reductions
4. Passing not allowed on either side
5. Passing not allowed : manoeuvring to clear passage
6. I am not under command - passing not allowed

Appendix

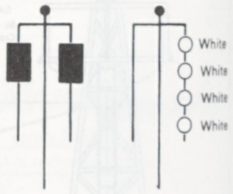
(A) Signals displayed on Station Signal Masts to Vessels

Signal No. 1 – Stand by to Proceed
(a) Hoisted on Port Tewfik, Kabrit, Deversoir and Ras El Ech "Stand by to Proceed on signal No. 2".

(b) Hoisted on Ballah and repeated on El Ferdan. "Southbound vessels made fast in Ballah West Branch, Stand by to Proceed".

(c) Hoisted on Ballah and repeated on El Kantara. "Northbound vessels made fast in Ballah West Branch, Stand by to Proceed".

(d) Hoisted on Km. 3 East Branch of Port Said. "Southbound Vessels using Port Said East Branch, Stand by to Proceed".



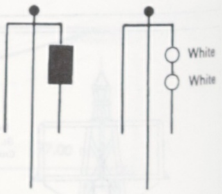
Signal No. 2 – Proceed
(a) Hoisted on Port Tewfik, Kabrit, Deversoir and Ras El Ech "Proceed".

(b) Hoisted on Ballah and repeated on El Ferdan. "Southbound vessels made fast in Ballah West Branch, Proceed".

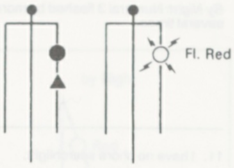
(c) Hoisted on Ballah and repeated on El Kantara. "Northbound vessels made fast in Ballah West Branch, Proceed".

(d) Hoisted on Km. 3 East Branch. "Southbound vessels using Port Said East Branch, Proceed".

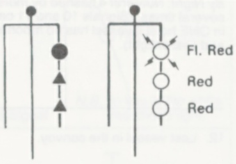
(e) Absence of Signal No. 2: "Stay at anchor or made fast and keep continuous W/T watch".



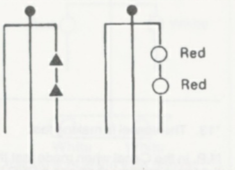
Signal No. 3 – Stand by to Make Fast
Hoisted at Km. 18 mast. "Southbound vessels made fast in West Branch Km. 4 to 14 and Northbound vessels already passed Tineh station, Stand by to make fast".



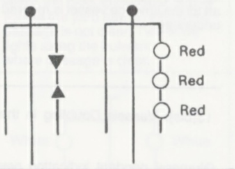
Signal No. 4 – Make Fast
Hoisted at Km. 18 mast. "Southbound vessels in Port Said East or West By-pass and Northbound vessels already passed Tineh station, Make Fast".



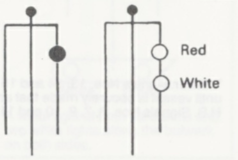
Signal No. 5 – "Attention"
"Southbound and Northbound vessels stand by to make fast or manoeuvre. Keep W/T watch immediately".



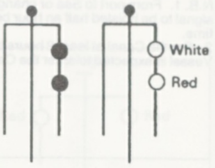
Signal No. 6 – Immediate Stopping
"Southbound and Northbound vessels make fast immediately".
Vessels may proceed when signal is lowered or switched off.



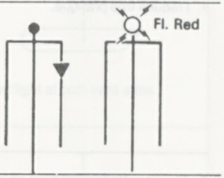
Signal No. 7 – Make Fast
"Vessels from North : Make Fast".
(to be lowered or switched off when all concerned vessels are made fast.)



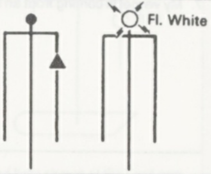
Signal No. 8 – Make Fast
"Vessels from South : Make Fast".
(to be lowered or switched off when all concerned vessels are made fast.)



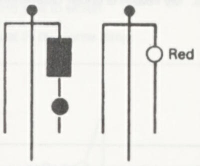
Signal No. 9 – Proceed
"Vessels from North made fast on Signal No. 7 : Proceed".
(Southbound vessels made fast in Port Said West Branch and in Ballah West Branch to Proceed on Signal No. 2.)



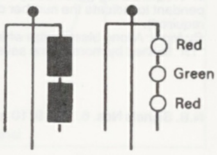
Signal No. 10 – Proceed
"Vessels from South made fast on Signal No. 8: Proceed".
(Northbound vessels made fast in Ballah West Branch to Proceed on Signal No.2.)



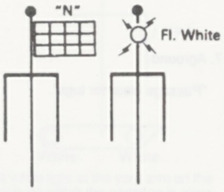
Signal No. 11 – Current Signal
Current indication signal.
Hoisted on Challoufa and Genefa signal masts: "Current Running North"
Absence of signal: "Current is Running South or Slack Water."



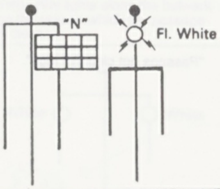
Signal No. 12 – "Port Closed"
"Suez Roads closed for bad weather".



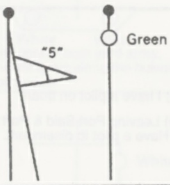
***Signal No. 13 – W/T Watch**
"Vessels from North establish Wireless Telegraphy Watch".



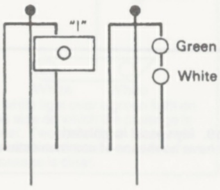
***Signal No. 14 – W/T Watch**
"Vessels from South establish Wireless Telegraphy Watch".



Signal No. 15 – Passage Authorisation
"Ferry Boat not allowed to move".
(By night: Light on wharf.)



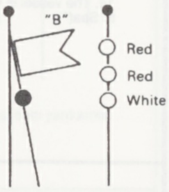
Signal No. 16 – Isolated Signal Station
"This signal station is isolated. All communications are made by Wireless Telegraphy".



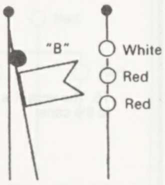
*Signals No. 13 and 14 can be used at the same time addressing both convoys from North and South.

(B) ***Special Signals Used by Vessels in Ports and in the Canal***

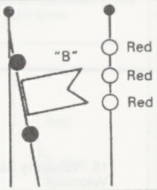
1. Oil tanker carrying bulk petroleum (flash point between 73° and 150°F).



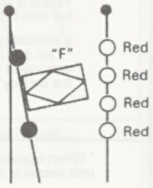
2. Vessels carrying 1st group dangerous goods.
Not Gas Free tankers.
LPG – LNG.
Dangerous chemicals in bulk.



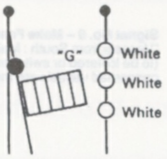
3. Petroleum in bulk. (Flash point below 73°F).



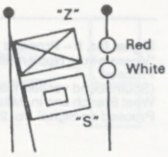
4. Vessels carrying Radio Active substances.



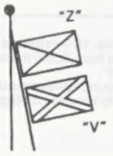
5. I require a Pilot.
N.B. 1. From port to Sea or changing berth, signal to be hoisted half an hour before sailing time.
2. For the Canal at least 2 hours before the 1st Vessel is expected to enter the Canal.



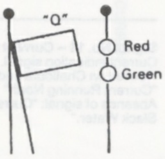
6. I require free pratique.



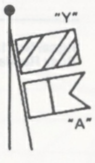
7. My vessel is coming from an infected port.



8. My vessel is under Quarantine.



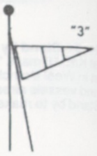
9. I require a tug (followed by a numeral pendant to indicate the number of tugs required).
By Night: A long blast on the whistle and letters "YA" flashed by morse lamp several times.



N.B. Signals Nos. 6, 7, 8, 9, 10 and 11 are to be used in Ports only.

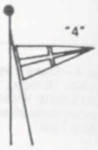
10. I have no mooring boats

By Night: Numeral 3 flashed by morse lamp several times.

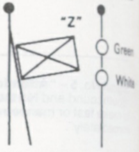


11. I have no shore searchlight.

By Night: Numeral 4 flashed by morse lamp several times. (Signals 10 and 11 can be used in ONE hoist if vessel has no mooring boats and searchlight).

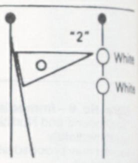


12. Last vessel in the convoy.



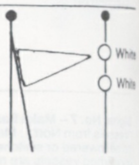
*13. The vessel is making fast.

N.B. In the Canal when made fast the 2 white lights are extinguished and a RED light put on aft all the time the vessel is moored until actually underway.



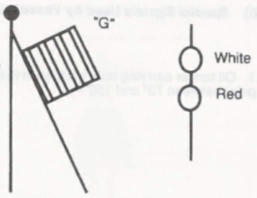
13(bis). Vessels Doubling in the G.B.L.

(Numeral pendant indicating new turn of Vessel)

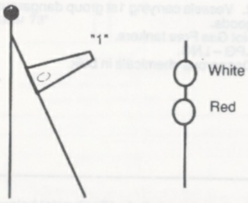


* When signals Nos. 13, 14 and 15 are hoisted, vessels are not authorised to overtake or cross until vessel is securely made fast and Signal No. 16 (G.V.) hoisted.
N.B. Signals Nos. 6, 7, 9, 10 and 11 are to be used in Ports only.

14. The vessel is manoeuvring to get underway to Sea(*).



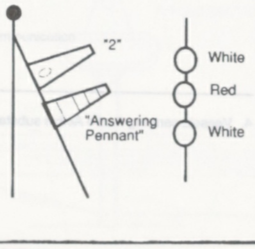
15. The vessel is manoeuvring to get underway to the canal



16. Voluntary Stopping (G.V.) "Garage Volontaire".

Vessel is not ready and will not maintain her turn in the convoy.

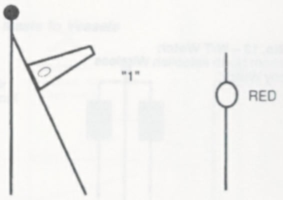
If hoisted by a vessel in the canal :
" I am securely made fast and can be crossed or doubled by other vessels in the convoy".



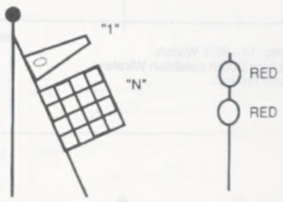
* When signals Nos 13, 14 and 15 are hoisted, vessels are not authorised to overtake or cross until vessel is securely made fast and signal no 16(G.V.) hoisted

17. Aground

"Passage clear for tugs".

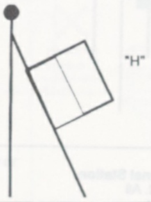


"Passage not clear for tugs".

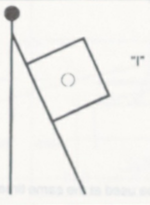


18. a) I have a pilot on board

b) Leaving Port Said & Port Suez
I Have a pilot to disembark.



19. My vessel is isolated .
I have no means of communication.



Signals used by dredgers in Canal Waters

Dredgers working underway

MEANING	by Day	by Night
1 dredging derway and not get out of the	 International Signal	 *N.B.*: In lieu of the white masthead light.
2 ssage is clear on e side shown	 A drum at the yard arm on the side on which the passage is clear.	 A white light at the yard arm on which the passage is clear. A red light at the yard arm on which the passage is not clear. Two white lights along the bulwark where passage is clear.
3 ssage is clear on th sides.	 A drum at both yard arms.	 A white light at both yard arms and two white lights along the bulwark on both sides.

(1) Dredgers working underway – *continued*

MEANING	by Day	by Night
4 Passing not allowed on either side.	 Two drums one over the other at the yard arm.	 A red light at both yard arms.
5 I am going about.	 Flag D hoisted at the yard arm on the side to which she is turning.	 A red light shown at the yard arm on the side to which she is turning. Signal IP by morse lamp.
*6 I am not under command.	 International Signal	
*This signal may be hoisted together with the International signal K (sound and visual) meaning: "STOP IMMEDIATELY"

) Stationary dredgers, floating cranes, etc.

MEANING	by Day	by Night
1 assage is clear on e side shown. am at work or oored).	 A drum at the yard arm on the side on which the passage is clear.	 A white light at the yard arm on the side on which the passage is clear. Two white lights along the bulwark on the side on which the passage is clear.
2 assage is clear on th sides (I am at ork).	 A drum at both yard arms.	 A white light at both yard arms. Two white lights along the bulwark on both sides.
3 assage is clear on e side shown but ly proceed at the west possible eed.	 A red flag at the masthead. A drum at the yard arm on the side on which the passage is clear.	 A white light over a green light on the side on which the passage is clear. Two white lights along the bulwark on the side on which the passage is clear.

his signal is also used by "Warehouse" string of barges.
e International Signal TE may also be hoisted. In this case the decrease of speed is imperative.
y night the imperative decrease of speed is shown on the Pilot's embarkation order.

(2) Stationary dredgers, floating cranes, etc. – *continued*

MEANING	by Day	by Night
4 Passing not allowed on either side.	 Two drums one over the other at the yard arm.	 A red light at both yard arms.
5 Passing not allowed: I am manoeuvring to make fast to clear the passage.	 A red flag at the masthead and two drums one over the other at the yard arm.	 A red light at the masthead. A red light at both yard arms.
*6 Passing not allowed. I have a breakdown and cannot get out of the way.	 International Signal	
*This signal may be hoisted together with the International Signal "K" (sound and visual): "STOP IMMEDIATELY".

ESSENTIAL FACTS FOR INCOMING TANKERS

1. Only clean ballast to be discharged overboard. There are no reception facilities for dirty ballast
2. The storage vessel is The'Bon Bateau' (Call Sign ELCT). Marisat number is 1241411. ETA's required 72/48/24 hours before arrival.
3. Anchorage area is recommended location for vessels awaiting berth.
4. Tankers to have ready:
    a. Windlasses, anchors, winches on forecastle, 3 inch messenger.
    b. on starboard side lifting gear capable of lifting a weight of 10 metric tons.
    c. on port side pilot ladder/accommodation ladder.
    d. reducer to 16 inches for tanker rail hose.
5. Tanker crew will perform all operations aboard the tanker under the mooring master's guidance.
6. Emergency Signal: Rapid & continuous blasts of the ship's whistle.

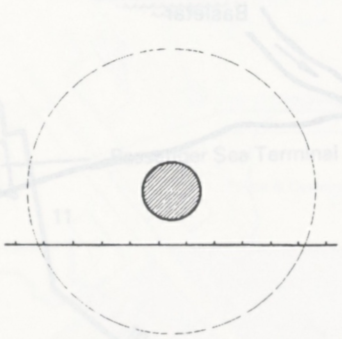
GERMANY (GENERAL)
ELBE HELICOPTER PILOTAGE (1)

WINCHING AREA



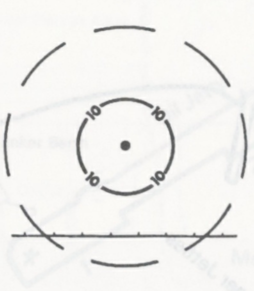
1. CLEAR ZONE	DIAMETER 4,60 M
Full painted circle spot (white or yellow, non skid)	
2. MANOEUVRING ZONE	DIAMETER 30,50 M
NO OBSTRUCTION HIGHER THAN	3,00 M

Man. zone circle line need not to be marked

Man. zone may extend over the ship's side.

If obstruction higher than 03,00 m, helicopter will hover approx. 03,05 m (10 ft) above the highest obstacle within man. zone.

RESTRICTED LANDING AREA



1. CENTER CIRCLE SPOT	DIAMETER 0,50 M
Full painted white or yellow	
2. AIMING CIRCLE	DIAMETER 10,00 M
NO OBSTRUCTION HIGHER THAN	0,10 M
Circle line painted white or yellow, width Circle diameter to be marked (10) Non-skid surface	0,20 M
3. MANOEUVRING ZONE	DIAMETER 25,50 M
NO OBSTRUCTION HIGHER THAN	1,25 M
Man. zone to be marked with broken circle line, width Man. zone may extend over the ship's side	0,20 M

1. CENTER CIRCLE SPOT	DIAMETER 0,50 M
Full painted white or yellow. "H" symbol may be painted, dimensions see ICS Guide. "H" symbol may only be marked in FULL LANDING AREA	
2. AIMING CIRCLE	DIAMETER 10,00 M
NO OBSTRUCTION HIGHER THAN	0,10 M
Circle line painted white or yellow, width Circle diameter to be marked (10) Non-skid surface	0,20 M
3. CLEAR ZONE	DIAMETER 22,00 M
NO OBSTRUCTION HIGHER THAN	0,25 M
Circle line painted white or yellow, width Circle diameter to be marked (22)	0,20 M
4. MANOEUVRING ZONE	DIAMETER 27,50 M
NO OBSTRUCTION HIGHER THAN	1,25 M
Man. zone circle line need not to be marked Man. zone may extend over the ship's side	

GERMANY (GENERAL)
ELBE HELICOPTER PILOTAGE (2)

SAFETY CHECK LIST

For use with ICS Guide to Helicopter/Ship Operations

To be checked by the officer in charge ☐

1. GENERAL

(a) Have all loose objects within and adjacent to the operating area been secured or removed? ☐

(b) Have all aerials, standing or running gear above, and in the vicinity of, the operating area been lowered or secured? ☐

(c) Has the officer of the watch been consulted about the ship's readiness? ☐

(d) Are the fire pumps running and is there adequate pressure on deck? ☐

(e) Are fire hoses ready, (hoses should be near to, but clear of the operating area)? ☐

(f) Are foam hoses, monitors and portable foam equipment ready? ☐

(g) Are foam equipment operators, of whom at least two are wearing the prescribed firemen's outfits, standing by? ☐

(h) Are the foam nozzles pointing away from the helicopter? ☐

(i) Has a rescue party, of whom at least two are wearing firemen's outfits, been detailed? ☐

(j) Is a man overboard rescue boat ready for immediate lowering? ☐

(k) Are the following items of equipment to hand?
   (i) Portable fire extinguishers? ☐
   (ii) Large axe? ☐
   (iii) Crow bar? ☐
   (iv) Wire cutters? ☐
   (v) Red emergency signal/torch? ☐
   (vi) Marshalling batons (at night)? ☐

(l) Has the correct lighting, (including special navigation lights), been switched on prior to night operations? ☐

(m) Is the deck party ready, and are all passengers clear of the operating area? ☐

(n) Have hook handlers been equipped with helmets, strong rubber or suitable gloves and rubber soled shoes to avoid the danger of static discharge? ☐

2. LANDING ON

(a) Is the deck party aware that a landing is to be made? ☐

(b) Is the operating area free of heavy spray or seas on deck? ☐

(c) Have side rails and, where necessary, awnings, stanchions and derricks been lowered or removed? ☐

(d) Where applicable, have portable pipes been removed and have the remaining apex ends been blanked off? ☐

(e) Are rope messengers to hand for securing the helicopter, if necessary? (Note: only the helicopter pilot may decide whether or not to secure the helicopter). ☐

3. **TANKERS: Additional Items for Check List**

(a) Gas control, ships not fitted with an Inert Gas System: has pressure been released from tanks within thirty (30) minutes of commencement of helicopter operations? ☐

(b) Gas control, ships fitted with an Inert Gas System: has pressure in cargo tanks reduced to slight positive pressure? ☐

(c) All tankers: have all tank openings been secured following venting operations? ☐

4. **BULK AND COMBINATION CARRIERS: Additional Items for Check List**

(a) Has surface ventilation to dry bulk cargoes ceased, and have all hatch openings been fully battened down prior to helicopter operations? ☐

5. **GAS CARRIERS: Additional Items for Check List**

(a) Have all precautions been taken to prevent gas emission on deck? ☐

Radio Communication

The helicopter will contact the vessel on VHF-FM channel 16 and will request the ship to change to channel 9 or 70.
The vessel shall advise the helicopter pilot of its position, heading, speed and the actual wind direction and speed over the deck.

Bearing Transmissions

After radio contact is established, until the helicopter is over the ship, it is essential that the vessel transmit direction finding signals on 410 kcs. On request of the helicopter pilot an uninterrupted (locked key) transmission should be given.

Wind Conditions Limiting Helicopter Operations

For most purposes the best relative wind is between 35° abaft the beam and ahead with speeds normally from 10 - 50 knots. However, certain sea conditions may make it necessary to obtain a relative wind which is between 35° abaft the beam and dead astern.

Sea and Swell

If possible the master should ensure that spray, roll and pitch are kept to a minimum by selecting a suitable course and speed. This is particularly important in preventing sea and spray from entering the helicopter's engine. The helicopter pilot should be informed of any likelihood of seas or heavy spray on deck.

When personnel are being winched to or from smaller ships the helicopter pilot may request the ship to head into the sea to reduce rolling.

GOVERNMENT MOORINGS

No vessel shall take up any buoy without previous application to the Marine Department. Details of the buoy dues, booking procedures, and the use of Government mooring buoys during typhoon are available from the Port Formalities and Dangerous Goods Office, room 318, Harbour Building, 38 Pier Road, Hong Kong, Tel.: 852 3086. All ships are to secure to Government Buoys by their chain cable. Slip wire should remain slack at all times. Any damage done to Government Moorings will render the ship using the same liable for such damage.

KYUNG IN ENERGY Co. TERMINAL

VESSEL BERTHING ARRANGEMENT

It is suggested that your vessel is moored to the Marine Terminal in accordance with the lines as shown.
This is considered as a minimum requirement. Use as many additional lines as you wish.
Please use the outlets on the extreme ends of the manifold for connecting the Loading Arms.
If the Starboard boom is rigged, move the boom out of the way of discharging arm connection.
You will need an accommodation ladder on the Port side for use by officials, agents, shore leave for crew, etc.
The Starboard loading arm is 16 in. A.S.A. (12 in. for Naphtha Tankers).
Minimum required interval between ship's two manifolds is 7 ft. 6 in. for loading arms connections.

APPROACH VELOCITY TO FENDER

16,000 DWT	1.0 FPS Maximum
72,500 DWT	0.7 FPS Maximum
